Mr. HOFFMAN of Michigan. Mr. Speaker, if you have been thinking of a tax reduction, a balancing of the budget, a reduction in the national debt, the end of the broadcasting of your dollars abroad, forget it.

While my efforts to accomplish all of the above will not only be continued, but increase, the facts of life might just as well be recognized. Nothing will be gained by fooling ourselves as to what is happening here in Washington.

Postal employees have renewed their demand for an increase in compensation. Unless their union officers overreach themselves, they will get it. The only question is how much.

Other Federal employees have joined in the demand for an increase in wages or salaries. They will get it. Again, the only question is, how much. United States district attorneys, Federal judges, Senators, and Congressmen are insisting upon a pay raise. It will be given. How much, no one knows. The raise will be substantial.

Increases in industrial wages—and they are certain to be given—will be paid by consumers; and wage earners and salaried people—dirty overalls, white shirt, nylon waist, or silk-tie wearers—all will pay a part of all of the above.

The administration is asking for an increase in pay and special benefits for those in the armed services. That will go through. Again the only question is as to the number of dollars authorized.

Additional appropriations for the armed services will increase the total by billions.

The national debt will increase, as will the interest charge, which is now over 6 billion.

Russia has told us to get out of Formosa. Chou En-lai declares he intends to take it. President Eisenhower has said we will not get out, that Chou En-lai cannot have it. The situation makes easy another world war, which certainly no intelligent individual wants.

Will we all live better at less cost? Has everybody been taken care of?

No. Some have been forgotten. They are among the most worthy.

What is to happen to those past 45 who cannot get jobs in industry, who are barred from employment by the minimum wage, which is to be increased from 75 to 90 or additional cents per hour? What about those who have had no opportunity or are unable to provide for their own old age, who through no fault of their own are either unable or incapable of earning a living wage?

They have no politically powerful, well-financed lobby. Apparently they will find themselves taking what, if anything, is left.

The remedy? At home just a little more thrift on the part of the Federal and other governments. Just a little willingness on the part of each of us to, for a short time, do without nonessentials, no matter how enjoyable or desirable.

Abroad? The adoption of a foreign policy which will keep us out of wars in which we have no vital interest.

A little more willingness to give people in other countries the opportunity to "paddle their own canoes."

This, I think, is the greatest country on earth. We have more of everything, including leisure—spare time—than people throughout the world have ever desired, sought, or enjoyed.

Why thoughtlessly continue inflation—get a ruinous depression? There must be—there is—a way out of the trouble abroad other than through war.

The 57th Anniversary of the Sinking of the "Maine"

EXTENSION OF REMARKS
OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. VAN ZANDT. Mr. Speaker, each year on February 15, we observe the sinking of the battleship *Maine* which cost the lives of 2 officers and 258 men and resulted in the war with Spain in 1898.

This is an occasion when we pay annual tribute to the gallant Spanish-American War veterans who defended the Stars and Stripes, fighting in the cruel heat of San Juan and battling pestilence and disease in the steaming jungles.

When President McKinley issued the call for volunteers, the United States had an Army and Navy of only 2,143 officers and 26,040 enlisted men; while Spain had one of the largest navies in the world and an army of 500,000 with over 192,000 in Cuba alone.

There were some 483,000 American youths who served in the Spanish-American war and of this number nearly 20,000 lost their lives either in battle or by yellow fever contracted in the disease-infested jungles.

The feat of Admiral Dewey on May 1, 1898, when the Spanish Fleet was destroyed is one of the glorious pages in American naval history.

Yet while we salute the United States Navy for its stellar role, let us not forget that the valiant foot soldiers and daring cavalrymen fought against great odds in heavy clothing in hot weather that sapped the vitality of the sturdiest men.

Let no man underrate the soldier of the Spanish-American War. Facing the perils of yellow fever and with poor rations and contaminated water, his life was made more difficult by disease-carrying insects that 57 years ago were uncontrolled and a plague to mankind.

Medical progress has made stupendous strides in the past 57 years yet the boys of '98 had no miracle or wonder drugs with the result they were virtually guinea pigs in the desperate attempts made to halt epidemics of every known variety.

These were the young men who carried the American flag in America's first crusade for the liberation of mankind.

Many of them again served their country on foreign soil together with their sons in World War I; while in World War II and the Korean war their sons and grandsons carried on in the noble cause of defending humanity by thwarting the ambitions of power-crazed dictators.

Truly, the American Nation owes an undying debt to those who fought in the Spanish-American War for they were pioneers in the battles waged on foreign soil in defense of liberty and freedom.

Today, on the 57th anniversary of the sinking of the *Maine*, I should like to describe briefly the battleship *Maine* and the scene of that eventful evening February 15, 1898, when two terrific explosions sank the ship in Habana harbor resulting in a terrible disaster.

To begin with, in the winter of 1897–98 mobs of Spanish loyalists, namely, those inimical to the United States and fiercely resentful of the well-known sympathy of the American people for the oppressed Cubans, became so formidable that the American consul general at Habana, Fitzhugh Lee, appealed to this Government for moral support in the shape of a naval force in Cuban waters. This request, made often before, was at last heeded. In January 1898, orders were issued to the North Atlantic squadron to assemble at the Dry Tortugas, within 6 hours' steaming distance of Habana. On the 25th of the month the *Maine* was ordered to Habana itself. A second-class battleship, she had, nevertheless, for that day, certain formidable aspects. She had an extreme length of 324 feet; beam, 57 feet; displacement, 6,650 tons; indicated horsepower, 9,290; and trial speed, 17.45 knots. In addition, she had an armored belt extending 180 feet at the waterline on each side, over which was a flat, armored deck. Joining the two forward ends of the belt was a heavy steel bulkhead, at the bottom of which was an armored deck which continued to the stem. The flat steel deck above armor dipped down abaft the belt, and was continued to the stern, one deck below, with a slightly diminished thickness. The barbettes and turrets were of heavy steel.

As for armament, the Maine had two "winged" turrets, each containing two 10-inch breech-loading rifles. She carried six 6-inch breech-loading rifles, besides seven 6-pounder and eight 1-pounder rapid-firing rifles. Finally, she had four above-water torpedo tubes on her berth deck, all in broadside.

On the morning of January 25, 1898, the Spanish authorities having been previously notified of her advent, the *Maine*, Capt. Charles D. Sigsbee, steamed into Habana Harbor and was duly assigned a berth 500 yards off the arsenal.

No United States vessel had visited Habana during the previous 3 years and meanwhile tension had been steadily mounting between the Spanish and American Governments.

There was much doubt as to the nature of our reception—

Wrote Captain Sigsbee—

for I was not aware of the character of the diplomatic exchanges. I was sincerely desirous of a friendly reception, but it was my affair to be ready for all emergencies. The *Maine* was in such a state of preparation that she could not have been taken at much disadvantage; nevertheless, she presented no offensive appearance, and meant no offense. On board United States men-of-war—

The Captain added thoughtfully—

it is commonly only a short step from peaceful appearance to complete readiness.

The Spanish port officials behaved with punctilious courtesy and the social amenities between American and Spanish authorities proceeded according to naval protocol. Then at 9: 40 p. m., on the night of February 15, the blow fell. At that fateful moment two terrific explosions threw parts of the *Maine* 200 feet in the air and illuminated the whole harbor.

The first dull explosion had been followed by a second, much more powerful, probably that of the forward magazine. The forward half of the ship was reduced to a mass of twisted steel; the after part slowly sank. The *Maine* carried 26 officers and 328 men, all of whom were on board when the explosion took place, except an assistant engineer, 2 naval cadets, and a gunner. Two officers and 250 men were killed at once and 8 men died afterward.

Captain Sigsbee's own immediate impressions, set down in his book, the *Maine*, are of interest. I quote:

At taps ("turn in and keep quiet"), 10 minutes after 9 o'clock, I laid down my pen to listen to the notes of the bugle, which were singularly beautiful in the oppressive stillness of the night. The marine bugler, Newton, who was rather given to fanciful effects, was evidently doing his best. During his pauses the echoes floated back to the ship with singular distinctness, repeating the strains of the bugle fully and exactly. A half hour later Newton was dead.

I was enclosing my letter in its envelope when the explosion came. The impression made on different people on board the *Maine* varied somewhat. To me, in my position, well aft, and within the superstructure, it was a bursting, rending, and crashing sound or roar of immense volume, largely metallic in character. It was followed by a succession of heavy, ominous, metallic sounds, probably caused by the overturning of the central superstructure and by falling debris. There was a trembling and lurching motion of the vessel, a list to port, and a movement of subsidence. The electric lights, of which there were eight in the cabin where I was sitting, went out. Then there was intense blackness and smoke.

The situation could not be mistaken—the *Maine* was blown up and sinking.

Within half an hour, having ascertained that the ship was doomed, Captain Sigsbee sent his famous dispatch to the Secretary of the Navy from the steamer *City of Washington*. After reporting the terrible disaster he added sober words of caution that public judgment should be suspended until further report. The rest, as the saying goes, is history.

As to the final chapter of the story of the *Maine* herself, I take the liberty of quoting William B. Norris' brief but admirable summary in his article, The Destruction of the *Maine*, which appears in the Dictionary of American History:

Investigations were soon made by the American and Spanish authorities separately. Their decisions differed. The Spaniards reported that an internal explosion, perhaps spontaneous combustion in the coal bunkers, had been the cause; the Americans that the original cause had been an external explosion, which in turn had set off the forward magazines.

News of the disaster produced great excitement in the United States, and accusations against the Spaniards were freely expressed by certain newspapers. Without doubt the catastrophe stirred up national feeling over the difficulties in Cuba, crystallized in the slogan "Remember the *Maine*." The wreck remained in Habana harbor until 1911, when United States Army engineers built a coffer dam about the wreck, sealed the after hull of the ship, the only part still intact, and floated it out to sea. There, on March 16, 1912, appropriate minute guns boomed as it sank with its flag flying. The remains of 66 of the crew which were found during the raising were buried in the National Cemetery, Arlington.

During the removal of the wreck a board of officers of the Navy made a further investigation. Their report, published in 1912, stated that a low form of explosive exterior to the ship caused the first explosion. "This resulted in igniting and exploding the contents of the 6-inch reserve magazine, A–14–M, said contents including a large quantity of black powder. The more or less complete explosion of the contents of the remaining forward magazine followed." The chief evidence for this was that the bottom of the ship had been bent upward and folded over toward the stern. European experts, perhaps influenced by several internal explosions in warships in the intervening years, still, however, maintained the theory of an internal explosion. No further evidence has ever been found to solve the mystery.

One visible token of the *Maine* still remains. Before her shattered hull sank forever in 1912, her remaining mast was removed, and now it stands in Arlington Cemetery, its conning tower and shrouds still in place, watching over the gallant old ship's honored dead who lie all around its base until the next and last reveille.

Pay Adjustments and Reclassification for Employees in the Postal Field Service

EXTENSION OF REMARKS
OF
HON. JOHN LESINSKI, JR.
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. LESINSKI. Mr. Speaker, I have today introduced legislation to provide an immediate 10 percent salary increase, with a minimum of $400, for all officers and employees in the postal field service. The amount of each employee's salary will be rounded out to the next highest $100 figure, so that as a practical matter in most instances the minimum increase will be $430.

My bill also will provide for a reclassification of positions in the postal field service, thus establishing a modern classification and pay structure suitable for present and future needs of the service. The reclassification provisions of my bill incorporate the essential principles recommended by Postmaster General Arthur Summerfield, modified to the extent which hearings before our committee have indicated is necessary to insure adequate protection for all officers and employees while at the same time allowing management full latitude to operate the postal service with maximum efficiency.

The reclassification provisions in my bill eliminate the so-called nullifying clause which appeared in the administration's proposal in some 21 places. This clause would have allowed workers to be assigned, without limitation, to perform work at a lower level than the level of their jobs, thus leaving the way open for downgrading and loss of pay. The clause also would have permitted assignment to higher level work without increase in pay.

In my judgment, a 10 percent immediate increase, to be followed by reclassification, is the absolute minimum increase which our postal employees have earned. Representatives of employee organizations have conclusively proved that postal salaries lag far behind increased living costs and pay rates in private industry, and that no recognition whatever has been given to tremendously increased productivity and efficiency by these employees. As a matter of fact, if proper recognition were given to these factors, a greater increase would be provided.

I have introduced this bill in a spirit of friendly compromise and cooperation. It is my belief and hope that it will provide a common ground for a meeting of the minds between the employees and the Postmaster General. It will be a very fair and effective pay and reclassification statute, under which the Department can operate with maximum effectiveness and all employees will be assured of fair treatment and of real incentives for ever greater productivity.

Security Is Everybody's Business

EXTENSION OF REMARKS
OF
HON. PETER F. MACK, JR.
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. MACK of Illinois. Mr. Speaker, never before in our time have we had such a need for an adequate air arm as we have in this atomic air age of today.

The Vice Chief of Staff of the Air Force, Gen. Thomas D. White, recently made a very worthwhile report on this subject to an outstanding patriotic organization assisting the Air Force in its current recruiting efforts, the junior chamber of commerce. I am proud of General White, who happens to be a constituent of mine, as he is recognized as one of the greatest authorities on air power in our country. General White called his address Airpower: Everybody's Business. But his theme was not merely airpower, it was security. There is nothing that should be of greater concern to all Americans today than security. It is the business and the responsibility not only of the Congress, but of the entire body of American citizens. But only superior airpower can give such security to us.

The Jaycees—the members of the junior chamber of commerce—are assisting the Air Force to recruit the men needed to man the 137 wing, 975,000-man Air Force which we are told is the minimum Air Force necessary to guarantee the security of the United States, and which we hope to have by the end of fiscal year 1957. General White stressed public understanding of the Air Force and its needs as fundamental to any effort to enlist the men, and to create such a framework for their activity as will persuade them to make a career out of service with the Air Force.

In times of war the American people are wonderfully patriotic and willing to make any sacrifice to insure victory. Today, with the threat to our cities and people and our civilization many times greater than it ever was even during World War II, the American people are not showing the same kind of fervent patriotism. They do not see the dangers in the current perilous peace, which are just as real, though not as apparent as the dangers in war.

During this period of so-called peace, the Soviets have made amazing progress in the building of nuclear weapons and long-range bombers. We were surprised

to learn during the Korean war that the Russian built MIG–15 was almost as good as our F–86 Sabrejet; we must realize, before another war emphasizes the fact, that Russian technology is excellent, and quite capable of engineering our destruction. As General White says:

The Soviets are building a stockpile of tremendously destructive nuclear weapons. They have built the world's largest air force, including a sizable fleet of long-range bombers. They have built several hundred light jet bombers, and are producing a new jet bomber similar to our B–47. Aimed directly at our sources of strength at home is a new, heavy jet bomber similar to our B–52. They designed and built this bomber for one primary purpose—to be able to strike this continent. * * *

It would be thoughtless of anyone to needlessly scare our people. Nevertheless, we would be remiss in our duty if we did not call attention to the urgency and terrible reality of the situation. Only if our people are intelligently aware of the threat, can they share our security burden. Ignorance leads to ultimate panic and confusion.

We find it easy to accept the new concepts of war brought on by the nuclear-air combination. But one of our main problems is that nuclear weapons mean not only a new kind of war, they mean a new kind of peace. This is a peace that can be kept only through strength.

Acceptance of this fact and an understanding of Air Force needs will help the Air Force to get the men it needs, and the legislation it needs in order to retain those men after they have been trained, and become experienced, and developed their greatest usefulness to the Air Force.

The ultimate goal of the Air Force is not 137 wings, or 975,000 men; it is public understanding of the true nature of airpower, and appreciation of the inexorable need for air superiority over any possible enemy. Unless we hold the lead we now have, numbers of wings or men will have no meaning. If we are to hold the lead, who can say now how many wings or men we may require tomorrow? But understanding is the fundamental thing. We must have it because security is everybody's business, security for ourselves and our institutions, and our beloved United States.

Mr. Speaker, under leave to extend my remarks, I include General White's stirring call for understanding in the CONGRESSIONAL RECORD. The text of his address follows:

AIRPOWER: EVERYBODY'S BUSINESS

(Address by Gen. Thomas D. White, Vice Chief of Staff, USAF, before the junior chamber of commerce, Air Force recruiting assistance kick-off dinner, Dayton, Ohio, January 26, 1955)

Thank you for those kind words, Milton Caniff. I also want to thank you for something else. On behalf of the United States Air Force, I want to thank you for getting Lieutenants Pipper and Murphy off the ice. Along with your millions of other readers, I was getting worried about those boys. Your rescue plan showed imagination.

Seriously, I want to thank Milton Caniff for the job he is doing. Through Steve Canyon, he is telling the Air Force story and paves the way for greater public interest and understanding of the Air Force.

Tonight the United States Junior Chamber of Commerce is launching a nationwide campaign to bring the Air Force and our citizens more closely together. This campaign will strengthen the link between the man in uniform and his civilian supporters. The stronger this link, the stronger our national security.

I am certainly happy to be here with you tonight and to have the opportunity to participate in this kick-off ceremony. I can think of no better group than the Jaycees to conduct this program. You have a reputation for dynamic action and for getting results. Your goals are cast in terms of general good, and not in terms of individual gain. As a result, you have gained wide public acceptance and nationwide support.

Your organization is composed of young men and is devoted to the development of young men. For this reason you share with the Air Force an intense interest in training and equipping our young Americans to keep our country safe and strong.

Just last Saturday the junior chamber of commerce paid a unique tribute to one of our better known young Air Force officers and in doing so you honored the Air Force. I refer to your including Maj. Chuck Yeager in your list of the 10 outstanding young men of 1954. We in the Air Force are very proud of Major Yeager—not only because he has flown faster than any other man in the world, but also because he typifies so many others like him in the Air Force. They do their jobs as a matter of duty. They do these jobs whether they be dangerous or routine, dramatic or dull, exciting or safe. We are particularly proud of the fact that there are thousands of young pilots in the Air Force who literally envy the opportunity Yeager has had. They would give their eyeteeth to have the job he had as a test pilot.

I have reviewed your program and I am glad to see that you have recognized the need to make it much broader than a mere recruiting drive. Your objective is to develop a better understanding of our Air Force and to acquaint the public with the men and women who are playing such a vital role in keeping our Nation free.

This is exactly what needs to be done. Success will not only result in helping to solve our reenlistment problem, but will also result in better guided, understanding support of Air Force objectives.

Why is understanding so important? We are an airminded Nation. Very few people in the Nation would disagree that our Air Force must be supported as a matter of high priority. What more do we need?

The Air Force needs a lot more than mere acceptance. It needs the kind of active support that, in a democracy, comes only after real understanding. In fact, in the United States, getting understanding is the key step to getting support.

The fact that our military forces must have the support of the people is one of America's most important democratic characteristics. It is one we are very proud of.

There is a related characteristic of which we are equally proud. It is that during a war the security of our Nation is everybody's business, and not the exclusive province of people in uniform.

The American people are doing a magnificent job of maintaining strong armed forces during these days of tension. However, World War II and Korea are fresh in our minds. Our people, like all others in the free world, are sick of strife. Recognizing the need for security, they are willing to pay the cost of preparedness by taxes; but they are reluctant to contribute to preparedness by personal interest and participation.

This attitude certainly has been normal in the past. For centuries each nation of the world has had its citizenry and its armies. The citizenry paid the cost of the armies, but stayed aloof. The army was paid to worry about wars as well as to fight them. Wars were strictly the army's business.

Our revolution and evolution as a democracy tended to change those old concepts. We could not afford an army of mercenaries, nor did we want one. The citizen soldier had won his freedom and the citizen soldier would safeguard it. But as time went on he developed this inevitable and understandable attitude:

"All right; I will be a soldier when there is a war on. But in peacetime I am strictly a civilian."

The citizen soldier, with this attitude, became the basis for the American tradition of nonaggression, small forces in peacetime, and so on. When we became involved in war, no nation's people ever responded more magnificently. However, when peace was won again, no nation's people ever were quicker to lose interest in their armed forces.

For this reason the history of our armed services in America has been one of high peaks of strength followed by almost bottomless valleys of weakness. The last valley we passed through was right after World War II.

These peaks and valleys of strength and weakness were tremendously expensive and wasteful, not only in money but in lives. Had we been ready for World War I and World War II, we might have prevented them entirely. It is certain that we could have ended them much sooner with far fewer casualties. However, we seemed willing to pay a high price for the privilege of ignoring danger until it was upon us.

The last valley we passed through could have been disastrous, because World War II ushered in a new weapon, the atomic bomb. This new weapon, combined with the capabilities of long-range airpower, has revolutionized warfare.

We felt fairly secure as long as we held a practical monopoly in long-range bombers and an absolute monopoly in nuclear weapons. However, there can be no monopoly in science and this has been demonstrated by the remarkable progress the Soviet Union has made in the building of nuclear weapons and modern long-range bombers. Communist possession of this combination has put us in what our President has termed "an age of peril."

The Soviets are building a stockpile of tremendously destructive nuclear weapons. They have built the world's largest air force, including a sizable fleet of long-range bombers. They have built several hundred light jet bombers, and are producing a new jet bomber similar to our B–47. Aimed directly at our sources of strength at home is a new, heavy jet bomber similar to our B–52. They designed and built this bomber for one primary purpose—to be able to strike this continent.

The masters of the Kremlin have not deviated one whit from their goal of communism worldwide. The United States is the principal obstacle which confronts them in their path to this goal. The Reds are well known for their utter ruthlessness in removing obstacles.

It would be thoughtless of anyone to needlessly scare our people. Nevertheless, we would be remiss in our duty if we did not call attention to the urgency and terrible reality of the situation. Only if our people are intelligently aware of the threat, can they share our security burden. Ignorance leads to ultimate panic and confusion.

Our traditional attitudes must change. As long as this threat exists, security can never again be considered as solely military business. This threat is not in the future, it is here today and it is real. Today security is everybody's business, not just during an actual war, but all the time.

We find it easy to accept the new concepts of war brought on by the nuclear-air combination. But one of our main problems is that nuclear weapons mean not only a new kind of war, they mean a new kind of peace. This is a peace that can be kept only through strength.

This means that we cannot continue any old habits of huge build-ups followed by

drastic cuts in the Armed Forces. We can no longer wait until we are sucked into a whirlpool of war to begin building our strength. Our new weapons can give us the strength to prevent a war if we will but develop them, but to be effective they must be maintained. We can no longer derive any strength from a program characterized by fits of stops and starts resulting from shifting political and diplomatic sands.

I mentioned America's magnificent responses in times of war. It seems paradoxical to me that our people are willing to sacrifice less now than they were during a period when our land was in little danger. During World War II, no enemy had any great capability of damaging the United States. Our children, our schools, our hospitals, and our cities were not attacked. Yet even when it was clear that we were winning, all our men, women, and even children were still pitching in cheerfully. Even after V–E Day they continued to give up their butter, their meat, their tires, and their gasoline. Our women stayed on their jobs as war workers. Our sons and fathers stayed on duty as servicemen. There were inconveniences, shortages, and tragedies, but no reluctance.

There was also no serious threat to our homeland.

Today the threat to our cities and people is many times greater than it ever was during World War II. Yet among our people there is little evidence of the same kind of fervent patriotism that there was 10 years ago.

The reason for this, as I indicated before, is that the dangers in this new kind of peace are not as apparent as the dangers in war, but they are just as real. As I see it, this job you have set for yourselves is to explain how the Air Force fits into this kind of new peace and how it can guard that peace.

We have a head start. Most of our people realize modern technology has made the Air Force truly the first line of defense and our hardest-hitting, longest-reaching arm of protection. The defense program now before Congress clearly shows the Nation's emphasis and reliance on airpower. This program shows that our planners have recognized the real nature of the threat and the most effective counter to it.

This is one kind of support which is certainly essential. Legislation and appropriations can solve our weapons and equipment needs. Congressional action can go a long way toward helping us to get the other vital element—men. But to get and keep good men, we must have more than laws and money. An additional essential is public understanding and public support.

Last week we held our yearly conference of all the top Air Force commanders. We discussed many problems, but one was common to all. Each commander asked this question:

"Where am I going to get the men to keep my organization going?"

Our number one problem within the Air Force is the current and future shortage of trained, experienced men. At the present time our reenlistment rate is down below 30 percent. This figure does not reflect the worst part of the situation. Among the men we need the most—the trained, skilled, experienced technician—the rate has sunk below 15 percent. We cannot hire ready-made radar technicians. We have to train them ourselves and it takes a lot of time and costs a lot of money. This problem is not confined to technicians. We are also losing veteran pilots and experienced staff officers.

We need the kind of support that will help our young men to realize that an Air Force career is a valued opportunity. We have high hopes that Congress will approve a substantial pay raise this year, as well as other legislation designed to improve service attractiveness. Considering what it costs this nation to train a man, his pay could be increased by many, many dollars before it would equal the cost of losing him.

In addition to pay raises and improved conditions, we need the same kind of support for the airman that he enjoyed during World War II. He must be encouraged to serve. His community must be proud of him for serving. The Air Force job is so big and our equipment is so complex that we need numbers of career men to man our units. Only in this way can we get the best out of the weapons and resources provided us.

To achieve the kind of support that will solve our personnel problem, the public must understand much more than the mere details of this one problem. They must understand air power and the Air Force. I will mention a few of these goals of understanding.

First, our people must realize the part that nuclear weapons play in our defense. There is still some resistance to their use and this is understandable. Nevertheless, they are the results of progress and are the weapons of today.

We can solve no problem of national security by ignoring them. Instead, we should be thankful that we have them in ever-increasing numbers. These weapons are the sole means we have to counter the overwhelming Communist superiority in manpower. So far they have deterred the Communist from all-out war but for only one reason. The Communists have felt that if necessary we would use our most effective weapons against them. Our power will be no deterrent at all if the Communists ever get the idea that we will hold back.

However, despite all our efforts to prevent war, the Reds may strike. We must prepare against that possibility. The two main elements in our preparations here at home for a possible attack are civil defense and air defense. Public support of civil defense is lagging. I emphasize that this is through no fault of our Civil Defense Administration. They have found it almost impossible to jar the general public out of its complacency.

Again I draw a parallel to World War II. Then, when no enemy had long-range bombers, we cheerfully cooperated in blackouts and civil-defense drills. Today when the enemy is capable of launching large-scale attacks on this country, the majority of our people pay lip service, but no effort, to civil-defense preparations. However remote we may believe the possibility of an attack to be, we must be ready. In case of attack, how could we hope for military success if our home front collapsed?

Our air-defense picture is brighter. Our warning systems are progressing. Our airplanes are getting better, and our network of air-defense bases is spreading. There has been one bothersome byproduct of our air defense. This byproduct is noise. To defend an area, the interceptors must be based centrally in the area they are to protect. This is one of the reasons that some of our jet bases are near cities.

Although our scientists are searching for ways to eliminate or reduce disturbances of high-performance airplanes, it looks as if we must face the fact that jets are loud. Our people must also realize that this is one of the minor, but troublesome prices of security.

We are doing all we can to avoid bothering the people whose lives we must protect. We have changed flight patterns, and approach altitudes, and in some areas, we have relocated airbases. Nevertheless, our people must learn to be grateful for the whine of our jets, it means protection.

This is, of course, only one of many small irritations that the Air Force unavoidably inflicts upon our public.

We crowd the public schools, we glut the roads around the bases. Seldom do we have the opportunity to live in one community long enough to be accepted as solid citizens.

All of these things are elements of what we call public relations. The Air Force realizes how important these relations are, and so do you. Your project "top flight" is evidence of that. All the things I have talked about are goals of understanding that we must shoot for. We must achieve these goals if we are to remain strong enough to keep our freedom and honor.

The kind of help your project brings to the Nation means a great deal to us all. This is exactly what we need.

I hope that this kickoff dinner tonight is typical of what will be happening in cities and towns across the Nation throughout the next year. It is a great thing you are doing. I wish you all the success in the world.

The Need for Increasing the Salaries of Postal Workers and Other Federal Employees

EXTENSION OF REMARKS
OF
HON. ROBERT C. BYRD
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. BYRD. Mr. Speaker, under leave to extend my remarks, I am inserting a copy of my statement which was submitted yesterday to the House Committee on Post Office and Civil Service. I believe it to be imperative that we immediately pass legislation which will provide an increase in the salaries of postal workers and classified Federal employees. The facts and figures contained in my statement will support my contention that such action should be taken now. The statement follows:

Mr. Chairman, I am very grateful for this opportunity to appear before your distinguished committee today. I am making this appearance in behalf of increased salaries for postal and classified Federal employees. These deserving people cannot be here to speak for themselves and we, as their Representatives, bear the responsibility of presenting and studying their problems and arriving at solutions thereto.

Almost 4 years have passed since postal and classified civil-service employees have received their most recent pay increase. During this period the faithful and loyal Government employees have seen their take-home pay eroded by increasing costs of living and rising tax burdens. While the earnings of postal and Federal employees have been deteriorating, the living standards of practically all other groups of the economy have been rising. Construction workers have increased their hourly rates since July 1951, when Federal employees received their last increase, by 20 percent, and employees in trade and manufacturing have enjoyed average hourly increases amounting to 14 percent. Workers in agriculture have also received wage increases which compensate for the rising cost of living.

It may be well, in considering a salary increase for postal and Federal employees, to study the average hourly earnings in certain selective industries.

AVERAGE HOURLY EARNINGS, SELECTED INDUSTRIES

Hourly earnings of production workers in manufacturing industries averaged $1.83 in December, the same as in November, and 3 cents more than in December last year.

For production workers or nonsupervisory employees

[Current prices]

Period	All manufacturing	Durable goods manufacturing	Nondurable goods manufacturing	Building construction	Retail trade
1939	$0.633	$0.698	$0.582	$0.932	$0.542
1944	1.019	1.117	.861	1.319	.731
1946	1.086	1.156	1.015	1.478	.893
1948	1.350	1.410	1.278	[1] 1.848	1.088
1949	1.401	1.469	1.325	1.935	1.137
1950	1.465	1.537	1.378	2.031	1.176
1951	1.59	1.67	1.48	2.19	1.26
1952	1.67	1.77	1.54	2.31	1.32
1953	1.77	1.87	1.61	2.48	1.40
1954:					
January	1.80	1.91	1.65	2.58	1.43
February	1.80	1.90	1.65	2.59	1.43
March	1.79	1.90	1.65	2.59	1.43
April	1.80	1.90	1.65	2.58	1.43
May	1.81	1.91	1.66	2.58	1.45
June	1.81	1.91	1.66	2.58	1.46
July	1.80	1.91	1.66	2.58	1.47
August	1.79	1.91	1.65	2.60	1.47
September	1.81	1.93	1.66	2.62	1.47
October	1.81	1.93	1.66	2.63	1.47
November [2]	1.83	1.94	1.67	2.62	1.46
December [2]	1.83	1.95	1.67	[3]	[3]

[1] Data beginning with January 1948 are not strictly comparable with those for earlier periods.
[2] Preliminary estimates; only manufacturing for November charted.
[3] Not available.

Source: Department of Labor.

Postal and classified civil-service employees depend upon us for an increase. They cannot bargain collectively on salaries and other working conditions as do workers in private industry.

Last year I supported the legislation providing a salary increase for these faithful workers, even though I felt that the increase Congress recommended was inadequate. I voted for the increase as a stopgap measure with the hope that the present Congress will deal with the problem justly and fairly.

The Presidential pocket veto of our pay-increase measure was a shocking disappointment to me as it was to most of you who voted for the bills.

We must correct the pay inequity to which the loyal postal and classified Federal employees have been subjected as expeditiously as possible. The efficiency, hard work, and sincerity of purpose which the distinguished members of this committee have shown toward solving the problem since the opening of the 84th Congress is most gratifying, and I am sure that this committee will recommend a fair and equitable bill. Obviously, a just bill will require more than mere compensation for increases in cost of living since July 1951. Sound public policy would require that the faithful servants of the people should share in the rising standards of living and increased productivity of our economy.

No study of this problem would be complete without taking a look at Consumer Price Indexes over the 1939–54 period. These figures are given in the accompanying table.

Consumer price indexes, 1939–54, for city wage-earner and clerical-worker families

[1947–49=100]

Monthly average:	All items
1939	59.4
1940	59.9
1941	62.9
1942	69.7
1943	74.0
1944	75.2
1945	76.9
1946	83.4
1947	95.5
1948	102.8
1949	101.8
1950	102.8
1951	111.0
1952	113.5
1953	114.4
1954	114.8

Productivity measurements of white-collar and professional workers are difficult to obtain. But where measurements are available, there is incontrovertible evidence that the productivity of postal employees has increased over the years and is constantly moving upward. During the past 15 years, employment in the postal service has increased by about two-thirds but the volume of pieces of mail handled has almost doubled. This means that the average post-office employee handles about 20 percent more mail today than he did before World War II. The 1956 budget indicates that the trend in rising productivity is expected to continue. In 1954 the average mail clerk handled 142 units per man-hour. The Bureau of the Budget estimates that during the current year the average will increase to 146 units, and in fiscal 1956 to 150 units per man-hour. Similar increases are expected in the productivity of collecting and delivery of mail.

Sound public policy as well as fair play would dictate increases for postal and classified Federal employees. Turnover in Federal employment is exceedingly high, and training of new employees is costly. Passage of a fair wage increase to these employees is, therefore, in the public interest, because it is becoming increasingly difficult for the Federal Government to retain the most qualified employees and to attract the promising young men for a career in Federal employment.

A fair and justified increase for the devoted and faithful postal and classified civil-service employees would have to consider the increases in cost of living since July 1951, the prolonged period during which no increase was granted, the increased productivity and the general rising standard of living in our great country. Furthermore, owing to the fact that the salary increase has been long overdue, it should be made retroactive to the date when the wage increase, voted overwhelmingly by the 83d Congress, was unjustly vetoed in August 1954.

Faithful men devoted to duty and their country have been considered rare. In the Bible the wise man asked: "A faithful man who can find?" Our country is fortunate to find them in abundance in the postal and Federal employment. We should recognize their faithfulness and loyalty by granting them the pay increase which is long overdue.

Mr. Chairman, I respectfully urge your committee to report legislation which will provide for at least a 10-percent salary increase for these workers. I believe that Congress would look with favor upon such a measure.

Soviet Faithlessness at Yalta

EXTENSION OF REMARKS

OF

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. RODINO. Mr. Speaker, basic to the ultimate success of any agreement or contract is the existence of the will to fulfill in good faith what has been stipulated. The will to act honestly and faithfully is the heart and core of any agreement in international relations.

At Yalta in February 1945 an agreement was reached between the late Franklin Delano Roosevelt, President of the United States; Winston Churchill, the present Prime Minister of Great Britain; and the deceased Soviet dictator, Marshal Stalin. This agreement concluded in the Crimea contained many elements that were intended to insure lasting world peace. Among these elements were: The projection of the basic concept of the United Nations Organization; a declaration on liberated Europe, based upon the principles of the Atlantic Charter and the declaration by the United Nations; the occupation and control of defeated Germany; war reparations; treatment of major war criminals; an agreement relating to prisoners of war and liberated civilian nationals; agreement on policy toward Japan; settlement problems in Eastern and Southeastern Europe bearing upon Poland, Yugoslavia, Bulgaria, Italy, Greece, and Rumania; consideration of the question of Iran; the establishment of permanent machinery for periodic conferences between the foreign secretaries of the three powers; and, finally, consideration of the question of the Turkish Straits.

In the conclusion of the Crimean Agreement President Roosevelt exercised the constitutional power invested in the office of the Presidency. And in like manner Prime Minister Churchill exercised the equivalent constitutional power invested in his office. As a supreme dictator Stalin was not governed by any such constitutional principles. Both President Roosevelt and Prime Minister Churchill entered into this agreement in good faith, and with the will to carry out the stipulations laid down. But, unfortunately, Stalin, the third party to this agreement, had no intention of fulfilling his obligations.

As a consequence of Soviet bad faith we have seen time and again willful violations of the Crimean Pact. No violation, however, could be more distressing to witness than the one that bore upon Poland.

At Yalta, the Polish eastern frontier was delineated roughly along the old Curzon line. Thus, Poland lost a large amount of her eastern territories. But further stipulations provided that Poland must receive substantial accessions of territory in the north and west. Another stipulation was made in the agreement calling for the holding of free and unfettered elections as soon as possible on the basis of universal suffrage and secret ballot.

At the Potsdam Conference, the western frontier of Poland was moved to the Oder-Neisse line in Eastern Germany pending final delimitation at the peace conference which, incidentally, was never held. However, free and unfettered elections were never held in Poland, and here in this display of bad faith on the part of the Soviet Union, the hopes of President Roosevelt and Prime Minister Churchill for a free, independent, and democratic Poland vanished.

Seldom before has the world seen such a display of bad faith as in the farcical elections that brought Poland under Communist domination. Every device of terror, imprisonment, and intimidation was used to destroy the effectiveness of the Polish democratic forces. Such were the free and unfettered elections that Yalta promised for Poland. We have long since discovered, much to our woe, how little good faith and good will we can ever expect from the Soviet Union.

On this 10th anniversary of the Yalta Agreement let us, therefore, recall to mind the diabolical dishonesty of the Soviet Union; let us remember the terrible consequences that this breach of faith has brought to the world; let us remember also the unhappy fate of Poland as a result of this breach of faith.

In the Polish people, who stand today before the world swathed in chains but with souls unconquered, there is exemplified the spirit of heroism in resistance, resolution in adversity, and faithfulness to the cause of freedom.

The Federal Retirement System

EXTENSION OF REMARKS
OF
HON. JOHN LESINSKI, JR.
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. LESINSKI. Mr. Speaker, in years gone by the civil-service retirement system was considered a model and as such was used as an inducement to attract the better qualified citizen to choose the civil service as a career.

Recent official research proves that on the average the Federal employee contributes more to his pension fund than is exacted by private industry; that the retirement benefits enjoyed by people belonging to private pension funds are superior to those enjoyed by civil-service employees; and that an increase in benefits is practical.

So as not to befuddle any issue and allow for free discussion of individual inconsistencies, each inequality is being corrected by an individual bill. If adopted, the bills will not make the Federal retirement system a new model for private industry but will increase benefits commensurate with employee contributions and put the governmental retirement system more in line with that of private industry.

The Eisenhower School Program

EXTENSION OF REMARKS
OF
HON. NOAH M. MASON
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. MASON. Mr. Speaker, the President in his message to the Congress outlining a school-construction program took note of the fact that our system of public schools has always been—and we hope it always will be—a school system based upon State and local control. Then the President proceeded to assume that certain States and local communities were unable to raise the money necessary to provide adequate schoolrooms to properly take care of the children; and, therefore, such States and local communities required Federal aid in the shape of Federal funds, aid to help pay the building costs of the new buildings or to underwrite local school building bonds.

Of course we all know that there are certain impacted areas, where defense plants have been built, that have more children than schoolroom space. Since these impacted areas were created as a result of Federal action and Federal needs, then of course such impacted areas should be given Federal aid—and that has already been provided for in previous legislation.

For the President to propose Federal aid for school buildings on a national scale is something else. In the first place, is it necessary? Why is such a step needed today more than it was 20 to 30 years ago, before Uncle Sam became such an all-wise, beneficent person to whom States and local communities might turn for fiscal aid for any and all purposes?

Mr. Speaker, in the first place Uncle Sam has no money to give out that he does not first get by levying taxes upon the State and local communities. Twenty years ago the Federal Government was satisfied by taking 25 cents out of every tax dollar paid in the United States, leaving 75 cents for the support of the States and local communities. Today, the Federal Government takes 75 cents out of every tax dollar paid in the United States, leaving only 25 cents for the States and local governments to exist upon. If the Federal Government did not rob the States and local governments of their tax dollars they could and would provide proper school facilities for their children without calling upon Uncle Sam for help.

Another point, Mr. Speaker, that should be given serious consideration before the Congress approves the President's request for school construction funds is the fact that our schoolrooms today are not as crowded as they were 20 or 30 years ago. They got along then without Federal aid; why can they not get along now without Federal aid?

In 1920–21 the average teacher load—number of pupils per teacher—for the Nation was 31.7. In 1950–51, according to United States Department of Education figures, the average teacher load was 24.1—7.6 fewer pupils per teacher than 30 years ago. The situation, therefore, so far as crowded classrooms are concerned, has actually improved. It has definitely not become worse. Why, then, all the furor? Why must the Federal Government rush to the aid of the States and local communities?

Mr. Speaker, a careful analysis of the school situation is contained in the following editorial taken from the Chicago Tribune of February 11, 1955. I include it as a part of my remarks and recommend it to my colleagues for careful consideration:

THE EISENHOWER SCHOOL PROGRAM

President Eisenhower's message on Federal aid for building schools sets forth sound principles and then proposes action that flies directly in the face of the precepts he has just uttered.

"Diffusion of authority among tens of thousands of school districts is a safeguard against centralized control and abuse of the educational system that must be maintained," he told Congress. "We believe that to take away the responsibility of communities and States in educating our children is to undermine not only a basic element of our freedom but a basic right of our citizens."

Having voiced these traditional arguments against Federal aid, the President asked Congress to vote for more than a billion dollars' worth of undermining. His proposals for Federal participation in financing of local school construction took three forms, under each of which States whose districts were helped would have to match Federal funds, dollar for dollar.

The first category of districts to be aided would be those that cannot sell their building bonds at a "reasonable" rate of interest. A White House aid put the limit on "reasonableness" at 3⅛ percent. To buy these bonds the Federal Government would put up $750 million and the States the same sum, to be used within 3 years.

The Dow-Jones index of school-bond yields stands at 2.42 percent. Probably then, only a small proportion of school districts have been unable to sell bonds yielding 3⅛ percent or less. But Mr. Eisenhower would provide funds to buy a half billion dollars of these bonds annually, one-fourth of the cost of all school construction in the Nation during this school year.

The second form of aid would go to districts that cannot borrow because of constitutional or statutory debt limitations. Federal and participating State governments would put up a total of $300 million. This would be used, Mr. Eisenhower proposed, as a revolving fund to advance the first year's rent until the districts could levy and collect taxes for the purpose. So used, the fund would permit the construction of $6 billion worth of schools within 3 years.

The Nation is building $2 billion worth of schools in the present school year. This rate of expenditure is the highest in history. In the last 5 years the country has built $7 billion worth of schools to accommodate 6,750,000 pupils. The increase in pupil population has been only 5,500,000; so the country has, until now, kept well ahead of the growth in school population. But by the President's calculations, school districts unable to borrow another cent need as much money annually to build new schools as all the districts in the country have ever spent in a year.

In the final category of districts that supposedly need Federal aid most desperately are those that can neither sell bonds nor raise taxes to rent a Federal-State school building. For these, Federal and State governments together would provide $400 million in outright gifts, spread over 3 years.

Illinois has distressed school districts. The legislature seems likely to adopt a scheme for a school building authority almost identical with that in the second Eisenhower proposal, except that no Federal aid is contemplated. The suggested capitalization for this authority is $15 million. This sum, it is expected, would provide building funds for all the districts unable to sell their own bonds. By comparison, this State's share of the $6 billion Eisenhower build-rent scheme would be $114 million, half contributed in Federal income taxes and half raised by the State.

The poverty of school districts portrayed by Mr. Eisenhower doesn't exist anywhere in the Nation in the proportions he alleges. It will no doubt manifest itself if the Federal purse is opened. Why should States that have been stingy with their schools tax themselves to make amends when they can pass half the bill on to taxpayers in States that have made more nearly adequate provision for educating their children?

Mr. Eisenhower relied, for proof that a serious shortage of classrooms exists throughout the Nation, on a survey prepared by the Federal Office of Education. Its figures have already been exposed as unreliable.

The Eisenhower message also expressed concern over the low compensation of school teachers. The local taxpayer is charged for paying off school bonds and for paying teachers in the same tax bill. Encouragement of extravagance in construction would be the unkindest act possible to underpaid teachers. It would leave that much less for salaries.

A Decent Break for Postal Workers

EXTENSION OF REMARKS
OF
HON. DON MAGNUSON
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. MAGNUSON. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I include the following statement presented by me to the House Committee on Post Office and Civil Service, Tuesday, February 15, 1955:

I appreciate this opportunity to present my views to this committee in support of a substantial pay raise for postal employees.

I have introduced a bill, H. R. 2158, which would provide for an increase of 10 percent or $400, whichever is greater, for all employees in the field service of the Post Office Department retroactive to August 23, 1954. This bill, as you know, is similar to H. R. 1592, introduced by Congressman MORRISON, and a number of other bills introduced by Members of Congress both on and off this committee.

I do not believe anyone seriously can question the need for adequate pay increases for employees in the postal field service at this time. The simple fact is that they are underpaid. They are underpaid in contrast with employees in private industry discharging similar duties. They are underpaid in contrast with the rates of pay prevalent in the postal field service prior to the Second World War. The pay scales of the loyal, hard-working men and women carrying out the vital but unsung tasks of the Post Office Department have not kept pace with the rapidly rising cost of living. In fact, postal workers have fallen further and further behind in the struggle to have and enjoy decent food, decent housing, and all of the many things that go into the standard of living of the average American of which the Nation justly is proud.

I have read persuasive statistics describing the plight of the mail clerk, the letter carrier, and all of the many other postal workers endeavoring to make ends meet, and the figures are impressive. But, more than that, I have talked to many of them personally, and I have received their letters by the hundreds, each telling a personal story of the ever-pressing grip of financial need. In my own State of Washington the fact is that almost two-thirds of rank-and-file postal workers are so hard put to make ends meet that they either hold outside part-time jobs or have found it necessary to put their wives to work.

Postal workers, like other Government employees, cannot strike to back up their claims for adequate pay scales, as can employees in private industry. They cannot go to work for a competing firm which offers higher salaries, because no such firm exists. They must come to us, the Members of Congress, lay their case on the table, and ask for fair treatment. This they have done. This committee held extensive hearings last year, in which every phase of the postal-pay problem was explored thoroughly. Additional hearings are now in process this year, and again the story is being told. I think it incumbent on us to act, and act promptly; each day's delay merely prolongs the need. We know the facts; we have only to make up our minds as to what rates of compensation are fair in the light of the facts and act accordingly.

I support the formula of a 10-percent increase or $400, whichever is greater. And I think the increase should be made retroactive to the end of the last session of Congress, which is when a pay-raise bill should have taken effect.

A higher increase than this formula provides could easily be justified by any standard normally used in determining a reasonable wage rate—by comparison with workers in other industries, by contrast to the relative purchasing power during some earlier period, by studying the change in productivity and average workload. Application of the formula would not restore, for example, the purchasing power of the average postal employee to the level of 1939. A higher increase could be justified in good conscience; to grant less, in my opinion, would be unjust.

The principal alternative proposal before this committee is contained in H. R. 2987, introduced by the distinguished chairman, and similar bills. I think the increase in salary scales which would be provided by this bill are not enough, particularly in the lower grades, where the need is greatest. While I recognize the need for increasing the level of remuneration for those assuming the greater responsibilities for the operation of the postal service, I think that our first and basic obligation is toward those in the lower grades who are struggling to keep up the pace. I think the formula I support will help to accomplish both objectives.

My principal concern today is with the problem of providing adequate pay scales for postal workers, but I should like to add the additional comment on H. R. 2987 that I feel it hands over to the Postmaster General too sweeping an authority in the matter of postal reclassification, job assignment and the employment of substitute and replacement personnel. Congress has, in my opinion, certain obligations in these areas which cannot be abdicated in favor of the judgment of the politically-appointed head of the Post Office Department, whoever he may be.

We often are inclined to take the postal worker for granted. The letter we drop in the mail chute or deposit in the convenient corner box always reaches its destination. The letter carrier always delivers our mail and our periodical reading matter. The clerk always is at the window to sell us stamps or to provide any one of a hundred other services. Their very competence puts them out of mind. They come to us now asking for a decent break. I think they have earned it; I think they deserve it; and I think in good conscience we have no choice but to give it to them as rapidly as possible.

Twenty-three Years of Experience With Our First Socialist Experiment

EXTENSION OF REMARKS
OF
HON. RALPH W. GWINN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. GWINN. Mr. Speaker, we have had 23 years of experience with our first socialist experiment—that much-touted TVA. I have been criticized for characterizing TVA as socialistic. However, my opinion conforms with that of the authorities. The Chattanooga (Tenn.) Times of February 15, 1934, quotes Norman Thomas as saying:

> The TVA is the only genuinely socialistic act (in the New Deal)—a flower in the midst of weeds.

TVA is owned and operated by the United States Government; that is to say, TVA is a communal or public-owned property acquired by taking private property amounting to $2 billion mostly from the people of 41 States, for the alleged communal benefit of the people in parts of 7 other States. Such immoral taking of private property never fails in the end to blight a people who take it. The proof is already apparent in Tennessee. She has suffered a reduction in production and commerce and, therefore, in the well-being of her people since the advent of TVA.

The United States Chamber of Commerce has compared Tennessee with 10 Southeastern States which use private power. In 1930, before the advent of TVA, the population of Tennessee ranked fourth among the 10 States. In 1950 she still ranked fourth.

In 1933, just a year prior to operation of TVA, the receipts from farm marketing ranked Tennessee fifth, while in 1950 she dropped to eighth place.

The retail sales payroll in 1935 put Tennessee in third place; in 1948 she had dropped to fifth place.

Retail sales in 1929 had Tennessee in second place; in 1948 she had dropped to fifth.

In value added by manufacture Tennessee ranked third in 1933; fourth in 1947. In gross postal receipts she ranked third in 1933; down to fourth in 1951.

In all the categories examined Tennessee has fallen behind in productivity. In only one area has Tennessee improved her rank among her neighboring States and that was in per capita income and per capita taxes paid. But that increase was caused by subsidies and doles paid by the United States Government; not from improved production. One hun-

dred and eight million dollars have gone down there annually mostly from other States to pay 22,796 TVA employees an average of nearly $5,000 apiece plus millions in doles granted by the Federal Government. Without the Federal payroll and subsidies and doles Tennessee would not have enjoyed an increase in per capita income but would have suffered a serious decline. She is now a taxeater and not a growing tax producer as compared to the other States.

The most startling failure of TVA is that it does not produce sufficient power for the people it serves. So TVA never will be able, selling electricity at half price, to earn enough to expand to meet the need of a growing community. That's why Tennessee growth is slowed up. There is a shortage. What value is low-priced electricity when it cannot be had at any price? This is the universal characteristic of socialism everywhere.

Besides all this, TVA is completely exempt from all taxes. It does not contribute a dime to national defense, not even toward the salaries of the President and the Congress that does all these nice things for it. Finally, TVA was made ashamed by the complaints of the local people in the adjoining municipalities that educated the TVA children, provided police and streets and hauled away their garbage free of taxes to them. So TVA condescended to volunteer to make a contribution of about a tenth of what it should toward the expenses it had thrust on its neighbors. But it may decide to quit at any time.

Had TVA paid taxes at the same rate paid by private power companies for the fiscal year ending June 30, 1953, such taxes would have amounted to about $80 million; resulting in a loss in operations of about $57 million. If TVA were required to pay interest on the appropriations granted it by Congress that loss would have been increased by another $24 million, which figure does not include the $10 million more for amortization. Thus if TVA were run as an honest business enterprise, its books on June 30, 1953, would not show a credit balance of $19 million but a deficit balance of $91 million. Yet, even with that deficit representing a subsidy paid by the Nation's taxpayers, the TVA system cannot produce enough cheap power to satisfy the demands of the consumers it was designed to serve.

There is no similar shortage of power in other parts of the country where private companies are the suppliers. The reason for this is that the private power companies, being run on sound and honest business principles, have anticipated the increased demand for electrical energy. At this time the private power companies are undertaking a $2.5 billion expansion program of their facilities.

The original excuse for the law creating TVA, viz, to control floods and to aid navigation on the Tennessee River, has turned out to be a joke and a fraud of extensive proportions. Instead of stopping floods it has actually permanently flooded 660,000 acres—an area as big as Rhode Island—out of a million acres it owns and controls. This great Tennessee River bottom, according to Army engineers, would not seriously flood more than once in 500 years. The bottom lands did sustain some overflow in the spring, as most river-bottom lands do. It benefited the land by leaving a fertile sediment. Crops thrived. Annual production was about $27 million. That is now all destroyed, and there is water, water everywhere.

Let us not dwell in detail on alleged improved navigation by deepening the Tennessee River, except to say that this was also a device to hide vast sums that should have been charged to cost of power. As a navigation scheme it has failed because it is cheaper to ship by rail.

There is another loss that is even more important than the $2 billion that have been poured into this monumental blight on Tennessee and drain on the other States. The people of Tennessee lost their political freedom when they became dependent on TVA. Their Governor is compelled to come to Washington, hat in hand, predicting dire consequences for his people if the dole is shut off. The people of Tennessee must live under whatever rules Congress promulgates and those rules affect not only the rates charged for power, but touch every aspect of the State's economy as has been pointed out. They have lost their productivity. They may not buy power elsewhere as private companies are excluded from the TVA reservation. They have lost their economic freedom, their know-how to provide power for themselves—competition is dead. In the words of Herbert Hoover:

> They have surrendered the control of their resources and energy to a Federal bureaucracy.

TVA cuts the price of power to a loss figure so as to buy the votes and support of its consumers in the rankest kind of political corruption. It exempts itself from taxation and by more political corruption forces its competitors to pay approximately 23 cents out of every dollar to help pay taxes TVA customers should pay but do not.

Even the little schoolboys now define TVA as "a river that flows through 7 States and drains 41." They were drained again in 1954 for the 22d year. TVA will be coming up to the public trough again in 1955. But Tennessee knows that no scheme to buy votes as crazy and incredible as TVA can last. This administration has already given fair warning. So Mr. Robert M. Metcalf, Jr., vice president of Guaranty Mortgage & Trust Co., of Memphis, Tenn., comes up with this remedy.

He suggests that the power-generating facilities of TVA be sold to the people in the area which it serves. This would result in relief for the taxpayers of the remainder of the Nation and at the same time give to the people of the TVA reservation exclusive control over the agency upon which they are completely dependent for their power. Perhaps even more important than these immediate tangible gains, is the fact that such a sale would represent a reversal of the largest, most clear-cut Socialist step the United States has ever taken.

Let Us Protect American Industries

EXTENSION OF REMARKS
OF
HON. ROBERT C. BYRD
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. BYRD. Mr. Speaker, it is imperative that this Congress take action to protect our domestic industries. I recently appeared before the House Ways and Means Committee and urged that H. R. 1 be properly amended to provide this needed protection. On Tuesday of this week, I appeared before the House Rules Committee and opposed the granting of a closed rule on this legislation, because a closed rule would not permit those of us who are Representatives from industrial areas to amend the bill so as to afford relief to the mining industry, the chemical industry, the glass industry, and others. Yesterday on the floor of this House, I again spoke in opposition to a closed rule. Our forces were out-numbered by a very narrow margin, and we lost the battle. I, therefore, hope that this House will take action today to retrieve that which we lost yesterday, and I urge the membership to support a motion to recommit the bill with instructions to the committee to bring the bill back out under amendments which will provide the kind of protection our industries need and deserve.

My district is the largest coal-producing district in America. The largest chemical plants in the Western Hemisphere are located in my district, as is one of the largest window-glass plants in the world. These industries are basic to the defense of this Nation, and they have suffered under the present law, largely because the escape clause is treated as a joke and trade agreements are used as pawns in the field of international diplomacy.

A case in point is the plight of the chemical industry, one of tremendous importance in both peace and war. It faces serious problems from foreign competition and many of its leaders have protested any reckless across-the-boards cut in tariff rates on chemical products. Because it is a very large industry which provides substantial payrolls and an important outlet for investment, its spokesmen deserve a hearing. I do not ask you to reject H. R. 1 in its entirety, but I do suggest that the chemical industry is typical of those groups in the country that are worried about foreign competition. An examination of their problems in specific form may well suggest that very specific answers to tariff problems are required, too. Generalizations are not enough basis to form a national policy. By this I mean that across-the-board cuts in tariffs represent a superficial approach. It would be more scientific and show better deliberation to study the needs of individual products and industries, adjusting each rate to specific requirements. This is not too much to ask in so important a matter.

The spokesmen of the chemical industry have come before the hearings of the Randall Commission and have released

statements to the press which suggest in unmistakable form the problems they face as a result of foreign competition. They suggest that if the present uncertainty over possible reductions in tariffs continues, then the expansion of the industry at home will be threatened, and new investment important to the growth of the industry will be lost. Because the chemical industry has been growing at something like four times the national average of all industries, its continued progress is of concern. If its high growth rate is continued without interruption, some hundred thousand new jobs in this industry will be created during the next 10 years. If this kind of progress is threatened by foreign competition made possible by tariff cuts, it is important that these facts be given the same careful consideration as the proposals to create export trade and economic solvency abroad through our tariff reductions. Any one-sided review of all the aspects of trade policy is a guaranty that all of these problems will have to be reconsidered by every succeeding Congress. For fatal weaknesses written into our laws make themselves felt inexorably. Let the decision of this Congress be so carefully laid as to avoid at least the obvious flaws of past acts in foreign trade policy.

Can we afford to be without a strong chemical industry? That question answers itself in the negative, for a great country such as ours with its variety of needs for an advanced technological society and its grave responsibility for the defense of the free world must have an assured supply of a wide range of chemical products. Many of these are products whose very names seem strange to the layman, yet any engineer, chemist, or specialized consumer could explain to us how these seemingly obscure substances, processed and combined, give us dyes, drugs, plastics, fuels, and the advanced materials of military armaments, without which our high standard of living and military survival would be impossible.

It may seem a long way back in history to some of us, and yet it was not many years ago that the First World War ravaged Europe. One of its early effects, long before we became involved in the fighting, was to cut us off from a variety of essential supplies previously turned out by German industry. It was at great effort that we painfully constructed a chemical industry of our own and learned enough secrets of research to make it possible to fulfill our needs. It is indicative of the progressive nature of the chemical industry of America today that it spends $200 million a year on research. This is obviously not the hallmark of a moribund segment of the economy. If it can continue to enrich American life with the marvels of the laboratories as it has in the past, its contribution will be one to recognize with pride.

Let us pause to consider the plight of the glass industry, and I would like to direct your attention to the adverse effect upon one of the glass plants in West Virginia. The rapid increase in imports of European window glass made under low-wage conditions resulted in shutting down of a production furnace and an experimental furnace last year at the Charleston plant of Libbey-Owens-Ford Glass Co., and 240 employees lost their jobs as a consequence. This condition followed the closing down of 2 tanks at the end of 1953, and brought the total layoff to 500 seniority employees directly due to the increased glutting of the window-glass market by foreign glass.

Nineteen hundred and fifty-three imports of window glass totaled 100 million square feet of glass, as contrasted with imports of less than 1 million square feet in 1948. In other words, 1953 imports of window glass were equal to 1,020,000 man-hours of work in modern window-glass factories.

The average wages of the American window-glass industry run about $2.40 an hour. European manufacturers pay from 37 cents to 45 cents an hour for the same type of work, and I am told that almost identical machines are used in European and American plants. Low-cost water transportation enables cheap European window glass to reach American cities on both the Atlantic and Pacific coasts with lower freight rates than those prevailing from Charleston, W. Va., to markets in this country. I am told that the freight rate from Charleston, W. Va., to Miami, Fla., is three times that from Antwerp, Belgium, to Miami. These figures should be enough to convince anyone that a further lowering of tariffs will be disastrous to our own industries, and that they cannot meet such competition without some reasonable protection.

Let me, in conclusion, make my position clear. We are engaged in an important review of our international trade policy. As previously on the floor of this House, I have made a strong plea for adequate protection of the coal and textile industries, I here state that the chemical industry is yet another of critical importance to the livelihood of the American worker and to the prosperity of the Nation. These important industries must not be destroyed nor can we afford to see them seriously injured. It is up to the Congress to prevent such a catastrophe.

I urge the Members of this House to support the motion to recommit. If we are successful in our efforts to recommit H. R. 1, it will be brought back with safeguards included, after which we can all conscientiously support the bill.

The Regaining of Armenian Independence

EXTENSION OF REMARKS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. RABAUT. Mr. Speaker, in 1918 when the Armenians had succeeded in regaining their national political independence after some 600 years of subjection to alien oppressors it was thought that they were destined to enjoy a measure of peace and freedom in their historic homeland. With great feelings of joy lovers of freedom throughout the world were glad to see long-oppressed Armenians win their independence. As it turned out, however, Armenians were not for long to have their national independence. During the short period of just a little over 2 years that Armenia possessed its freedom, its existence as an independent state was in constant jeopardy. The small and weak country had to fight for its life on many fronts. Finally in December of 1920 Armenia was overrun by its enemies and most of it fell to the Communist Russians. They had come as saviors and liberators, but immediately they established a despotic regime.

The people of Armenia were unwilling to accept this without a fight. In mid-February of 1921 an uprising was under way, and by the 18th it proved so successful that in a few days nearly all the unwanted invaders were expelled. For a brief period of only 6 weeks Armenians again enjoyed freedom.

This uprising is historically significant because it is an instance in which communism was successfully repelled and defeated, and the Armenians regained, even if only temporarily, their political liberty. That is the reason we celebrate this memorable day.

Washington: Cultural Center of the World

EXTENSION OF REMARKS
OF
HON. FRANK THOMPSON, JR.
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. THOMPSON of New Jersey. Mr. Speaker, in his program Person to Person, Edward R. Murrow interviewed, last November, the distinguished American, Lillian Gish. She devoted practically all of her time to advocacy of the establishment of a Ministry of the Fine Arts as a department of the Federal Government with a Secretary of Cabinet rank. She argued that we are now coming of age in cultural matters, and such an agency is a part of the government of practically all British and European countries.

In his message on the state of the Union the President declared that—

> In the advancement of the various activities which will make our civilization endure and flourish, the Federal Government should do more to give official recognition to the importance of the arts and other cultural activities. I shall recommend the establishment of a Federal advisory commission on the arts within the Department of Health, Education, and Welfare, to advise the Federal Government on ways to encourage artistic and cultural endeavor and appreciation. I shall also propose that awards of merit be established whereby we can honor our fellow citizens who make great contributions to the advancement of our civilization and of this country.

A number of bills have been introduced in the 84th Congress to advance the proposals outlined above, some of which have already reached the hearing stage.

The gentleman from New York, EMANUEL CELLER; the gentleman from Montana, LEE METCALF; the gentleman from New York, ADAM C. POWELL, Jr.; the gentleman from Pennsylvania, GEORGE M. RHODES; and myself have offered the American National Arts Act, which was referred to the House Education and Labor Committee for its consideration.

A second bill, creating a Federal commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, theater and fine arts, and mass communications center, was referred to the Committee on the District of Columbia of the House of Representatives. Hearings have already begun on this bill before a special subcommittee whose chairman is the able gentleman from Louisiana, JAMES H. MORRISON.

The broadest kind of support has developed for this bill which would give the Nation's Capital the cultural facilities it has lacked for 155 years, facilities possessed by large and small European cities and by many cities in our own country.

Legislation to make Washington the cultural center of the world has been introduced by the gentleman from New York, EMANUEL CELLER; the gentleman from Pennsylvania, GEORGE M. RHODES; the gentleman from Minnesota, ROY W. WIER; the gentleman from Connecticut, ALBERT P. MORANO; the gentleman from New York, ADAM C. POWELL, Jr.; the gentleman from Minnesota, JOHN A. BLATNIK; the gentleman from Arkansas, OREN HARRIS; the gentleman from New Hampshire, CHESTER E. MERROW; the gentleman from New Jersey, HARRISON A. WILLIAMS, Jr.; and myself.

Among the many distinguished witnesses who have testified in support of the proposed legislation are Mrs. A. Paul Hartz, legislative chairman, General Federation of Women's Clubs, and Robert W. Dowling, chairman, board of directors of the congressionally chartered American National Theater and Academy. I include excerpts from their testimony here for its great informational value:

EXCERPT FROM THE STATEMENT OF MRS. A. PAUL HARTZ, LEGISLATIVE CHAIRMAN, GENERAL FEDERATION OF WOMEN'S CLUBS, WAVERLY, VA.

If the cultural endeavors of a people are a measure of their stature, the passage of H. R. 1825 brooks no delay. This bill which would create a Federal commission to formulate plans for the construction in the Nation's Capital of a civic auditorium with connected facilities making it a center for music and the fine arts is a first step toward overcoming a serious cultural lag.

Appreciation of fine arts knows no national boundaries. It is in this realm that we can hope for the greatest understanding among the peoples of the world. A building dedicated to the purpose and living expression of fine arts in the District of Columbia might well symbolize the cultural bonds which give the greatest promise of lasting peace.

In this day of uncertainty there is a continuing battle for the minds of men and we must properly gage not only our military and economic strength but our cultural strength as well. If the final victory is to go to the forces of freedom, we must not ignore this significant endeavor. Our failure to project to other countries our appreciation of our cultural heritage is a serious handicap as we compete with the Soviet Union in the cold war.

The General Federation of Women's Clubs urges the passage of H. R. 1825.

STATEMENT OF MR. ROBERT W. DOWLING, CHAIRMAN, BOARD OF DIRECTORS, AMERICAN NATIONAL THEATER AND ACADEMY

Mr. Dowling. It is a privilege to speak with you about this. It has been very dear to my heart and to the interests of ANTA for many, many years.

I would like to call attention to something pertinent to the question of whether we cannot have a place where foreign visitors, painters, sculptors, and others can exhibit their works here in America.

This year the State Department gave me the privilege of organizing an exhibit of American art in Paris during April, May, and June.

The French Government put at our disposal 5 national theatres, their opera house, Comedie Francais and others, where we display American painters' works and sculpture and where our Philadelphia orchestra will perform in the opera house, the ballet of New York and 2 plays and the musical comedy "Oklahoma."

There is no proper place for such a performance in Washington. If we were to have reciprocal visits—and I am frequently asked when I have visited national theater groups from Salzburg, Austria, and all the way to Scandinavia and through the rest of Europe, "Where would we play if we came?" or "Where would our works be shown—our paintings and sculptures?"

We have the privilege of owning some theatres in New York and I am familiar with the problems of booking and I think we plan to bring the Shakespeare Theatre from Stratford next fall.

It is very difficult to know whether we can play them. They cannot play in Washington because the National Theater has an open system of booking which takes place for 2 weeks at a time but when they come to us they will have performed in New York where theaters are customarily booked from October or November to June and July and sometimes longer.

It is very difficult to hold out the 2 or 3 weeks that a national company visiting from Europe can perform. We brought the Greek National Theater to New York and we would like to get a theater—the right kind of a theater—and every single seat was taken for every performance.

I call your attention to the fact that although we may have 30 theaters in New York and 2 in Washington and other cities have 1 or 2 or 3 theaters, there is no comparable place where foreign artists and companies and national theaters can visit and perform. And as our State Department has now placed in the hands of "ANTA" the International Exchange Program in which we are sending performers to Asia, South America, Central America, and Iceland, and European countries, we have no place to invite them in returning our visits. It is very vital to our cultural exchange program that we have such places.

Therefore, we urge you gentlemen to guide this bill through to a point where it can have the benefit of the Commission's more thorough study of the problem.

I have no other point to raise unless you have some questions.

Mr. MORRISON. I understood you to say there was a private program the United States was putting on in Paris and that they wanted to reciprocate and wanted to come to Washington but that the facilities were not here to receive them.

Mr. DOWLING. That is true. Not only for Paris but for European countries, countries even that are semibehind the Iron Curtain—Yugoslavia, where we are now sending our ambassadors and culture. If they were to come here we would have no place for them to use.

Mr. MORRISON. I was quite impressed with the point you raised that we were sending entertainment to different parts of the world. It is just as important in one sense to have them go there and to have theirs come to the United States. You made that point and they cannot come here because we do not have the facilities to house them here?

Mr. DOWLING. That is right. They always ask me when I visit those countries. While we would like to play in your National Theater and I have to say, There is not any except one we lease in Washington which is not a national theater but just a commercial venture.

Mr. MORRISON. It is national in name only.

Mr. BROYHILL. No questions.

Mr. MORRISON. Thank you very much for your contribution to the committee.

The Summerfield Reclassification Plan

EXTENSION OF REMARKS
OF
HON. ROBERT C. BYRD
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. BYRD. Mr. Speaker, we in West Virginia, have suffered mass unemployment and the misery that comes with that economic illness.

The current depressed economic conditions have not made things easier for post-office employees. Let no one make any mistake about that.

On the contrary, the economic problems of the area have closed the possibilities of self-help that the postal workers had formerly turned to. The West Virginia post-office employees had sought to supplement their meager incomes by getting additional part-time jobs and by having their wives work. But when the bad unemployment situation developed, the part-time jobs disappeared and the opportunity for large-scale employment of women ended.

The additional income upon which the post-office employees have had to depend for so long, therefore, ceased to exist.

West Virginia and the post-office employees in the State have some peculiar economic problems, but the need for an adequate postal wage increase is nationwide. It is up to us in Congress to meet that need.

When I say an adequate wage increase, I mean one that will really help post-office employees out of their really bad economic situation. Such an increase, I believe, is the 10-percent increase contained in several bills which have been introduced during this session.

I sincerely hope that Congress will approve the 10-percent increase for the postal workers, and I also want to urge that we flatly reject the Summerfield reclassification plan. This bid for extra powers by an appointed official is dangerous, not only to the post office employees' rights but also as a giveaway of congressional powers.

Last year Congress was assured in some of the most determined lobbying that

has ever been carried on by a Government department that the Summerfield reclassification plan, then offered, carried no dangers. Yet, according to press reports, the Postmaster General in testimony a few weeks ago, in effect, admitted that many of the charges made against the 1954 plan had basis in fact.

The present plan, the Department assures us, removes all these problems. But we had assurances from the same people last year that no such problems even existed.

The present plan is still shot through with loopholes for downgrading of employees; it still involves the surrender of authority over tens of thousands of postal positions by Congress; it still provides meaningless raises of $210 a year to the rank and file employees and munificent grants of $4,000 a year to some top officials.

Even the postal positions which Congress would continue to control would suffer under this scheme. A Washington newspaper recently called the job descriptions of the Summerfield plan "frauds." It said that these descriptions are written so as to justify the salaries the Department wants to pay.

Any plan that has this type of unfairness to it, should be rejected at the outset. But the Summerfield job reclassification plan has the distinction of not only being unfair—in part a "fraud"—it is also dangerous.

It merits the same rejection that Congress accorded to its parent plan last year.

Hon. Pete Jarman

EXTENSION OF REMARKS
OF
HON. LOUIS C. RABAUT
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. RABAUT. Mr. Speaker, it was with a heavy heart and much regret that I belatedly learned of the passing of a colleague and friend, the Honorable Pete Jarman, Congressman from Alabama for the years 1937 through 1949.

Despite the great distance separating our respective constituencies, I found that the common ground of this House afforded me the privileged opportunity of knowing this great American. The tribute I wish to pay him, on the advent of his passing on February 17, is best told by way of the following anecdote:

It seems that at this particular time, Mr. Jarman was a member of the committee having jurisdiction over the Public Printer and, hence, the publication of the CONGRESSIONAL RECORD. In those days the RECORD was printed in two columns instead of the present three columnar arrangement. The then Public Printer, Mr. Augustus E. Giegengack, had sought for some time to change the format of the RECORD so as to effect a sizable economy of some $200,000 per Congress; but for some reason had not been too successful in selling his idea to the committee. Mr. Giegengack brought the matter to my attention which I, as a member of the Appropriations Committee, pursued in a statement on the floor when the matter came before this House. After presenting the case for revision of the RECORD, I was forcefully asked by Mr. Jarman if I would yield—which I granted. He consumed the first 5 minutes excoriating the Appropriations Committee's position in concerning itself with a matter not properly their primary concern. His indignant objections were interrupted by the Speaker's gavel giving notice that his time had expired. I immediately asked if the gentleman from Alabama desired additional time; for I felt that he had not touched on the merits of the question in his preoccupation of reprimanding the Appropriations Committee. The next 5 minutes were spent in the same manner as the first 5; for he was exercised greatly by what he considered an imposition on his committee's rights. But at each additional grant of time his vindictiveness waned until he culminated some 45 minutes later somewhat spent. He never honored my question on the floor, but was later instrumental in revising the RECORD to its present form and effecting the great savings.

Some time later I encountered the lovely Mrs. Jarman in a casual social gathering where, in her inimitable charming manner, she assured me that Pete intended nothing personal in his remarks. Strangely enough, I had felt no personal abuse from Pete Jarman's comments; instead, I was struck by the vitality of his manner in standing up to what he considered an encroachment of authority. It was principle, not personality that brought his verbal wrath upon our heads. This misunderstanding was the beginning of a long and memorable personal friendship with a truly great American who jealously guarded the principles of Jeffersonian democracy with uncompromising dedication.

In this day when expediency is sometimes confused with principle, the absence of men like Pete Jarman shall be noticeable. His service to country has been recorded here; his spirit, I pray, shall always permeate the proceedings of this House.

I tender to Mrs. Jarman deep sympathy in this time of her great bereavement and sorrow.

The Federal Service: Its Problems and Its Future

EXTENSION OF REMARKS
OF
HON. HUGH SCOTT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. SCOTT. Mr. Speaker, under permission granted me, I am submitting herewith copy of an address entitled "The Federal Service: Its Problems and Its Future," delivered by the Honorable James C. Worthy, Assistant Secretary of Commerce, before the American Society for Personnel Administration, Society for the Advancement of Management, and the National Capital Chapter of the Civil Service Assembly, on January 28, 1955:

THE FEDERAL SERVICE: ITS PROBLEMS AND ITS FUTURE

(Address by Hon. James C. Worthy, Assistant Secretary of Commerce,)

I. INTRODUCTION

I am very proud of the opportunity to address this joint meeting of three distinguished organizations. Whatever differences there may be in the membership, professional specializations, and systems of concepts and techniques as between your three groups, all of them have one characteristic in common—a focus on and a concern for the human problems of running the Federal Government. Each of your organizations has made significant contributions to the efficiency of Government operations and to the integrity of the career service. Your membership rosters constitute a "Who's Who" of leaders in the field of management and administration. I salute you for what you have done, and wish you Godspeed in your continuing efforts.

I appreciate your inviting me here today to discuss some of the problems of the Federal service as they appear to a relative newcomer to Government who is now on his way back to private business. My status in this respect gives me a perspective which may have a certain value. For whatever they may be worth, I would like to share with you some of the observations I have made during the past 2 years.

Personal point of view

I want to be perfectly clear that what I shall have to say represents solely my own thinking and that none of the proposals I shall make are to be considered as in any way official. They represent merely the ideas of one individual on the verge of reentering private life. I trust you will view them in that light and accept them as sincerely directed toward improving the Federal service.

First of all, let me say it has been a great privilege to be a member of the Eisenhower administration and an officer of the Department of Commerce. I accepted the invitation to come down to Washington because I believed so implicitly in the principles represented by the President and by Secretary Weeks. I have never had occasion to regret that decision. Friends at home have commented on what they sometimes refer to as my willingness to accept the sacrifices of public service. I have always assured them that no sacrifice was involved. Quite the contrary: these 2 years have been the most stimulating and rewarding of my entire life, and I shall always be thankful that this opportunity was given to me.

I shall always be thankful for the friends I have made here, in high positions and low; friends who have made my task easier and my life richer. I have come to have a tremendous respect, not only for the appointive officials of this administration but for the members of the career service. I hope that as I go back to private life I will be able to help correct some of the mistaken impressions which prevail in certain quarters about the kind of people who work for the Government. I can say in all sincerity that for hard work and patient devotion it would be hard to find their equal in any line of endeavor.

II. SPECIAL CHARACTERISTICS OF GOVERNMENT WORKERS

The question is often asked of me as to how people in Government differ from those in private business. By and large, of course, they do not differ: Government people are a representative cross section of the American people as a whole, with all their diver-

sity and all their strengths and weaknesses. But in the professional and higher administrative levels of Government service I think there are certain characteristics which at least in respect to emphasis tend to distinguish the typical Government employee from his counterpart in private industry.

Generalizations about people are always hazardous, but I think it can be said that the typical upper level career employee tends to look somewhat more to the satisfactions of the job itself and somewhat less to the monetary rewards of that job than the typical employee in private industry carrying comparable burdens of responsibility. Whereas the business executive defines his status and measures his progress to a considerable extent in terms of his income, his opposite number in government is inclined to give greater relative weight to his job as such and to his professional achievement on that job.

I do not mean to imply that the government worker is not interested in the size of his paycheck. In many cases, in fact, his somewhat sharper focus on job satisfactions may represent an adaptation to a situation in which financial rewards are more difficult to achieve than in private industry. Whatever the origin of the attitude, the fact remains, I think, that there is a difference, at least in degree, in the respective orientations of the man in government and the man in industry.

Implications for administrators

This generalization has important implications for the government administrator, particularly to the administrator who comes into government from private industry where he has been accustomed to rely heavily on monetary rewards for energizing and directing the efforts of his organization. For one thing, the government pay system is too cumbersome and inflexible to permit it to serve as a useful tool for this purpose, and the businessman cum administrator must learn to rely on other means.

Of greater significance is the fact that failure to appreciate the extent of the government worker's ego-involvement in his job may lead the new administrator inadvertently to destroy or seriously impair the primary incentives available to him to promote high-level performance and efficient operation. The government worker will exert himself to the utmost, if necessary under severe difficulties, if he feels that those in authority recognize the importance of what he is doing and are giving him the support he needs. But if the value of his work is questioned—or, worse, if he is attacked directly or by implication as an unnecessary burden on the public payroll—he is deprived of the chief incentive he has for diligent, conscientious effort.

This does not imply by any means that a new administrator should accept without question all the activities he may inherit; neither does it imply that functions once established need be continued indefinitely. Indiscriminate approval loses its value here as in all human affairs. What is needed is a selective, judicial approach; an attitude of evaluating functions on their merits, of seeking to eliminate the less essential in order to strengthen the more essential, of concentrating on the most important things to be done and providing the circumstances, the atmosphere, the support which will enable them to be done better. This is the kind of approach the Government employee will understand and respond to, and the administrator who uses it can count on a loyal, enthusiastic, and productive organization.

Efficiency in Government

Because of the many impediments to efficient operation in Government, it is important that this characteristic of the Government employee be recognized and utilized. Most of these impediments to efficiency are inherent in the nature of Government service.

There is, for one thing, the high rate of turnover at the top. I was looking the other day at a picture taken about 2 years ago of the secretarial officers of the Department of Commerce. Of the 7 men in the picture, 4, including myself, are no longer there and have been replaced by newcomers. The situation in other departments, I imagine, is fairly comparable and is not by any means unique to this administration. I could not help wondering as I looked at that picture what would happen to a private business concern if it experienced a like degree of turnover in its top staff.

This kind of turnover places a severe strain on any organization. Government, as an on-going institution, has adapted itself over the years to absorb this strain. It has built-in resiliencies that enable it to weather the comings and goings of those at the top. Experienced civil servants develop techniques of self-protection that help them adapt to change in policies and personnel; those who fail to develop such techniques are not likely to survive for long.

These are natural adaptations to the realities of Government life; they are essential to a reasonable degree of continuity of function. But they take their toll in efficiency. When so much of the organization structure has to be designed to provide resiliency to change, when so large a part of the efforts of key personnel must be devoted to self-protection—or equally important, when so much initiative is stifled for fear of unnecessary exposure—it is little wonder that Government operations are often inefficient as compared to private industry.

Challenge to Administrators

The Government administrator, however, has it within his power to offset these impediments in substantial degree. He has available, for the tapping, a tremendous source of energy and enthusiasm in the job-oriented attitudes of the typical career employee. Give the career employee leadership as to the direction you want him to go, recognize the importance of what he is doing, see that he has the support and facilities he needs, do what you can to remove roadblocks and encumbrances in his way—and you will be amazed at the effort and productivity you will call forth. Under these circumstances Government operations can more nearly approach the efficiency of private industry. But the task requires high orders of understanding and administrative skill.

III. COMMONSENSE IN ADMINISTRATION

In this general connection, I would like to say a few words about the organization of administrative functions in the Federal Government. There has been a vast proliferation of administrative activities in recent years. Budget and management staffs, personnel staffs, organization and methods staffs, general service staffs, and so on have often grown more rapidly than the agencies of which they are a part. Typically, too, when cut-backs have been necessary the administrative staffs have been cut back less severely in proportion to the professional and program staffs. Both the growth of the administrative staffs and the tenderness with which they are treated when appropriations are reduced are justified in terms of the presumed contributions of such staffs to efficiency of operations.

Expansion of administrative staffs

It is easy to argue that an extra budget analyst can save many times his salary, or an extra personnel man can help improve employee morale, or the centralization of common services can save payroll. All these things may be true—in balance and moderation. But I have the feeling that in some cases we may have gone too far. The pendulum has swung widely since the reports of the first Hoover Commission called attention to the need for improved administrative management in the Federal service. The organizations represented here today have greatly aided in that swing. And because of the strategic position the administrative staffs have come to occupy in most major agencies, they have been able to expand and strengthen their functions, often at the expense of the program areas.

I think a time has come for stock-taking. Above all, I think the time has come for a reevaluation of the role of the administrative functions.

One reason administrative staffs have grown as they have has been the tendency to elaborate and extend administrative controls. A parallel factor has been the tendency to centralize functions. If the approach is in the direction of control and centralization, there is no limit to the extent to which the administrative staff can grow; but the cost in terms of the effectiveness of the organization as a whole can be very great indeed.

A service approach

In the Department of Commerce we have tried to develop a different point of view. We have tried to minimize the control aspects of administrative functions and to promote maximum decentralization. In particular, we have tried to emphasize the service aspects of the administrative jobs. We have tried to get across the idea that none of the administrative functions—whether personnel, budget and management, organization and methods, or whatever—has any value in its own right, that it is useful only to the extent that it contributes to the achievement of program objectives.

In our view, the purpose of the administrative staff is not to devise and police controls, except as positively required by law or regulation, but rather to assist program staffs in finding their way around difficulties and to provide them with the professional advice and services they need to do their jobs more effectively. Under this concept, administrative staffs can be kept small but their value to the organization can be greatly enhanced. And the job satisfaction of the administrative people themselves can be enriched and deepened accordingly. I submit there is far more basis for pride in helping a bureau or a division solve a knotty problem than in issuing a reprimand for deviation from some procedural detail.

As professionals in the several functional branches of administration, I urge you to consider carefully the role and orientation of your administrative organizations. I feel very definitely the need for strengthening administrative management in the Federal service, but I think we ought to consider carefully the means we employ for that purpose.

IV. THE PROBLEM OF PATRONAGE

I should like to turn now to another subject which also, in my view, requires considerable reevaluation. I refer to the subject of patronage and its relation to the career service. No other topic—except possibly that of security—has generated so much heat and so little light during these past 2 years.

Whatever other fruits it may have enjoyed from its victory in 1952, the Republican Party has been bitterly disappointed in the matter of jobs. The party had been out of power for 20 years. There had not only been little or no Federal patronage during all that time, but party leaders and workers recalled vividly what happened in 1933 when the Democrats succeeded the Republicans in office.

Recollections of 1933

They recalled the arbitrary dismissals of career employes suspected of the taint of Republicanism—such as the removal from the civil service of 376 "higher paid technical and professional positions" in the Bureau of Foreign and Domestic Commerce and the en bloc replacement of encumbents by loyal

Democrats. They recalled the thousands of Democrats who found their way into Federal employment in the years following 1933 and the difficulty of getting a job without Democratic endorsement.

They recalled the vigor with which Jim Farley handled his job as patronage boss and his frankness about what he was doing and why. They recalled that as late as 1948 Jim Farley had written: "While many criticize the spoils system, I have always felt that it is just as easy to find a good Democrat as a good Republican or vice versa and that the party in power should reward its own."

Disappointments of 1953

Remembering these things, the leaders and workers of the Republican Party looked forward to the turnover in office 2 years ago with relish and anticipation. But they were sorely disappointed; and if they have grown bitter, they can be understood. It does little to assuage their bitterness to point out that there are a number of very important differences between 1933 and 1953. But if we are to deal intelligently with the problem, we had better understand what those differences are.

I had the fortune—or misfortune—of serving in the first years of two new political administrations: with the NRA and its successor agencies from 1933 to 1936 and with the Department of Commerce from 1953 to 1955. I am therefore in a position to see quite vividly some of the sharp contrasts between the two periods.

Greatly extended civil service coverage

For one thing, the coverage of civil service is much more extensive in the latter period than it was in the former. When the Democrats took office in 1933, 80 percent of all Federal jobs were under civil service. But by 1936 civil service coverage had been reduced to about 60 percent, partly through removing certain jobs from civil service but more importantly through specifically exempting the newly created emergency agencies. As against about 40 percent of all Federal jobs available for patronage purposes before the end of President Roosevelt's first term, only 15 percent are so available now. Whatever this may represent in the way of a desirable strengthening of the merit system, it also represents a formidable restriction on freedom of appointment.

Growth of Government under Roosevelt

Of much greater importance, however, was the fact that 1933 saw the beginning of the rapid buildup in the size of the Federal establishment, whereas 1953 saw the initiation of a sharp trend in reverse. During President Roosevelt's first term, new agencies were created in quick succession and the need for Federal workers grew by leaps and bounds.

I can remember the hectic buildup period of NRA during the summer of 1933. We had few administrative regulations in those days, but I can remember one of them: No hiring on Fridays. This rule was necessary simply because the recordkeeping machinery could not keep pace with the rate of hiring. So each Friday people from the chief clerk's office went through the organization taking a census of all those hired during the preceding days of the week. Other agencies faced with similar problems of rapid growth no doubt employed a variety of expedients, but I have always thought of this one as illustrating vividly the great wealth of jobs available at that time. And I can assure you from having lived through it that the party then in power made full use of the political opportunities thus afforded.

Contraction of Government under Eisenhower

The situation faced by the new Republican administration when it took office in 1953 was sharply different. Instead of entering on a period of great expansion, President Eisenhower set in motion the economy program which had been one of the important Republican pledges in the preceding campaign. Instead of more jobs there were fewer. Instead of rapid, large-scale recruitment, widespread reductions in force were the order of the day. During the first 2 years of the Roosevelt administration, Federal employment increased by 141,000. During the first 2 years of the Eisenhower administration, Federal employment decreased by 200,000. In the Department of Commerce alone, regular, full-time employment was cut back 23.3 percent during our first year in office. Thus, even in the relatively few job categories which remained outside civil service the opportunities for patronage were meager indeed.

Buildup of pressure

But memories of what had happened in 1933 persisted, and discontent within the Republican organization rose to fever pitch. Pressure on the administration became extreme. I think it is to the everlasting credit of the President and the men around him that, in the face of this pressure, they have kept and maintained their strong position of safeguarding the merit system. I shudder to think of what might have happened had less courageous and less forthright men been at the helm.

But the pressure remains and the problem persists, and the entire subject is becoming increasingly confused. I think the time has come for a fresh and objective reappraisal.

A large part of our present confusion comes from failure to distinguish between two quite different things: the need of a new administration to gain control of the machinery of Government and the need of the party in power for jobs to reward the party faithful. These two needs have only in common the fact that both involve jobs and both involve people. Otherwise, they are entirely different in nature and must be satisfied by entirely different means. Let us consider each of them in turn.

Controlling machinery of government

In order to gain control of the machinery of Government, it is necessary for a new administration to control only a relatively few jobs. These are the key positions in the organization, the positions which are truly policy determining or policy influencing and the incumbents of which are close enough to the working processes to insure the faithful adherence of the staff to the program directions laid down.

In this connection, it is important to remember that by far the greater part of all governmental activities are devoid of partisan content. What has the work of the Bureau of Standards or the Patent Office or the Bureau of the Census or the Office of Business Economics to do with which party is in office? The level of their appropriations may rise or fall in accordance with the dictates of administration policy, the scope of their activities may expand or contract accordingly, and there may be certain changes in program emphasis. But the work itself is nonpolitical.

So long as the top staff in such agencies is professionally competent and properly cooperative with the new administrative group their personal politics is beside the point—assuming, of course, that they comply fully with the restrictions of the Hatch Act. In considering the number of jobs a new administration needs to have at its disposal to insure control of the governmental machinery, this largely nonpartisan nature of by far the greater part of the federal establishment needs to be kept in mind.

Support for administration policies

Even in activities where there is an appreciable degree of partisan content, the number of jobs that must be controlled still is relatively small. It has been my observation that the great majority of Federal workers—I can say this confidently at least with respect to the employees of the Department of Commerce—are conscientiously supporting the policies and programs of this administration—as I am sure they conscientiously supported the policies and programs of our predecessors in office.

Unfortunately, there has been a certain amount of confusion on this point, and it has sometimes been overlooked that, if people are to support a particular program or policy, they have to know what that program or policy is. One of the difficulties faced by the new administration when it came into office 2 years ago—and I am sure it is a difficulty experienced by any incoming administration—was that many of the new officials had to learn their way around in their new jobs. They had, of course, a general idea of the kinds of work performed in the bureaus and offices for which they were responsible and they had fairly clear-cut notions of the directions they wanted to go. But they often were not familiar with detailed issues and it took time for them to acquaint themselves thoroughly with the pros and cons of various alternative lines of action.

Under these circumstances, in the early months of this administration people down the line were sometimes lacking in clear-cut policy direction. But the work had to go on, and in the absence of specific instructions to the contrary they were likely to continue along much the same lines as under the prior administration. Thus it happened that the new administrators were sometimes confronted with actions or proposals for action with which they were in disagreement, and it is easy to understand that in some cases they developed the feeling that their career staffs were undercutting and second-guessing them. But this was only a passing phase. As the new administrators gradually worked out their own policy positions, as they made clear to those under them the directions they wanted to go, the career staffs swung in solidly behind them and are giving them their loyal, wholehearted support.

Few jobs required for control

Thus, even in activities with substantial partisan content, it is necessary to control only a relatively few jobs to control the machinery of government. Effective control is not secured by reaching far down into the organization, but by making sure that the few really key jobs are filled, not merely by people loyal to the administration but by people with a sure grasp of the problems of the organization and the ability to provide clearcut goals and positive leadership. Given this, there need be no fear of lack of control.

By and large, I think the schedule C system has proved reasonably adequate to assure effective control of the governmental machinery. In the Department of Commerce we have not been granted all the schedule C authority we asked for, but, for the most part, we are fairly content. It might interest you to know that of our approximately 41,000 permanent full-time jobs only 86 are in schedule C. I think this gives some indication of the quite small number that are needed for purposes of control.

V. SUSTENANCE OF THE PARTY SYSTEM

But there is another and quite different need that must also be met. This is the need for jobs to nourish the American party system. For this purpose greater numbers and quite different categories of jobs are required than those embraced under the schedule C concept.

Nature of party system

The genius of this country is political. That genius is expressed in our unique party system no less than in our unique Constitution. The distinguishing characteristic of American political parties is that they are nonideological—there are far greater differ-

ences of ideological position within each of the two great parties than there are between them. This characteristic has important implications for our political system. It means, among other things, that many conflicts are resolved within the framework of the parties themselves rather than in struggles between the parties.

In countries when parties are largely ideological, as in England, the conflicting ideological principles of the parties makes the resolution of issues difficult. Under our system where the differences are chiefly within and not between the parties, issues can be debated much more clearly in terms of their individual merits; precisely because the ideological factors are fuzzy they interpose fewer difficulties to the reaching of agreement. The American process is seldom neat and orderly and few interest groups are ever entirely satisfied with its results. But neither is any interest group ever wholly alienated. The American party system is probably the most effective means ever devised by man for handling the political problems of organized society.

Necessity for patronage

Under ideological party systems, the common interest of ideological position helps hold the party machinery together and keeps it functioning. Under the American system, some other unifying and sustaining factor is necessary. Historically, this factor has been patronage.

I think we have failed in this country to appreciate this peculiar characteristic of the American political system. I think that in our enthusiasm for extending the scope of the merit system we have come dangerously close to denying our political parties the sustenance they need to retain their health and vitality.

We have been misled, I think, by false analogies between our and the English civil service systems. We have gone on the implicit assumption that if the merit system is good it should be continually expanded until, ideally, it covers all Federal employment. But we have failed to realize that the English can afford a universal merit system because their parties are ideological and consequently have little need for patronage whereas there is serious doubt that our parties could survive for long in their present form without adequate patronage. Many of the difficulties of the Republican Party today are directly traceable to what may be best described as 20 years of malnutrition.

In our indiscriminate pursuit of the ideal of a universal civil service we may have gone too far. I think we need to take another look at what we have done in terms of its implications for the party system.

Characteristics for political recruitment

Let me make this very clear: I am not suggesting we turn the clock back; I am not suggesting we expose either Government employees or the public to the evils of a revived spoils system. What I am proposing (and remember, I am speaking only for myself) is that we make a careful analysis of Federal employment for the purpose of identifying certain jobs whose nature is such that they can be filled without material loss of efficiency, and perhaps even with gains in efficiency, by the selection of applicants referred by the party in office.

I am not suggesting that such jobs be filled by Republicans simply because they are Republicans (or by Democrats simply because they are Democrats) but that they be filled by properly qualified persons referred by the political party in office. The emphasis, in other words, is not simply on party label but equally on fitness and capacity.

One requirement would be that jobs designated for this purpose be such that their effective performance would not be seriously impaired by fairly frequent turnover. Most of them should be in the field, close to the grassroots for these have by far the greatest political value. They should be the kind of jobs which lend themselves to efficient recruitment through the channels of party organization. For certain kinds of jobs, in fact, it should be possible to secure just as well qualified people through political referral sources as through competitive civil service examinations, often with a definite improvement in efficiency of recruitment and quality of selection.

Quite definitely, jobs designated for this purpose should not be those requiring specialized technical or professional skills; not only are such jobs of little value politically, but it is essential for orderly and efficient government that they be filled entirely without reference to political considerations. For the same reason, jobs involving special public trust, such as those in the Internal Revenue Service, should be excluded for it is essential that the public have confidence that the decisions of such officials are not susceptible to pressures of any kind, political or otherwise.

Other specifications, both of inclusion and exclusion, could be spelled out but these, I think, suggest the general approach.

Need for study

I shall not be so unwise at this time as to try to identify any specific jobs which might be set aside in this kind of special reserve. It is the essence of my thought that the problem be studied very carefully with the needs of the party system in mind as well as the requirements of efficient management. I venture to suggest that in the interests of contributing to the strength and vitality of the party system we could afford to risk a slightly lower level of efficiency on certain kinds of work than we might otherwise try to achieve. On the other hand, I am convinced that if we have capable management, and if the jobs are properly selected for the specific purpose here in mind, filling them with applicants referred from political sources may well result in increased efficiency and better performance. The competitive civil service is not necessarily synonymous with maximum efficiency.

Also, let me be clear that I am not necessarily talking about a large number of jobs. Actually, the number which might remain outside the merit system might very well be no more than the total outside the merit system today. But they would be better distributed. They would be excluded from the merit system because they have characteristics which peculiarly fit them for this special purpose. Their status would be well-defined and the conditional tenure of their incumbents well understood.

Benefits to merit system

Such a program would not only greatly strengthen our very special party system, it would also be a boon to the merit system itself because it would channelize along safer lines the tremendous political pressures which otherwise build up whenever there is a change in the party in power.

We have seen something of such pressures during the past 2 years. You can be sure that they will recur with equal or greater force the next time there is a change in party. If these pressures are not relieved by wise and well-considered measures there is always the danger that they may reach a point where "something has to give," and the resulting explosion may do irreparable harm to the merit system.

There is no necessary conflict between the merit system and the selection of politically referred applicants. Both serve highly essential purposes, and their roles can be reconciled. The two are in conflict now because we have failed to take into proper account the very real—and, let me emphasize, legitimate—needs of the American party system. But this can be corrected by identifying certain carefully selected jobs and making it quite clear that there is nothing wrong in filling them with applicants referred by the party in office.

It should be made equally clear that appointments to all other jobs, except those in the schedule C category, would be made absolutely without reference to political considerations of any kind. By carefully distinguishing between the characteristics and methods of administering the two system, they could work side by side in much greater harmony than now prevails and could serve their respective purposes much more usefully.

VI. REORGANIZATION OF PERSONNEL FUNCTIONS

I should like to turn now to another subject which likewise, I think, needs reappraisal. I refer to the need for more effective organization of the executive branch for efficient management of personnel, especially in the higher levels. I recognize that I am venturing onto controversial ground and repeat that the opinions expressed, whatever they may be worth, are entirely my own, and I accept sole responsibility for them.

Administrative difficulties

Many of the administrative difficulties of the Federal service have their origin in three main points:

1. The Civil Service Commission, over a period of years, has been called upon to perform two quite different and in many ways basically conflicting functions. On the one hand, the Commission is called upon to protect the interests of career employees; on the other, it is called upon to serve as the staff arm of the Chief Executive in personnel management matters. The first is an employee interest. The second is a management interest.

2. The President, as Chief Executive, is responsible for providing central leadership in the executive branch in personnel management. To date, however, no President has ever had an adequate staff for positive and progressive personnel management, nor one with full jurisdiction over all executive personnel matters.

3. Personnel management in the departments and agencies needs to be strengthened through strong central executive leadership within the framework of regulations established for the career service and through almost complete decentralization of authority and responsibility for actual personnel operations to the departments and agencies themselves.

Let me elaborate these points a little further.

Conflicting functions

First of all, the combining of two basically conflicting functions in the Civil Service Commission is an open invitation to schizophrenia. In this respect, the experience of private industry is illuminating. Some companies have established personnel departments for the stated purpose of representing the interests of workers to management and the interests of management to workers. Where serious efforts have been made to apply this concept, the results have been highly unsatisfactory to both workers and management, and the personnel director has usually wound up with a bad case of ulcers and thoroughly discredited on both sides.

It should be axiomatic that no single individual and no single agency can properly represent both management and workers. At some point the wholly legitimate requirements of management come into conflict with the wholly legitimate interests of workers, and regardless of whether the personnel director takes a stand on one side or the other or seeks to temporize, his effectiveness is loss and his influence dissipated.

Second, it seems to me essential that all functions involving central executive leadership in personnel management in the departments and agencies be vested in the

Executive Office of the President and that the President be given a staff adequate to discharge his responsibilities in the important field of personnel management.

Realinement of responsibilities

This requires, in my opinion, a far-reaching realinement of responsibility for personnel functions. As I see it, the Civil Service Commission can best achieve its historic mission of establishing and maintaining a strong career service if it is relieved of responsibility for administrative operations and concentrates on providing the framework for the career service principally through (1) establishing appropriate regulations and standards for such a service, (2) inspecting personnel management activities in the agencies, and (3) adjudicating employee appeals. These functions are the very heart of establishing, maintaining, and protecting the career civil service.

A proper realinement of functions also requires, in my opinion, a strong executive personnel agency in the Executive Office of the President. The functions of such an office should be: (1) to develop and formulate general personnel policies within the framework of laws and regulations established by Congress and the Civil Service Commission, (2) to stimulate, assist, and review personnel management in the departments and agencies, and (3) to carry on certain types of personnel activities, especially those involving high-level executive positions, which can only be conducted effectively from the Office of the President.

Bureau of Personnel

Such an agency might be called appropriately the "Bureau of Personnel." It should be a part of the Executive Office of the President, should report directly to the President, and should have a status coordinate with the Bureau of the Budget.

Some of the functions which should be performed by the new Bureau of Personnel are now performed by the Civil Service Commission. Others are now performed by the Chairman of the Civil Service Commission in his capacity as the President's Adviser on Personnel Management. Still others are now performed by a variety of individuals and offices scattered about in various places. Finally, some of the functions which should be performed in the interest of effective personnel management are not now being performed at all or are being performed only on a rudimentary level. Grouping all of these phases of personnel management into a single strategically located agency in the Executive Office of the President would unify and strengthen personnel management in the executive branch and provide the President the facility he needs for exercising leadership in this crucial area of governmental operations.

Progress in other areas of management

Such a realinement would be in keeping with the best developments in organization in the recent history of other phases of management. The Bureau of the Budget has been able to do a far more effective staff job for the President since its reorganization in 1939 and transfer from the Treasury Department to the Executive Office of the President. Great improvements in administration have been achieved in a number of agencies through adoption of corporate forms of organization, business-type budgets, and comptrollership systems of controls. Accounting systems have been greatly improved under the joint accounting program of the Bureau of the Budget, the Treasury Department, and the General Accounting Office, and commercial-type audits represent a big step forward over the traditional Government-type audits.

In a number of subject-matter areas, moreover, rulemaking, inspectional, and appellate activities have been separated from operating functions with a substantial improvement in organization and operations. I need only refer, for an example, to the very desirable clarification of functions and organization in the field of civil aeronautics, where we have a Civil Aeronautics Board (the CAB) to establish the framework of regulations for civil aviation activities and a Civil Aeronautics Administration (the CAA) to carry on necessary operations such as aviation safety, Federal airways operations, airport engineering, and the like.

Personnel arm of President

As I see it, the Bureau of Personnel in the Executive Office of the President would serve as the personnel arm of the President, with no confusion as to its orientation toward more efficient management practices. It would develop and formulate general policies within the framework of civil-service laws, regulations, and standards; and provide central leadership, assistance, and review for the personnel organizations and programs of the various departments and agencies in terms of the needs of efficient management.

The Bureau would engage only such activities as cannot be efficiently decentralized to operating departments and agencies. Personnel operations should be streamlined and decentralized to departments and agencies far more than they have up to the present time, particularly in the field of recruitment, examination, and related matters. With more effective guidance from a Bureau of Personnel in the Office of the President, it could be expected that better personnel management would develop in the departments and agencies. The improvements thus achieved should in turn make possible a far greater delegation of authority and responsibility than perhaps would be wise at the present time.

In addition to providing strong leadership and guidance to operating departments and agencies in the executive branch, the Bureau of Personnel would perform various functions of a staff nature for the President. I need not catalog all the useful functions the Bureau might perform, but I would like to mention 1 or 2 which may be of special interest.

High-level executive placements

One of the most important of such functions is that of executive placement in high-level jobs of a policy-determining or policy-influencing nature. In general, these jobs are about equivalent in type and level to schedule C jobs and above. Jobs of this nature obviously have important implications not only from the standpoint of executive management but also from the standpoint of political relationships.

The first requirement for effective organization of any kind is that key positions be filled with people properly qualified to perform their tasks. A related requirement is that adequate means be provided to assure orderly replacement with equally competent people in face of the turnover that always takes place.

I have been struck, these past 2 years, not only with the great difficulty of securing properly qualified people for higher level Government positions but also with the problem of assuring effective utilization of the personnel available. An agency head, faced with the loss of one of his top officials, is in a very difficult position. He is an extremely busy man. The demands on his time and attention are such that he can give little thought to locating a good replacement, and the probabilities are strongly against the right man just happening to come along at just the right time. In consequence, many important positions are in danger of being filled on a basis of accident or expediency, and many good men are passed over merely because no one happens to think of them in a particular connection at a critical moment.

One of the primary functions of the Bureau of Personnel as I see it would be to provide an executive placement service to the President and to high officials of the Government. Suitable rosters should be developed and kept up to date of persons within the Government and of persons outside the Government who are well qualified for various types of key positions and who should be considered for them and if necessary persuaded to accept them. Very often, the person needed for a particular job is a most reluctant candidate indeed.

Optimum use of talent

Executive talent is always a scarce commodity, and one phase of the executive placement function should be to assure optimum use of the talent actually on hand. I am very sure that many of the people already serving in this administration are qualified for higher responsibilities than those they now hold. Means should be provided for identifying such people and for indicating the kinds of higher responsibilities for which they should be considered. The bureau of personnel should periodically appraise the work of all policymaking officials, not only to bring to light any hidden talents already on hand but to discover weaknesses and inadequacies which should be corrected by replacement or other suitable administrative action.

With rosters thus developed, the Bureau of Personnel would be able to render a highly useful service to the President and to the heads of the various executive agencies. As vacancies occur, the director of the bureau could do the staff work of reviewing the qualifications of all potential candidates, both from within government and without. He could then present a small but highly select list to the agency head, who would make the final selection. Without in any way restricting the range of choice of the agency head or encroaching on his responsibility, a service of this kind would save him an appreciable amount of time and worry. And it would tend to greatly improve the quality of selections. The basis of selection would be considerably broadened and there would be greater assurance that the best qualified person available is actually appointed. The resulting improvement in management and direction of the key affairs of government could be very great indeed.

Orientation of new officials

One of the serious needs of Government is some more effectively organized means for instructing new high-level appointees on the problems they will face in taking over their new responsibilities. Any retail store on F Street does a better job of making sure that a new salesgirl gets a good start than does the Government with respect to a new assistant secretary. Every secretarial officer of this administration with whom I have talked has expressed the wish that some way, some how, he could have been warned about some of the pitfalls he had to discover the hard way or could have been given certain basic information about how government works and about how he could most effectively take hold of his new responsibilities.

The Bureau of Personnel, as I see it, would not only play a key role in the selection and appointment of new high-level officials, but would also be responsible for seeing that they get off to a good start.

Closely related to executive placement and orientation is executive training and development. The Bureau of Personnel should undertake to plan out and operate a governmentwide, interagency program of training and developing promising young executives for key positions in the future. Unless we do this, we are failing to make maximum use of the potential talent we already have available in the Federal service. Drawing on the experience of industry, I think it can be safely said that the only successful way to run such a program would be from the Office of the President.

College recruiting

Another function of the Bureau of Personnel should be the direction of college recruiting, on which the quality of future management depends in large degree. From my experience in private business, I know that we must keep a continuing influx of promising young college graduates each year, in order to maintain competent management. In the company to which I am about to return, it takes about 8 years to train a good store manager through various intermediate assignments and positions. The company relies heavily on recruiting able young college graduates each year. It knows from experience that if it fails to recruit sufficient trainees in any given year, it is in for trouble 8 years or 10 years later, when it will be looking for good store managers and can't find them to the extent it needs them.

Shocking deficiencies

On a conservative estimate—to my mind unrealistically conservative—about 8,000 new college graduates a year are needed in Government service. Currently, I understand, we are actually recruiting only about 2,000 a year. I can imagine what such a deficiency would do to a private industry; its implications for the future competence of Government operations are shocking.

The Government's whole college recruiting program must be completely overhauled, with a view to competing more effectively with private business firms and professional organizations in attracting a better share of the cream of each year's crop of college graduates. This means, among other things, that we must be able to offer them not only a decent salary, but recruitment without burdensome procedural requirements. We must also provide a carefully managed program of opportunities to show what they can do, promotion as rapidly as they show their ability and as rapidly as they would be advanced in private industry, and reasonable protection from the vicissitudes of reductions in force and similar disturbances of tenure for a stated period of years (perhaps as long as 10), provided, of course, their performance and progress are satisfactory.

Strengthened functions

There are many other ways in which the Bureau of Personnel could strengthen personnel management in the executive departments and agencies. The main point is simply this: As a management agency, it should—and could—focus attention more sharply on the several problems with which government is faced in achieving efficient and economical personnel management. It should—and could—help us to distinguish mere tradition and form from real and current operating needs, and thereby help us to devise more realistic and effective solutions to our personnel problems.

I have tried to give some indication of the broad lines along which, in my view, the personnel activities of the Federal Government should be reorganized. I think our present arrangements are inadequate because conflicting roles and responsibilities have been allowed to grow up over the years within the Civil Service Commission which compromise it in its function as a regulatory agency and severely handicap it as a management arm of the President and the executive branch. I have tried to suggest a means for eliminating this conflict and for strengthening both functions. I do not expect ready acceptance of these proposals, but I hope they may provide a basis for further thought and discussion, out of which may come an effective solution for one of the really serious problems of government administration.

VII. CONCLUSION

I fear I have talked much too long. But I had some things I wanted to say, and I am grateful to you for providing me the occasion to say them.

I want to say only one thing further.

It has been a great privilege to serve under the leadership of President Eisenhower and Secretary Weeks. It has been a great experience to be here in Washington these last 2 years. One of the fine things about that experience was getting to know the people in the Department of Commerce and people such as yourselves in this room with a common interest in the problems and the future of the Federal service. I shall think of you often. Good luck to you all.

Address by Hon. Joseph W. Martin, Jr., at Dallas, Tex., February 14, 1955

EXTENSION OF REMARKS

OF

HON. BRUCE ALGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1955

Mr. ALGER. Mr. Speaker, it is a pleasure for me to call the attention of my colleagues to an occasion of great importance to my district of Dallas County. Our most admired and respected colleague, the gentleman from Massachusetts, Mr. JOSEPH MARTIN, addressed a large gathering in Dallas February 14 as a part of our Lincoln weekend celebrations.

The response of those present left no doubt as to the affection and high esteem of the people for Mr. MARTIN. We Texans were most appreciative and proud to have him with us to benefit from his vast experience in the Federal Government and to hear his underlying concepts of the function of government.

So that others may also enjoy his remarks of that evening, I include in the RECORD the following speech which he delivered at that time:

Texas friends and neighbors, this is a visit I have anticipated for many weeks. We hear a great deal about Texas in Washington—some of it even from Texans themselves—and almost everyone winds up by saying that you have to be in Texas to see what is going on in order to believe it.

Any doubts about your growth and progress have vanished as a result of this visit. In fact, I am somewhat surprised that your fine committee could persuade this many Texans to sit still long enough to hear a speech—because only people who are very busy could have brought about what you have accomplished in recent years.

No man, I am sure, could in one evening talk about all of the wonderful things I have seen in this great State since my journey to Dallas. I have managed to absorb some of the highlights of your progress, however. In taking note of some of them, I cannot refrain from thinking that if all of our people could come to Texas for a visit, there would be no fear for the future of the Nation.

The Dallas story is one of which all of you can be justly proud.

I note that your annual payroll is over $1 billion for the third year in a row.

That the income for all of your people in 1954 set a new record of $12½ billion.

The census people tell us that the population of Dallas is expected to increase by 30,000 people in 1955; that the State population is growing at a rate that exceeds the national average.

Your employment is increasing steadily; your wage earners are sharing an ever-increasing amount of your prosperity; your markets and farms are prospering; and your construction records for homes and factories reach new peaks with the dawning of each new day.

Texas banks are bulging with the savings and investments of her people; Texas farm marketings are at a new high; Texas agriculture is now the most diversified in the history of the State.

Yes, even the baby business in Texas is booming. In fact, 1 out of every 16 babies born in the United States is now born a native Texan—a notable contribution on the part of Texas mothers, among their many other amazing accomplishments in the building of a bigger and better Texas.

Yes; I am now convinced; Texas is an amazing place; her people top go-getters; her future bright with the promise that peace, progress, and prosperity are here to stay.

I want to congratulate you on electing BRUCE ALGER as the Representative in Congress from Dallas.

He is a credit to your judgment and a welcome addition to the National Legislature. Already he has established many warm friendships for the benefit of his home State and district, and we respect the intelligence and integrity he has displayed since joining us.

He has demonstrated an energy and alertness that, combined with experience, will make him an outstanding Member of the House. He will be a credit to his State and to his district.

I hope that Mr. ALGER is the first of many Republicans that Texas will send to Congress. I hope that Texas—first in so many things—will also be the first in this part of our great country to really and truly develop into a two-party State.

Had I been borne a Texan, I would be one of your best salesmen.

The fact that I was not, however, does not prevent me from sharing in the pride that is rightfully yours because of your accomplishments.

Texas and the rest of the Nation, I am firmly convinced, have prospered and grown in part because of many things that have been done in Washington during the past 2 years under the leadership of President Dwight D. Eisenhower—a native Texan.

The Eisenhower administration and the 83d Congress have set many records of progress.

First, we wiped out the economic controls which had kept our people in a state of constant irritation for more than a decade. These controls handicapped the growth of our country. Business has gone ahead faster because these controls were eliminated.

We settled for good the question of whether Texas and other States were to enjoy the constitutional privileges of managing and exploring their own lands or whether the Federal Government would be allowed limitless encroachment of the rights of our people, and, incidentally, the Federal Government prospered through the legislation.

We ended the Korean war—not completely on our terms, but in a manner at least befitting the dignity of a government determined to build a defense and a security for the long haul to peace.

We abolished certain agencies competing with private business and we sold or are selling the competitive Federal operations which thrived on tax dollars to the detriment of free enterprise.

The administration also created a new department of Government—Health, Education and Welfare. And the President selected the best-looking Cabinet officer in history to run the Department—Mrs. Oveta Culp Hobby, a Texan—and she is doing a splendid job.

Many useless Government jobs were abolished, but there was no wholesale patronage firing of employees. On the contrary, the complaint was because some were not removed.

We cut taxes a total of $7,400,000,000—the biggest reduction in history; and we reduced appropriations in 1954 and 1955 a total of $64 billion below the 1952–53 level.

This reduction helped us in our efforts to bring about a prosperity based on peace rather than war.

Recognizing the need for a rapid expansion of the Nation's road system, the 83d Congress provided funds of almost $2 billion for highway and farm-to-market road improvements for 1956 and 1957. In addition, the President has presented to Congress a long-range, multibillion, pay-as-you-go highway program. This is the first modern appraisal and plan for our highway needs in many years, and one that is long overdue.

The St. Lawrence Seaway was voted a go-ahead in the past year, so that our eastern and midwestern waterways can expand to meet the needs of a growing population and an expanding economy in that area.

We extended social-security coverage to 10 million additional people and unemployment compensation to 4 million more Americans, recognizing as we did the need for a long-range approach to the problems and needs of a vastly increased number of older citizens.

The men and women who built up our country must not be neglected in their old age.

At the same time, we moved speedily into the field of health and hospitalization for our older people. We redesigned the construction program from a theory of building hospitals for the sake of building hospitals to a program of construction tailored to the need for rest homes and clinics. In this way, so long as the Federal Government can serve a purpose in the area of health and hospitals, we are meeting the needs of those least able to pay for proper care.

This, I might emphasize, is not a New Deal program, a Fair Deal program or a socialist program. It is a human program, as the President so consistently reiterates. It is designed to lift the burden from deserving citizens who face the misfortunes of age or illness without adequate funds. It is but a small measure of the debt we owe those who have worked as good Americans toward the better life we enjoy today.

On the defense front, we made ourselves much stronger militarily, with the full utilization of atomic weapons.

We are living in critical days. We must not minimize the threat to our way of life. Both inside and outside the country there are people who seek to undermine and destroy the freedoms we hold precious. These people must not be allowed to succeed. They cannot succeed if we are alert and vigilant.

Asia is the scene of an unfolding explosive drama. Soviet Russia and its pawn, the Chinese Reds, seek to dominate all Asia. If this could come to pass, it would eventually mean the Red domination of Africa, Asia, Europe, and perhaps eventually the United States.

This threat makes it essential for us to build our defenses so strong that we are invincible. Over $30 billion is planned to be expended this year on defense alone, and each succeeding year will require equally large sums until the danger is over.

Wisely we are specializing in atomic weapons and atomic defense, for these instruments of warfare present the only way our shores can be attacked. Supremacy in the air and in atomic weapons as planned by President Eisenhower means security. This we must have.

President Eisenhower knows thoroughly our defense needs. When he says we can save $2 billion for the taxpayers without impairing our defense, I say to you I am for his proposal. This cold war we are in could go on for many years, and we must have economy in our spending for armaments. We must not forget a demoralized financial condition and wild inflation could destroy our country.

The Soviet leaders are no longer a mysterious group. Their aims are as clear as the noonday sun. They seek world domination, and they steadily push to accomplish their objective.

The Red plotters will resort to arms only if they are sure they can win. They know they cannot win now, and therefore they are stalling until they think the time is ripe.

We must keep our defenses strong so that this day will never come.

Let us think about the forces that threaten us. Red China is the immediate foe, but back of her is Red Russia supplying the hardware of war.

When we hear the threatening talk of the Soviet and the Red Chinese let us not be led astray.

We all want peace. We will go a long way to secure peace. But let it be understood we are not going to be bluffed into permitting the Soviets to dominate the world. We will not be coerced into abandoning the free world to servitude and poverty.

We also have the problem of communism and subversion at home. Much has been accomplished by the Eisenhower administration to arrest subversion and bring the Red rats to light. We silenced with harsh facts those who denied the menace existed. We did this by the swift enactment of legislation designed to plug the loopholes in our security.

We stripped the Communist Party of all legal rights.

We denied Government comfort to Red-infiltrated labor unions.

We sent 50 Communist leaders to jail.

We deported more than 100 lingering subversives, who plied the Communist intrigue for years without bothering to apply for citizenship while they planned the destruction of this Nation.

Why the alien subversives were accorded the freedom of this Nation—some for more than a decade—we have yet to learn. We still seek the answer to the question of who built the barrier of illegal protection around them.

When you hear the rattling disputes over the administration's security program, keep these questions in mind. Many have not been answered as yet, many may never be. But so long as I remain in the House of Representatives, an answer to all the questions will be sought.

As a nation, we cherish individual rights. Each of us is entitled to a complete and fair appraisal of our lives at the bar of public opinion as well as in our courts.

Let us retain that freedom without the tarnish of personal restrictions—but let us retain also the commonsense that recognizes the ability of some to use it as a shield while subverting the very heart-beat of personal liberty.

Never forget that once we relax our vigilance, the Communists will seize again upon the same pattern of manipulation, infiltration and spying that worked against us before.

We do not seek revenge against those who blundered in the past. Nor are we seeking silence from those who deny the blunders or are blind to the dangers we face. Let them speak. But let us weigh their words against the facts as we know them. And I believe when we do, responsible Americans will support with vigor continued efforts to stamp out the Red evil in our time.

Now, what of the future on other fronts?

As I said, last year we gave the largest tax reduction in the history of the country. It is on that solid foundation we will make 1955 a year of prosperity. You may recall how some political partisans were saying last year that we were in a depression. Well, they were just as wrong as men can be. That depression was averted by wise leadership—1953 and 1954 were the 2 most prosperous years in our history, and 1955 will also be a great year for America.

Official Government statistics show that for automobiles, furniture, appliances, food, clothing, personal services, and traveling, our people will spend more—by many, many millions—than they did in 1953 and 1954. In addition, industry alone will spend a record-breaking $27 billion for construction this year.

The President envisions, and I heartily concur, that a long period of great expansion, stretching to new horizons of peace and plenty, is ahead for us all.

The President's concept of the future is based on the conviction that private citizens must have the widest latitude to contribute to the development of the economy—an opportunity consistent with the needs of all our people, one in concept with the enterprise and ingenuity that built the great Nation we serve today.

This means for the future more good homes, more good schools, better health facilities, and lessening of the impact of disaster upon our citizens in all walks of life.

Our people are self-reliant. They always have been. Thus we build to strengthen that self-reliance instead of weakening it with paternalistic governmental interference in our daily lives.

With this in mind, the President has presented to Congress a program of progress. Designed to supplement the accomplishments of the 83d Congress, this program consists of:

An adjustment of trade regulations to promote the flow of trade and capital between friendly nations and to protect American industry.

A continuation of policies to ferret out and neutralize subversion.

A further cut of $4½ billion below Government spending in the fiscal year which ended last June 30.

Improvements in the partnership development between Government and private enterprise in the utilization, conservation, and development of our natural resources.

Extended development of a modern highway system in keeping with the growth of our population and the expansion of our towns and cities.

More than $12 billion for the development of flood control, navigation, harbor improvements, construction of roads, schools, and other utilities.

Improvements in programs to provide better care for our mentally ill, our crippled children, and voluntary health insurance coverage by private concerns.

And, finally, but not the least in importance, the continuation of policies which meet the broad requirements of a growing nation, dedicated to the needs of our steadily increasing standard of living.

Our chances of success on the legislative front are great if our legislators meet the challenge before us. Politically we have a divided house, but the problems this presents should not blind us to the human needs of our people in the days ahead.

I cannot help but be enthusiastic about the future. Just recently—if you will grant me a personal remark—I completed 40 years of public service. At no time in those 40 years has America ever looked more strong, more abundant, or in better shape to grasp the opportunity for progress that lies ahead.

We have a way of life that is the envy of the world. We have never faltered in sharing our bounty, nor will we now blight our future by selfish motives.

Two global wars have thundered across the vistas of our dreams for peace and plenty. These wars have claimed too many of our courageous young.

More than ever today the world is aware that wars settle nothing, that man's search for peace must be fruitful or we perish.

Let us resolve that in the days ahead we will be strong and steadfast, yet patient and prayerful, and as dedicated Americans work toward the goals we all seek.

Abundance is bulging on the horizon of our lives. The sum of man's knowledge in science, art, and religion mounts steadily toward the rising star of permanent peace and freedom.

The decades of desolation of spirit and wealth lie behind us if we move with confidence and inspiration in the days ahead.

We must work together as Americans; we must unite to help those who lead us.

Our great President, Dwight Eisenhower, has dedicated much of his life to public service.

If we falter in our support of his hopes and ideals, we add to the burden he carries for us all.

Let us as free men take up our share of the task ahead. Let us walk together with buoyant confidence that in God's will the pathways of peace and plenty will climb to the pinnacle of man's faith and spirit that rests in the hearts of men of good will everywhere. By striving thus we will reach the goals of peace, progress, and prosperity for all mankind.

Exchange of Letters With General MacArthur

EXTENSION OF REMARKS
OF
HON. VICTOR L. ANFUSO
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. ANFUSO. Mr. Speaker, I have recently had an exchange of correspondence with Gen. Douglas MacArthur which, I am certain, will be of utmost interest to all Members of Congress and to the Nation as a whole.

On January 26, General MacArthur delivered an address in Los Angeles which aroused deep national interest. In it he urged the United States to proclaim its readiness to abolish war, in concert with the other powers of the world. After reading his address in the newspapers, I wrote to him on February 3 and offered to introduce a resolution in Congress declaring that "it is the will of the American people to abolish war as a means of settling international disputes."

On February 7, General MacArthur replied to my letter saying it would require more than congressional expression "to trigger a worldwide movement for the abolition of war." Instead of a resolution, he suggested that I present the matter on the floor of the House and from here "build up gradually to more aggressive action to implement the basic concept."

Mr. Speaker, I shall be glad to take up General MacArthur's suggestion and I hope to bring this matter to the attention of the House in the near future at which time I will be ready to discuss it in greater detail and to present my views on the subject.

I am extremely interested in the idea of developing a people-to-people approach to the problem of international peace, and I shall utilize all efforts in that direction. I welcome the views and suggestions of anyone who can contribute constructively toward the furtherance of this idea.

In the meantime, I desire to place into the RECORD the exchange of correspondence between General MacArthur and myself:

FEBRUARY 3, 1955.

Gen. DOUGLAS MACARTHUR,
New York, N. Y.

DEAR GENERAL MACARTHUR: I was very much interested in your statement which I read in the New York Times, urging the abolition of war. This is very commendable on your part and certainly you, as the greatest living soldier, are qualified to speak on this subject.

What do you think of my introducing a resolution in Congress declaring that it is the will of the American people to abolish war as a means of settling international disputes? The approved resolution of the Congress, signed by the President of the United States, should also call upon all other nations to adopt similar resolutions.

I am not sufficiently convinced that the United Nations is doing the job intended for it. I favor more of a people-to-people approach to the problem.

Before doing this I would be most appreciative of your views and any further suggestions.

In high esteem, I remain

Sincerely yours,

VICTOR L. ANFUSO,
Member of Congress.

FEBRUARY 7, 1955.

The Honorable VICTOR L. ANFUSO,
Congress of the United States,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN ANFUSO: I am grateful indeed for the support of my views on the futility of war as reflected in your thoughtful note of February 3.

It has always been my opinion that war's abolition can only come about through the emergence of a leadership in world affairs with the strength and vision and moral courage to proclaim a readiness in concert with other major powers, to enforce it as a matter of constitutional doctrine by specific constitutional proscription. There is no doubt in my mind but that the great masses of every nation in the world, whether on this side of the Iron Curtain or on the other, would, as a matter of self-interest and protection, fully support such a constitutional limitation upon political power and zealously guard it against any despot's violation or abuse. For even in totalitarian regimes the leaders show at least token respect for the constitutional rights of the citizenry. This because all people, even those partially enslaved under oligarchic rule, have grown to look to their constitutions as the final repository and safeguard of their remaining liberties. Thus today, even the Soviet leaders do not so defy the will of the masses as to openly nullify their constitution. They may fool them. They may ignore rights to individual protection. They may sugar-coat many of the constitutional provisions to make them appear to give to the people rights and liberties which they do not in fact give, but they do give them a body of constitutional laws as something they have grown to expect and to demand, just as they constantly prate about peace being the ultimate objective of all public policy because they fear the masses will revolt against any course openly leading to war.

So in my opinion, it would take more than the congressional expression which you suggest to trigger a worldwide movement for the abolition of war. It would take a ringing affirmation of a dedicated leader commanding universal respect, capable of arousing the conscience of mankind into a crusade against lagging leaders who in the mad lust for ever increased political power willfully ignore the realism that war as an instrument of political power has been outmoded by the advance of science. I do not know when this Nation will be blessed by such a leadership but I pray that it will be before it has been drawn through the tragedy of another and infinitely worse cataclysmic conflict.

I would therefore suggest that instead of submitting a resolution, that you limit yourself initially to presenting your basic views on the floor of the House. From such a beginning you could build up gradually to more aggressive action to implement the basic concept.

With every good wish,

Most cordially,

DOUGLAS MACARTHUR.

The Law of the Land

EXTENSION OF REMARKS
OF
HON. JAMES G. FULTON
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. FULTON. Mr. Speaker, I arise to congratulate Robert Post, of Pittsburgh, whom we all know as Bob Post, on the production of his motion picture The Law of the Land, which is doing so much to explain to the people of the United States the method of the making of the laws in the United States, as well as the practical working of the United States Congress.

We who have known Bob Post for many years, are pleased with the recognition which is being given both to the picture and the producer. On Tuesday, February 22, 1955, at Valley Forge, Pa., Bob Post has received Freedom Foundation's award for producing the picture which they say is "an outstanding achievement in helping to bring about a greater understanding of the American way of life during 1954." I believe that Freedom Foundation has made a wise choice in naming as one of the recipients of the George Washington Honor Medal for 1954 both my good friend Bob Post as well as the fine motion picture The Law of the Land.

Another individual who has by his support contributed much to the success of the picture is David J. McDonald, president of the United Steelworkers of America with headquarters in the Commonwealth Building, Pittsburgh, Pa. David McDonald is to be complimented for recognizing the value of the picture The Law of the Land and arranging for its distribution and showing among the members of the United Steelworkers, in order to bring to the working men and women a fine view of the working of the United States Congress and our United States Government.

Mr. McDonald knows the eager interest with which our working people are learning and taking new part in our local State and National Government bodies, which is making for an informed and intelligent electorate among the people. The action of labor leaders in our labor relations in developing an informed and

experienced electorate, will make for efficient and stable Government in the future, and contribute to the stability of our system of Government.

We hear many cries against various groups in this country, but there is one point on which we can all unite, and that is the development of an intelligent and informed, free electorate. We are proud that David McDonald and the United Steelworkers of America have seen fit to purchase copies of this picture that will give the congressional story national distribution. In its preface Mr. McDonald states:

Unselfishly, this picture is available to other labor unions, schools, church groups, fraternal and civic organizations—in fact, anywhere that Americans congregate.

This is labor statesmanship.

Address of Secretary of Labor Before the New England Governors' Conference

EXTENSION OF REMARKS
OF
HON. THOMAS J. LANE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES
Wednesday, February 16, 1955

Mr. LANE. Mr. Speaker, under leave to extend my remarks, I wish to include the following address of the Secretary of Labor, the Honorable James P. Mitchell, before the New England Governors' Conference, Boston, Mass., on November 18, 1954:

I appreciate this opportunity to speak before this distinguished group. Your conference is in the best tradition of our American heritage. It is an effort through cooperative endeavor to promote the well-being of the people in your area. This approach commands the respect and admiration of all of us.

The great natural resources of New England, the ingenuity and industry of its management, and the skill and resourcefulness of its workers would seem to make it a most attractive and profitable place for industrial enterprise. In addition, the high degree of labor-management harmony and the maturity of the relationships between workers and employers would seem to be conducive to high production and successful operations. Consequently, when some companies closed their New England plants or let them become obsolete and built or expanded in other areas, you tried to find out why and to correct your difficulties and attract new industries.

I have reviewed many of the studies of the New England economy. From this I have concluded that you are trying to solve problems with the intelligence, initiative and resourcefulness for which you have always been noted. As a result of the work of conferences such as this, the efforts of the New England council, the studies which you are promoting, and the local efforts to attract and expand industry, I see a bright future for this region.

The whole history of our country has been one of change, growth, and progress. That is the process now going on in New England. I note that you are diversifying your industries and shifting into production of the new products of this electronic age. No longer is the future of your area tied as closely to its traditional industries, some of which are experiencing a long-term decline.

You lost the village blacksmith to Detroit, and some of the textile mills to the South, but in their place you are expanding your transportation equipment industries, your electrical machinery manufacturing, your jewelry and silverware industries, your aircraft plants, your fabricated metal products factories, and your recreation and resort facilities. Each new age has found you meeting its challenge. You may be justly proud of your past and fully confident of your future.

The industrial transition which you are undergoing will undoubtedly be faced by other sections of the country from time to time. The problems you are meeting as employment in some industries declines and the lessons you are learning to increase employment in other industries can be studied with profit by every region of the country.

The entire country has recently been going through a period of changeover from high-level defense production to a more normal economy. This changeover has been superimposed in New England on a regional transition which had been building up for a long time and which has been accelerated since the end of World War II. In 1939 two-thirds of the region's manufacturing employment was in the soft-goods industries, but in 1954 just over 50 percent of the workers are producing nondurable goods. There has been a great increase in the production of electronics and other electrical equipment, fabricated metals, and transportation equipment, and considerable decline in the textile industry which employed 281,000 workers in September 1939 and only 173,000 in September 1954.

Since the end of the war there has, as you know, been a nationwide decline of employment in the textile industry, although not as great a drop for the country as a whole as for the New England region. The overall decrease has been due in part to the shift to the synthetics and in part to improvement in techniques of producing the conventional cottons, woolens, and silks which began in the 1920's. Output per man-hour in the decade 1929–39 increased by 41 percent in woolens and worsteds, by 46 percent in cotton goods, and by 131 percent in silk and rayon. Increases in productivity slackened during World War II, but the recent installation of new types of textile machinery has greatly increased output per worker since 1947.

The essence of the New England economy is its ability to utilize its outstandingly able labor force and its mature labor-management relations. New England's record in labor-management relations, as measured by the number of man-days lost through strikes, continues to be excellent. For example, in 1953, only 4.9 percent of the Nation's man-days of idleness from work stoppages were in New England, whereas New England has 7.1 percent of the Nation's nonagricultural employment. This same favorable record has existed in nearly every postwar year.

New England, in common with the rest of the country, has an interest in taking steps to eliminate unemployment. This is a problem which can best be solved at a local level. The Federal Government can make some contribution but cannot do the job alone.

Like other areas, New England has benefited from the procurement activities of the Federal Government. For example, from July 1 through November 13, 1954, at least 70 contracts, each of one-half million dollars or more, were awarded to firms located in New England. These large contracts had a value of over $208 million. They covered such diverse items as cartridges, propeller assemblies, helicopters, aircraft engines, barracks, woolen cloth, sonar sets, electronic equipment, mine sweepers, parachutes, shoes, wire, chemicals, amplifiers, antennas, rifles, coal, plastic dinnerware, automatic screw machines, a hospital, a radar gunnery trainer, a warehouse, a submarine, and spare parts for aircraft.

In the first 10 months of 1954, the value of Federal contracts awarded for highway construction was over $5¾ million in Connecticut, over $4¾ million in Maine, over $16½ million in Massachusetts, almost $6 million in New Hampshire, over $2¼ million in Rhode Island, and over $4½ million in Vermont.

I cite these figures only to indicate that I believe New England is getting its share of Federal expenditures and to express the hope that this has been helpful to your economy.

While there has been a recent decline in unemployment, we in Washington are not complacent about the unemployment situation. We are determined to take all possible steps to promote job opportunities. We are trying to make sure that all of our policies—legislative and administrative, financial and operating—promote the economic welfare of the American people. I am sure that you in your own areas have the same objectives and are working toward the same end.

There are many areas in which we can work together for the benefit of the people of your region and the Nation as a whole. These include the Federal and State programs to promote the social and economic welfare of the American people.

Many Americans are concerned about the growth of Federal bureaus and programs in recent years and the pressures to add still more functions that will make the Government bigger.

No one seriously suggests that the role of Government in today's dynamic economy should fail to keep pace with the changing times and the altered needs of the American people. But we must continually ask ourselves whether the governmental action that will do the job best may not actually be, in many instances, that of the State or community which is most familiar with the particular problems of the citizens who live there.

In a letter to the Congress, on March 30, 1953, President Eisenhower pointed out that "the Federal Government has entered fields which, under our Constitution, are the primary responsibilities of State and local government. It has led to duplication and waste. * * * The maintenance of strong, well-ordered State and local governments is essential to our Federal system of government."

However, until our State and local governments take positive and well-considered steps to meet the demands of their own citizens for the performance by government of necessary functions, the pressures on the Federal Government to do what the local governments could do but have not done will continue. As in the past, such pressures will encourage the further expansion of Federal regulation and control in these areas.

Consequently, it will be to our mutual advantage to explore today those areas in which further State action is desirable.

The New England States pioneered in State minimum-wage legislation. Massachusetts passed the first law in 1912. Currently, all of your States but one have minimum-wage laws, although one is limited to its coverage to a single industry. New England not only set the trend in minimum-wage legislation, but also in covering men under such laws. Connecticut was the first State in the Nation to take this action. New Hampshire, Massachusetts, and Rhode Island soon extended their laws likewise to cover men. The pattern set by the Federal Fair Labor Standards Act in giving wage protection to both men and women has been more commonly accepted in this New England area than anywhere else in the United States. Of the 5 laws now covering man, 4 are in this area. Likewise, this area has followed the pattern of the Federal act in establishing a statutory minimum. Three of your State laws estab-

lish a statutory minimum rate; and Connecticut was the first State to meet the 75-cent minimum rate set by the Federal act.

Despite the great progress that has been made, there is still work to be done in this area. I hope that this region will work toward having in every State minimum-wage legislation that sets a realistic statutory minimum rate and covers men as well as women workers.

Workmen's compensation is one of the areas in which this Department is intensely interested. Under the leadership of Under Secretary Larson, who is an expert in this field, we hope, with the cooperation of the States, to make real progress and to strengthen this most important program for working men and women.

When workmen's compensation laws were first passed, they contemplated benefits approximating two-thirds of the worker's wages when he was incapacitated from an occupational injury. Now due to rising wages and increased cost of living, weekly benefits fall far below this standard. Likewise, many employees are not covered at all because of the exemption of small employers. In the 6 New England States, for example, all laws exempt employers with less than a specified number of workers, ranging from less than 3 to less than 8. The average weekly earnings of factory workers in the United States are over $72. Only 2 of the 6 New England States—Connecticut and Massachusetts—provide a maximum weekly benefit of $40 or more for temporary total disability. For the other 4 States, the maximum ranges from $25 to $33.

In many other areas, we need to strengthen our workmen's compensation laws. The need for coverage of occupational diseases as well as injuries resulting from accidents is obvious. Three of your States (Vermont, New Hampshire, and Maine) limit such coverage to a specific list or schedule of diseases. With new industrial processes constantly being developed and exposing workers to new hazards, it is essential for workmen's compensation laws to provide for full coverage of occupational diseases, as is now done in more than half of the States.

This is another area in which there is still room for progress in New England.

By and large, the unemployment insurance laws of the New England States compare favorably with those in other jurisdictions. The basic maximum weekly benefit amounts range from $25 to $30. In Connecticut and Massachusetts, where recognition has been given to family responsibilities, the maximum weekly benefit is greater for the individual with dependent children—up to $45 in Connecticut, and limited to the individual's average weekly wage in Massachusetts.

Of the New England States, New Hampshire is the only one which nearly approaches the President's recommendations for an improved unemployment insurance program so far as duration of benefits is concerned. All eligible individuals may receive benefits for 26 weeks if they continue to be unemployed through no fault of their own. In Maine and Vermont, all eligible olaimants are entitled to uniform duration of 20 weeks. The remaining 3 States provide for a maximum of 26 weeks but many workers are entitled to fewer weeks of benefits, depending on their earnings in the prior year.

In the New England States other than New Hampshire, the percentage of maximum weekly benefits to average weekly wages ranges from 38.1 to 45.2; in Connecticut and Massachusetts, individuals with dependent children receive a higher percentage of their average weekly wage. The majority of claimants in New Hampshire would receive benefits up to one-half of their average weekly wage only if its benefit formula were changed from one in which the weekly benefit is based on a fraction of a full year's wages. This is due to the fact that use of a fraction of a full year's earnings tends to depress the weekly benefit because of the inclusion of weeks of less than full-time earnings as well as weeks of no earnings. Maine, with a maximum weekly benefit of $27 and uniform duration of 20 weeks, is hampered by its type of benefit formula so that only 21.6 percent of insured claimants in 1953 were eligible for the maximum weekly benefit amount.

As you can see, this is another area deserving of your careful consideration. This is particularly true because of the increasing attention being given to stabilization of income. This type of income security is sometimes called the guaranteed annual wage. Actually, in many cases unions demanding a guaranteed annual wage are really looking for supplementary unemployment compensation. Improved unemployment-insurance systems would help alleviate this problem.

One of the major problems in the field of economic security is maintaining the income of individuals and families when the wage earner is ill and unable to work. The need of workers for income maintenance during periods of unemployment caused by illness is possibly even greater than their need for income when the unemployment is due to lack of work.

Yet while all States have statutory provisions for unemployment insurance, only four provide their workers with statutory protection against loss of wages due to nonwork-connected disabilities. Of the 4 States, the one in New England—Rhode Island—is the pioneer. In other New England States the legislatures have considered disability insurance. Connecticut and Massachusetts have given it active consideration over quite a period. Vermont is one of the 6 States which has modified its unemployment insurance law to permit an unemployment claimant to continue to receive benefits even though he becomes unable to work during an uninterrupted period of unemployment, provided that he does not refuse work which would have been suitable if he had not become sick.

The importance of disability benefits to the workers in a State is indicated by the fact that in 1953 Rhode Island paid $12.6 million in unemployment insurance benefits and $6.2 million in disability benefits.

The field of temporary disability insurance is worthy of further attention. It is an area in which protection is needed and State action is warranted.

I should like to stress the importance of a strong, coordinated State labor department to the States' efforts to meet their responsibilities to the wage earners within their borders. A State labor department should administer labor laws, but it should do much more. It must provide the planning and leadership that are vital to achieving the objectives of a growing economy, good labor standards, safe work places, and the minimizing of industrial disputes. Only through such a strong labor department can these objectives be carried out with the flexibility required by our changing social and industrial developments.

A labor department is the agency of State government to which workers and employers should be able to turn for advice and help in meeting everyday problems of employment and in planning for the future. The New England area is fortunate that it has had functioning labor departments over a very long period. I can think of nothing that I would consider more important in terms of the welfare of the wage earners of your States than to strengthen that agency of your State government that gives leadership in the conservation of the State's human resources.

There is a great need for State facilities to provide effective mediation and conciliation services in labor-management disputes. Generally speaking, the Federal Mediation and Conciliation Service limits itself to labor-management disputes which threaten a substantial interruption of interstate commerce. Unless the States step in, there is a no-man's land in other labor disputes where no mediation services are offered.

State agencies are particularly well qualified to help settle labor disputes. They are in the best position to understand the local problems and the local interests involved. The local community suffers the toll of labor disputes more than any other area and, therefore, settlement is primarily the interest of the State.

Unfortunately, many States do not provide active mediation services, making it impossible for them to bear the responsibility which is properly theirs. The active services include certain New England States, but there is room for improvement here as in other areas. Three of the States in your region have what could be called fully effective State mediation and conciliation services. In the other three States, you obviously have room for some progress.

All of the New England States have basic safety laws and an agency charged with administering those laws. Four (Massachusetts, Rhode Island, New Hampshire, Vermont) have delegated full authority to the administrative agency to draft rules and regulations to carry out the intent of your basic safety law and to provide the flexibility required to keep pace with rapidly changing industrial processes. One State (Connecticut) has no such general authority, and in the other one (Maine) the authority appears to be somewhat limited.

Experience shows adequate industrial safety for employees can never be achieved unless regulatory authority is given to promulgate safety codes, and that authority is actually used to build a solid foundation on which a safety structure can be erected. Now, I do not mean that safety code enforcement is all that is involved in a good safety program. If that were so, your inspectors would only need to be good policemen. They must be much more than that. They must be highly trained technicians, skilled in the best accident-prevention methods and able to put their knowledge to use.

Every worthwhile safety program is based on the premise that a safe and healthy place to work is provided the employee. Everything else—training, supervision, and employee cooperation—that enter into the program must follow. And a trained staff, working with an adequate safety code structure, can do a great deal to show the employer how to provide a safe work place.

I believe you will wish to look into this problem. Where you lack basic legal authority to carry on good safety programs, you will want to remedy that as soon as possible and strengthen your State resources for the promotion of occupational safety on every front. Every dollar spent in accident prevention will yield high dividends in reduction of costs resulting from occupational accidents and in the conservation of the Nation's greatest resource—its workers.

The Labor Department's Bureau of Apprenticeship is charged with promoting apprenticeship and industrial training. I have instructed this Bureau to encourage management and labor to expand their efforts in improving the skills of the Nation's work force. All of us know that this is extremely important to our economy at all times. I have also directed the Bureau of Apprenticeship to encourage State agencies to assume more leadership and more responsibility in the promotion of sound apprenticeship programs.

As you know, each of the New England States has an active apprenticeship agency. However, improvements can be made. Two-thirds of the New England States do not have active State staffs and therefore are

not in a position to give the necessary promotional and technical assistance to the people in their industries.

I strongly urge you to evaluate what is currently being done in your States and to improve and intensify training efforts to expand the skills of the entire New England work force.

I particularly urge you to consider the importance of adequate training programs for the young people of your States who are for the first time entering employment. Attention should be given to the special supervisory problems involved in their training and emphasis should be placed on application of safety rules.

All levels of Government should be concerned not only with apprenticeship training but also with the many other very important types of training. We in the Labor Department are in the process of launching a new program to encourage effective training for all workers. The responsibility for developing the skills of employed workers lies with management and labor. The role of the Federal, State and local governments is only to assist and help. This role is important, however, and deserves our fullest support.

We have gone a long way in the United States in correcting child-labor evils since the early days when so many workers in mines and factories, including the growing textile mills of New England, were young children. New England was the pioneer in seeing the evil of child labor and in enacting legislative remedies. It was in Connecticut in 1813 and Massachusetts in 1836 that the first child-labor laws were passed. But as child-labor protection has become a nationwide movement, New England as a region has lost its lead. The nationally accepted standard of a 16-year minimum age for employment during school hours has been met by only 4 of the 6 New England States (Connecticut, Maine, Massachusetts, Rhode Island). Rhode Island is the only State in this area to set a maximum 40-hour workweek for boys and girls under 16 and Connecticut the only one with a maximum 8-hour day and 48-hour week standard for those 16 and 17 years of age.

In the early days of our Nation farmwork was a family activity, but now the widespread practice of depending upon seasonal hired laborers has made the protection of children working in agriculture one of our greatest needs. We have made too little progress anywhere on this front. For example, among the New England States not one applies to agricultural employment a 16-year minimum age for employment during school hours, and only Connecticut has a 14-year minimum age for limited agricultural work outside school hours.

Much remains to be done by the New England States to provide the basic child-labor protections that are generally accepted today as necessary to safeguard the educational opportunity of our youth and advance constructive employment opportunities for young people when they are ready to join the Nation's work force.

We all know that despite our professed beliefs in the equality of man, certain groups among us are discriminated against because of their race, color, religion, or national origin. When this discrimination affects a person's opportunities for employment, it is particularly pernicious. The freedom to earn a living without being discriminated against is as important to the individual as the better-known civil rights and freedoms guaranteed by the Constitution. Freedom of speech, assembly, and religious worship may seem to be empty phrases to a person who is deprived of his chance to make a living because of the color of his skin, or the way he worships God or because his ancestors were members of a particular national group.

As you know, there has been a long struggle for the enactment of Federal legislation to meet this problem. One of the arguments against Federal legislation in this field is that this matter should be dealt with by the States. To lend validity to this argument, however, the States must take some action to eliminate this injustice to large numbers of their people.

Here in New England three of the States, Massachusetts, Connecticut, and Rhode Island have acted. These States have statutes against discrimination in employment which have demonstrated that State action along this line can be effective. The annual reports of the State agencies administering these laws indicate that they have succeeded in reducing discrimination in employment. They have opened up employment opportunities where members of some groups have previously been barred.

I commend to the attention of other States the experience of Massachusetts, Connecticut, and Rhode Island in meeting the problem of discrimination in employment.

There are two significant population trends which I believe I should discuss with you before closing. First is the bumper crop of World War II babies now going through the school systems of the Nation and soon to be candidates for their share of employment opportunities. Second, and of real concern to the New England area, is the increasing representation of older workers both in the general population and in the labor force. People 45 and older have increased from 17.8 percent of our population in 1900 to 28.4 percent in 1950. They will comprise nearly 50 percent by 1975.

Studies conducted in selected areas through State employment security agencies have established clearly that, in spite of the present high levels of production and employment, older workers are at a distinct disadvantage in obtaining new employment. Unless the economy achieves considerable further expansion, the large number of young people born in the 1940's who will reach working age in the 1960's will create much heavier competition for jobs.

It follows, then, that unless hiring and retention practices of employers detrimental to the interests of older workers change before the 1960's, an excessive number of older people will suffer unemployment and dependency. In this respect, New England faces a particularly acute situation. Great concentrations of older people tend to be found in the older industries. This is true in the case of textiles, which have in the past represented such a large part of New England's industrial endeavor, and it is true also in the metal trades, which account for much employment in this region.

In recognition of the impact of these problems in your States, Rhode Island, Massachusetts, and Connecticut have established committees on the aging which are giving earnest attention to constructive actions that may be taken. I share their concern. We at the Federal level are also working on this problem. It will take the best cooperative efforts of all of us to find the solution.

Thank you for permitting me to discuss with you some matters of mutual interest. These are some of the many areas in which we can work together for the benefit of the people of New England and the country as a whole. I hope that you will call upon me whenever the Department of Labor can be of assistance. You may be assured of our earnest desire to cooperate with you on behalf of the general welfare.

HOUSE OF REPRESENTATIVES

THURSDAY, FEBRUARY 17, 1955

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D. D., offered the following prayer:

O Thou who wert the God of our fathers, and in whom they trusted and were not confounded, we rejoice that Thou hast been the God of all their succeeding generations.

May our own life, with its manifold trials and temptations, problems and perplexities, daily become richer and stronger in the realization of Thy presence, Thy peace, and Thy power.

Show us how we may add strength and beauty to our moral and spiritual stature and find in Thee those reinforcements and durable satisfactions which will enable us to carry on courageously and victoriously.

Grant that, in the sphere of our human relationships, we may never fail to manifest the virtues and the courtesies of considerateness and patience, of kindness and love.

Help us to hasten the dawning of that blessed day when men and nations everywhere shall rise out of the hatreds and enmities of the jungle and seek to live and labor together in the spirit of friendship and fraternity.

Hear us in the name of the Christ, the Prince of Peace. Amen.

The Journal of the proceedings of yesterday was read and approved.

LOUISIANA MARDI GRAS BALL

The SPEAKER. The Chair recognizes the gentleman from Louisiana [Mr. THOMPSON].

Mr. THOMPSON of Louisiana. Mr. Speaker, today the Louisiana Mardi Gras flags are flying from the mast of the Mayflower Hotel. The Louisiana State Society again this year brings to Washington a little of Louisiana by way of a colorful Mardi Gras ball, which is to be held in the grand ballroom of the Mayflower Hotel tomorrow night.

The ball this year is dedicated to our great rice industry, and here for the occasion is the pride of Louisiana's finest resource—its youth, represented by 21 of our most beautiful girls, each a queen of one of Louisiana's many festivals.

The tableau of the ball, Mr. Speaker, will depict the migration of the Acadians from Nova Scotia to Louisiana, in this the bicentennial year of that historic event. This tableau will be produced by Mr. William Graham, of Catholic University, with a cast of students of the university's school of speech and drama. The guest narrator for the occasion will be Mr. Tony Marvin, of the Columbia Broadcasting System.

The pageant of queens will follow, with each queen in full regalia, and finally, the queen of the ball, her majesty, Alice Gay Soileau, will be escorted by none other than Mr. Democrat of America, to her king.

The king, Mr. Speaker, whose identity has been a closely guarded secret until now, will be Mr. Harry G. Chalkley, of

Lake Charles, La., who truly represents Louisiana's rice.

We of the Louisiana delegation are proud that our folks back home have again honored us by the visit of this fine group who are with us today.

FACTS ON THE LOUISIANA STATE SOCIETY'S 1955 MARDI GRAS BALL

PARTICIPANTS IN THE BALL

Queen: Alice Gay Soileau, 22-year-old daughter of Mr. Audley J. Soileau of Ville Platte, La., an old town founded by one of Napoleon's lieutenants, is a descendant of the Acadian French who migrated to Louisiana from Nova Scotia 200 years ago. She is a graduate of Sacred Heart Academy of Grand Coteau, La. She speaks French fluently and is presently teaching school in Louisiana. Her twin brother is serving with the United States Army. Congressman T. A. THOMPSON, Seventh District, Louisiana, is the queen's godfather.

King: Harry G. Chalkley, a native of Lake Charles, La., is a rice grower and cattleman. He is vice president of the American Rice Growers Cooperative Association; a member of the Secretary of Agriculture's Advisory Committee on Rice, the Committee on Research on Rice, and the Commodity Credit Advisory Committee on Rice. He is past president of the Louisiana Farm Bureau and is presently chairman of the Louisiana Farm Bureau's Rice Committee. He is president of the Sweet Lake Land & Oil Co., and is a member of the agriculture committee of the United States Chamber of Commerce. Mr. Chalkley is a graduate of the United States Naval Academy and is a retired captain in the United States Naval Reserve.

Maids: Miss Corinne Boggs, Miss Lynn Prescott, Miss Andrea Anderson, Miss Patti Bean, Miss Barbara Boggs, Miss Catherine Bourg, Miss Amelia Ann Broussard, Miss Elizabeth Coulon, Miss Sarah Foret, Miss Myrtis Mixon, Miss Mercedes Ann Prudhomme, Miss Barbara Rubenstein.

Princesses from rice areas of other States: Miss June Dodd, California; Miss Anne Eastland, daughter of Senator and Mrs. James O. Eastland, Mississippi; Miss Catherine Kilday, daughter of Representative and Mrs. Paul J. Kilday, of Texas; Miss Martha Mills, daughter of Representative and Mrs. Wilbur Mills, of Arkansas.

Acadian bicentennial representative: Miss Hattie Maraist.

Tableaux presented by speech and drama department of Catholic University of America under direction of Mr. William Graham.

Her majesty, the queen, presented by the Honorable SAM RAYBURN, Speaker of the House of Representatives.

Queens: The following queens from Louisiana and their representations are: Miss Betty Burgess, Louisiana Shrimp Festival, Morgan City, La.; Miss Elizabeth Carter, Louisiana Forest Festival, Winnfield, La.; Miss Lucille Cassidy, Paper Festival, American Legion, Bogalusa, La.; Miss Georgia Alice Cayer, Domino Festival, Chenneyville, La.; Miss Grace Delcambre, Louisiana Yambilee Festival, Opelousas, La.; Miss Gail Dugal, Camellia Festival, Lafayette, La.; Miss Cindy Gardiner, International Rice Festival, Crowley, La.; Miss Janice Hayman, Southeastern Louisiana Rose Festival, Bogalusa, La.; Miss Janice Hebert, Cotton Festival, Ville Platte, La.; Miss Jan Johnston, Louisiana Peach Festival, Ruston, La.; Miss Jane Kerne, Louisiana Sugar Cane Festival, New Iberia, La.; Miss Lois Leblanc, Iberia Parish Festival and Agriculture Fair, Delcambre, La.; Miss Marcie C. Mizell, American Legion Post, Bogalusa, La.; Miss Martha Richards, Livestock and Pasture Festival, Marksville, La.; Miss Jeanette Patin, Louisiana Dairy Festival and Fair Association, Abbeville, La.; Miss Myrna B. Soileau, Tournoi Festival, Ville Platte, La.; Miss Nancy Joe Theriot, Southwest Louisiana Mardi Gras Association, Lafayette, La.; Miss Linda Thompson, Holiday in Dixie Festival, Shreveport, La.; Miss Delores Vaughn, Louisiana Farm Bureau Federation, Baton Rouge, La.; Miss Ruth Elizabeth Wall, Queen of the Spirit of Mardi Gras, New Orleans, La.; Miss Sally Ware, Northern Louisiana Delta Festival, Bastrop, La.

Officers of the Louisiana State Society: Felix M. Broussard, president; Representative T. A. Thompson, first vice president; Representative Edwin E. Willis, second vice president; Paul E. Jones, treasurer; Barbara A. Rathe, secretary; J. W. Hanley, sergeant at arms.

PERSONAL EXPLANATION

Mrs. FRANCES P. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. FRANCES P. BOLTON. Mr. Speaker, on rollcall No. 5, February 8, it was necessary for me to be out of the city due to the grave illness of a member of my family. Had I been present I would have voted "aye" on the bill H. R. 3005.

THE TEXTILE INDUSTRY

Mr. CANFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. CANFIELD. Mr. Speaker, like other Members who represent textile areas, I am very much disturbed about the legislation we are about to consider and I speak as a friend and supporter of reciprocal trade. Most certainly I shall be opposed to a closed rule precluding any amendments from the floor.

I represent a textile area. The textile industry in the United States is an essential industry, but the textile industry is sick and foreign imports are contributing to that sickness. In my area some mills have been forced to close in recent months. Thousands are unemployed. There have been wage reductions. I find no encouragement in the bill we are about to consider today, no assurance of any kind.

SPECIAL ORDER GRANTED

Mrs. ROGERS of Massachusetts asked and was given permission to address the House for 5 minutes today, following any special orders heretofore entered.

RECIPROCAL TRADE AGREEMENTS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, it is my understanding the House is going to consider H. R. 1 today. This bill was introduced by the distinguished chairman of the Ways and Means Committee, and, among other things, extends the authority of the President of the United States to enter into trade agreements with other nations of the world under section 350 of the Tariff Act of 1930, as amended. To the general public, this legislation is known as the Trade Agreements Extension Act of 1955.

It is my view this legislation constitutes one of the most important responsibilities facing the Congress of the United States in many years. This legislation is far reaching. It reaches way down to the very heart of the American economic system. It involves international relations, it involves international politics, it touches the lives of all of the American people.

This Trade Agreements Extension Act of 1955 is concerned with international trade. International trade can be considered from many viewpoints. In the strictest theoretical sense, it can almost be reduced to a mathematical formula. In an economic sense, it spreads itself from a scientific theory clear across international, political, and social considerations to the doorstep of a home in our community wherein the family has lived and depended for years upon one type of work in one type of industry; so much so this family is beyond change. In an international sense, this subject is indeed very, very large and great.

It is well to keep in mind, and may I say that I try to do so, the fact that all legislation, regardless of subject matter, is conceived in human need and human requirements. The world in which we live has reached its present position in a constant process of movement from one factor or consideration in relation to another. In other words, we are not at the point of the beginning of life and living on this earth. If we were, we might then accept and adopt certain laws and methods relating to human endeavor based upon the completely theoretical concept of international trade operation. But, as you know, this is not the case. We must accept the world as we now find it and we must do the best we can in trying to keep things orderly as well as beneficial for our country and our people in their life and living in the community of international society.

Because of the very great importance of this legislation to the American people, I feel compelled to make this appeal to the distinguished Members of this great House of Representatives here in the United States Congress. Before making your decision regarding this legislation and casting your vote, I appeal to every Member to search his or her own mind and knowledge as to whether or not this legislation delegates to the executive branch of the Government powers of the Congress vested in the Congress and only in the Congress by the Constitution of the United States. As Members of Congress, we do not possess the authority or the right to delegate our powers to another division or branch of the Federal Government.

In your thinking about this problem, I appeal to you further to think very seriously as to whether or not it is wise

for the Congress to give the authority provided in this legislation to the executive department of the Government. To be sure, our executive department of Government is now fortunate to have as its Chief Executive one of the really great Americans in our distinguished history. However, as Members of Congress, I think you will agree with me we cannot afford to consider legislation which grants additional powers to the Executive based upon our great and distinguished leadership of the hour. This legislation is far-reaching and there may be a time when the Congress as well as the people of the United States will greatly regret any such extension of power.

Furthermore, I appeal to every Member who may possess in his home district one of the fine old basic fundamental industries of America—an industry which down through the years has helped to establish the great American system of life and living so envied by so many other nations. If you possess one of these industries in your district, I appeal to you to think about all of the effects this legislation—this Trade Agreements Extension Act of 1955—might visit upon this industry and upon the many in your district so dependent upon this industry and who have been dependent upon this industry for so many years.

In my district, in my Massachusetts community, where American freedom was born, and where the free way of life was first established, there is one of these great basic fundamental American industries. It is the textile industry which has done so much for so many; it is the textile industry which has been the backbone of the American economic system during the days when our country was striving on to maturity.

Within the boundaries of this Trade Agreements Extension Act of 1955, there is the opportunity, there is the authority, there is the power to transfer the greatness of the American textile industry into the hands, if you please, of foreign textile barons who do not provide their employees and their labor with a living wage, but, on the contrary, capitalize upon their slavery.

This legislation, I say, contains the power to destroy the American textile industry. If this industry is destroyed, it will carry with it the destruction of business of all kinds, small and large, in our community. It will affect our banking institutions. Yes, it can even destroy the local domestic market of our American farmers for their milk, butter, and eggs.

No American industry, my colleagues, and no American community, should be subjected to this possibility. The high standard of living now enjoyed by the American people certainly should not be lowered, should not be destroyed, and should not be placed in competition with economic systems of foreign countries having no similarity in structure or relationship.

In conclusion, I appeal to every Member of this House to think, to think hard and accurately, and oppose the granting of powers here in this legislation which will permit our great basic industries and our high standard of living, and our way of economic life to be bargained away by international politics and politicians, using the subferfuge and the propaganda that to do so we will provide the big brother aid to the economic systems of foreign nations. A study of these systems, if you care to make them, will disclose that such a sacrifice on the part of America cannot result in a lifting up of the standard of living and life in these countries. All it can possibly do is make rich men in those countries richer and result in throwing millions of Americans out of their jobs and in the end forcing a fundamental change in our way of life, a change which will plunge us head on into socialism.

Oh, I appeal to you, my fellow Members, think, think tonight, think long and hard, for this is important legislation for your country and mine.

CHINA

Mr. FLOOD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, I am advised that there are nearly 400,000 barbers, beauticians, and manicurists in the United States and many schools and colleges exist to train these workers, but I cannot find out how many schools, colleges and universities, or any other source of instruction teach the Chinese language to Americans at a time when we are evincing great interest in China. China is the world's most populous nation and we apparently are under the impression that we should have nothing to do with anything Chinese. I cannot imagine a more ridiculous point of view, and if there ever was a time when the educational institutions and other sources of information should develop an interest in and teach the Chinese language outside of the Armed Forces, but particularly to the men in the armed services, this is the time.

DOMESTIC COTTON TEXTILE INDUSTRY

Mr. DEANE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. DEANE. Mr. Speaker, in the light of today's discussion by the House of H. R. 1, the Trade Agreements Extension Act, much comment is coming from the textile industry on the effect of this bill upon that segment of our national economy. Likewise, cotton farmers are interested in the outcome of this bill and in increasing the export of raw cotton from this country. It is indeed true that unless we can find overseas markets for the cotton we grow which is surplus to our domestic needs, the price of cotton will continue depressed and will affect textile manufacturing.

During recent weeks, I have been conducting research into the status of our cotton textile industry and into our cotton exports, and I believe, Mr. Speaker, that the results of my study of these two matters will prove of some benefit to the Members of this House as we take up H. R. 1 for consideration today.

STATUS OF DOMESTIC COTTON TEXTILE INDUSTRY

Looked at as a whole, our domestic cotton textile industry is generally strong. Its total production of cotton cloth in 1953 was 10.2 billion yards; production in the first 9 months of 1954 was at an annual rate of 9.7 billion yards. Imports in 1953 totaled 62 million yards, little more than one-half of 1 percent of United States production; imports in the first half of 1954 were at an annual rate of 59 million yards, about the same proportion to production as in 1953. While exports have declined from their postwar peak, they totaled 621 million yards in 1953, 10 times as large as imports. Exports during the first 9 months of 1954 were at an annual rate of 597 million yards, also about 10 times as large as estimated imports.

While raw cotton consumption dropped from the peak of 10.5 million bales in the 1950-51 cotton year—August 1 to July 31—to 8.6 million bales in 1953–54, the Department of Agriculture expects domestic consumption to reach 9 million bales during the present cotton year.

The changes in levels of cotton consumption and textile production in the United States undoubtedly reflect the operational adjustments being made by the cotton textile industry—like many other industries—resulting from the expansion brought about by World War II and the Korean hostilities. Nevertheless production in 1953 was within 1 or 2 percent of its output in 1943 when more than half of the year's production of cotton textiles was utilized for war purposes.

RAW COTTON

Raw cotton exports by the United States are expected to reach 4.5 million bales during the current cotton year. This compares with a postwar peak of 5.8 million bales in 1949–50 and a low of 3 million bales in 1952–53. About 500,000 bales of the 4.5 million bales are expected to be sold abroad for local currencies under title I of Public Law 480, 83d Congress.

Thus far in the cotton year only the United States and Mexico are ahead of the export level of a year ago. All other major cotton-producing countries are believed to be behind their 1953-54 rate of exports.

THE LATE HONORABLE PETE JARMAN

Mr. SELDEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. SELDEN. Mr. Speaker, it is with deep regret that I must announce to the Members of the House of Representatives the death this morning of Hon. Pete Jarman, a former Member of the House from the State of Alabama, and

former Ambassador to Australia. Mr. Jarman served with distinction the district which I now have the honor to represent from 1936 to 1948. In 1949, he was appointed Ambassador to Australia and diligently performed the duties of that office through 1953. With his passing today, Alabama and the Nation have lost an outstanding leader and statesman.

Mrs. FRANCIS P. BOLTON. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. FRANCES P. BOLTON. Mr. Speaker, it was indeed a shock to learn that our former colleague, the distinguished gentleman from Alabama, the Honorable Pete Jarman, has died quite suddenly and unexpectedly.

Death comes to us all sooner or later—but somehow a man of Pete's geniality, his friendliness, his humor, seems such a part of active living that one finds it difficult to accept the fact that he has gone from among us. My heart goes out to his delightful wife who has companioned him down the years—may strength and courage be given her in her devastation.

My association with Pete Jarman in and out of the Committee on Foreign Affairs was a most delightful one. We sat on opposite sides of the committee table; but one of the privileges of service on this great committee is lack of party thinking, and the never-failing determination to work for just one thing: the best interests of our Republic.

When Congressman Jarman became Ambassador Jarman he went to Australia with the blessing and the good wishes of the committee on which he had served so well. Those same good wishes go with him as he starts on the road one cannot see. May the Infinite welcome him as he moves out into the larger life.

A PARADOX

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, it was very interesting a few moments ago to hear the gentlemen who represent districts where there is unemployment, state their opposition to the bill H. R. 1, on which we will be called to vote tomorrow.

They want protection for local industries and the employees of those industries.

Yet some of these same gentlemen have been consistent and ardent advocates of aid to other countries, the purpose of which was to train employees, finance industries, whose products are now in direct competition with those of our own industries, and whose protection they now seek.

To me it does not seem logical to tax our people, to send our dollars, our machinery, our technicians abroad to establish an industry and then, when that industry is born and has become efficient, deny it the right to sell its products in this country without restriction.

I shall be paired against the bill, because I believe that we should first consider the interests of our own people.

PERSONAL ANNOUNCEMENT

Mr. MARTIN. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. JOHNSON] may extend his remarks at this point.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. JOHNSON of California. Mr. Speaker, long before H. R. 1 was placed on the calendar for consideration by the House I had made a very important engagement for February 18, 1955, which will take me out of Washington and which I feel I cannot break.

Unfortunately that will make it impossible for me to be present if a vote is taken on the bill on that date, which seems likely now.

However, I have obtained a live pair so the outcome of the vote will not be changed by my absence. I would, if present, vote "no" on the bill and "aye" on a motion to recommit, if one is offered. If the bill is recommitted with instructions I would vote for the final passage of the bill.

TRADE EXTENSIONS AGREEMENT ACT OF 1955

Mr. SMITH of Virginia. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 142) providing for the consideration of H. R. 1, a bill to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, and ask for its immediate consideration.

CALL OF THE HOUSE

Mr. MARTIN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

Mr. SMITH of Virginia. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

Ashley	Hays, Ark.	Meader
Belcher	Hébert	Morrison
Bentley	Hess	Phillips
Bolton, Oliver P.	Hill	Powell
Budge	Hillings	Prouty
Burdick	Hoeven	Radwan
Clevenger	Holifield	Reece, Tenn.
Cole	Horan	Richards
Davis, Tenn.	Jackson	Shelley
Dawson, Ill.	Johansen	Short
Dempsey	Judd	Sieminski
Diggs	Kean	Siler
Dingell	Kearns	Smith, Wis.
Eberharter	King, Calif.	Spence
Ellsworth	Kirwan	Talle
Gamble	Knutson	Teague, Tex.
Garmatz	McConnell	Vorys
George	McGregor	Wolcott
Green, Oreg.	Macdonald	Yates
Gross	Mack, Wash.	Young
	Mailliard	

The SPEAKER. On this rollcall 363 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HOUR OF MEETING TOMORROW

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 o'clock tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

COMMITTEE ON ARMED SERVICES

Mr. BROOKS of Louisiana. Mr. Speaker, I ask unanimous consent that Subcommittee No. 1 of the Committee on Armed Services be permitted to sit this afternoon after the adoption of the rule, during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

TRADE AGREEMENTS EXTENSION ACT OF 1955

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed 2 days, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except amendments offered by direction of the Committee on Ways and Means, but said amendments shall not be subject to amendment. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

Mr. SMITH of Virginia. Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN], and now yield such time as he may desire to the gentleman from Massachusetts [Mr. LANE].

Mr. LANE. Mr. Speaker, when the Trade Agreements Act of 1934 was passed, we were led to believe that it would succeed in overcoming domestic unemployment.

As far as the textile, and a few other sick industries are concerned, this law became an enemy, instead of a friend.

The only spinning and weaving being done in many New England mills is by the spiders on their webs that signify the absence of human activity.

The hard-core facts of unemployment in textiles, among fishermen, and miners are pushed out of sight, under the table, while the State Department conducts experiments in international goodwill to the tune of billions of dollars extracted from Americans.

Judged on its record of recent years, I would say that we do not have much confidence in what it now advises us to do.

If the State Department has no other solution to the problem of providing export markets for Japanese textiles than to dump them in the United States at the sacrifice of our own textile industry, we are forced to the conclusion that it is confused, and does not actually know what it is doing.

International communism will not be stopped by throwing more Americans out of work.

The State Department would be better occupied in devising practical means to save the remainder of Asia from communism, and in restoring trade in the area embracing Japan, the Philippines, what is left of Vietnam, Malaya, Laos, Cambodia, Burma, India, Pakistan, and Formosa, than in surrendering our domestic market to an invasion of Japanese textiles.

Substitution of foreign for American cloth in our home market would deepen unemployment in textile communities that have had the unfortunate distinction of leading the labor-surplus parade, and for years.

The Government would have some defense, at least, if, during all that time, it had come forward with some program to help alleviate the distress of the tens of thousands of textile workers who are unemployed.

It has done absolutely nothing.

But now, exalting international above domestic relations, it plans to add insult to injury by opening the gates to a flood of foreign imports to rescue the Japanese while letting our own people drown.

Japan has a newly rebuilt cotton textile industry that is capable of producing billions of yards of goods at wages averaging 11.9 cents per hour, compared with our New England average of $1.38.

How, in spite of all the camouflage and sidestepping, can the Government keep a straight face in suggesting that the American textile industry and others will not be disastrously affected by the proposal to enter into negotiations with Japan, looking to a further reduction of tariff rates.

For years we gave away billions to foreign nations.

Apparently this was not enough.

They want us to give away our jobs.

Even now, before the full impact of lower tariffs will hit us like a hurricane, those people still working in the textile mills of New England are being conditioned to take a cut in wages.

I ask the Government to come clean, to put it on the line, and dare to tell millmen, union representatives, stockholders, the employees and the unemployed of our textile industry that extension of reciprocal trade will not harm them.

I do this in order to fix responsibility.

Before the Congress votes on this measure, it must face the irrefutable facts of the following wage differentials and be prepared to answer those Americans who will be displaced by foreign imports.

Gross hourly earnings in some of the principal textile-producing countries:

	Per hour
Northern States of the United States	$1.41
All United States average	1.28
Great Britain	.45
France	.39
Italy	.24
Japan	.11⁹⁄₁₀

Gentlemen, do you want to kill off the American textile industry?

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Rhode Island [Mr. FOGARTY].

Mr. FOGARTY. Mr. Speaker, I rise in opposition to the rule. H. R. 1 is vital to the interests of my district. Already, without any further tariff reductions, the principal industries of Rhode Island are menaced by competition from cheap-labor imports. Many thousands of workers have already been thrown out of work in the lace manufacturing industry, in other textile mills, in jewelry-making plants, and other factories. The tariff has already been cut below the peril point.

H. R. 1 would not only authorize the President to make still deeper cuts in the tariff, it would grant him virtually unlimited powers to regulate our foreign commerce through the medium of trade agreements. These agreements under the authority of this bill could contain provisions relating to tariffs, to import quotas, customs formalities, and other matters relating to trade.

This would represent virtually a complete abdication by the Congress of its constitutional powers and responsibility in the regulation of foreign commerce. I am not willing that this be done. There is too much at stake here to pass lightly over. There is too much at stake to put the House under the extreme limitation of a closed rule.

The hearings before the Committee on Ways and Means demonstrated the widespread and serious opposition to the bill as it is drawn. Over a hundred witnesses from some of our most important industries expressed great concern over the consequences of the bill's enactment. These industries included textile manufacturing, chemicals, electrical equipment, wool growing, the fisheries, scientific equipment, coal, oil, cattle raising, cordage, carpets, and a long list of others.

Great concern was expressed over the proposed Japanese trade agreement. I join in that concern. A way must be found to limit and contain the disastrous effects of a further tariff reduction on imports from Japan. No other competition is more difficult for our industries to meet. The bill as it has come from the Committee on Ways and Means has not provided any proper and practical method of coping with this problem. It would simply throw our industries into the struggle without more to look forward to than escape-clause action. The record in this clause as a defense and remedy is very poor. Fewer than 10 percent of the applicants have gained relief.

The serious defects of H. R. 1, including unheard of powers proposed in it for the Executive, and its failure to make it possible to live with the trade agreement with Japan which it specifically authorizes, combine to make an overwhelming case against a closed rule. The House should be given a chance to fit the bill to the vital needs of our industries and their workers.

I strongly urge, therefore, that the rule be defeated.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, once again the duly elected Members of the House find themselves under a threat of an un-Democratic and un-American gag-rule procedure.

House Resolution 142, the rule in question, would make in order H. R. 1, and tie the hands and bridle the tongues of 410 Members of the House who are not members of the Ways and Means Committee.

Only in an extreme emergency could there be any justification for such flagrant violation of the ordinary rules of procedure. No such emergency exists here.

The travesty of it is that legislation will be jammed through the Congress, that was conceived in Geneva, given the official O. K. at the State Department, and written by the Randall Commission. It is handed to you today with the weak apology that 20 members of the august Ways and Means Committee heard your protests but decided that your welfare and the welfare of those constituents should be sacrificed on the altar of world politics.

Not one word do we hear about the welfare of America; about the economic deserts that have already developed; about the ruin that lies ahead for large segments of American industry.

Whether you are seated on the right of the center aisle or on the left of the center aisle, may I plead with you my colleagues to resent this violation of your right and your privilege to participate in the deliberations of the Congress.

It is my plan to demand a rollcall vote on the previous question. You should remain in the Chamber ready to stand and be counted in support of this request. You will then have a chance to say whether you approve or disapprove this violation of your rights.

Once more may I plead with you, my colleagues, to turn a deaf ear to the propaganda of the floor leadership on both sides of the aisle, that you will have an opportunity to recommit this bill. Here and now is the place to make your fight. Let us stand and be counted; let us vote for the interest of America and of our constituents.

Mr. MASON. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. MASON. If we had not had an open rule, we would not have the escape clause in the law at the present time, would we?

Mr. BAILEY. That is true. I thank the gentleman from Illinois for calling

that to our attention. That is the only way I was able to write the escape clause in the law in the beginning.

Mr. CANFIELD. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I am glad to yield to the gentleman from New Jersey.

Mr. CANFIELD. There are certain sick industries in our country today, and one of them is the textile industry. Is the textile industry mentioned in this bill?

Mr. BAILEY. They are not, and there will be no chance to amend the bill unless we have an open rule. Let me say, Mr. Speaker, I will be satisfied if you open this up and give the Members who want to offer amendments a chance to do so. I will take a licking, if it is necessary, but let us make the bill at least agreeable to a majority of the Congress, which it is not at the present time.

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

I am sure, Mr. Speaker, that we always admire and appreciate the sincerity of our good friend, the gentleman from West Virginia, who just spoke. I think we all appreciate that in his district and in his State as a consequence of the coal situation, he does have a problem and, I repeat, we are all pleased to hear from him at all times. But, while he might be opposed to this bill because he feels that the importation of residual oil is the cause of so many miners being out of work, I question whether that is truly the fact. In my considered judgment, the reason why the coal industry is in a bad way is because of the desire of many, many people, millions of people, who want to use oil and gas.

As an illustration of that, only last year there were 9 million barrels of residual oil used in this country. Eight million barrels were produced locally, and 1 million barrels were imported. The gentleman may feel that in the event 1 million barrels of residual oil which was imported had been kept out of the country, the coal industry would have gotten that share. I am frank to confess that I am not an authority on the matter; but, on the other hand, the residual oil people do not want it to come in because they feel they would get that additional amount and that the coal industry would not get any of it. So I do not think anything this Congress can do with regard to exports and imports can help the coal industry. I think the cause is that a great majority of the people want to use gas and oil. The representative of millions of farmers spoke for this bill. Can anyone conceive that if this bill would bring chaos or ruin to the farming industry that the Farm Bureau and the National Grange would be here testifying for this bill? If the American Federation of Labor felt that millions of their employees would be thrown out of work, would they have come in and testified in favor of this bill? If it is going to bring chaos to business, do you think the United States Chamber of Commerce and scores of other business organizations, with billions of dollars invested, would be coming before the Ways and Means Committee supporting this bill?

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. ALLEN of Illinois. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. The gentleman observes that coal is no longer looked upon with favor because most people want to use gas and oil. I am sure the gentleman would be glad to know that in case, and God forbid, this country gets into general mobilization or partial mobilization, you will be on a coal fuel potential within 24 hours, and no gas or oil will be used for that purpose.

Mr. ALLEN of Illinois. I agree that would probably happen. But what I am saying is that I have seen so many people who continually used coal are now using oil and gas. I am not disagreeing with the gentleman, but I think the gentleman will agree with me that I have stated the facts.

Mr. FLOOD. Will the gentleman yield for one short observation?

Mr. ALLEN of Illinois. Yes; I yield.

Mr. FLOOD. Will the gentleman agree that if and when the time comes that all subsidies and all advantages given to liquid and gaseous fuels are permitted to be enjoyed by the coal industry, the situation in your district may even change?

Mr. ALLEN of Illinois. I thank the gentleman for his observation.

Of course the ideal condition would be if we could only export and not import. Yes, that would probably be the ideal situation. But unfortunately that just cannot happen. For instance, last year we imported between $10 and $11 billion worth of goods and we exported $16 billion worth of goods. When you do import coal and other products you are going to throw some people out of work, but it is likewise true that when you ship $16 billion worth of goods out of the country that gives more people work than the $10 or $11 billion worth that is brought into the country. Just think of how many people are used in the transportation of those $26 billion worth of products. So from that standpoint, perhaps when we ship out $16 billion worth of goods it is true that some of them are going under lend-lease, but nevertheless it does happen that many more people are employed. The record shows clearly that $16 billion went out of the country last year and $10 billion worth came into the country.

In conclusion, Mr. Speaker, I do not feel that the President of the United States intends or would possibly do anything to hurt business or any individual in the entire country. I am certain he has advisers who are competent and sincere, like the Farm Bureau, the Grange, and the United States Chamber of Commerce. I am sure these advisers and counselors of the President are not going to advise anything to bring our country into chaos or into a ruinous condition.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. ALLEN of Illinois. I yield to the gentleman from Indiana.

Mr. HALLECK. There has been some suggestion, as I understood, that there might be an effort to vote down the previous question and amend the rule to make it an open rule. As far as I am concerned I think everyone ought to understand, and certainly the new Members, that throughout the years without regard to which party has been in power we have brought measures of this kind to the floor under closed rules. Experience has shown that when you throw the matter open to amendment on the floor you generally wind up with the bill getting in such shape it has to be recommitted. Under the pending rule as drawn there will be opportunity for the minority side to present a motion to recommit, and on that motion a separate vote could be had. I therefore asked the gentleman from Illinois to yield in order that I might say I am supporting the rule and will vote for the previous question in order that we may proceed in the way that we have through the years in the consideration of such bills.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Maryland [Mr. HYDE].

Mr. HYDE. Mr. Speaker, I am distressed at the domestic injury suffered by the mining and railroad industries of my district as a consequence of the prevailing policies which permit unlimited quantities of foreign residual oil to be unloaded into the fuel markets of the east coast.

I am sure that none among us will question the vital role which must be assumed by the coal industry in time of war. During World War II demand for bituminous coal rose by 74 percent from the time that the conflict erupted on the Continent until the year that our troops went ashore in France. All military experts agree that there will be no such time to reach peak industrial activity in the event of further hostilities. In 1954 the bituminous-coal industry produced less than 400 million tons. Our mobilization base requirements call for a minimum of 650 million tons of annual production if an emergency develops. To achieve that output, the coal industry should be producing at least 500 million tons per year in the interim period. Because of the world tension existent at the present time, we must stay on the safe side militarily and industrially. I consider it foolhardy to permit our coal industry to remain at a low level of production when it could at any time be called upon to accelerate production far beyond its current capacity.

Unfortunately, Maryland's mines were among the first to suffer from the inroads of foreign residual oil. Until this product began to deluge the Atlantic seaboard, Maryland was producing in excess of 1½ million tons of coal annually. Last year our total output dropped below 400,000 tons. Whereas our labor force at the mines was made up of more than 2,000 men in 1948, today we have less than 500 employees. In 1948 residual oil imports amounted to 53 million barrels; last year the total was 131 million.

I am reminded of an article appearing in the Washington Star in 1950. A reporter who visited Maryland's mining communities described the destitution that enveloped that region as a result of the competition that came from foreign refineries. Since that time conditions

have worsened fourfold. A comparative few of the miners are still holding on, working 1 or 2 or 3 days a week. Some have left their homes to seek employment elsewhere. Others have found part-time employment in other industries.

Railroaders who depend upon coal traffic for employment are confronted with a similar situation. The Baltimore & Ohio, whose lines extend through some 200 miles of my congressional district, reports that total personnel in this company declined from an average of 65,000 in 1946–48 to only 50,000 at the present time. The devastating effects of foreign residual oil are emphatically reflected in these figures, for much of the coal tonnage picked up in the northern West Virginia and western Pennsylvania fields goes to tidewater or directly into the utility plants of the east coast. Production in mines on the B. & O. lines dropped from 42 million tons in 1948 to 31 million tons in 1954. The Western Maryland Railway which also juts into both the northern West Virginia and western Pennsylvania regions and has a western terminus on the Chesapeake Bay, experienced a decline of from 7,484,000 in 1940 to less than 5 million last year.

The mines of Maryland were a vital force in the industrial progress of this Nation. For that matter, one of the attractions of Washington as the Nation's capital was its proximity to the coal fields near Cumberland. In 1789 a group of citizens in Alexandria and Georgetown issued an advertisement calling attention to this advantage in the campaign to have the seat of the Federal Government moved from Philadelphia to this city. From the time the B. & O. completed its line to Cumberland in 1842, coal shipments provided the bulk of traffic, and throughout the years this commodity has been the greatest single source of revenue for all the other great roads of this section of the country.

Since 1800 more than 260 million tons of coal have been produced in Maryland, yet there are 3¾ billion tons of recoverable reserves remaining. Today many of our mines are flooded with water, and railroad cars are rusting away on siding because the market for coal has been usurped by foreign residual oil.

Let me say, Mr. Speaker, that I am so optimistic as to hope that in due time most—or even all—of our trade restrictions will have disappeared. I also hope that there will come a day when immigration barriers will be unnecessary. But neither is practical at the present time, nor in the foreseeable future. I believe that H. R. 1 must be amended, in the interest of the domestic economy and the national security, to provide for a restriction on importation of residual fuel oil to at least 10 percent of the domestic demand, based on the corresponding quarter of the preceding year.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from New Jersey, Mr. WOLVERTON.

Mr. WOLVERTON. Mr. Speaker, I am opposed to the rule in its present form.

This is a representative body. Every one of us is here as a representative of the constituency that elected us. It is inconceivable that under such circumstances that every one of us will be denied the right to offer an amendment to the pending bill if the rule now before us is adopted.

The rule gives the right to offer amendments only to the Ways and Means Committee. That means that a mere majority of that committee can dictate what this entire membership can vote upon. We know that the committee is divided in its views on this legislation, but, even the minority members of that committee cannot offer an amendment to the bill. As long as there is a majority of the committee, though it is only a majority of one, in favor of a particular viewpoint, then that viewpoint prevails, and there is no power given to us to change it by an amendment. Thus, it could be said that one vote in the Ways and Means Committee could under certain circumstances control the action taken by the committee, and the committee can limit or determine what the membership of the House can vote upon.

This is wrong in principle and it is particularly wrong in a representative government such as ours. The fullest opportunity should be given to permit the House to work its will in all matters of legislation that come before it for decision. This rule prevents such. It is a gag rule of the worst type. It is un-American and should be defeated.

The legislation which this rule brings to the House for consideration is one of the most important matters that will be presented during this entire session of Congress. The purpose of the bill is to extend the reciprocal-trade-agreement law for 3 years and to permit the President to reduce tariffs in a substantial degree.

There are in our Nation thoughtful persons who are deeply concerned as to the effect the enactment of this bill might have on certain industries that employ thousands of workers. The effect of this bill could mean that the products of certain of our industries will be brought into direct competition with similar articles produced abroad by under-paid workers. Workers in foreign countries do not receive wages of the kind we pay in this country. There is fear we cannot meet such competition successfully with our present higher standard of wages. This is a real danger to our workers.

The bill now before us does not give the protection it should to the workers in this country. It should be amended to do so, but the rule that now brings the bill to the floor of this House precludes any such amendments being offered unless offered by the Ways and Means Committee. It is folly to expect it to offer any such amendments. If the committee had been agreeable to this viewpoint, then such a protective amendment would have been put in the bill before it was reported to the House for action. The fact that such was not done by the committee is evidence that the committee has not, and will not, look favorably upon such an amendment. Thus, it will not be added by the Ways and Means Committee, and no Member of the House can offer such an amendment if the rule now before us is adopted.

This is all wrong. The rule should be amended so as to give the Members of this House the right to offer an amendment such as I have mentioned or any other amendment that is deemed necessary to protect our workers. It is only in such manner that full expression can be given to the real spirit and intent of representative government.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Speaker, I am opposed to the rule because it will not permit amendments to H. R. 1 when it is read under the 5-minute rule.

This closed rule is a gag rule and denies me as a representative of some 300,000 people to offer amendments to the bill that will protect their interests as American wage earners.

We who lived in the 20th Congressional District of Pennsylvania, have made every effort possible to obtain relief from the adverse effects of the unlimited and unrestricted importation of foreign residual oil which is one of the main factors in wrecking our economy. Unless those of us from coal-producing States are permitted to offer amendments to H. R. 1 curbing the flood of foreign residual oil, we have no other means of stopping it.

The unemployment in my congressional district is mounting daily and as of January 1, 1955, there were 18 percent of our employables unemployed. It is in the name of the unemployed in my district who are today living on public assistance and surplus food commodities, that I ask that this closed rule be defeated.

I am sure that the membership of this House if given an opportunity to vote on an amendment providing for a 10 percent quota limitation on the importation of foreign residual oil that such an amendment will be approved overwhelmingly, since it will restore employment and also protect the jobs of those presently employed.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. SCUDDER].

Mr. SCUDDER. Mr. Speaker, I rise in opposition to the gag rule recommended by the Rules Committee for the consideration of H. R. 1, the act which would extend the reciprocal trade agreements for a period of 3 years, and carrying with it language which I do not feel is strong enough to protect the American workingman and our American industries.

I have always felt a free discussion of all legislation to be very necessary in our legislative processes.

The Constitution plainly spells out the responsibilities of Congress in tariff matters. I feel there has been too great a delegation of these responsibilities during the past several years, and I believe it is time to take a new look into the laws regulating the commerce between our country and the other countries of the world.

I do not believe in a high tariff, but I do believe that tariffs should be so set as to make up for the difference in the production of goods manufactured in countries where substandard wages are paid. I believe that foreign goods which go on sale in our country should be based on quality and not on price. Some equalizing legislation is highly necessary. I believe in a strong peril point and escape clause being written into tariff legislation.

Mr. Speaker, I am opposed to, and shall vote against the rule and trust that a majority of my colleagues do likewise.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from West Virginia [Mr. BURNSIDE].

Mr. BURNSIDE. Mr. Speaker, much of the pottery which is manufactured in the United States is made in my State of West Virginia, and a good percentage of it is made in my district.

The manufacture of pottery is not a large industry when compared with some of this country's mass production manufacturers, but in my district and in the State of West Virginia, the industry is most important. It furnishes employment to many of our people. It flourishes in small towns where it is often the sole employer. It uses materials native to the locality which are valuable only for production of pottery. The loss of this industry in our State would be doubly unfortunate; not only would raw materials abounding in West Virginia be wasted, but even more important, the already critical unemployment situation would be made even worse, and the widespread human suffering in West Virginia would be intensified.

Loss of this industry is the result which we may expect from further tariff cuts on imported pottery. Domestic pottery has already been hard hit by tariff reductions. I understand since January 1951 employment in pottery plants has decreased about 30 percent. It is further understood that profits from 1951 to 1954 have decreased about 50 percent. During this same period, the amount of pottery imported into this country has increased, even above the very high 1951 levels. The pottery people I have talked to think that reductions in import tariffs already effected under the Trade Agreements Act have brought much of this trouble into being. They feel definitely that further injury now threatens them by the three proposed reductions in tariff, authorized by H. R. 1. Their fear is especially directed to Japanese importations.

The pottery industry in this country feels that it has done everything within its power to streamline the industry. Of course, the American chinaware industry is the most highly mechanized of its kind in the world. Since the people of the industry have made their industry the most efficient, they feel that the acts of their government proposed here, will be a method to rob them of their livelihood.

I am sure that further tariff reductions would eventually eliminate practically all manufacture of pottery in the State of West Virginia. I am convinced that lower pottery tariffs are completely unjustified because domestic-made pottery is prevented from competing with foreign pottery, not because of the competence of foreign manufacturers, not because of the inefficiency of American methods, not because of the superiority of foreign goods; but solely because of the dangerously low wage scales prevalent in pottery manufacturing abroad. Labor in the United States is well paid and should be well paid in order to preserve our high standard of living. It is completely unfair to require an industry which does pay fair wages to compete with industry in foreign countries paying starvation wage scales.

I am a Representative of the State of West Virginia, which is the worst hit State in the Union, because of unemployment. My people feel that further tariff cuts will be a major irritant to our economic structure. Gentlemen, in proposing to destroy an industry of this nature, some of you have suggested that we can transfer its workers to other activities. But unemployment resulting from such destruction would be most hard to alleviate because pottery workers have a peculiar skill that cannot be absorbed by other industries. Many of them have spent years learning a highly skilled craft, so you are taking away the livelihood of these people and building up a frustration by putting them on charity.

Mr. Speaker, it is generally conceded by all those who are familiar with the textile industry that it is in a nationwide state of depression. I understand that production has been curtailed throughout the industry so that there is widespread unemployment, or part-time employment. I know that in the American Viscose Co. plant in Parkersburg, which formerly employed more than 3,000 people, only about 900 employees are now at work. I understand from the Textile Workers Union of America that about 200 mills have been closed down in the last few years, and 75,000 workers have been laid off since 1951. In Parkersburg, as in many other cities, I am sure, the closing or near closing of a textile mill is an economic catastrophe, the effects of which are felt by every resident of the entire area. The rayon plant in Parkersburg, a city of 40,000, was the city's largest source of employment. Its limited operation at the present time has injured every small-business man in Parkersburg. It has, in addition to the unemployment directly created, caused widespread unemployment in other business activities. Numerous people who might otherwise have sought employment in Parkersburg, have been forced to leave their homes and families to seek employment elsewhere. Many, many more of the employees are attempting to exist in Parkersburg, as best they can. Hundreds are still drawing unemployment compensation. Hundreds more have exhausted their benefits. From statistics furnished me by the West Virginia Department of Public Assistance, I learn that over 2,700 people in Wood County, of which Parkersburg is the county seat, are on surplus food.

As you might expect from this, Parkersburg has been classified by the Department of Labor as a severe labor surplus area. Since their textile plant was so large an employer, its displaced workers, and those displaced because of its economic effects, cannot find other jobs. This situation is doubly complicated by the fact that other local industry is also depressed at the present time. Nearly every other employer in Parkersburg has been injured by recent tariff reductions.

From this I think it is clear that the present condition of the textile industry, particularly the manmade fibers division, does not warrant further tariff cuts which would increase textile imports. Much of the present distress in the industry has been caused by our unwise importation policy. Much more distress will be created if there are further tariff reductions on manmade fibers.

The chief beneficiary of such reductions would, of course, be Japan. Japanese rayon plants are as efficient as those in the United States. They are capable of producing and have produced fibers of as fine a quality as can be made in the United States. Their industry has rapidly recovered from the effects of World War II. I understand that the productive capacity of the Japanese rayon industry at the close of World War II amounted to approximately 360 million pounds per year. As of 1950, that capacity had been raised 32 million pounds, to a total of more than 390 million pounds. This restoration of rayon production capacity was made against the recommendation of the Textile Commission to Japan. It was made with the help and cooperation of the United States. But the fact is that the rayon industry in Japan is overbuilt. Its capacity for production at the close of World War II was adequate to supply the internal needs of Japan. I can see no fairness in a policy which permits the overbuilding of a foreign industry and then provides for lower tariffs in the United States to take care of the excessive foreign production.

I do not deny the fact that Japan must import foodstuffs in order to survive and that it must export materials in exchange. But the foods which Japan needs can be obtained in southeast Asia, where she can trade her manmade articles for rice. Burma, Thailand, Indochina, the Philippines, and Indonesia all have, or could have, rice for export. Our policy should direct Japan's trade into these channels rather than directing it to the United States, where irreparable injury can be done to our entire economy.

In conclusion, let me say that I am firmly convinced that there would be absolutely no benefit to be derived from further reductions in tariffs on textile imports as authorized by H. R. 1. On the contrary, every indicator capable of measurement indicates that nothing but harm will result if textile tariffs are lowered.

Mr. Speaker, 5 years ago this spring I appeared before committees of the Senate and House to protest trade policies that were responsible for creating unemployment and poverty in my congressional district and in other areas throughout West Virginia. I was particularly concerned with the growing

threat imposed upon our national economy by imports of oil from South America and the Middle East. I presented figures to show that the increasing amounts of crude oil and its products shipped from foreign lands were usurping America's fuel markets to the detriment of our own coal and oil producing industries.

Today—almost 5 years later—I find that the destitution brought about by this foreign menace has increased in intensity and has extended its perimeter of disaster. More mines are closed, more miners and railroaders are unemployed, and business throughout the coal and railroad centers of the Appalachian region has steadily declined. The domestic oil industry has likewise experienced serious injury and is losing its incentive to develop new fields and new wells in the midst of this otherwise prosperous economy in the United States. Unfortunately, many wells are being pulled in West Virginia today.

Let me give you an example of the past and continuing disregard of the national welfare and security arrogantly exhibited by the importing oil companies. Committees of Congress undertook to look into the problem after 75 million barrels of residual oil were imported into the United States in 1949. Our distinguished legislators were rightfully alarmed not only because these imports were bringing destitution to coal-producing areas, but also because this country was building a dependence upon a source of supply that would not be available in an emergency period.

A representative of the United Mine Workers of America testified before the Senate committee that each time a huge new tanker tied up at an American dock, it brought not only a quarter of a million barrels of fuel oil, but also job discharges for 63 American miners for a full year. We import not only low quality oil, he explained, but unemployment.

A representative of the Brotherhood of Railroad Trainmen testified that residual oil imports were responsible for what he termed enormous increases in railroad unemployment. An official of the National Coal Association warned of the danger of permitting utilities on the Atlantic seaboard to rely upon a fuel which cannot be stored in large quantities and which would be unavailable in time of snorkel submarine action in ocean shipping lanes.

The Governor of the State of West Virginia testified that foreign residual oil was creating general economic chaos in our State, for it not only threw thousands of mineworkers and employees of related industries out of jobs, but also deprived State, county, and local governments of much-needed revenue from direct and indirect taxes.

I ask you, gentlemen, to keep in mind that these statements were made following the year that a record 74 million barrels of residual oil entered United States markets from abroad. Naturally, we, who have an interest in the coal industry and its employees, the independent oil producers and their employees, the railroad industry and its employees, and in other affected fields, were deeply concerned with the unnecessary damage that was being inflicted upon our economy. Those 74 million barrels of residual oil were equivalent to 18 million tons of bituminous coal. The loss of that tonnage deprived mineworkers of 2,806,000 man-days—representing $43,549,000—in 1949. More than 15 million tons of that coal—the coal which was never produced because its markets were stolen away by a foreign product—would have been shipped by rail. The resulting loss to railroad workers amounted to $23,331,000. That, gentlemen, is what a Senate subcommittee of the Committee on Labor and Public Welfare learned when it made a study of unemployment in the coal and other specified industries 5 years ago. That committee issued a report which included this terse statement:

> The committee, on the basis of all the evidence before it, is convinced that the importation of foreign oil has had a substantially injurious effect on the coal, oil, and railroad industries of the Nation.

Is there any wonder why we who represent coal, railroad, and domestic oil companies were deeply concerned with what would happen if the deluge of oil from abroad were not checked? We realized that in addition to the losses sustained by wage earners in these industries, the flood of foreign residual and crude oil would impair the capital investment of the coal industry, reduce domestic exploration and development of new oilfields, cause pulling of producing wells, and imperil the national safety. We sought immediate action to correct the unfair and dangerous situation then existent. Pressure and promises from importing oil companies, however, were so great that our efforts at that time were hopelessly in vain.

Now let us review what has happened in the intervening years. Here are the residual oil import figures for the succeeding period:

	Millions
1950	120
1951	119
1952	128½
1953	136¼
1954	131¾

Representatives of importing oil companies insisted time and again that it was their policy to supplement rather than supplant domestic fuels. Though it was proven by a Senate committee that the amount of foreign residual oil then being imported into the United States was already causing serious harm to American industries and American workers, shipments rose beyond the expectations of even the most pessimistic of us, the aggregate for the last 5 years amounting to more than 635 million barrels. Now Mr. Speaker, to me it is inconceivable that any group of international operators would be so disrespectful and disdainful of the elected Representatives of the people of the United States as to ignore completely the findings and recommendations of an officially appointed committee of the Congress. Not content to disemploy thousands of wage earners in this country, these world oil manipulators have intensified the weakness which their exploits have created in our defense structure.

Fuel experts have learned that, in order to have our coal industry produce the 650 to 700 million tons of bituminous coal that would be required in the first year of a national emergency, the mine output in the interim should be at least 500 million tons per annum. I remind you that in 1954 the bituminous-coal industry produced only 392 million tons. With the consequent decline in coal tonnage, railroads have laid off an ever-increasing number of workers and of necessity have neglected rolling stock that would be needed to transport coal in an emergency.

You gentlemen realize, of course, that when a mine is closed, as has been the the experience with so many of our operations in West Virginia since foreign residual oil began to take over our markets, all the equipment, steel rails, and such are pulled out, and the mine fills with water. If a mine is reopened, the water must be pumped out and all the material must be replaced—a slow, costly process taking many months. Inasmuch as we are now living in an atomic age, how much time would we have to get these mines ready?

Somewhat the same situation is applicable in the case of domestic oil production. If foreign oil takes over the domestic markets, there is no reason for American oil men to develop new fields or to explore for new wells. The wells pulled in West Virginia are gone forever. Our State of West Virginia has lost a vast amount of income because of these dangerous practices. The State now finds itself short some $7 million in revenue. We are told that we are facing a deficit for the coming year of about $15 million of needed revenue.

Thus, you see, this problem of foreign oil is not a matter of concern merely to a small group. Its economic consequences affect every one of us, particularly everyone in West Virginia.

Mr. Speaker, a telegram of February 9 points out succinctly the strain under which the Porcelain Products Co. of Parkersburg, is operating. It appears useless to belabor the point that this industry is severely injured by tariff reductions. This West Virginia company has been faced not only with just one reduction, but now with almost constant reductions. Faced with this constant threat to their existence not only from tariff cuts by the present administration, but with deliberate orders by this administration that are threatening their corporate life, they ask, when will this stop? Gentlemen, I ask you to put a stop to it. This is the telegram:

> Deprived 39 people of 9 months' work, at average of $2.20 per hour, equals wage loss this plant only of $130,000; equal loss by our suppliers. This occasioned by one Bonneville order placed with Japs. Additional Government requirements placed with Japs created additional losses to company and men of at least a million dollars. Tariff cut would be suicidal for our depressed industry whose billing has decreased 28 percent over 1952. Your assistance and help to correct this urgently required.
>
> G. M. RUOFF,
> *Vice President and General Manager, Porcelain Products, Inc.*

Mr. Speaker, in my district and throughout the State of West Virginia, there are many plants which manufacture handblown glassware. Some of the most beautiful glass in the world is produced in my district. I am sure that you are aware that the art of producing handblown glass is very intricate and requires great skill. I think I can safely say that glass manufacturing is more than just an ordinary industrial process. It is a highly specialized craft or art.

Irreparable injury has been done the handblown glass manufacturers of this country by repeated reductions of tariffs on imported glassware.

Since the Second World War, handblown glass imports have consistently increased. Stark evidence of the effects of these imports on the domestic glassware industry is revealed by the fact that as these imports have gone up, domestic sales have declined. If tariffs are cut even further, as authorized by H. R. 1, the only result to be expected is complete elimination of the American industry. I submit that this would be most unwise. I can see no net benefit to the American economy to be gained by elimination or near elimination of our handblown glassware industry. Many, if not most, of the plants in the industry are located in very small towns or villages. They are usually the most important local employer and often offer the only local employment. The closing of these plants would practically wipe out many small West Virginia communities. I cannot think of this havoc as a necessary short-term period of readjustment, as the exponents of free trade term it. It may be well to say that at some future time our economy would readjust, and the younger displaced workers would find other employment. But all of us with any common sense know that a handblown glass worker who is over 45 years old cannot get a job because his skill is in an industry specialty not used by other manufacturers. I am not aware of any other products which could be manufactured in our present glassware factories; but even if that were possible, further reductions in tariffs mean a serious loss to West Virginia. Our State income, already rapidly declining, would be reduced even further. Many people now gainfully employed would be forced to leave the State or to join the thousands of unemployed people now suffering in West Virginia.

Mr. Speaker, I would like to stress what I believe is the most important factor to be considered in relation to glassware tariffs. That is simply this—the major factor in production of handblown glassware is obviously labor costs. It has been pointed out time and time again to you that cheap labor in foreign countries is solely responsible for the low prices of imported glassware in this country. Since the United States cannot control the internal domestic policies of foreign countries, and since we cannot prevent exploitation of labor in certain countries, further liberalization of our tariff policies will not even benefit the people of foreign countries. Certainly it can only create extreme hardship for the handblown glass industry and its workers in this country.

Mr. Speaker, there are 7 toy glass marble factories in the United States, 6 of which are in the State of West Virginia, engaged primarily or solely in the production of toy glass marbles. These factories which normally employ around 878 persons, exclusive of sales representatives, are as follows:

Vitro Agate Co., Parkersburg, W. Va.

Champion Agate Co., Pennsboro, W. Va.

Heaton Agate Co., Pennsboro, W. Va.

Ravenswood Novelty Works, Ravenswood, W. Va.

Marble King Incorporated, St. Marys, W. Va.

Master Glass Co., Clarksburg, W. Va.

Peltier Glass Co., Ottawa, Ill.

Import of toy glass marbles from Japan within the past year has caused these factories to lose 60 percent of their sales within the United States. Employment is now reduced to 294 persons. Based upon information furnished by United States purchasers, 90 percent of the remaining business will be lost to Japanese suppliers within the next year.

The reason for this recent loss in United States business is not difficult to explain. The cost of production for manufacturers of toy marbles in the United States is 200 percent more than the cost of production for their counterpart manufacturers in Japan. The low cost of production in Japan is due primarily to the low cost of labor and raw materials and to low Japanese taxes. These cannot be offset by more efficient methods of production in the United States. The average monthly wage of a skilled machine operator in the Japanese marble factory is 15,000 yen—$41.66—and the average monthly wage of an unskilled adult laborer is 6,000 yen—$16.66. There are no unions in the Japanese marble factories, and child labor is sometimes utilized. In marble factories in the United States, machine operators average approximately $300 per month, and the unskilled laborers, approximately $200 per month. Laborers in the United States work only 40 hours per week, while their counterparts in Japan work 50 to 60 hours per week. The low cost of labor and low taxes, which average about 15 percent, result in proportionately cheap raw materials. Conference United States-flag lines advise that Japanese toy glass marbles are loaded as ballast and the cost of shipping from Japan to the United States is only $10 per 2,000 pounds. Shipping costs on nonconference United States-flag vessels and on Japanese-flag vessels are considerably lower.

Under the present tariff rate, it is almost certain that the entire marble industry in the United States will close down. Gentlemen, this industry, as I have said, is not large, but it is a source of employment to people in West Virginia. Why must their jobs be sacrificed? Why must the already devastating unemployment problem in West Virginia be made worse?

Mr. Speaker, as I am sure you know, West Virginia, particularly that part of the State lying in the Ohio and Kanawha River valleys, has been blessed with vast deposits of elements used in the manufacture of many vital chemicals. For this reason, the State is one of the centers of the chemical industry of the United States. Many of the people in my district, the Fourth Congressional District, are employed by chemical manufacturers, and a very great number of these people have informed me of their fear that further reductions in tariffs on chemical imports will jeopardize their jobs and the plants in which they work. Manufacturers, too, feel that further tariff reductions will jeopardize the industry they have developed. Some are considering moving to other countries. Therefore, I would like to bring to your attention the need for protection of this vital industry.

I need not, I am sure, point out to you the national importance of the industry about which I am speaking. We all know that without it our national-defense effort in our two latest wars would have been crippled. I think it fair to say that this industry played as important a part in our victories as any other in the land. I am sure, too, that you are aware that chemical manufacturing was developed during the First World War precisely because it was then found that this Nation depended to too large an extent on chemicals manufactured in foreign countries, particularly Germany.

Today we find the coin reversed. We have a strong national industry which has served the Nation well, but it cannot survive in the face of cheap foreign imports. I think that our national-defense interest alone is sufficient ground for not permitting further reductions in tariffs on chemical imports. But there are many other cogent reasons for retaining a protective tariff in this industry.

In the first place, statistics show that our chemical tariffs have already been reduced so that they are among the lowest in the world. I am not prepared to say that further tariff reductions would close down our chemical industry entirely, but I am sure that it would cause a considerable readjustment of the industry. Many chemicals now manufactured in this country would be discontinued. Many plants would be closed down and much of the money now spent by the industry in research and development of newer and better chemical products would not be spent. I am sure that many West Virginians would lose their jobs. I know that many of them have already felt the effects of imported chemicals, and I am not prepared to say that these people can be regarded as mere elements of the labor force to relocate and readjust themselves as best they can.

The unemployment situation in West Virginia is already severe. If we make it worse by further reductions in tariffs, the distress already rampant throughout the State will be intensified, and the chance for eventual recovery will be lessened. In terms of human beings, lower tariffs on chemicals will only create further misery.

In addition to its immediate present effects, an unwise tariff policy in regard to chemicals will vitally affect the future of the industry and our Nation. Chemical production requires highly trained

professional people. Chemical research is an important part of the industry. Our national supply of trained chemists is an important national asset. If we take any action tending to curtail the industry, we will destroy some of the incentive for young people to go into the field. The shortage of specialists which may result could do irreparable future harm.

Foreign chemical industries have rapidly recovered from World War II. They are daily increasing their production. We must maintain a tariff policy nurturing our own industry and the jobs of its workers because of the natural advantages of production abroad. Not only are foreign labor costs far beneath those in this country, but construction, operation, and maintenance costs are far less in foreign countries than they are here. In addition to this, chemical manufacturers abroad enjoy tremendous tax advantages. Obviously we must either offer some protection for our own industry or prepare to lose much of it. I, for one, think we have no real choice. We must retain a protective chemical tariff to protect our own national interest.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Rhode Island [Mr. FORAND].

Mr. FORAND. Mr. Speaker, I ask unanimous consent to extend the remarks I intend to make on the bill and include therein letters, resolutions, and newspapers articles.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Oklahoma [Mr. JARMAN].

Mr. JARMAN. Mr. Speaker, I am opposed to the closed rule on H. R. 1 Such a rule leaves us no opportunity to submit to the House amendments that would protect segments of our economy seriously in need of protection. For example, a strong case can be made for protection of our domestic oil industry. Oil imports furnished 8 percent of our national demand in 1946. Today oil imports furnish 14 percent of the United States market. In the same period of time imports of oil have risen from 377,000 barrels per day to over 1 million barrels per day. In the same period oil imports have increased 179 percent, whereas domestic production has increased only 36 percent. The welfare of our Nation, in its domestic and foreign policy, demands congressional action against the flooding of our Nation by foreign oil. Under this closed rule, we are barred from even submitting this important matter to our colleagues of the House. Fairness of parliamentary procedure should give the House an open rule, under which rule the House would have a real opportunity to work its will.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. FLYNT].

Mr. FLYNT. Mr. Speaker, I am opposed to the rule in its present form. It is manifestly unfair to bring in this H. R. 1 under a closed rule.

Nearly all of us want a reciprocal trade act, but we want one that at least resembles a two-way street—one that bears some reasonable relation to the dictionary definition of "reciprocal."

For too many years the United States has been making bona fide trade concessions all over the world, and in return we have been met with restrictive import licensing requirements, artificial embargoes and outright violations of standing agreements.

We who oppose the rule in its present form and who oppose H. R. 1 as reported out by the Ways and Means Committee, want and believe we have the right to expect a reasonable amendment to assure American industry and the American wage earner that not a single American industry and not a single American's job is expendable.

We want and we have a right to expect an amendment which will make the peril-point and escape-clause provision mandatory when so recommended by the Tariff Commission. This is fair; it is reasonable; it is honest, and, above all, it is American.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Speaker, I am opposed to the rule. I am against any gag rule any time, any place, anywhere—and this is a gag rule. It is a mockery to point to this forum as the great place of free speech and find this rule before us. I speak for the anthracite-coal industry, the great basic fuel potential of America. We only ask at this point in the parliamentary situation for the right to present our case to the House. Let me speak for my amendment seeking a quota on residual fuel oil. If the House knows the facts, I believe in my heart we will get this so badly needed protection, little as it is we need it desperately. I repeat, in case of the outbreak of hostilities of any magnitude, this Nation will be on a coal-fuel basis within 24 hours after the first shot is fired; make no mistake about that. Promises of help, many assurances of aid, much sympathy from all for the coal people but none of the support given to all other segments of our economy. This residual, cheap imported fuel oil strikes at the heart of our coal industry. This means loss of jobs in the mines and on the railroads of this Nation.

But, at this time, let us defend our rights as Members of this House to represent the districts which sent us here. And for one that I intend to do in this vote.

In the American way, let us open this vital matter to free discussion, amendment, and debate.

Mr. Speaker, I repeat my opening words; I am opposed to the rule.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. SISK].

Mr. SISK. Mr. Speaker, I appreciate the opportunity to speak briefly in opposition to a closed rule on H. R. 1, because I believe the matter is of utmost importance to many of my constituents who have had little opportunity to look into the possible effect of the measure as reported out of committee.

In the first place, I am strongly in favor of the reciprocal-trade program and an adequate extension of authority to negotiate agreements under it. I also strongly favor retention of provisions of the program to insure against destructive dumping of foreign agricultural products on the American market, in other words, the escape-clause and peril-point provisions of the act.

More than 100,000 persons in my district can be seriously affected by this legislation because they are in agricultural industries which may be subjected to destructive foreign competition. Their representatives feel the provisions of H. R. 1 as reported by the committee may not contain adequate escape-clause and peril-point provisions. They are also concerned with the manner in which these provisions are administratively handled.

I have had no opportunity to study the reported bill in sufficient detail to determine its handling of these vital matters. Undoubtedly, the effect of the bill will be fully revealed during debate on the floor, but in the event the debate reveals the need for strengthening of these provisions, I would feel it most unfortunate if a closed rule should prohibit amendments which would enable me to vote for a program which I strongly support.

I am sure many other Members favor extension of this important program if it contains adequate safeguards. I am sure proponents of the committee's bill do not want to be in a position where they may be accused of railroading it, nor do I feel they want to place friends of the measure in a position of being forced to oppose it. I appeal for an opportunity to hear discussion of H. R. 1 and to vote for amendments if I then believe they are needed. I hope the Members will refuse a closed rule.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from West Virginia [Mr. MOLLOHAN].

Mr. MOLLOHAN. Mr. Speaker, I am opposed to this rule in its present form. The action which this House takes with regard to H. R. 1 will directly affect every man, woman, and child in this Nation. Their bread and butter—the standard of living they enjoy—the extent of their economic security is irrevocably tied to the question of whether business continues to flourish and industry continues to expand in this country.

With a question so vital therefore to the well-being of the American people, how then shall we dispose of it in a few hours of limited debate—yet still honorably discharge our sacred responsibility to our constituents?

Largely as a result of the vast imports of foreign residual oil which flow unrestricted into our eastern seaboard, unemployment in our West Virginia coal fields increased 25.7 percent in 1954 over 1953. The low rate of the duties imposed upon imports of glass and pottery has opened so wide the doors to our domestic markets—that the doors of our glass and pottery plants in the First

Congressional District of West Virginia are, one by one, slamming shut. The consequent unemployment in these industries exceeds even the high rate which now prevails in the coal fields, while similar conditions prevail in our important chemical and textile industries.

With due respect to my distinguished colleagues who sit upon the Ways and Means Committee, I still must protest that upon so grave an issue as that which H. R. 1 encompasses, we cannot permit ourselves to be guided solely by the conclusions of only 25 Members of this House. The margin of error is too great—the consequence of error too costly.

Moreover, I submit, Mr. Speaker, that the problem of international trade is too complex for us to proceed, with balanced judgment, to consider H. R. 1 until we are possessed with fullest possible information upon all of the many ramifications which are involved.

It was never the intent of the Founding Fathers of this Nation that a few men, only, should write the laws of this land. I most earnestly urge that only under free and open debate shall we be able to determine, with equal justice for all, the course of action we should pursue in disposing of the grave issues with which H. R. 1 is involved.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Ohio [Mr. FEIGHAN].

Mr. FEIGHAN. Mr. Speaker, I urge the adoption of an open rule.

I should like to make it clear that I have always supported the principle of reciprocal trade, and shall continue to do so.

The reason I urge the open rule is to permit open debate on the question of whether we should have any trade relations with the U. S. S. R. or the nations controlled or dominated by communism. There is no special prohibition against such trade in H. R. 1 as it now stands.

The main objective of the Trade Agreements Act is to increase foreign trade in a manner so as to be helpful to the economy of the United States and to expand and strengthen the economies of certain other nations of the world. There can be no valid argument against the need for an expansion of international trade, but there are substantial points of difference, I believe, on how this trade should be expanded, what we should trade, and with whom we should trade.

Perhaps the most important question involved in H. R. 1 is whether we should have trade with any of the nations of the Communist bloc which I shall hereafter refer to as the Russian Communist Empire; and if so, how this trade should be regulated. It is to these two critical questions that I wish to present my observations and some basic facts which, up to today, appear to have been overlooked.

The Kremlin has recently stepped up its psychological warfare offensive against all free men and all free institutions. This psychological warfare offensive is being carried out under the false banner of peaceful coexistence. In this offensive against the free world trade between the Russian Communist Empire and the nations of the free world plays a very important part. The Kremlin expects to attain the following objectives as a consequence of this offensive:

First. To lull the free world into a deep slumber of false security;

Second. To cause us to cut back drastically on our defense preparations;

Third. To secure from the free world food and consumer commodities required to subdue the restive nations and peoples held within their empire;

Fourth. To lay the groundwork for a system whereby the nations of the free world will be caused to compete against each other in the field of trade under rules calculated to bring complete economic victory to the Kremlin;

Fifth. To cause as many nations of the free world as possible to develop an economic dependency upon the Russian Communist empire—particularly with respect to raw materials;

Sixth. To provide a better cover for infiltration and internal subversion of nations through the media of business and trading fronts which the Kremlin is anxious to establish in key spots in most of the free nations.

There is no such thing as trade in nonstrategic or noncritical materials with the Russian Communist empire. Anything they choose to trade for or with the free world you may be sure they need critically. Every type of intercourse carried on by the Kremlin with the free world is a calculated one in their unceasing warfare against human freedom and free institutions. Trade with the nations of the free world is clearly one of the major devices by which the Kremlin calculates to further its objective of world domain.

Recently we have read in the newspapers a great deal about the benefits which would accrue to us by trading our surplus food with the Russian Communist empire in exchange for valuable resources such as manganese. I recall that early last spring a trial balloon was put up on the subject of selling surplus butter to the Russians. When word got out that this butter would be sold at a price less than the American housewife has to pay for it, the promoters of this scheme ran for cover and pulled down their trial balloon. Now it appears as though these same promoters have put a slogan on that old trial balloon so as to disguise it. The new trial balloon has a banner on it which reads: "Barter butter for manganese." The joker in this proposition is that while we might get a small amount of manganese for a very large amount of surplus butter—as a token demonstration of how we can outbarter the Russians, we should not be fooled into believing that a consistent trading program will be built up in which we will receive only manganese and other needed raw materials in exchange for butter, wheat, and our other surplus commodity stocks.

We must never forget that the masters of the Kremlin are in a state of constant warfare. At this moment their warfare is primarily directed at the many nations and millions of people enslaved within the Russian Communist empire. What the Communist masters are now seeking to do is to break down or remove all possible opposition within their empire, and to bring about an economic, political, and military consolidation of the vast areas and millions of people they control. They must accomplish this first task of consolidation before they can engage in an all-out showdown with the nations of the free world.

In the war of the regime against the people now taking place within the Communist empire, it is no secret that the weakest economic link in the arsenal of the Kremlin is its food production program. Over the past approximately 10 years, the food production program within the Communist empire has been a notable failure. There are undoubtedly a number of reasons advanced for this failure, but I believe they can all be summed up as follows:

First. Because of the forced collectivization of the rural areas and the peasants, together with the resistance and opposition which this has brought from the people themselves.

Second. Because so much of the available manpower within the Communist empire has been put on war production work, thus depriving peaceful industries of needed manpower.

Events of the past week in the Kremlin have made it abundantly clear that the leaders of the conspiracy of communism are faced with tremendous internal problems. Among these problems is the acute shortage of food and other consumer goods. Some competent observers of these events point out that one of the main reasons for this acute shortage in food and other consumer commodities is the fact that the majority of available manpower in the U. S. S. R. has been deployed in the production of war materials, which are referred to as heavy industries. Khrushchev, the latest czar, is the advocate of allout development of the heavy industries as against the deployment of manpower for the production of food and other consumer commodities. As a consequence, it should be clear to us that now more than ever the masters of the Russian Communist empire need our food and other consumer commodities.

Common sense tells us that if we trade food for any item with the Communist empire we will be helping them to keep their war-production work at its present high level. If they are unable to trade for the food they so badly need, eventually they will have to drastically reduce their war-production work in order to provide manpower for the rural areas or be faced with the alternative of large-scale famines and mass uprisings by the people.

The same can be said with respect to a large number of consumer commodities which are usually in long supply in the United States. The enslaved people within the Russian Communist empire are demanding more shoes and clothing, more household appliances, and more of the gadget type of commodities which are so common and inexpensive in the United States but so rare in the Communist empire. Again, one of the basic reasons for these shortages within the Russian Communist empire is the deployment of vast resources of manpower to war-production work.

I believe the time has come for us to regard our position with respect to surplus food commodities and surpluses in other consumer commodities as being a distinct asset in the arsenal of the United States and the free world as a whole. The Communists have long considered food as a weapon for war. Why do we not look upon our surplus foods as weapons for attaining true peace and freedom? There are many areas of the free world, some of them now being subjected to heavy Communist propaganda, which could benefit by having reasonable quantities of our surplus foods. In those areas of the world where human want is the greatest, Communist propaganda has made the greatest gain. Our surplus foods, and to the extent possible, certain other consumer commodities in long supply, should be directed to those areas. These steps, together with an increase in technical assistance to those areas, would be a death blow against Communist propaganda.

I strongly recommended to the Ways and Means Committee that the question of trade with the Russian Communist empire and trade with the nations of the free world be considered as separate measures. I do not believe that we can advance a program of international trade which will bring real and lasting benefits to the free world unless we do separate these issues. Moreover there is the grave danger that in our laudable efforts to increase trade with the nations of the free world, we will open the door to critically needed materials which the masters of the Russian Communist empire so badly need today. Specifically I recommended that a prohibitive clause against the possibility of any trade with the U. S. S. R. and the nations controlled or dominated by communism be included in H. R. 1.

The Select Committee To Investigate Communist Aggression authorized by the 83d Congress, on which I had the privilege of serving as a member, conducted a large number of public hearings here in the United States and in Europe. It had before it a number of recent escapees from the Russian Communist empire. They testified that within the Communist empire there is seething discontent and hatred of the regime. Many of them urged that the United States not trade food or consumer commodities of any type with the Kremlin because by so doing we would be giving the Kremlin the weapons to control and hold captive our most dependable allies—the nations and people enslaved by them. Other recent escapees from the Soviet Union have publicly stated that the masters of the Kremlin are sitting on a powder keg which might explode any day. The exploited people enslaved by communism who are denied the essentials of life make up the powder in that keg.

There are an increasing number of people showing an interest in the possibilities of making not only a fast dollar, but rather large bundles of them through a program of trading our surplus foods and consumer commodities with the Communist empire. These are the same kind of people who saw nothing wrong in selling scrap iron for the manufacture of bombs to the Japanese just prior to the outbreak of World War II; they are much like the people who, during World War II, did not hesitate selling high-grade ballbearings to the Nazis through neutral channels. This kind of people would like to put the American farmers "over the barrel" by getting them to sanction the trade of surplus foods with the Communist empire. They hold out the possibility of financial gain to a farmer who is worried about prices for his farm products when he sees a large surplus of these same products accumulating in Government warehouses. These same people would make the American farmers into a propaganda weapon for the masters of the Kremlin, just because it would mean a bundle of fast dollars for them.

I repeat what I have said previously—there is no material—whether it be raw or manufactured, which is not considered strategic by the Communists in their never-ending war against freemen and free institutions. I urge an open rule. I wish to offer an amendment to H. R. 1 to prohibit any trade whatsoever with the U. S. S. R. or any nation under its domination or control. Such an amendment is in the security interests of the United States because it is clear, beyond any doubt, that trade of any kind with the Communists increases the possibilities of war.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Massachusetts [Mr. PHILBIN].

Mr. PHILBIN. Mr. Speaker, this bill strikes at the heart of the American industrial system upon which we must depend to promote general prosperity and provide employment for millions of our citizens. In operation it will open still wider the import gates through which a steadily increasing flow of cheaply produced foreign goods can flood our American domestic markets, undermine many industries, and cause serious unemployment in the country.

The rule under which the bill comes to the House has been referred to as a "gag" rule. It shuts off all amendments to the bill. It strictly limits debate and thus denies this House the privilege of giving adequate consideration to the measure.

We can all take notice, if we will, of the fact that the so-called peril-point and escape-clause clauses of this organic law, inserted into it originally to provide some measure of protection for our great productive machinery and workers, have not been functioning effectively. They are virtually inoperative. They urgently need revision and implementation.

This bill favors foreign interests. It is contrary and hostile to American interests. It threatens our workers, our people, and our whole economic structure. It is a monstrous misnomer to call this bill reciprocal. It reciprocates nothing to this country. It grants to foreign nations wholesale permission in many instances to load up American markets with products produced under sweatshop and coolie conditions which will in time wreak even greater injury and damage to the industrial strength and scientific resources of this Nation, so necessary to the national defense and well being.

I am unalterably opposed to this most unjust and unsound bill and to the closed gag rule which brings it before the House.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. KELLEY].

Mr. KELLEY of Pennsylvania. Mr. Speaker, I like many of my colleagues, am in the unenviable position of opposing the rule and thus opposing consideration of the bill under a closed rule. I have supported the Reciprocal Trade Act continuously up to this time; however, I now find myself in the position where I cannot get relief for glass and coal industries. We cannot get any consideration to relieve the industries which are being badly injured throughout the country and in various areas of the country. I refer particularly to those industries with which I am familiar, namely, the glass and coal industries. We have been down on our knees figuratively speaking praying for relief for those industries, particularly the coal industry.

The dumping of residual oil in the eastern part of the United States has damaged the coal industry and will continue to do so. The residual oil that comes from South America, particularly from Venezuela, is the residue that remains after the oil has been refined. Let me make this emphatic: The coal industry can compete with the oil and gas industry of this country. But I am told that residual oil is placed on the shores of our country at the quite low price of 2½ cents a gallon. That is ridiculous. How is coal going to compete with that price?

Residual oil is good for only one thing in this country. With the millions of tons of residual oil that have been dumped here it is only good for one thing and that is for heavy industry.

Mr. VAN ZANDT. Mr. Speaker, will the gentleman yield?

Mr. KELLEY of Pennsylvania. I yield to the gentleman from Pennsylvania.

Mr. VAN ZANDT. The residual oil that comes out of the Caribbean area is sold on the eastern seaboard market for whatever price they can get?

Mr. KELLEY of Pennsylvania. Yes.

Mr. VAN ZANDT. If the coal miners dug the coal for nothing and the railroads hauled it for practically nothing, the Venezuelan oil would still undersell American-mined coal.

Mr. KELLEY of Pennsylvania. Yes.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. KELLEY of Pennsylvania. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. I know the gentleman has led the fight in this House on the question of dumping residual fuel oil on the eastern seaboard. He is the great spokesman for the bituminous coal industry. May I say to the gentleman that he knows I have the privilege of speaking for the anthracite or hard coal industry. We join with you folks of the soft coal industry in this resistance to the dumping of residual fuel oil from the Caribbean area and from Venezuela. The economy of Venezuela is now at its

highest peak in the history of that country. It is one of the most wealthy and one of the most expensive places to live in in the world.

Mr. KELLEY of Pennsylvania. I thank the gentleman from his observation.

Mr. Speaker, there have been a lot of figures presented to the House Ways and Means Committee and before the Joint Committee on the Economic Report trying to disprove the contention of those who are interested in the coal industry in this country that residual oil has done any damage to the coal industry. I do not know where they got their figures but they are erroneous. It is a simple matter of arithmetic.

The coal operators or coal shippers have a contract, let us say, using this as an example, with some industry using coal. They are suddenly cut off and denied further shipments. The reason is stated to them. So it is an accumulation of all these coal shippers losing their contracts and then adding them up. It is a simple matter of arithmetic. It shows that 35 million tons of coal per year are being lost to residual oil, cheap giveaway oil, from Venezuela. The 35 million tons of coal mean 24,000 miners are out of work. It means that the mines are closed down. It means some of them are closed down only partially. Now, you do not revive the coal industry, you do not revive mining operations overnight. Full mobilization would put this country in desperate straits for coal if the mines remain idle very long. I think we should take stock of that fact because after all it is a matter of national defense to preserve and nurture the coal industry of this country. It is a basic industry, it is a natural resource, and should not be neglected. We have appealed for aid but we have not found it. We have talked long and we have been listened to with deaf ears so far as the committee is concerned.

We cannot do anything under this rule, and therefore I must oppose the rule. I am compelled to do so. I am also opposed to the bill. The glass industry has suffered greatly from imports, and the bill offers no relief. It occurs to me that a rule should permit some avenue where an industry that is damaged could seek relief. Now, you might say to me, "Well, the escape clause offers that." It does in words, but it does not in action. Appeal to the Tariff Commission is no help—at least, for these two industries. We think that the committee should have taken some cognizance of the difficulty of these two industries. I am sorry that I am in the unenviable position because I believe reciprocal trade over a long period is beneficial to the country. I believe relief should be given, not permanently but temporarily, so that industries can adjust themselves to changing conditions.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. KELLEY of Pennsylvania. I yield to the gentleman from Kentucky.

Mr. PERKINS. I believe the gentleman from Pennsylvania has been a coal operator for many years.

Mr. KELLEY of Pennsylvania. Yes; I am sorry to say.

Mr. PERKINS. And in the past 2 years or 2½ years your operations, I believe, are no longer in operation.

Mr. KELLEY of Pennsylvania. Well, they are idle.

Mr. PERKINS. I think that my colleague from Pennsylvania will agree that the importation of this residual oil is one of the major reasons for our high rate of unemployment in the coal areas.

Mr. KELLEY of Pennsylvania. That is exactly right.

Mr. PERKINS. One reason why this is a difficult problem is that our own people are carrying on this dumping program—in most instances are using old and obsolete machinery which makes the volume of residual oil great. This is particularly true in Venezuela. Day after day we kick the seriousness of our coal industry aside by saying residual oil is not a cause. There must be a commencement point, and why should a basic industry be denied protection from this dumping program?

The amount of this waste oil coming in from Venezuela during the past calendar year and dumped on the eastern seaboard amounted to 350,000 barrels per day, or the equivalent of 90,000 tons of coal each day. With the daily coal production approximating 1.1 million tons, this amounts to oil importation equivalent to 8 percent of our national coal production. The Reciprocal Trade Act which we now propose to extend prohibits any action that would stop this increased importation of residual oil.

I believe in free trade, and am in accord with the general principles of the Reciprocal Trade Act. However, free trade should not be considered as a license for special interests to dump by-products into this country at the expense of one of our essential industries—coal. This basic industry must be given an opportunity to survive and a limitation on imports of residual fuel oil is a necessary step for that opportunity.

Mr. Speaker, I would like to support this measure and hope that the House will give us an opportunity to offer an amendment to establish quota limitations on imports of foreign residual fuel oil. I want to thank the gentleman from Pennsylvania for yielding to me.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. Moss].

Mr. MOSS. Mr. Speaker, my opposition to a closed rule is based on the fact that this Congress of the United States—a Congress elected by people from all the Nation and dedicated to representing the will of all the people—must have the fullest possible opportunity to express all views on a matter so important as the reciprocal trade program.

I realize, of course, a completely open rule to debate the program would lead only to endless discussion as each Representative puts forth the point of view of his area. I believe, instead, we should have a rule permitting discussion of substantive amendments to the bill before us.

Only a few areas of the Nation are represented by the members of the Ways and Means Committee which worked so long and hard to report the bill before us. I know they considered all the many pages to testimony presented to them, but their views are, of necessity, based on the wishes of the people they represent. On legislation of such worldwide importance as reciprocal trade, the widest practicable debate should be permitted so that the final bill will have the benefit of all shadings of meaning and opinion from representatives of all the areas of our Nation.

The bill, I fear, sticks too closely to the recommendations of the Randall Commission, and that Commission is not without fault in spite of the long hours of hard work put into developing its proposals. There is, for instance, mention of peril-point provisions in the legislation before us, but too often in the past regulations to implement peril-point legislation have been ineffective.

The people in my congressional district believe trade with other nations of the world should be as free as possible. They recognize the value of economic exchange of goods as an arm of international relations. We do not believe, however, free trade should be permitted to wipe out the standard of living enjoyed by factory and farm workers in our Nation. When the governments of other nations sets up false barriers, we must protect the interests of our people.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. Brown].

Mr. BROWN of Ohio. Mr. Speaker, I rise in opposition to the resolution and the adoption of the rule contained therein. I shall vote against the motion to move the previous question. I shall do so because I do not believe that this is the type of legislation upon which a closed rule or a so-called gag rule is either wise or necessary. We are told, of course, many, many times by many people that we should be progressive and forget the past and look only to the future; yet in another breath we are told that we should think only of the past and follow established precedent and vote for a gag rule on a tariff bill when actually the question before us is not that of individual tariffs but rather great questions of broad policy.

Now, I can understand why a gag rule or a closed rule might be considered necessary if you were bringing in a tariff bill which contained thousands of items, such as are also contained in many tax bills, like the recent Tax Revision Act. But when you bring in a bill such as this, that deals with certain fundamental principles and the question of the delegation of power and of congressional responsibility, if you please, to the executive branch, then I believe that the Members of this House have the right, the duty, and the responsibility to work their own will. Remember, Mr. Speaker, when this bill finally leaves the House and goes to the other body across the Capitol, the Members of that body will be permitted free and unlimited debate and will have the privilege of offering any and all amendments that they may desire on this bill.

I believe that the average Member of the House is capable of passing judgment upon the principles that are included in this bill, the principles of government that are involved. They

talk about precedent; that we ought to gag ourselves, that we ought to vote to gag ourselves because of precedent.

Let me remind you, Mr. Speaker, that all of these bills were not brought to the floor under a gag rule; that in 1951 the extension of the Reciprocal Trade Agreements Act was brought to this floor under an open rule, a rule which permitted the offering of amendments from the floor. It was then, and then only, that the escape clause provision was written into the Reciprocal Trade Agreements Act.

It is entirely possible, with all due respect to the membership of the Committee on Ways and Means, that there is some Member of this body—certainly not myself, but some other Member who is wise enough to offer an amendment that the majority of this House will think will help to carry out the intent and the will of the people.

Each and every one of us has an equal responsibility to represent our people. It is not easy for me to oppose this rule, yet I have a responsibility to speak for my constituents, for the people of my own district and to do what I can to protect the interests of the people of my State and finally to do that, which in my judgment and conscience, with what little intelligence God gave me, I think is in the best interests of the American people. To say to me and to say to the Members of this House that we should meekly and weakly surrender that privilege, that right, I think is wrong.

So I am hoping the House will vote down the previous question so that we may have an open rule.

Mr. SMITH of Virginia. Mr. Speaker, I yield 1 minute to the gentleman from Tennessee [Mr. COOPER].

Mr. COOPER. Mr. Speaker, I should like to point out, in response to the question raised by the distinguished gentleman from Ohio [Mr. BROWN], that the escape clause was already included in practically all the trade agreements in existence at the time that amendment was adopted in the House. The amendment to the act simply copied the provision that was already included as an escape clause in the Trade Agreements Act.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Ohio [Mr. MINSHALL].

Mr. MINSHALL. Mr. Speaker, on last Tuesday I appeared before the Committee on Rules in support of an open rule on H. R. 1.

I am in favor of the reciprocal trade-agreements program. We in Greater Cleveland, with the advent of the St. Lawrence Seaway, are becoming increasingly aware of our role in international commerce, and we are cognizant of the favorable effect increased trade will have on the security of the free world. However, I am opposed to placing the gag rule on a measure of such great importance to the American people. I am sure that opinion is and will be most evenly divided which only serves to stress the importance of abolishing the closed rule.

It is my opinion that matters so important to the American people as foreign trade, tariffs and reciprocal agreements should be discussed openly and freely by the entire membership of the House of Representatives. It is my feeling that if the discussion and debate here on the floor should prove to a majority of us that H. R. 1, as reported by the Committee on Ways and Means, should be amended or changed in any way, we, as Members of this Congress, should have an opportunity to do so. I urge the Members to reject the closed rule.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Ohio [Mr. HENDERSON].

Mr. HENDERSON. Mr. Speaker, I am opposed to the rule and the bill. The rule, which eliminates the possibility of amendment, makes the Congress merely a ratifying body—a rubber stamp, at most.

This bill, as it stands, is harmful to my district and even with amendment possibly will present a serious threat. Southeastern Ohio depends greatly on coal, glass, and pottery, each of which is in a perilous position as a result of already reduced tariffs and lack of restrictive quotas. If this bill is passed, I would like to see it revised in such a way that at least the coal mines in Ohio, the pottery industry, the glass plants, the floor- and wall-tile industry, and the people dependent upon them for their livelihood might be served by the first principle of Government: Protection from foreign invasion—invasion by cheap inferior products. Therefore, Mr. Speaker, I oppose the rule which would prevent this Congress from setting up such a line of defense.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. NICHOLSON].

Mr. NICHOLSON. Mr. Speaker, I am against this rule. I am against the bill anyway. I believe in protecting the business of this country. I think, after raising our pay yesterday $10,000, we can meet these issues and pass the laws ourselves instead of letting the State Department make the laws for us. It is about time we got up here and made the laws in this country, and not have the State Department or anybody else make them for us. The Constitution provides who shall do it, and it is about time we started following the Constitution, our Constitution, instead of the constitution of every other country in Europe and in Asia.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. NICHOLSON. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Would the gentleman agree with me that there is nothing reciprocal about this Reciprocal Trade Agreements Act, that only the United States provides the reciprocity?

Mr. NICHOLSON. There never has been any reciprocity. It has always been one way.

Mr. BROWN of Ohio. Will the gentleman agree with me that practically all foreign countries have higher tariff barriers than does the United States?

Mr. NICHOLSON. There is no question of that. They do not permit a lot of our products to get in over there at all.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Connecticut [Mr. DODD].

Mr. DODD. Mr. Speaker, I oppose this rule recommended to control the parliamentary situation for this important piece of legislation.

I do not believe in these gag rules.

I believe in free and open debate with power to make changes in proposed legislation.

This rule allows us to talk our heads off for 2 days but denies us a chance to do anything else.

We cannot even change a punctuation mark in the bill.

We are told: "Here is the law. You can take it or leave it. And you will have only one opportunity to do that."

This is getting pretty close to puppet parliamentary practice.

It appears to me that there is an interesting relationship between these closed rules and the delegation of congressional responsibility to the executive branch of our Government.

Those who urge the adoption of a tight rule believe that this body, because of its size and the conflicting interests here represented, cannot write good tariff legislation. I believe the Congress is capable of handling tariff legislation.

Because I believe that we are capable of exercising that restraint and that self-discipline which are essential to the operation of successful representative government.

As for the time element, what difference does it make if it takes us 6 days or 6 weeks to hammer out a good tariff law on the anvil of free debate.

The other body has been known to take more than that length of time in considering a specific piece of legislation. And the other body will talk about this proposal at great length and will allow a free opportunity for amendment of it.

If the other body is capable and responsible enough to permit open debate, isn't it about time that the Members of this body claim for themselves the same high sense of responsibility and the same degree of efficiency?

There is always time to do things right. The interesting relationship between gag rule and delegation of constitutional responsibility becomes more clear as we examine into the reasons suggested for this kind of procedure.

For once it is conceded that this body has neither the time nor the proper disposition to write intricate legislation, it is simple to proceed to the delegation of constitutional responsibility to the executive branch of our Government.

Mr. Speaker, these are compelling enough reasons for opposition to this rule.

But if more are needed, let me suggest that the extension of the authority delegated for 3 years is, under all existing circumstances, impractical and unreasonable.

In the posture in which the United States of America stands today there is a critical necessity for frequent examination and reexamination of our international trade and tariff situation.

This Congress can find the time once each calendar year to examine what has happened and to correct mistakes.

No executive needs a 3-year license arrangement with the legislative branch of this Government.

If we are to continue down the road of delegation of our constitutional responsibility, let us do it on a short-term basis.

Mr. Speaker, I have not attempted to point out the economic tragedies which may befall the people of my district and of my State under the name of reciprocal trade agreements.

But lest there be those who think that no such problems exist, let me state here and now that a great number of industries and a vast number of employees look to me to help preserve the industries and these jobs until some provision can be made for them.

I believe in the improvement of world trade and in reciprocal trade agreements, but not to the extent of destroying ourselves because of too much haste and insufficient planning and preparation.

The call of the hour, Mr. Speaker, is that America preserve herself as that we may help preserve others.

I ask my colleagues to defeat this rule and to instruct the Rules Committee to give us a parliamentary situation where we can strike a blow for a free international economy and a healthy and ever-growing free-enterprise system in the United States.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Mississippi [Mr. SMITH].

Mr. SMITH of Mississippi. Mr. Speaker, I rise in support of the rule. I take this time to remind my colleagues on both sides of the aisle that they cannot defend a vote against this rule and still take the position that they favor the extension of a sound reciprocal trade program.

I want to remind those who represent districts where the commerce of the area knows the value of a forward-looking American trade program that you cannot appease some small minority in your section by voting against this rule and at the same time claim to work for the interests of the great majority of the people of your district and of this country.

I remind my colleagues who represent agricultural areas where we have staggering surpluses of commodities that can be taken off the surplus list only by some sort of trade arrangements with the rest of the world that you cannot appease some small industry in your district, some small selfish interest, and at the same time vote against this rule and in a sense thereby vote against the reciprocal trade program, and by that little device think you are riding both sides of the fence. You know that the purpose of defeating this rule is to destroy the Reciprocal Trade Act insofar as possible.

We have reached here the historic situation where for the first time in the history of the United States we have an intelligent view, an intelligent leadership on the part of a Republican President on this matter of trade policy. I appeal to my Republican colleagues to support their President in putting this into effect, and I appeal to my Democratic colleagues to do what they can in this bipartisan sense to take advantage of this great opportunity a Republican President has given us.

I have been shocked and disappointed and dismayed at the attitude of so many of my friends from areas where the viewpoints of great Americans like John C. Calhoun once prevailed. John C. Calhoun must be revolving in his grave today as he sees the views about trade legislation of some of his successors from the part of the South he fought so hard for during his years in public life.

I hope we will realize that the vote on this rule today is decisive. If you believe in the reciprocal trade program, you will defeat this effort to slice it up into small pieces. An effort is being made to slice up the reciprocal trade program, just like many other programs that are in effect. There is no effort to try to repeal it completely, at least no open effort. They want to cut it to pieces and knife it in the back to do whatever can be done to destroy it, just as has happened to so many other programs. But I want to emphasize to all of my colleagues today that the American farmer who has a stake in the production of surplus commodities and the staggering cost of maintaining those surpluses wants to sell his goods, and the American farmer will realize in the long run that if this reciprocal trade program is cut back here today, as a result of our action in opening this up to every type of trade sell-out that can be conceived of, your responsibility in voting against this rule will be acknowledged and accepted. This is an important issue. I think this bill is the greatest issue which will come before the Congress within the next 2 years, during which we will be Members of the 84th Congress. The overall issue will be decided, as the President said 2 years ago, on whether we fail or succeed in solving this trade problem.

Mr. ALLEN of Illinois. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. GAVIN].

Mr. GAVIN. Mr. Speaker, at times I cannot understand the attitude of the Members of the House. I cannot understand your thinking—whenever there are any economic difficulties in any areas of any country in the world, why you get all worked up about it; but when there are any difficulties in any particular areas of the United States such as in the coal industry in the various States where mine after mine has been closed down and thousands of miners have been thrown out of employment, nobody is seemingly concerned or gets excited over the problem of how the Federal Government can step into the picture to afford relief from the deplorable conditions that exist. I want to say to my good friend, the gentleman from Illinois, that he is not well informed on conditions in the coal areas of Pennsylvania. For his information, I want to point out to him that the importation of residual fuel oil and crude oil has had a devastating and tragic effect upon the production of coal in Pennsylvania. I might call to your attention that in 1947 we were importing approximately 350,000 barrels of oil and today we are importing 1,200,000 to 1,300,000 barrels of oil a day. I might call to your attention that this has seriously affected not alone the coal industry and oil industry but killed the incentive of the American independent oil producers to find new reserves of oil. Our own oil production in the United States which was 6,500,000 barrels a day last year at this time is at the present cut back to approximately 6,100,000 barrels.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield since he mentioned my name?

Mr. GAVIN. I yield.

Mr. ALLEN of Illinois. We all sympathize with the problems of the coal industry. I do not know of any American industry which deserves more of our sympathy. The gentleman from Pennsylvania must be well informed about the coal situation because he said that I did not know but little about it. I ask what was the production of coal, let us say, 2 years ago? How many tons of coal were produced?

Mr. GAVIN. I cannot give you the exact figures right now.

Mr. ALLEN of Illinois. Can anyone give us the figures?

Mr. VAN ZANDT. About 2 years ago, the production of coal was 630 million tons.

Mr. GAVIN. And what is it today?

Mr. VAN ZANDT. About 400 million tons.

Mr. GAVIN. In other words, production of coal has gone down 230 million tons.

Mr. ALLEN of Illinois. Now my question is this: 630 million tons of coal were produced. If we kept out of this country the million barrels of residual oil which is imported how much coal would be consumed in place of that oil providing coal was used entirely?

Mr. GAVIN. I regret that I am not able to give you those figures at this time.

Mr. ALLEN of Illinois. Can anyone answer that question? Perhaps the gentleman from Pennsylvania who is on his feet can answer the question. In other words, how much coal is displaced by this 1 million barrels of residual oil? If 1 million barrels of residual oil were not imported, how much more coal would be used?

Mr. MASON. It amounted to 43 million tons last year.

Mr. GAVIN. Did the gentleman say 23 million tons?

Mr. ALLEN of Illinois. That is 23 million tons out of 640 million tons.

Mr. GAVIN. The gentleman stated that it was 43 million tons.

Now, I might say to the gentleman from Illinois, the coal industry is not looking for sympathy; the men working the mines cannot live on sympathy; they want a solution to this problem, and cutting back oil imports would help. The facts are that the American oil industry has cut back, because of the importation of crude oil, approximately 400,000 barrels a day.

Now, here is the point. Today our daily production is cut back because there is a flood of crude and residual oil coming in, devastating and tragic to the coal industry, and impairing and eventually would seriously affect the oil-conservation programs of the various States, and killing the incentive of independent oil producers to find new reserves.

The SPEAKER. The time of the gentleman from Pennsylvania has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the gentleman 3 additional minutes.

Mr. GAVIN. Suppose for the sake of argument we accept this present situation, and suddenly we are catapulted into an emergency somewhere in the world. Our supplies of oil are cut off from Venezuela and the Far East by submarine warfare, and we have not been giving the American independent producers incentives to build up our oil reserves because of present heavy importation of foreign oil. We are going to be in a very trying position to fight any kind of a war unless we have oil. We floated to victory on oil in World War I and World War II and the Korean war. The petroleum industry turned in a magnificent performance. They should be encouraged and not discouraged.

Mr. SIMPSON of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. GAVIN. I yield.

Mr. SIMPSON of Pennsylvania. Apropos of what the gentleman from Mississippi [Mr. SMITH] said a moment ago, it depends on whose congressional district is affected by this bill whether we are for it or against it. The gentleman from Mississippi [Mr. SMITH] comes from the South, and I will wager he has no industrial mills of any importance in his district. I will wager that he does have a big cotton-producing area and he is completely protected by quota for the particular business in his district. I say to all of you, if we vote our own districts we will vote for what is good for the workingmen in our district, and that means that we have to have protection more than we have today.

Mr. GAVIN. I was in Europe in November and December and let me tell you the people of the European countries are doing well for themselves. They are well fed and well clothed and well housed. American business has produced the money to pay into the Federal Treasury to make possible the various programs to bring about their economic and industrial rehabilitation. Today they have, with our help and money, the latest and finest of all types of industrial equipment. With low-paid labor in Europe and in their amazing recovery we are now asked to let down the bars to flood this country with cheap merchandise and materials which will crucify American industry and the worker who by the sweat of his brow is trying to maintain a respectable living. We had better think very carefully about this whole program. I want to be recorded as opposed to this rule because it will have a tremendous impact on the economic and industrial life and welfare and well-being of the American workingman, particularly in the coal fields, which are in a deplorable condition at this time.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. GAVIN. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. First of all, I do not like the word "flood" connected with oil; but, to be serious, I would like the House to know that many of my colleagues in the coal fields and I have never voted against a foreign-aid bill rule or final passage since 1945. All that we in the coal business have been trying to do is to have this new law permit some consideration. I have never opposed a foreign-aid bill or any bill dealing with foreign aid since I have been here. This time I oppose the rule and the bill.

The SPEAKER. The time of the gentleman from Pennsylvania [Mr. GAVIN] has again expired.

Mr. GAVIN. I ask the gentleman from Tennessee to give me 3 additional minutes, because some of the Members on that side have used a great deal of my time.

Mr. COOPER. I do not have the time.

Mr. GAVIN. I want to be recorded as opposing the rule, and I hope your American pride in your country will manifest itself today and you will oppose this rule for the welfare of the American people and protection of the American workman.

The SPEAKER. The time of the gentleman from Pennsylvania has again expired.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Georgia [Mr. DAVIS].

Mr. DAVIS of Georgia. Mr. Speaker, I am opposed to this closed rule.

On Tuesday I went before the Rules Committee along with a number of other Members of the House and urged that an open rule be given on this bill. We are confronted here today with statements by members of the Rules Committee and the Ways and Means Committee that if this closed rule is voted down and an open rule adopted, consideration of this tariff bill may continue for days, and great numbers of amendments may be offered to the bill.

What, may I ask, is wrong with that? Is it not our principal business here to give adequate consideration to all legislation, even though it may require days to do it? Is it not the proper function, as well as the duty, of each Member of the House to offer amendments to every bill which comes up, if in his judgment the bill needs amending?

Furthermore, is it not the right of each Member who is here representing the people in his district to offer such amendments to all legislation which in his judgment may be needed or required? These are not matters of grace or sufferance.

We have been told that the Ways and Means Committee carefully considered this bill, and that as the bill is drawn, it embodies the best thought and judgment of the Ways and Means Committee. I have no doubt that that is true. However, the members of the Ways and Means Committee do not either collectively or individually represent my district in Congress. I was elected to represent it, and I want to exercise my own judgment, not the judgment of the Ways and Means Committee, in giving that representation. I have not deposited my proxy with the Ways and Means Committee, and I do not want to legislate by proxy through the Ways and Means Committee. I want the right to take just as much time as needs to be taken in the consideration of this bill, and to offer amendments to the bill, discuss them on the floor of the House, and give the House membership an opportunity to accept or reject any amendments which I may offer.

A closed rule is a gag rule. It deprives the membership of the opportunity to give full and free consideration to pending legislation. The fact that it may require considerable time to give this consideration is no argument against it. What have we been doing here since Congress convened on January 5 which makes time such a precious element now? Most of the time we have been meeting just 2 days a week, and staying in session only a short time on those days. We are not pressed for time. We have all the time necessary to consider thoroughly this bill and all amendments which may be offered to it, even though it may require the balance of this week and all of next week.

This is one of the most important bills which will come up during this session of Congress. Whatever it may contain when it is finally voted upon, it is going to have a lasting and far-reaching effect upon our economy, our industry, our agriculture, and our working people.

In my judgment, this bill grants too much authority to the Executive. It enlarges to a great extent the authority previously possessed by the Executive. I think it goes too far. I think it should be amended to include safeguards and afford protection to certain of our industries which are threatened with great injury through the flooding of our markets with articles manufactured in foreign countries by cheap labor, which, in some instances, is paid only one-tenth the average hourly wage paid to workers in similar industries here in America. This kind of cutthroat competition is ruinous to our workers and to our industries.

I voted to extend the reciprocal-trade legislation last year. I would like to vote to extend it again. But if this closed rule is adopted, and the bill, as it is now written, comes up for adoption on the final vote, I shall vote against it. I cannot support the bill in its present form, although I would like to see it amended in certain particulars so I would be able to support it.

Mr. SMITH of Virginia. Mr. Speaker, I yield to the gentleman from Wisconsin [Mr. REUSS] such time as he may desire.

Mr. REUSS. Mr. Speaker, I am opposed to the rule in its present form.

Mr. Speaker, I am in favor of H. R. 1 and opposed to amendments which will in any way cripple its purpose of increasing our two-way trade with the rest of the world. But I believe that the closed rule, House Resolution 142, is too tightly closed, and that some measure of amendment should be permitted. I have confidence that the Committee on Rules can come up with a rule which, without allowing unlimited amendment, nevertheless permits a debate and a vote on the major issues of policy presented by H. R. 1. I am equally confident that the valid principle which H. R. 1 expresses will prevail over such amendments.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Virginia [Mr. POFF].

Mr. POFF. Mr. Speaker, as I see it, the whole trouble with our reciprocal trade program is that it is not reciprocal.

Today, United States tariff rates are at the lowest point in our history, averaging only 5.1 percent of the value of affected imports. In fact, today's average tariff is 68 percent lower than it was in 1937. To cite a few examples for comparison: the average French tariff is 10.6 percent; Switzerland's tariff averages 8.1 percent of imports; and Great Britain's average is 25.6 percent. This last figure is actually 20 percent higher than it was in 1937.

The average individual in America today thinks that America has a tariff on every article imported from a foreign nation. This is not the case. In point of fact, of the some $10.8 billion 1951 imports, over $6 billion consisted of products which entered this country under no tariff or quota limitations whatever. Of the remaining $4.8 billion, only $3 billion were subject to import quotas or tariffs high enough to affect in a substantial way the import volume. Most of this $3 billion consists of agriculture products, which fall within the price-support program, and finished manufactures.

One of the domestic American industries most seriously affected by this lack of reciprocity is the textile industry. In a 3-year period, the number of textile employees has declined approximately 260,000 of which some 40,000 were in the South. The United States 1953 tariff rate on imported cotton manufactures was 21.55 percent and on synthetic textiles, 19.7 percent. On imports of cotton manufactures, the United Kingdom, on the other hand, charges a tariff up to 30 percent; Italy, up to 25 percent; Germany, up to 30 percent; and Canada, up to 27½ percent. To further compound the inequity, the average hourly wage of an American industrial worker is $1.79; the average hourly wage of a French industrial worker is only 46 cents.

Compared with America's 19.7 percent tariff on synthetic textiles, India charges 50 percent; Italy, 25 to 27 percent; Norway, 22 percent; and France, 20 to 25 percent.

Another glaring example of how other nations with which America trades have failed to reciprocate on tariff concessions is found in the automobile industry. America's tariff on foreign automobile imports is 10 percent. Japan charges 30 to 40 percent; India, 63 percent; France, 15 to 30 percent; and the United Kingdom, 15 to 33⅓ percent. However, the tariff imposed is not the only restriction to automobile importation in England. Additional duties and taxes bring the consumer price in the British market of 1 of the 3 low-priced American cars up to approximately $6,000.

Not only is the American tariff lower than that of most of her trading Allies, but the wage differential works a serious competitive handicap on the American workingman. As noted before, the average hourly wage of an American industrial worker is $1.79. In France, it is 46 cents; in Switzerland, 57 cents; in West Germany, 44 cents; in the United Kingdom, 47 cents; in Italy, 35 cents; and in Japan, only 19 cents. So it is that three factors operate in concert to the detriment of the American businessman and American workingman; namely, first, a low American tariff; second, foreign commodities produced by foreign labor with substandard wages; and, third, high foreign tariffs which restrict America's export volume in the foreign market.

I fully realize that those who support the theory of completely free international trade do so under the conviction that America ultimately will gain economically by importing on a duty-free basis, all those commodities which can be produced cheaper in foreign countries than they can be produced in America, and that America should produce for domestic consumption and foreign export only those commodities which she can produce more cheaply than a foreign nation. Such a philosophy, to my mind, is a little heartless, because it envisions the ultimate extinction of many small American farms and industries in which the principal cost factor is skilled or unskilled labor.

We, in the United States, have, in recent years, fostered high labor standards and high wages. We outlaw child labor and sweatshops. We prohibit interstate shipment of prison-made goods. We insist upon fair competition through antitrust laws. We impose social-security and unemployment-compensation taxes. We establish minimum wages. We require workman's compensation. We enforce a variety of other rules and regulations designed to enhance the lot of the American workingman. These laws have contributed much to our national welfare but, at the same time, they have necessarily increased the sale price of our American commodities in the foreign market.

Those free-traders who profess such a vital interest in the consumer will have to admit that America could produce goods cheaper and in greater abundance if we permitted child labor and sweatshop conditions. The question is whether it is morally right for us to sanction such conditions abroad by lowering or removing the tariffs on foreign commodities produced cheaper with substandard wages. Such a policy not only encourages a continuation of lower labor standards in foreign countries but lowers the labor standards in America by forcing American labor to compete with underpaid foreign labor.

The international free traders do their best to minimize the impact of their policy on the individual American industry directly concerned in a particular tariff structure. Occasionally, they will go so far as to admit that their policy will annihilate a certain American industry. But they never seem to be willing to consider the secondary repercussions of their policy.

Perhaps the best example of these secondary repercussions is to be found in the American transportation industry. To the uninitiated, the unrestricted importation of cheap foreign residual fuel oil might seem to have no bearing on the railroad industry. But it does. I will try to translate the total number of barrels of residual fuel oil imports in 1954 into railroad wages lost in Virginia's Sixth Congressional District.

The three Pocahontas railroads, the Norfolk & Western, the Chesapeake & Ohio, and the Virginian, have some of their most important terminals in Roanoke and Clifton Forge. Of the some 386.4 million tons of domestic bituminous coal production in 1954, about 92 million tons were originated by these 3 railroads. This amounts to 23.8 percent of the total. Total importation of foreign residual oil in 1954 was 134.8 million barrels, most of which was dumped along the eastern seaboard, capturing important coal markets. Total coal displacement was approximately 31.6 million tons. Applying the 23.8 percent ratio, the three Pocahontas lines lost over 7½ million tons of coal cargo. At the rate of $3.56 per net ton, the total freight revenue loss was $26.7 million. On the N. & W. line, approximately 47 percent of operating revenue goes into wages. Using this ratio as an average, the total loss in wages to the 58,541 employees of the Pocahontas railroads was about $10.6 million. Approximately 10,000 of these employees work in our sixth district, which means that the total wage loss in the sixth district was about $2 million.

Like the ripples from a rock dropped in a pond, this wage loss spreads across the entire surface of our economic lake. Farmers, grocerymen, barbers, theater owners, professional men, wholesalers, and retailers feel the shock. Railroad workers unemployed swell the welfare rolls and dislocate the job picture in other industries.

Now what is the rock that is dropped in the pond? What is causing this loss of wages and disrupting our economic life? Nothing more complicated and nothing more simple than the unrestricted importation of a foreign commodity produced as a waste byproduct by foreign interests through the exploitation of cheap foreign labor. The international do-gooders, proclaiming pious platitudes about opposing quota limitations to help our less fortunate neighbors in foreign lands, may as well admit that the only ones this policy helps are the big foreign oil men and that this help is given at the expense of our own American industry and our own American workingman.

While the American coal industry and associated industries naturally have a personal interest in supporting a quota limitation, we as legislators have a broader interest which, I submit compels us to agree with their position, and that interest is the national interest. Our national economic strength and military security depend in large measure upon our natural resources and our capacity to transport them from point of production to point of consumption. In the event of enemy attack, our mobilization potential will be gaged, not by coal in the ground but by coal in the furnace. Coal in the ground cannot become coal in the furnace unless we continue to maintain and further refine the technical know-how and operating skill of the mining and transportation industries. This cannot be achieved unless we are willing to protect these industries from unfair competition from abroad.

Out of a sincere and abiding conviction that the House, as well as the other

body, should have a free and unabridged right to work its will on this legislation, I shall vote against the closed rule. If the rule is passed and individual Members are given no opportunity to amend the bill, I shall vote to recommit the bill to committee for further study and amendment. If the bill is not recommitted and amended, I shall vote against the bill in its present form.

Mr. ALLEN of Illinois. Mr. Speaker, I yield such time as he may desire to the gentleman from Ohio [Mr. SCHENCK].

Mr. SCHENCK. Mr. Speaker, I am opposed to considering the questions of reciprocal trade agreements under a closed rule.

The matter of reciprocal trade agreements is of great importance to our Nation as well as the other nations of the world. We must have a wise and proper program of foreign trade. It is very important that we work out programs of both imports and exports which will benefit our Nation and all our citizens.

That the people of the Third District of Ohio, which district I have the honor to represent in this House, are deeply interested is attested by the very heavy mail I have been receiving on this subject.

It seems to me, therefore, that because of the extreme importance of this legislation that full opportunity should be given the Members of this House to fully and properly consider each and every amendment that may be offered. It is also my conviction that this legislation is too important to be rushed. Sufficient time should be taken so that the resulting legislation will have been fully and carefully considered and therefore will be sound.

Mr. SMITH of Virginia. Mr. Speaker, I yield 1 minute to the gentleman from West Virginia [Mr. STAGGERS].

Mr. STAGGERS. Mr. Speaker, one of our colleagues said that Calhoun would turn over in his grave if he knew what was going on here today. I am telling you that the framers of the Constitution would turn over in their graves if they knew that the men and women elected to represent the people of this country were delegating their authority to the State Department, the Ways and Means Committee, and the Rules Committee.

We should take into consideration the fact that we represent the interests of the people and not turn that power over to somebody else.

I am opposed to this closed rule. Those who advocate it have not come forward with one proposal to help the distressed areas of the United States; not one proposal. If they would come up here and say: "We are going to do something for the coal, glass, and textile industries," it would be different.

We who are opposed to the closed rule hope that should an emergency come upon us we would be in position to meet it. Formosa is at a critical stage. Nobody knows what is going to happen tomorrow. We must accept our responsibility, look at the facts and say we are going to take care of the coal, glass, textile, and our other major industries in this country.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY. Mr. Speaker, I rise at this time to voice my opposition to this rule, which would prohibit amendments to H. R. 1. I wish first to emphasize that I wholeheartedly support the basic purpose of H. R. 1. Like so many others my age I learned the hard way, by being in combat in World War II, that this Nation cannot be isolationist, cannot go it alone, and cannot bar its doors to the flow of trade. I know that we must act in full concert with all the other free nations of the world, so that the economic and social health of all trying to stem Soviet expansion and designs will be strong. I fully understand that we are but one in a family of nations, which like any family group has its individual members interdependent on each other. Our own great land is more blessed in many respects than some other members of the family of free nations, and I accept the great moral obligation we have to those less fortunate.

However, it is one of the most basic tenets of familial relationship that each household in a family group has certain obligations to its own members, obligations which in the nature of things are primary. These involve matters essential to their welfare and survival. I must therefore, Mr. Speaker, speak up on behalf of such members; they are the people of southern Illinois. It is my duty to do so; that is what I am here for.

In southern Illinois we have an area in our own great Nation that is suffering such acute distress that it is beyond my capacity to describe it to you. Suffice it to say that it is classified IV–B by the Department of Labor, which means a very substantial surplus of labor. This means over 30,000 unemployed, over 24,000 families on food relief. Why, Mr. Speaker, why should this happen in our land of plenty? Because the source of their livelihood, the coal and fluorspar industries of southern Illinois, is being strangled by competition from beyond our shores.

We have a most serious obligation to our own people. We must assure them the means to a decent living. It is for this reason that I am against this rule, it is for this reason I seek amendment to H. R. 1, which this rule would prohibit, to provide my own people with the opportunity to earn their living and to provide our own native industry a chance to survive. Mr. Speaker, unless this rule is defeated, I will be compelled to vote against the entire trade bill.

Mr. SMITH of Virginia. Mr. Speaker, I yield myself the remainder of the time.

The SPEAKER. The gentleman from Virginia is recognized for 9 minutes.

Mr. SMITH of Virginia. Mr. Speaker, I recognize the difficulty of many Members of the House on this bill; we all have our own problems in our own districts, but this is a question that affects the whole country. When the chips are down, I think certainly Members will exercise the right to do what we think is in the best interests of the country as a whole.

It has been recognized ever since I have been on the Rules Committee that bills of this type should be considered, as a practical matter, under a closed rule. The original bill setting up this program, as I recall, and the extensions in 1953 and 1954 were considered under closed rules. Nobody seemed to object at that time; as a matter of fact, both the majority and minority members of the Ways and Means Committee came before the Rules Committee and joined in the usual request that that committee makes of the Rules Committee for a closed rule.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield at that point?

Mr. SMITH of Virginia. I yield to the majority leader.

Mr. McCORMACK. The gentleman's statement is absolutely correct; it has always been understood and accepted. And I might make the further observation that as I sit here and see men from New England and other sections in the North rise and say they are going to vote against ordering the previous question I wonder if they realize that if the previous question is voted down they are faced with having a quota on imports of oil voted into the bill. They are going to be faced with that. If they are against the rule, they should vote for the previous question and then vote against the rule.

It is my belief that the rule ought to be adopted, because it has been the custom and the practice without regard to which party has been in control to consider bills such as this under closed rules.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the minority leader.

Mr. MARTIN. Has the gentleman from Virginia ever known of a tax or a tariff bill that was not considered under the same type of rule?

Mr. SMITH of Virginia. I have just stated that it has been the uniform practice since I have been on the Rules Committee, and I have been on it many years. That is done as a matter of practical necessity.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Ohio, and then I must decline to yield further.

Mr. BROWN of Ohio. The gentleman will agree, I think, that in 1951 the same type of bill was brought up under an open rule.

Mr. SMITH of Virginia. I believe that is correct.

Mr. Speaker, I want to talk about the practical situation and the reason why the rule is brought in here in this way. The members of the Ways and Means Committee know it, the Members of the House who have been here for some years know it. If you bring a bill of this type in and permit as many amendments as could be offered from every section of the country, to suit the special need of every district, by the time you got through with the bill you would have it loaded down with so many amendments you would have to recommit it to the Committee on Ways and Means.

Now, that is the practical situation and it is a practical situation. I am told that there are some 350,000 items subject to the tariff law, which means if you carried the thing to its ultimate absurdity there could be 350,000 amendments of-

fered to this bill. Many of them would probably be voted up.

What are you going to do? There seems to be some intimation here that maybe the Ways and Means Committee is arbitrary about this matter and wants to govern the House or rule the House. There has been the same intimation that the Rules Committee wants to do the same thing, that the Rules Committee wants to run the House. Let me say, and I think this ought to be said once and for all, that the Ways and Means Committee cannot do anything to this House that a majority of the House does not want done. The Rules Committee also cannot do anything to this House that a majority of the House does not want done.

What the Ways and Means Committee does and what the Rules Committee does is that on the best judgment that we have, considering all the practicalities of the situation, we present to you our recommendation, a recommendation that as a practical matter this bill should be handled in this manner. If the House does not like it, if a majority of the House does not want it, you do not have to take it, you can vote it down. But that is the democratic way of doing it, that is the way the rules of the House provide it shall be done.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from Indiana.

Mr. HALLECK. I want to confirm what the gentleman has said as to the practice in the past. He has referred to the immediate past 2 years during which on this side we had the responsibility, and I had the responsibility as the majority leader. If my memory serves me right, in the Republican 80th Congress when we extended the Reciprocal Trade Act we likewise had a closed rule. I also agree with the gentleman that experience has indicated that that is the proper way to proceed. Certainly, speaking for myself, we followed that practice when I had the responsibility and I am not going to be inconsistent now and reverse my position because at the moment the responsibility has shifted to the other side.

Mr. REED of New York. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Virginia. I yield to the gentleman from New York.

Mr. REED of New York. The Members of the House may be surprised, I suppose, when I say that I shall vote for the closed rule. Last year when I had a desperate fight on tax revision and other legislation, the distinguished gentleman from Tennessee [Mr. COOPER] was in the minority. I asked him to cooperate with me for a tight rule to get that legislation through. He did it. I told him I would reciprocate. I am doing that on this legislation.

Mr. SMITH of Virginia. The gentleman from New York confirms what I have said that he and the minority members of the Ways and Means Committee appeared before the Rules Committee with the majority members of the Ways and Means Committee and recommended this type of rule which is the customary type of rule in connection with bills of this kind.

The SPEAKER. The time of the gentleman from Virginia has expired.

Mr. BYRD. Mr. Speaker, I appeared before the House Rules Committee on Tuesday in opposition to the granting of a closed rule on H. R. 1, and I am objecting to a closed rule today. Such a rule deprives the membership of the opportunity to work its will upon a piece of legislation that is of the most vital importance to our country. Time after time, we Members who represent districts in which are located chemical plants, glass plants, pottery plants, and coalmines have spoken about the serious problems confronting those industries. We have begged and pleaded and importuned for recognition of the disastrous conditions which prevail in many areas, and our efforts have been in vain. As a consequence, I believe, and I know that my belief is shared by others, that the only way relief and protection will be given to our domestic industries and the American people will be by sheer force of numbers in amending the bill that is before us. We can only do this under an open rule which will permit us to go over the bill piece by piece and word by word and amend it in such a way that the escape clause will no longer be a joke as it has been under the prevailing setup. We must not dare, in the face of critical world conditions, to permit the continued destruction of our domestic industries.

The present Trade Agreements Act does not expire until June. We have ample time in which to study this legislation. We are not facing an immediate deadline, and it behooves us to assume the responsibility which is ours under the Constitution.

I urge the Members of this House to take a firm stand against a closed rule.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question.

Mr. BAILEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 178, nays 207, not voting 49, as follows:

[Roll No. 8]

Garmatz	Mailliard	Young
George	Meader	

So the previous question was not ordered.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Hess against.
Mr. Shelley for, with Mr. Dempsey against.
Mr. Judd for, with Mr. Short against.
Mr. Garmatz for, with Mr. Johnson of California against.
Mr. Kean for, with Mr. Cole against.
Mr. Morrison for, with Mr. Reese of Tennessee against.

Until further notice:

Mr. Spence with Mr. Bentley.
Mr. Hays of Arkansas with Mr. Chiperfield.
Mr. Yates with Mr. McConnell.
Mr. Sieminski with Mr. Mailliard.
Mr. Powell with Mr. Oliver P. Bolton.
Mr. Dawson of Illinois with Mr. Horan.
Mr. Davis of Tennessee with Mr. Meader.
Mr. Buckley with Mr. Ellsworth.
Mr. Eberharter with Mr. Jackson.

Mrs. FRANCES P. BOLTON, Mr. PASSMAN, and Mr. BROOKS of Louisiana changed their vote from "nay" to "yea."

Mr. MILLER of California changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

Mr. BROWN of Ohio. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Ohio: Strike out all after the resolving clause and insert in lieu thereof the following:

"That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed 2 days, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit."

The SPEAKER. The gentleman from Ohio is recognized.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, the amendment which I have offered simply provides for an open rule which will permit the time on the bill not to exceed 2 days of general debate. It is exactly the same sort of rule as the one we had before us except it strikes out the gag or closed rule portion.

The adoption of this amendment will permit the House to work its will and to offer any amendment that is germane to H. R. 1 when it is considered under the 5-minute rule.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. Actually this is the same as the 1951 rule.

Mr. BROWN of Ohio. This is practically the same as the 1951 rule. It is an open rule. The 1951 rule, if I remember correctly, provided for 5 hours of general debate. The amendment I have offered permits the time on the bill not to exceed 2 days of general debate.

Mr. FLOOD. Outside of that, it is the usual rule?

Mr. BROWN of Ohio. Outside of that it is the usual open rule.

Mr. Speaker, I move the previous question.

The SPEAKER. Is the gentleman going to yield time?

Mr. BROWN of Ohio. I have no requests for time.

The SPEAKER. Does the gentleman from Virginia require time?

Mr. SMITH of Virginia. I do not know that I desire to say very much about it except that as a practical matter I feel the bill should be considered under the closed rule.

The SPEAKER. Does the gentleman from Ohio yield to the gentleman from Virginia?

Mr. BROWN of Ohio. I yield to the gentleman from Virginia.

Mr. SMITH of Virginia. Mr. Speaker, if we are going to open this up to general amendments under the 5-minute rule, it would be hardly necessary to have as much as 2 days of debate. I was wondering if the gentleman would not be willing to cut general debate and get on to the final matter of amending this bill which, unless I am very much mistaken, will take you a good many days.

Mr. BROWN of Ohio. If the gentleman desires, I am perfectly willing to accept an amendment to reduce general debate to 1 day or to have 5 hours of general debate.

Mr. SMITH of Virginia. I would suggest the amendment that we reduce it to 1 day of general debate.

Mr. BROWN of Ohio. Mr. Speaker, I ask unanimous consent to amend my amendment by inserting "5 hours" instead of 2 days.

The SPEAKER pro tempore (Mr. HARRIS). Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SMITH of Virginia. The gentleman has yielded me a half hour?

Mr. BROWN of Ohio. Mr. Speaker, I yield the gentleman a total of 30 minutes.

Mr. SMITH of Virginia. Mr. Speaker, I yield such time as he may desire to the Speaker, the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Speaker, the House on this last vote has done a most unusual thing and under the circumstances a very dangerous thing. If the amendment offered by the gentleman from Ohio [Mr. BROWN] is adopted and we go into the Committee of the Whole for the purpose of offering and considering amendments, I wonder what kind of situation some Members who are interested in certain amendments are going to find themselves in from the practical standpoint? You may get your amendment on and then you would feel compelled to vote for whatever came out of the Committee of the Whole even though there were a dozen amendments adopted that you seriously objected to.

Only once in the history of the House in 42 years in my memory has a bill of this kind and character been considered except under a closed rule. How long it is going to take, how far afield you will go, I do not know. There are some people who are against any kind of reciprocal-trade arrangements. It is perfectly proper that they should vote for an open rule and cripple the bill just as much as they can. But if a closed rule is adopted, they will have the opportunity to vote on a motion to recommit which may be substantive and they can register themselves at that time. But to proceed in this fashion, in my opinion, is a great mistake.

Let me tell you something about the labor situation. Everybody wants labor employed at good hours, at reasonable wages; but suppose we do not trade with the rest of the world. Money does not cross the ocean to balance trade between country and country; it is surplus goods for surplus goods. And, we are no longer a debtor nation; we are the great creditor nation of the world. We are no longer a small producing nation; we are the greatest surplus-producing nation upon the face of the earth, and we have got to have it so that we can trade freely with the rest of the world, or our factories will close and more thousands upon thousands of laboring men will be turned out of their jobs just because we refused to trade goods for goods with them.

We are living in a complex civilization. We are the leaders of the world as a democracy. We have been challenged for the leadership of the world, and we must assume it and carry it out, or neither the United States of America nor any other place will be a fit place to live. We are the strongest nation upon the face of the earth from an economic standpoint, and we have become that because we have traded with the other nations of the world.

So, as an old friend to all of you, as a lover of the House of Representatives and its procedures, I ask you to vote down this amendment offered by the gentleman from Ohio [Mr. BROWN].

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. RAYBURN. I yield to the gentleman from Massachusetts.

Mr. MARTIN. If we vote down the amendment of the gentleman from Ohio [Mr. BROWN] that will bring the vote upon the rule as it was adopted by the committee; will it not?

Mr. RAYBURN. On the original rule, that is correct, and I think that is the

proper procedure, and then everyone can vote as he thinks best and according to his conscience.

Mr. BROWN of Ohio. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS. Mr. Speaker, I have the greatest respect for our distinguished Speaker, the gentleman from Texas [Mr. RAYBURN]. He has been here 42 years, and I have been here only 30 years. But this is not the situation as he portrays it so far as I am concerned. This is a fine opportunity for the House to work its will. Many of you Members here have stood up many times and said, "I am against a gag rule." Now is the time for you to work it out. How can you do it? What can you do here? You can pass the motion made by the gentleman from Ohio [Mr. BROWN], and then we can go to work. There will not be more than 4 or 5 amendments offered. You Members who represent the textile industry can get together; you men who represent the coal industry can get together, and you others who have been sadly abused can get together and offer your amendments, and we can adopt them or vote them down. Then you will have had a chance.

The thing for you to do is to support this amendment and let us go to work and get something done which we can do ourselves.

Mr. SMITH of Virginia. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana [Mr. BOGGS].

Mr. BOGGS. Mr. Speaker, I am convinced that before we vote on this amendment that every Member of this body should thoroughly understand exactly what we are doing. If the amendment offered by the gentleman from Ohio prevails, it means that for the first time in many, many years we will attempt to write on the floor of this body a tariff bill. It means that the various groups and interests who for one reason or another feel that they have been aggrieved will do just exactly what my distinguished friend from Ohio said a moment ago; they will get together and then have the finest exhibition of logrolling that we have had in this body in many, many a year.

If we want to do that, all good and proper. But I should like to address myself first to my colleagues from the South. To me it is fantastic that in our great section of the country, where we must export 60 percent of our rice, 40 percent of our tobacco, 30 percent of our cotton, where our economy is closely tied in with the trade of our Nation with other nations of the world, that we should lend ourselves to this proposal which can only mean in the ultimate the scuttling of the Trade Agreements Act; because that is what is involved here.

Insofar as my good friends on the left are concerned, I find myself in the position of speaking for the program of the President of the United States. What is the history of this legislation? Two years ago the President said, "Let us study the matter." We continued the trade-agreements program for 1 year. Thereupon we gave him the authority and the power to create a commission, which was created, and known as the Randall Commission. That Commission was made up of Members of this body, of the other body, and of the public at large. That Commission reported back to the Congress of the United States and made its recommendations, last year.

Thereupon, in March of last year, the President of the United States transmitted a message to this body embodying substantially the recommendations of that Commission. They were not considered at that time by the Ways and Means Committee, but we instead adopted another continuing resolution for 1 year.

At the beginning of this session, the first economic message of the President of the United States dealt with this program. He called it a moderate program. Believe me, it is a moderate program. Many people have recommended that we extend trade agreements for at least 5 years. Many, including those who studied the program on the President's own Commission, have felt that the escape clause and the peril point were too broad, not too thin, as some contend.

So we continued that language, with additional safeguards. Now by a series of, shall I call them concerted actions—one industry collaborating or getting together or logrolling, or whatever you want to call it, with another, in order to influence a majority of the Members of this body to defeat the President's program—they want to send a message out to the world that we are turning the clock back and are abandoning the reciprocal-trade program.

I hope the House will vote "no" on this proposal.

Mr. BROWN of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Speaker, with reference to the remarks of the gentleman from Louisiana [Mr. BOGGS], I should like to say that if the gentleman were frank with you he would tell you that the State of Louisiana has an import quota on Puerto Rican and Cuban sugar. He ceased to be a free trader back in 1934. He is a high protectionist now. And he is accusing me and other people here who want a chance of some little protection of their own, of being high protectionists. I think that is all I need to say about the gentleman's remarks.

It is with regret that I have to call the attention of my colleagues to the remarks of our beloved Speaker. But let me remind the distinguished gentleman from Texas [Mr. RAYBURN], whom we have highly honored for many years, that we handled this same legislation under an open rule in 1951. I offered, and we approved, the so-called escape-clause provision that Mr. Dulles and other people justified before the committee, and said, when asked about it, that they thought it should remain in the legislation. There is nothing wrong with the escape clause. The only trouble with it is that the Tariff Commission and the State Department and the President have gone about it to see that the escape clause is not carried out by circumventing the Tariff Commission.

I can assure the distinguished gentleman from Texas that not over 4 or 5 amendments will be offered to this legislation when we go into the Committee of the Whole. We want the escape clause clarified. We want an opportunity to decide whether we are going to have an import quota on residual oil to protect the coal industry. There are perhaps 1 or 2 more major amendments that will be offered, but I can assure you that will be the limit of it. So do not let them drive you into undoing what you have just done. You decided by your vote when you beat the motion for the previous question that you wanted to open this up to give all Members an opportunity to offer amendments to the bill. You are doing that now, and you will do it when you adopt the substitute resolution offered by the gentleman from Ohio [Mr. BROWN], which is exactly the same rule under which we operated in 1951.

I am willing to trust my colleagues of the House. If we from West Virginia cannot win an import quota on residual oil, we will take our licking, as we always have in the past. This is not the first time we have asked for these things. All I am asking you is that you give us the chance to present our plea before the House. If we cannot convince you of the merits of the case, then do otherwise. In the meantime, stand firm. Let us go through with what we have started.

Mr. KELLEY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. BAILEY. I yield.

Mr. KELLEY of Pennsylvania. Why not amend the rule and confine it to amendments that were offered before the Committee on Ways and Means, and have the House vote on that, instead of having a number of amendments offered that were not even considered by the Committee on Ways and Means? I repeat, let us amend the rule so that only those amendments can be offered that were considered by the Committee on Ways and Means.

Mr. SMITH of Virginia. Mr. Speaker, I yield 3 minutes to the gentleman from Georgia [Mr. LANHAM].

Mr. LANHAM. Mr. Speaker, I have the greatest respect for the Speaker of the House. I do not believe that since I have been here I have differed with him more than once or twice. I not only have great respect for him but I hesitate to oppose him on the floor; but I feel that I should make clear my opposition to this rule. However, I have supported the reciprocal trade agreements program in the past. I still think we ought to support it.

I have great respect and admiration too for the distinguished gentleman from Tennessee [Mr. COOPER] who is follow- the illustrious Cordell Hull of his State.

However, now that it has come home to me that this peril point and the escape clause are insufficient to protect those industries that are threatened actually with destruction, I simply cannot go along unless this bill is changed so as to make effective those clauses that were intended to protect industries that were about to be destroyed.

I went before the Committee on Ways and Means and very frankly told them of my fears for the textile industry in the

South. In their wisdom they did not see fit to strengthen the protective clauses. The only thing I am interested in here now is strengthening these clauses that will protect our industries. I shall not offer any amendment, and I hope no one else is going to offer an amendment to exempt the textile industry or any other. All I am interested in here is in strengthening these clauses so that if this industry or any other industry is threatened, as I believe the textile industry is, by the importation of textiles from Japan made by cheap labor where the wage scale is about 13½ cents an hour as compared with our wage scale in America of $1.32 an hour. If you will do that, I promise you so far as I am concerned, I will not offer or support any amendment to exempt any special industry. The only thing I am interested in is making these clauses effective, and the only way we can do that, as I see it, is to make the recommendation of the Tariff Commission final in these cases. The executive department has set up what is called a Committee on Reciprocity Information. The purpose of that committee is to gather information which will enable the President to contradict what the Tariff Commission has told him in its findings. It is set up for that purpose. In only 2 cases out of 10, as I recall, has the President followed the recommendations of the Tariff Commission. I say that we ought to stick to our vote and I ask you to vote for this motion offered by the gentleman from Ohio.

Mr. SMITH of Virginia. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. FLYNT].

Mr. FLYNT. Mr. Speaker, I am somewhat reluctant to take the floor at this time, but in fairness to the men and women who are employed in every industry in America, I feel I must do so. The district which I have the honor to represent is a large textile district, but I would take the same position I am now taking if there were not an industrial plant anywhere in that district today. The position I take is one which I think is fair. I think it is honorable, and I certainly think it is American. I certainly yield to our distinguished Speaker in number of years of service for he was a Member of this House before I was born but I do not yield to the Speaker or any other Member of this House in my devotion to America and to men and women of America who work for a living. On this last vote which was just taken, I think every Member of the House knew the issue which was being voted upon. It was to obtain the right of the Members of the House to once again assume the sovereignty of the legislative body, which we are. This bill, H. R. 1, is favored in principle by all of us. All of us are for it in principle. I know that every Member of the Georgia delegation is for it in principle. I know I am for the basic principle of reciprocal trade, but I am not for this rule, any other rule, or any piece of legislation which would yield the sovereign authority of the House of Representatives to the executive branch of the Government or some international conference at Geneva. The House of Representatives must assert its own sovereignty in matters of legislation and particularly on matters which are close as they were in the Committee on Ways and Means which reported out this bill. Mr. Speaker, I am opposed to this rule in its present form, and I ask the Members of the House to have the courage to stand fast on the position which they have just taken.

Mr. BROWN of Ohio. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania [Mr. GAVIN].

Mr. GAVIN. Mr. Speaker, I want to thank my good friend, the gentleman from Ohio, for permitting me to have 4 minutes. I want to say I listened to your remarks with a great deal of interest and with a great deal of respect. Also to my very good friend, the gentleman from Massachusetts [Mr. MARTIN]. I might say to you both that your years in this House—your experience, eminently qualifies you to present to us your thinking on legislative proposals, and that I have a very high regard and deep respect for your judgment. However, it is quite evident today, from the action that the House has taken, that we, representing the various districts throughout the United States intend to recapture some of the things that rightfully belong to us, and that is protection of American industry and its workers. This vote today is evidence that the House is not satisfied with the present setup and it is regrettable that we have to resort to the technique we have to secure recognition and consideration from those who are handling these reciprocal-trade agreements. These reciprocal trade programs should work both ways. Those handling these programs seemingly have an utter disregard for the problems of our respective districts and the industries upon which they depend for their existence. You might appeal to them but they pay little or no attention to your appeals. It seems they are just interested in seeing how they can develop and protect the economic and industrial areas all over the world but not those back home. When we come to them with a problem, such as cutting back the heavy imports, well, a study is being made and a report will be submitted relative to coal, oil, and gas, but we still are waiting on the report from the Cabinet Commission headed by Arthur Flemming. Let me say that my State, the great State of Pennsylvania, is having the toughest time of its life for its very industrial existence. Today the Pennsylvania grade crude field is producing only 40,000 barrels of oil, which is a trifling amount in a Nation producing 6½ million barrels a day; we are fighting for our very existence in the petroleum industry. Hundreds of people are gainfully employed in the industry. Continual heavy imports will affect these employees. We have 80,000 wells producing 40,000 barrels of oil, or about one-half a barrel per well per day. We have to compete with the wells in Venezuela that produce several thousand barrels a day which is tough competition. Certainly we are entitled to some protection from this form of competition. For instance in 1947, they were importing some 350,000 barrels a day and today they are up to 1,200,000 barrels a day. So it is about time to cut back on these imports so the American independent producer can exist. This whole program should be developed so that the American workingman and the American people have an opportunity to live. Each year our own national production of oil goes down and imports go up. If we are suddenly catapulted into an emergency, if our supplies are shut off from Venezuela and Iran, we would be in a very serious position. Today we are killing the ambition of our people to increase our production of oil. The other day I received a book about an inch thick on the development of a South American country. I was surprised at the work and study that went into publishing such a volume. Nobody publishes a book on the deplorable conditions in the coal industry or what we can do and how we can do it, to afford relief in the distressed coal areas existing in Pennsylvania and the other coalfields of the various States.

The SPEAKER. The time of the gentleman from Pennsylvania [Mr. GAVIN] has expired.

Mr. BROWN of Ohio. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee [Mr. COOPER].

Mr. COOPER. Mr. Speaker, I fully agree with the splendid remarks made by our beloved and distinguished Speaker with respect to the question now presented to this House for consideration.

I would like to give my colleagues the benefit of a few facts, especially with respect to the cotton textile industry about which some have spoken here today. The fact is that we export ten times more cotton textiles than we import. The facts show that in 1953 our cotton textile production was 10 billion square yards. Of that amount we exported 600 million square yards and we imported only 50 million square yards. That is an illustration of the facts that prevail with respect to this legislation.

Your Committee on Ways and Means gave thorough and careful consideration to all of the facts that were available and presented, and we have presented this legislation for your consideration.

I strongly urge that the motion of the gentleman from Ohio [Mr. BROWN], be voted down and then that we vote for the rule presented here by the Committee on Rules.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. COOPER. I yield.

Mr. HALLECK. I think it would be well to clarify the parliamentary situation: If the motion of the gentleman from Ohio is voted down then we still have a vote on the rule.

Mr. COOPER. The gentleman is correct. And just one other point: The Secretary of Labor appearing before our committee stated that 4⅓ million jobs in this country are involved in our foreign trade.

Mr. BAILEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Does the gentleman from Ohio yield for a parliamentary inquiry?

Mr. BROWN of Ohio. For a parliamentary inquiry only.

Mr. BAILEY. Was the gentleman's motion in the form of a substitute or an amendment?

Mr. BROWN of Ohio. It, of course, was an amendment to the rule. The gentleman I think knows that.

Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, I regret to find myself in disagreement with the distinguished leadership of the House. I concede that it would be easier to gag ourselves and escape the responsibility which is placed upon us by the Constitution, but I believe that we can trust ourselves better than we can trust any agency of this Government. If we cannot trust ourselves, we cannot trust some agency of this Government.

I believe the House will exercise great restraint and good judgment in deciding the various issues which will be presented in the course of the debate and the amendments to the bill. As for me, I am tired of this argument that we ought to delegate power to someone else because we cannot trust ourselves to discharge the responsibility which under the law we owe this country.

I voted for the reciprocal trade program from the beginning, but I believe it has been abused. I believe they have failed to take into account the will of the Congress as expressed in the act. I think there have been many injustices and I believe the whole question should be opened to the House. We ought to consider the arguments, be guided by the facts, and do that which is in the best interests of the country.

Mr. GAVIN. Mr. Speaker, will the gentleman yield?

Mr. DIES. I yield.

Mr. GAVIN. As it stands now, the Reciprocal Trade Act is a one-way street. What we should do is to make it a two-way street to protect the bread and butter of the American worker in competition with the rest of the world.

Mr. DIES. I agree with the gentleman. We have passed through a period of internationalism until some people think more about what will happen to the Hottentots than what will happen to our own people. I think charity ought to begin at home. I am still an old-fashioned American who believes that we ought to consider first the interest of our country. I think some people in our country are suffering as a result of unfair competition and the importation of the products of cheap pauper labor.

I want to hear the facts. If the proponents of an amendment fail to support their position with logic and with argument and with facts, I will be against it, but I think the time has come when the membership has to face the responsibility we owe the American people.

Mr. Speaker, I shall vote for the amendment.

Mr. BROWN of Ohio. Mr. Speaker, I yield 10 minutes to the gentleman from Pennsylvania [Mr. SIMPSON].

Mr. SIMPSON of Pennsylvania. Mr. Speaker, I have played an active part in the Committee on Ways and Means as we listened to the dozens upon dozens of witnesses who came in front of that committee either speaking for H. R. 1 or opposing it. I suggested awhile ago that the controlling factor which every person who appeared in front of that committee—and I am going to make no exceptions—was the interest of that Member of Congress or that other individual in what was good for his congressional district or what was good for his industry or his business. That applies to the man who is a Member of Congress or to the man engaged in exporting or importing or the man who manufactures largely for the trade here at home. I do not consider that selfishness. I consider that the American way of conducting business; to look after your own, to take care of the people in your own town, within your own congressional district, and I am not a bit surprised when a Member of Congress stands up here and says that the little business, if you please, in his congressional district has not been able to get the relief which he knows is needed for that industry and for that district.

Frankly, it is ridiculous to have somebody come from a Government agency and tell a committee of this Congress that there is no unemployment in my congressional district or in your district, that there is no industry in your district which is badly affected by the importation of goods coming in here too cheaply. It is foolish on their part, it is unrealistic and to you who know differently it is just absurd, so absurd in fact that given the opportunity which you had a few minutes ago to speak up and say aloud and publicly: "What I want to do is to protect the jobs in my congressional district" you did so.

Now it is being suggested that having marched up the hill you will turn around and march down again, that having made a record which someone can look at and say: "You voted to protect the business of your congressional district, you made that record," now you are going to walk down the hill again. I do not believe you will do that.

Consequently I ask you to support the amendment which has been offered by the gentleman from Ohio [Mr. BROWN]. What would be the consequences of supporting the amendment offered by the gentleman from Ohio? In the first place, the chairman in charge of the legislation will be the gentleman from Tennessee [Mr. COOPER], chairman of the Ways and Means Committee. This is my first opportunity as a member of the Ways and Means Committee to express a word with respect to the gentleman from Tennessee [Mr. COOPER], who conducted the hearings in which I think I played an important part. He conducted those hearings fairly and he impressed me. So I went around to his office after the hearings closed and said to him as directly as I could: "Mr. COOPER, I want to compliment you upon the fair and diligent way in which the hearings were conducted."

On the Republican side of the aisle is the gentleman from New York [Mr. REED] than whom there is no fairer Member of Congress to be in charge of the legislation. Both of these gentlemen are long experienced in the legislative processes. Each of those gentlemen knows that we can handle this legislation, giving every Member of Congress the right to be heard in a constructive manner, not rising to suggest dozens or hundreds of little amendments, about which you have heard this afternoon, but in the 5 hours of general debate to gradually evolve certain categories in which certain amendments will fall and which will be acted on by the House in the Committee of the Whole under the guidance of the chairman of the Ways and Means Committee, the gentleman from Tennessee [Mr. COOPER] and the gentleman from New York [Mr. REED].

There will be constructive legislation come out of that on problems of greatest importance to your congressional districts. You owe it to the people of your district to know exactly what goes on and not have some committee, and I am referring to my own committee, write this legislation behind closed doors.

Mr. COLMER. Mr. Speaker, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield to the gentleman from Mississippi.

Mr. COLMER. The gentleman will recall that in 1951 we had an open rule on a similar piece of legislation. Can the gentleman tell the House how long it took to consider that piece of legislation?

Mr. SIMPSON of Pennsylvania. Really, I cannot recall so far as the facts are concerned. I recollect I had a part in it, as did many others. I think we did it in one day, maybe 2 days, whatever it was.

Let me tell you this: In that bill to which the gentleman refers we passed on the floor the escape clause on the motion of the gentleman from West Virginia [Mr. BAILEY] and the peril-point provision, which are the only two pieces of legislation in the Reciprocal Trade Agreements Act that give any relief whatever. I wish you would listen to this. The escape clause and the peril point are the only sections in the Reciprocal Trade Agreements Act which give any possibility of hope to a businessman who suffers today, and that was written right here on the floor, and that is one of the categories where we must do something, namely, by improving the escape clause, if we are going to protect industry back home.

Mr. COLMER. I think it rather important to clarify that. The gentleman's recollection is that it was one day. Would the gentleman say that it was not more than 2 days?

Mr. SIMPSON of Pennsylvania. It makes no difference. It was done here on the floor in an open meeting, a result openly arrived at and satisfactory to everybody.

Mr. BAILEY. Mr. Speaker, will the gentleman yield in an effort to answer the question?

Mr. SIMPSON of Pennsylvania. I yield to the gentleman from West Virginia.

Mr. BAILEY. Like the amendment offered by the gentleman from Ohio, it called for 5 hours of general debate.

Mr. SIMPSON of Pennsylvania. Let me put it this way: What we did that day gave the one and only way for relief to a business or the man who lost his job as

the result of too low a tariff, and we did that here on the floor, and we should improve it in this legislation before us now.

Someone suggested that this amendment should be changed, that only amendments could be considered which were considered by the Committee on Ways and Means. It would not be satisfactory to limit amendments to those considered by the Committee on Ways and Means, because, as a matter of fact, we were forced to move very rapidly, and amendments of importance were not offered in that committee.

No, gentlemen. Under the guidance of these two distinguished gentlemen, the chairman and the former chairman of the Committee on Ways and Means, I know that this House can and will rise to its responsibility and will perfect legislation properly amending and extending the reciprocal trade-agreement program.

I believe in the reciprocal method of making agreements. I am opposed to the kind of agreements which we have been making, particularly as they have been treated by foreign countries. Do you know that there are more restrictions against free trade today, more restrictions today, than there were back in 1932 when we started this so-called reciprocal trade-agreement program? And, we have traded away the high tariffs we had in that day; but the other countries have imposed barriers after having implied or agreed that they would not do so.

So, gentlemen, it requires a far higher degree of Yankee trading—which is what we were told the reciprocal trade agreement provided for, Yankee trading—we require a far higher degree of Yankee trading than we have had at any time in the past.

I urge that the House adjust itself to this problem and adopt the amendments which will give protection to American industry and the American farmer who needs protection if he is to maintain a market here at home first and after that have a market abroad to sell his produce.

Mr. BROWN of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I shall not take the time of the House but for a very few moments. The situation which confronts us is simply this, as I understand it. The House has voted down the previous question on the rule as it came from the Committee on Rules. By that action it made it possible to amend the rule. I am convinced that the House took the action it did in voting down the previous question because of a desire on the part of a majority of the House to have an open rule and an opportunity to offer amendments to H. R. 1 and have them considered on the floor of the House in the usual manner.

Now as I understand the situation, if the amendment which I have offered, an amendment which simply provides for an open rule in the usual manner with 5 hours of debate, should be voted down, then the rule remains exactly as it was when it was introduced; it remains a closed or a gag rule. The question will then arise as to whether or not the House which just a few minutes ago voted down the previous question, thereby indicating its desire to have an open rule, wants to turn around and march down the hill again and vote for a closed or gag rule as it was in its original form.

For the purpose of clarifying the situation, Mr. Speaker, I should like to propound a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. I should like to ask the Chair whether or not, if this amendment is voted down, the question will then arise on the adoption of the original rule.

The SPEAKER. The Chair answered that question when he had the floor, when the question was asked by the gentleman from Massachusetts [Mr. MARTIN]. That is the situation.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I understood the reason for the opposition to the gentleman's amendment to be that the Members of the House did not have the ability to write an amendment; is that correct?

Mr. BROWN of Ohio. I do not know why the opposition arose. But certainly the House did express its will in voting down the previous question. Certainly it did indicate to every thoughtful person that there was a desire here by a majority of the membership of this House to have an open rule. And it was for that reason that I offered this amendment. And if this amendment is adopted, Members of the House will have an open rule and the opportunity to work their will on this bill. If the amendment is defeated, then the only question before the House will be whether the House wants to adopt a closed or gag rule or whether it wants to defeat the rule entirely and send the resolution back to the committee for further consideration.

Mr. VORYS. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield to my colleague from Ohio.

Mr. VORYS. I was a member of the Randall Commission. I approved its recommendations. I approve the general principles expressed in H. R. 1. But I do not feel that the Randall Commission necessarily possessed all the wisdom in the world or that the great Committee on Ways and Means possesses all the wisdom in the world. I think this Congress is about as good as the Congress was in 1951, when we considered trade agreement extension under an open rule. I am supporting the amendment of the gentleman from Ohio [Mr. BROWN].

Mr. BROWN of Ohio. I thank the gentleman from Ohio. I want to repeat—and then I am through—that the only question before the House in voting this amendment, the only point, regardless of all the oratory that has taken place, is whether the House wants an open rule or whether the House wants to reverse itself and go back to the closed or gag rule, which will prevent the Members of the House and other Members of Congress from working their will on H. R. 1.

Mr. Speaker, I move the previous question on the amendment.

The previous question was ordered.

The SPEAKER. The question is on the amendment offered by the gentleman from Ohio [Mr. BROWN].

Mr. McCORMACK and Mr. BAILEY demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 191, nays 193, not voting 50, as follows:

[Roll No. 9]

Eberharter	Judd	Talle
Ellsworth	Kean	Wainwright
Fjare	Kearns	Watts
Gamble	McConnell	Wolcott
Garmatz	McGregor	Yates
	Mack, Wash.	Young

The Clerk announced the following pairs:

On this vote:

Mr. Hess for, with Mr. Hébert against.

Mr. Dempsey for, with Mr. Dawson of Illinois against.

Mr. Short for, with Mr. Judd against.

Mr. Johnson of California for, with Mr. Morrison against.

Mr. Cole for, with Mr. Kean against.

Mr. Bolton for, with Mr. Powell against.

Until further notice:

Mr. Spence with Mr. McConnell.

Mr. Shelley with Mr. Chiperfield.

Mr. Hays of Arkansas with Mr. Bentley.

Mr. Buckley with Mr. Meader.

Mrs. Griffiths with Mr. Mailliard.

Mr. Davis of Tennessee with Mr. Horan.

Mr. Watts with Mr. Jackson.

Mr. Yates with Mr. McGregor.

Mr. Garmatz with Mr. Hoeven.

Mr. Eberharter with Mr. Wolcott.

Mrs. BUCHANAN changed her vote from "nay" to "yea."

Mr. BELL changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

Mr. BROWN of Ohio. Mr. Speaker, may I call for a recapitulation

The SPEAKER. The Chair thinks the vote is close enough so that there should be a recapitulation.

The Clerk will call the names of those voting in the affirmative.

Mr. McCORMACK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McCORMACK. I would like to inquire of the Speaker if my understanding is correct that on recapitulation no Member can change his vote. The question is only how they are recorded.

The SPEAKER. That is true because the vote has been announced.

Mr. BROWN of Ohio. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. Upon recapitulation, if a Member finds that his vote has been recorded incorrectly, he certainly has a right to correct it.

The SPEAKER. That is the purpose of a recapitulation.

Mr. BROWN of Ohio. That is what I thought.

The Clerk called the names of those voting "yea."

The SPEAKER. Are there any Members recorded as voting "yea" who are incorrectly recorded? [After a pause.] The Chair hears none.

The Clerk will call the names of those voting "nay."

The Clerk called the names of those voting "nay."

The SPEAKER. Are there any corrections?

Mr. BROWN of Ohio. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. May I inquire whether or not the name of the gentleman from Louisiana [Mr. HÉBERT] was called?

The SPEAKER. He is not recorded.

On recapitulation, the vote is yeas, 191; nays, 193.

So the amendment was rejected.

Mr. SMITH of Virginia. Mr. Speaker, I move the previous question on the resolution.

Mr. BAILEY. Mr. Speaker, on this I demand the yeas and nays.

Mr. BROWN of Ohio. Mr. Speaker, the previous question has been moved on the rule as originally reported by the Rules Committee, that being a closed rule; is that correct?

Mr. SMITH of Virginia. That is the way it stands, the gentleman's amendment having been defeated.

The SPEAKER. The question is on ordering the previous question. The gentleman from West Virginia has asked for the yeas and nays.

Mr. BAILEY. Mr. Speaker, will I be given the privilege of asking for a call of the roll on the adoption of the rule?

The SPEAKER. The gentleman may have that privilege, if the previous question is ordered.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

Mr. BAILEY. On that, Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 193, nays 192, not voting 49, as follows:

[Roll No. 10]

	Mailliard	

So the resolution was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Hess against.

Mr. Garmatz for, with Mr. Dempsey against.

Mr. Judd for, with Mr. Short against.

Mr. Buckley for, with Mr. Johnson of California against.

Mr. Kean for, with Mr. Cole against.

Mr. Spence for, with Mr. Oliver P. Bolton against.

Until further notice:

Mr. Shelley with Mr. Bentley.

Mr. Hays of Arkansas with Mr. Meader.

Mr. Dawson of Illinois with Mr. McConnell.

Mr. Davis of Tennessee with Mr. Horan.

Mr. Powell with Mr. Mailliard.

Mr. Morrison with Mr. Chiperfield.

Mrs. Griffiths with Mr. Hoeven.

Mr. Vanik with Mr. Jackson.

Mr. Eberharter with Mr. Ellsworth.

Mr. Yates with Mr. McGregor.

Mr. BROWN of Ohio. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. Mr. Speaker, is it not necessary for each Member to qualify on this vote?

The SPEAKER. It is.

Mr. BROWN of Ohio. Mr. Speaker, I ask that the well of the House be cleared.

The SPEAKER. Members will please retire from the well.

Mr. HOFFMAN of Michigan. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HOFFMAN of Michigan. What are the qualifications to permit a man to vote?

The SPEAKER. He must have been in the Hall listening but failed to hear his name.

Mr. HOFFMAN of Michigan. When his name was called?

The SPEAKER. That is correct.

Mr. JONES of Alabama changed his vote from "nay" to "yea."

Mr. HOLIFIELD. Mr. Speaker, I was in the Hall and heard my name called, but the Clerk went on to the next name before I could answer. I vote "yea."

The result of the vote was announced as above recorded.

Mr. BAILEY. Mr. Speaker, I challenge the vote of the gentleman from California [Mr. HOLIFIELD]. He was not on the floor of the House.

The SPEAKER. The gentleman from West Virginia is out of order. The Chair always takes the word of Members.

Mr. BAILEY. Mr. Speaker, I withdraw my statement.

Mr. HOLIFIELD. Mr. Speaker, I demand the floor on a point of personal privilege.

The SPEAKER. Of course, the Chair would have to recognize the gentleman, but the Chair believes that he properly answered the gentleman from West Virginia.

Mr. HOLIFIELD. Mr. Speaker, I shall withdraw my request, but I shall renew it at a later time.

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD, and to inform the House that therein will be a proposed motion to recommit.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. COOPER. Mr. Speaker, I ask unanimous consent to revise and extend the remarks I expect to make in the Committee of the Whole and to include certain material and information I may deem appropriate.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. COOPER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 1, with Mr. BOLLING in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, general debate shall be confined to the bill and shall continue not to exceed 2 days, to be equally divided and controlled by the gentleman from Tennessee [Mr. COOPER] and the gentleman from New York [Mr. REED].

The Chair recognizes the gentleman from Tennessee.

Mr. COOPER. Mr. Chairman, I yield myself 40 minutes.

Mr. Chairman, the pending bill embodies the trade agreements recommendations of the President and it has been listed by the Speaker as the first major piece of legislation to be considered by the House.

The bill would continue from June 12, 1955, until June 30, 1958, the President's authority to enter into trade agreements. Under present law, his authority ends on June 12, 1955.

In addition to extending the President's authority to enter trade agreements, the President would be authorized by the bill to negotiate tariff reductions by any one of three alternative methods, which may not be used cumulatively:

First, the President would be authorized to reduce by a total of 15 percent tariff rates existing on July 1, 1955, in stages of not more than 5 percent in each of the 3 years of the extension of his authority. Describing this authority in another way, it would mean that the President would be authorized to arrive at a rate which is 85 percent of the rate existing on July 1, 1955. Under this 15-percent authority, the President could not make any decrease after June 30, 1958, with one minor exception, having to do with cases where the President has initiated the reductions under this provision but there has been a nullification due to some other action on his part—such as escape-clause relief, or there has been legislation enacted by the Congress which temporarily nullifies the reduction. In using this authority, the President cannot put into effect a successive step in the up to not more than 5 percent per year reductions until after the previous step has been in effect for at least 12 months. This authority is not contained in existing law.

A second alternative would permit the President to reduce duties by not more than 50 percent of the rate prevailing on January 1, 1945, only in the case of products which are normally not imported, or are normally imported into the United States in negligible quantities. This, in effect, is a limitation on the authority now granted the President, because at the present time the President can reduce rates of duty by 50 percent of what they were on January 1, 1945, without any limitation as to whether or not the products are being imported into the United States. In the case of negotiations which have already been announced and in which Japan will be a party, the President would under the bill be authorized to reduce rates of duty by 50 percent of those existing on January 1, 1945, if the trade agreement with Japan is not entered into until after June 12, 1955. The President already has the authority under present law to make such reductions up to June 12, 1955, and the provision in the bill merely continues this authority for the 3-year period of the extension. However, the authority granted is limited specifically to those negotiations which were announced in November of 1954 and in which Japan is a party. Except in the case of these negotiations, the authority

granted under this alternative is actually a limitation on that granted the President under present law.

The third alternative authority which would be given the President by the bill is that under which he could negotiate reductions in rates of duty which are higher than 50 percent of the value of an imported product and reduce them to 50 percent of such value.

In the case of these three alternatives, the President may decrease a rate to the lowest of the rates which could be arrived at by applying any one of them. However, as I have already stated, he would be prohibited from making cumulative reductions. Also, under these alternatives the President can only make the reductions gradually, because if the total amount of reduction is 15 percent or less, the reduction during any 12 months cannot exceed 5 percent; and if the total amount of the reduction is more than 15 percent, then no more than one-third of the reduction can be given effect during any 12-month period.

As an example of how gradual these reductions would be, take the case of a rate which is 20 percent on July 1, 1955. The President under the 15 percent alternative could reduce this rate of duty to 17 percent. However, he would be permitted to make this reduction by no more than 1 percent at a time, and only after the previous 1 percent reduction had been in effect for 1 year. It can be seen that in addition to permitting only gradual reductions in rates of duty, the bill only permits moderate reductions in rates under this alternative.

The bill requires the President to submit to the Congress an annual report on the operation of the trade-agreements program. This report is to include information on new negotiations, modifications made in duties and import restrictions of the United States, reciprocal concessions obained, and other pertinent information on the trade-agreements program.

The bill contains a proviso that its enactment shall not be construed to determine or indicate the approval or disapproval by the Congress of organizational provisions of any foreign trade agreement entered into under the authority which it grants, such as the organizational provisions of the general agreement on tariffs and trade.

The bill continues the so-called most-favored-nation treatment whereby trade agreement concessions apply to imports of goods from all countries. Under present law it is stated that the President may suspend the application of this treatment to the products of any country or countries which discriminate against our products or engage in other conduct tending to defeat the advantages which we gain in our trade agreements. The committee amended this provision so as to make it mandatory that the President withdraw most-favored-nation treatment from a country after he has had reasonable time to make efforts to get the particular country to cease its discriminatory treatment against American commerce or to rectify other acts or policies on the part of such a country which in his opinion, defeat the purpose of our trade agreements. As under existing law, the most-favored-nation treatment would remain subject to the requirement that the President not extend trade-agreement concessions to imports from Russia and from other nations or areas dominated by the Communists.

The bill requires the President, to the maximum extent that he can, consistent with the purpose of the bill, to avoid the subdivision of classification categories. This provision is designed to prevent further complications of our existing tariff structure, and it does not authorize the reclassification of any article. It merely refers to the breaking up of existing classifications into additional subdivisions in trade agreements.

The bill leaves unchanged the safeguards under the present trade agreements program. This means that full public notice, including a list of products on which concessions may be made by the United States, will be published before negotiations are entered into, that public hearings will continue to be held, and that the peril-point provision and the escape-clause provision of present law will continue in full effect. There was considerable discussion of the escape-clause procedures under existing law during committee hearings and executive sessions. The committee carefully considered all phases of the operation of this provision. It was decided that it is neither necessary nor desirable to make any changes in the law. It was our opinion that discretion should be left in the President to make his decision based upon the findings and recommendations of the Tariff Commission, considerations of our national interest, defense and security, and any other relevant factors which he alone has primary responsibility for under present law. The committee did decide, and we so stated in our report, that we intend to keep the administration of the escape clause under continuing study.

The President would continue to have to report to the Committee on Ways and Means of the House and the Committee on Finance of the Senate whenever a reduction which he makes in a rate of duty exceeds the peril-point finding of the Tariff Commission. Also, the present law, which requires that no reduction shall be made on any article if the President finds that such a reduction would threaten domestic production needed for projected national defense requirements, is not affected by this bill. In addition, the President—pursuant to the recommendation of the Commission on Foreign Economic Policy—has instructed the Trade Agreements Committee that in its negotiations no tariff concessions should be granted on products made by workers receiving wages that are substandard in the exporting country.

The bill also provides that no provisions in a trade agreement can be given effect in the United States in a manner which is inconsistent with existing legislation of the United States. This provision insures that provisions of existing law such as section 22 of the Agricultural Adjustment Act cannot be impaired by any provision in a trade agreement.

At this point, I would like to bring to the attention of the House a typographical error in the report on the bill. On page 63, in the table setting forth the estimated value of United States exports in 1937 and 1953 to countries with which trade agreements are now in effect, in the last column—having to do with percent increases from 1937 to 1953—opposite "United Kingdom and dependencies," the figure should read "20.5" instead of "205."

Since 1934 the reciprocal trade-agreements program has been an essential part of our foreign economic policy. Our foreign economic policy and our overall foreign policy cannot be disassociated. As President Eisenhower has stated:

> If we fail in our trade policy, we may fail in all. Our domestic employment, our standard of living, our security, and the solidarity of the free world—all are involved.
>
> For our own economic growth we must have continuously expanding world markets; for our security we require that our allies become economically strong. Expanding trade is the only adequate solution for these two pressing problems confronting our country.

An expanded foreign trade is in our own enlightened self-interest just as much as it is in the interest of the peace and security of the other nations of the free world.

As the Secretary of State declared:

> The failure, at this stage of world affairs, to rededicate our Nation to liberalize trade policies, and to do so for a 3-year term would have grave consequences.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from California.

Mr. HINSHAW. I have heard some speculation on the floor of the House as to what the effect would be if no trade legislation of any kind were passed in this session of the Congress. To what would we revert and what would be the effect? The gentleman has partially referred to it but I think not completely.

Mr. COOPER. I appreciate the gentleman's bringing that up. If we abandon our trade-agreements program now, we would eliminate any opportunity that the President would have to negotiate any further trade agreements.

Mr. HINSHAW. I am getting at this fact: Would the Smoot-Hawley tariff remain in effect? Is it in effect, in other words, as a backer-up of this bill and previous legislation, or would we revert to something else?

Mr. COOPER. We would continue to operate under trade agreements that are now in existence.

Mr. HINSHAW. So long as they existed?

Mr. COOPER. Yes; so long as they existed, but there would be no authority for the negotiation of any other trade agreements.

Mr. HINSHAW. What is the approximate average time limit on these trade agreements? Is it 2, 3, or 5 years?

Mr. COOPER. They continue under the terms of the agreements until notice is given by one of the contracting parties of a desire to alter, change, or terminate the agreement.

Mr. HINSHAW. That is the answer I wanted.

Mr. BONNER. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from North Carolina.

Mr. BONNER. What greater authority is given in this act than has existed heretofore?

Mr. COOPER. No greater authority except the additional discretionary authority to the President that I pointed out before with respect to the 15 percent over a period of 3 years, not to exceed 5 percent a year, and the other alternative provisions I mentioned earlier in my statement. In some instances, as I pointed out, the President's authority actually would be eliminated. But all of the safeguards, such as the peril point, escape clause, and the provision known as the Symington amendment of last year with respect to the national defense—all those provisions are continued, and are not affected in any way by this bill.

Mr. BONNER. They are retained in this bill?

Mr. COOPER. They are continued as the law of the land and in no way affected by this bill.

Mr. BONNER. Well, how far did the President have the authority to go—to the degree of 15 percent?

Mr. COOPER. Of course, under the original act in 1934, he had authority to reduce rates not to exceed 50 percent. Then, in 1945, additional discretionary authority was granted to the President to reduce rates by not more than 50 percent of the rates in effect at that time.

Mr. BONNER. So, altogether, it could have been as much as 15 percent or more?

Mr. COOPER. Oh, yes. This 15-percent authority is very moderate.

Mr. DURHAM. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from North Carolina.

Mr. DURHAM. What definition does the gentleman put on the words "substandard wages in foreign countries"?

Mr. COOPER. That is a direction by the President to the trade-agreements committee.

Mr. DURHAM. Who makes that determination, the Tariff Commission?

Mr. COOPER. No. The committee which makes recommendations to the President as to concessions which might be made in a trade agreement with another country.

Mr. DURHAM. Whether that country is using substandard wages in the production of an article in competition with ours?

Mr. COOPER. That is right.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. HINSHAW. May I ask whether that is a substandard wage in that country or substandard wages to us?

Mr. COOPER. Substandard wages in the country seeking to export goods to us.

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. VORYS. As I understand the history of this legislation, there has never been any extension in which the power to negotiate was as limited as in this extension in that there was never any extension where there was a limitation of 15 percent, not more than 5 percent in a given year, in a trade negotiation. Am I correct?

Mr. COOPER. I think that is a fair statement.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. GROSS. Did the United States Tariff Commission send a report to the committee making some critical references about this bill?

Mr. COOPER. The Tariff Commission sent a report to the committee which was read in full to the committee in executive session. This is our usual procedure in the case of such reports.

Mr. GROSS. Is there any part of it in this report?

Mr. COOPER. I do not know that there is any part of it in the report on this bill, but the entire report of the Tariff Commission, at the request of our distinguished friend from New York [Mr. REED] was read to the Committee on Ways and Means in executive session. It is my recollection that each and every suggestion of the Tariff Commission was taken care of. As you know it is usual for all committees of Congress to consult with interested departments and agencies in drafting legislation.

Mr. GROSS. Can I read that report?

Mr. COOPER. I do not know.

Mr. GROSS. Is it a secret report?

Mr. COOPER. It was reported to our committee. That is also the usual practice.

Mr. GROSS. Well, in other words, is it a secret report? Is it available to Members of Congress?

Mr. COOPER. I do not know that it has been released. We do not usually release to the Members or the public reports which we have requested.

Mr. GROSS. Will it be released?

Mr. COOPER. As a matter of fact I think it was carried almost in full in the Wall Street Journal, or at least was commented upon rather fully in that paper.

Mr. GROSS. I do not happen to take the Wall Street Journal, but I certainly would like to see this report.

Mr. COOPER. I have not read it here, but I have heard that it was carried in the Wall Street Journal.

Mr. GROSS. Will the gentleman tell me why it is in the nature of a secret report?

Mr. COOPER. I do not know that there is anything secret about it. It is just a report to the Committee on Ways and Means, and it is still there. As I stated, we do not usually release such reports.

Mr. MORANO. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. MORANO. Who makes the determination as to substandard wages in another country?

Mr. COOPER. The committee which includes representatives of the Department of Labor makes the determination before making recommendations to the President as to the concessions which will be included in a trade agreement with that country.

Mr. MORANO. In other words, our committee then determines whether or not a substandard wage is being paid by another country?

Mr. COOPER. Yes.

Mr. MORANO. If we so determine, there is no reduction in the rate?

Mr. COOPER. That is under the instruction of the President to the committee.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. HARRIS. In the report it itemizes the commodity and the product of each country that is exported. Is there any information available as to commodities, outlined in each one of these countries under the Trade Agreements Act, imported into this country?

Mr. COOPER. When proceedings are started looking to the negotiation of a trade agreement, our various departments of the Government that constitute the Committee on Reciprocity Information, listed in the report, from all of the information available, make up a list of products on which the United States might possibly make concessions in the negotiations. That list is published, and full public hearings are held and all available information is secured before any negotiations are undertaken at all.

Mr. HARRIS. I notice in the report here, I assume for the information of not only the Members of the House but anyone interested, on page 64 the statement:

United States exports of products subject to trade agreement concessions.

I assume this is for comparative purposes; it shows United States exports for 1937 and 1953. Then it lists the commodities exported. Is there any such table of commodities imported, for the years 1937 and 1953?

Mr. COOPER. I do not recall that we did at the moment, if I understand the gentleman's question.

Mr. MILLS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. MILLS. As I recall, that information is not in the committee report.

Mr. HARRIS. I do not find it there.

Mr. MILLS. There are publications that the gentleman may obtain from the Department of Commerce which give full and complete information on imports for any year in which he may be interested; classifications of imports, the country of origin, and so on. All the information the gentleman may seek can be obtained from the Department of Commerce. The committee does have those publications in its possession.

Mr. HARRIS. I am sure the committee must have that. It occurs to me that it would be enlightening for the Members of the House if that information were included in order that we may have the information for imports as well as export.

Mr. MILLS. If the gentleman will come by the desk, I shall show him one of these publications and he will understand why we did not include them in

the report. They are rather voluminous and very detailed.

Mr. COOPER. I am sure our distinguished colleague will observe that the report is 86 pages long. We were a bit concerned whether we had not already made it too long and whether we would be able to get our colleagues to read it for that reason. Of course, if this considerable volume of additional material were added, it would have been that much longer.

Mr. HARRIS. Mr. Chairman, will the gentleman yield further?

Mr. COOPER. I yield.

Mr. HARRIS. I might say, from the action that we have seen here today that the Members are more interested apparently in imports than they have been interested in exports. I think that is a very vital point. I think this is a very informative report on the effect that the program is having in our country because of exports of our own products.

Mr. COOPER. That is important, and I would invite attention of the Committee of the Whole in passing that on page 12 of the committee report, under "E. Appendixes," they will see we have included quite a number of appendixes to this report, and each one of those includes very vital and valuable information on this program.

It has been my privilege to have been a member of the Committee on Ways and Means ever since the inception of the reciprocal trade agreements program. I have always fully supported the program, and it is my firm conviction that it is one of the most important programs ever established by the Congress in the field of international relations, and that it has at the same time contributed materially to our own domestic well-being.

This program as extended and improved by the pending bill will contribute just as much to the stability and security of all the free nations in the world, including ourselves, as our military alliances and international organizations, because it takes a strong economy before any nation can be a strong ally. As the Secretary of Defense stated in his testimony before our committee:

> The stronger our allies are economically and militarily the better for both them and ourselves. * * *
>
> International trade must be a two-way street. Such trade provides the most effective way to improve our relations with our allies on a long-range basis. It is just as important as any military agreements which we might work out.

The United States, as the greatest creditor nation in the world, should, and must, take the leadership in enlarging world trade.

The main impediment to an expanded market for our own production is the shortage of dollars on the part of friendly foreign nations. The most affirmative way of helping to reduce and eventually eliminating this shortage is the lowering of trade barriers on a collective basis by the free nations of the world. The trade and tariff restriction policies of each country in the free world have an effect on free world trade.

We must realize that although it seems to be a common belief in this country that we are self-sufficient this is not a fact. We were to a great extent in days gone by; however, that situation has changed. The reason for this change is due to the growth of our population, our ever-increasing per capita consumption, and the consequent depletion of our resources. To the extent that we use tariffs unnecessarily, we accelerate the exhaustion of our resource reserves, and our dependence on foreign supplies is thereby progressively increased.

Even though we may be able to produce many of the essentials which we need, other nations in the free world cannot. The things which they can produce are limited, and they must trade in order to exist. If we do not trade with them, they will be forced to trade elsewhere, and in most cases this can only mean with Communist-dominated areas. We need allies who will cooperate with us, not because they feel that it is necessary in order to secure our economic and military aid but as free and equal partners in a united front against communistic subversion from within and aggression from without. The most shortsighted thing we could possibly do is to isolate our allies between a tariff curtain and the Iron Curtain.

We must remember also that from our own selfish interest we have a greater stake in expanding world trade than any other country in the world. We export around 20 percent of the goods in world trade and import about 15 percent. There is no segment of our economy which does not benefit from this world trade. In the case of agriculture, we are exporting the products of our farms which represent the production of from fifty to sixty million cultivated acres. This is an area equivalent to the combined cultivated land of Mississippi, Tennessee, Louisiana, Kentucky, Alabama, Florida, Georgia, North Carolina, South Carolina, and Virginia.

The produce of about 1 out of each 10 acres of our cropland is exported. In 1953, we exported almost 50 percent of our total production of rice, 26 percent of our total production of tobacco, 24 percent of our total production of cotton, 21 percent of our total production of soybeans and products, and 19 percent of our total production of wheat—and in 1953 the exports of these items had fallen off considerably from what they were in 1951, when even higher percentages were being exported.

We all know how important exports are to our farmers. We also know that when these exports are reduced, there follows lower prices, increased surplus problems, and there can follow acreage restrictions and marketing controls. These are some of the direct effects. In addition, cropland is diverted from the production of agricultural products for export to the production of other agricultural products for domestic consumption. This means that even those farm products which are not exported suffer due to increased competition in our domestic markets. There is probably no segment of our economy that has a greater stake in an expanded foreign trade than agriculture.

In the case of another very important segment—labor—it was estimated by the Secretary of Labor in his testimony before our committee that 4⅓ million jobs are attributable to work generated by our foreign trade, both export and import. Some have estimated that not over 100,000 workers would be threatened with the loss of their jobs from increased imports, even if we should provide a hypothetical reduction across the board of 50 percent in all our present tariff rates. I do not know the accuracy of either the figures of the Secretary of Labor or of this estimate; however, I am firmly convinced that whatever may be their accuracy, they do give an approximate indication of the net stake which labor has in our export and import trade.

Our commerce and industry also has a vital stake in expanded trade among the countries of the free world. We exported in 1953, 45 percent of our production of our tracklaying tractors, over 12 percent of our total production of refrigerators, 6 percent of our total production of cotton cloth and duck, and similar percentages of our total production of many other of our manufactured products.

The gentleman from Pennsylvania [Mr. EBERHARTER] inserted in the daily RECORD at page A953—which the Members have available to them—a reprint from the Foreign Commerce Weekly of June 28, 1954, published by the Department of Commerce, entitled "Producers Have a Big Stake in Exports." This reprint shows over a period of several years, what the percentage of exports of our total production of both agricultural and nonagricultural commodities have been. A study of these tables indicates that our country indeed has a big stake in exports.

I would like to again point out to this Committee that all the safeguards of existing law are maintained by this bill, such as the peril point and escape clause procedures, the provision of the Trade Agreements Extension Act of 1954 that no reduction shall be made in the duty on any article if the President finds that domestic production needed for projected national defense requirements would be threatened, and in addition the President, pursuant to the recommendation of the Commission on Foreign Economic Policy, has instructed the Trade Agreements Committee that in its negotiations no tariff concessions should be granted on products made by workers receiving wages that are substandard in the exporting country.

In addition to the maintenance of these safeguards, the bill itself provides that the reductions authorized can only be made gradually.

There are three main ways in which we can deal with the problem of our export trade, which trade is vital to our prosperity: First, we can make outright gifts of dollars to foreign countries with which to buy our goods; second, we can decrease the sale of our goods to foreign countries; or, third, we can expand import trade and thereby expand our export trade. There seems to be only one choice which any reasonable person could make, and that is to continue and moderately liberalize our present trade-agreements program, as would be provided in this bill.

The enactment of this legislation will mean increased prosperity here at home and rising levels of economic activity abroad.

Never before have we needed allies who will join with us as equal partners in our common front against Communist aggression as we need them today. An expanded foreign trade to back up our military treaties is an essential part of the common defense of the free world.

I urge that the bill be enacted.

Mr. DURHAM. Mr. Chairman, will the gentlemena yield?

Mr. COOPER. I yield.

Mr. DURHAM. The gentleman has given the House a very clear explanation of the measure. Today there was great concern about the Congress losing control of the measure, once it was enacted. Since this measure will be administered by the Tariff Commission, is not the Tariff Commission an independent agency?

Mr. COOPER. Oh, yes.

Mr. DURHAM. And is it not subject only to the Congress then?

Mr. COOPER. Yes. That is true. It also furnishes information to the President, of course.

Mr. DURHAM. What I am getting at is the point that we are not losing control of this. The Congress still has control of it by the fact that it is an independent agency, subject only to the control of Congress?

Mr. COOPER. Certainly. The Congress under this bill retains all the control it has today and has had all along.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Tennessee.

Mr. EVINS. I should like to take this occasion to commend the distinguished dean of the Tennessee delegation, the chairman of the Committee on Ways and Means, for the very splendid address which he has given the House. His statesmanlike approach to this whole problem is typical of the gentleman. I think he has made a most forthright and able presentation of this very important question, and he has been the champion of freer trade advocated by Cordell Hull, the father of the Reciprocal Trade program, and the gentleman is a worthy successor to that great statesman. I commend him.

Mr. COOPER. I thank the gentleman.

Mr. EVINS. And I have noticed the rapt attention which Members of this House have given to the gentleman's able address.

Mr. COOPER. I thank my colleague.

Mr. GROSS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GROSS. The resolution which we adopted this afternoon provides that after the adoption of the resolution general debate shall start and shall be confined to the bill and shall continue for not to exceed 2 days. My question is, Starting debate at 4:15 in the afternoon, as we did today that the adoption of the resolution, does that constitute a legislative day?

The CHAIRMAN. The Chair would answer the gentleman that this would be a matter for the committee to decide. The present occupant of the chair understands that the day is not divided by the House or by the committee.

Mr. GROSS. Then this would or would not be called a legislative day so far as general debate upon this bill is concerned?

The CHAIRMAN. It is the understanding of the Chair that when the Committee of the Whole rises after concluding debate on this subject today that would constitute 1 day.

The gentleman from Tennessee [Mr. COOPER] consumed 44 minutes.

Mr. GROSS. Can the Chair inform us what time it is proposed to meet tomorrow?

The CHAIRMAN. The House will meet at 11 o'clock.

The gentleman from New York is recognized.

Mr. REED of New York. Mr. Chairman, I yield myself 20 minutes.

Mr. Chairman, I am opposed to H. R. 1.

I will not dwell on the reasons for my opposition in any great detail. They are set forth starting on page 23 of the report of the Committee on Ways and Means on this legislation. I recommend the minority views expressed therein to your attention.

I would like to discuss at some length what I consider to be a very alarming aspect of this bill. Whether this bill passes or not, I say this to you—not a single Member of this House can say with any certainty what are the powers that H. R. 1 grants. Not a single Member of this House can say with any certainty what the ultimate effects of H. R. 1, if enacted, will be. I do not intend that statement to be in any sense a reflection on the intelligence of this House. You could not be expected to know the answers to these questions because none of the witnesses before our committee were able to provide them.

You have been told that this bill grants authority for an across-the-board cut of 15 percent in any existing tariff. You have also been told that it authorizes cutting in half any existing tariff on commodities being imported in negligible quantities. Finally, you have been told that the bill authorizes a reduction down to 50 percent of any tariff above that figure.

No evidence was produced before our committee as to the articles which will be affected by these proposed reductions. Not one single attempt was made to explain why 15 percent is an appropriate general reduction. Absolutely no information was given our committee as to why 50 percent as distinguished from some other percentage is the proper amount to which all rates in excess of that figure should be lowered. Nor were we given one iota of information as to what commodities are deemed to be imported today in negligible quantities. Nor were we told what tests would be employed in determining negligible imports. Nor were we told why a reduction in the tariffs on such imports by 50 percent was appropriate. Mr. Chairman, in all its hearings on this vital legislation our committee obtained no facts from the proponents of the bill as to the likely effect of these proposed tariff reductions upon our imports or exports. Mr. Chairman, I have looked in vain in the majority report for an explanation of these matters. To my great concern, I have found not a word—not one single word—to explain the need and justification for these specific reductions.

However, let us assume for the sake of argument that these reductions are appropriate, although the reasons may be obscure to us, at this time. I make this further statement—not one single Member of this House can say with any certainty what are the ultimate limits of the tariff reductions authorized by this bill. The Randall Commission and the President in his foreign economic policy message both recommended authority to reduce existing tariffs. Now, you might reasonably suppose that that means authority to reduce tariffs as they exist today. But that is not the case, Mr. Chairman, with respect to H. R. 1. H. R. 1 grants these broad powers to cut tariffs, not with respect to the rates now in effect, but with respect to the rates which will be in effect on the 1st of July of this year—almost 5 months from today. Why is that significant?

It is significant because negotiations are now about to get underway with Japan. It is contemplated that those negotiations will result in significant tariff concessions by the United States. Secretary Dulles expressed the hope to our committee that those negotiations would be concluded prior to July 1. Moreover, you must understand this—every tariff reduction granted to Japan in these negotiations will be extended automatically to every other non-Communist nation of the world. As a result, it appears probable that we will have an entirely new tariff schedule, affecting textiles, chinaware, glassware, chemicals, and a host of other items, before July 1. It will be those new rates which no one can predict with any certainty whatsoever today to which the new 15 percent reduction authority granted in H. R. 1 will be applied. That is why I say, Mr. Chairman, that not a single Member of this House can say with any degree of certainty what the reductions are which H. R. 1 authorizes. Certainly, no member of the State Department or the Tariff Commission can give you such information. It is not available. We have never before, in previous extensions of the Reciprocal Trade Act, delegated authority whose scope was so completely unknown.

For the first time, in addition to a simple extension of the President's existing authority to enter into trade agreements with foreign governments, H. R. 1 grants these broad additional powers—to make agreements relating to tariffs, to most-favored-nation standards, to quantitative import and export restrictions, to customs formalities, and—listen carefully to this—to any other matters relating to trade designed to promote purposes similar to any of the foregoing.

Mr. Chairman, what does this new language mean? I do not know. I do not think any member of our committee knows. We were told that this new language simply expresses what the State Department considers its present authority to be. If that is the case, what

is the necessity for it? We were told that it was designed in order to clarify any existing uncertainties. In my mind, this new language creates much more uncertainty than it lays at rest. We have gotten along for 20 years without this new grant of authority. We have entered into trade agreements with some 42 other countries of the world without it. What is the sudden need for this new authority which no one—I repeat, no one—has explained the need for?

Let me speak for a moment about GATT, an international agreement to which the United States is a party. The contracting parties to GATT bind themselves with respect to tariff rates, quotas, countervailing duties, and so forth. In areas in which Congress has not already acted, an agreement within GATT—for example, as to agricultural import quotas—would in practice preclude future congressional action in the same area if such action would be in violation of the GATT agreement.

GATT has never been submitted to the Congress for approval. I am concerned that the sweeping grant of authority which I have just discussed can be interpreted as constituting such approval. The majority included an amendment to the bill providing that its enactment would not constitute either approval or disapproval of the organizational features of GATT. Does not this provision leave a clear inference that the language be construed as constituting approval of the substantive provisions of GATT? I believe this can only be answered in the affirmative, particularly in view of the fact that the majority objected to an amendment offered by me along the lines of the provision included in every recent reciprocal trade act extension to the effect that the act would not constitute approval or disapproval of GATT as a whole.

Mr. Chairman, this is another example of the extraordinary lack of certainty inherent in almost every provision of this piece of legislation. Few Members of this House know what GATT is. Even fewer Members, including myself, can say what H. R. 1 accomplishes with respect to GATT.

There are other aspects of the bill which deserve detailed comment. For example, it was recommended in our committee that the bill be amended to insure that no trade concession could be granted which might impair the national security and that no concession already granted would be permitted to remain in effect if impairment of the Nation's security resulted. This was rejected by the majority.

However, I would like to address myself to the present operation of the so-called escape clause. As you may know, there have been 59 applications for relief under this section. In 15 of these cases the Tariff Commission found injury or the threat of injury, and so reported to the President. In only five of these cases has the President taken action in response to the report of the Commission.

Escape-clause proceedings before the Tariff Commission are lengthy and involve exhaustive public hearings. Every available fact is laid before the Commission. However, in his rejection of escape-clause recommendations, the President has frequently expressed his disagreement with the finding of the Commission as to the fact of injury. This disagreement over the facts has been based upon several grounds.

For example, the President may decide that injury has occurred, not because of imports, as found by the Tariff Commission, but as the result of a nontrade factor, such as a shift in consumer demand. Or the President may base his decision on evidence supplied to him by other agencies, including foreign governments. Or the President may decide that some overriding consideration of the national interest may require disregarding of the fact of injury. It is obvious, therefore, that there is considerable uncertainty in the outcome of escape-clause procedures.

I believe this to be particularly unfortunate when a domestic industry, typically a small industry, goes to great expense of both time and money to pursue its claim before the Tariff Commission, secures a determination by this bipartisan agency that serious injury as a result of imports does in fact exist, and then discovers that the recommendation of the Commission has been disregarded on the basis of other evidence not presented in the proceedings to which it was a party and with respect to which it has had no opportunity to rebut or otherwise explain.

The domestic industry has no appeal from the findings of fact of the Tariff Commission. It has no further forum in which to pursue its case. I believe, therefore, that our legal traditions, as well as elementary principles of justice, require that the findings of fact by the Tariff Commission be conclusive on the President as well as on all other interested parties. I cannot believe it desirable that these findings of fact be set aside on the basis of evidence produced, for example, by a foreign government or a foreign industry and channeled through the State Department outside of the public proceedings and beyond the public forum contemplated by the law.

I was glad to note that the majority in their report on the bill recognized this problem concerning the findings of fact. I think it unfortunate that the majority found no solution to the problem, other than to suggest that the President should give the fullest consideration to the facts as determined by the Tariff Commission. This suggestion is indefensible to me because it suggests that the President does not give such full consideration today. I reject such an implication. The majority suggests that it would be inappropriate to make the findings of fact final because, they state, "in practically every field where administrative or judicial findings are involved the Congress has provided for some review of those findings." This statement overlooks the fact that the courts never admit to overruling an administrative finding which is supportable by the evidence. Nor does a court in its judicial review consider any facts or any evidence not considered by the administrative agency.

The question is not whether the President should be precluded from any review of Commission findings; it is solely whether Commission findings should be set aside regardless of the fact that they are based on substantial evidence, or even regardless of the fact that the finding is the only possible finding from all the evidence in the record.

Therefore, while I also recognize many other inadequacies of the escape-clause procedure, it would seem that, as a very minimum, the findings of fact by the Tariff Commission as to the existence of injury be conclusive. It may well be, and I personally agree, that the President should even in this case not be bound by these findings if he decides that considerations of the national security are overriding.

Mr. Chairman, I intend to offer a motion to recommit at the appropriate time. The motion to recommit will be with instructions. These instructions will be designed to carry out what I am convinced was the original intent of the Congress with respect to escape-clause procedures. It will be a motion to recommit with instructions. It should be clearly understood by those who are not familiar with this procedure that such a motion, if it carries, will in no way delay consideration of the bill. It is my understanding that a vote on final passage of the bill as amended by the recommittal motion would follow almost immediately. Every Member would thus have an immediate opportunity to cast his vote on the bill as a whole.

Mr. Chairman, I ask unanimous consent to insert at this point in the RECORD the language of the motion to recommit which I intend to offer at the appropriate time. It should be understood that this language may be subject to further refinement or addition before it is offered.

The CHAIRMAN. Without objection, the request of the gentleman from New York [Mr. REED] is agreed to.

There was no objection.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Iowa.

Mr. GROSS. I should like to call attention to the fact that there are only about two dozen Members of the House of Representatives on the floor to listen to the excellent presentation by the ranking minority member of the Committee on Ways and Means on this tremendously important legislation. I want also to again call attention to the unfairness of the rule which made this bill in order for it provided 2 days of general debate. One of those days is now practically consumed and there has been only a little more than an hour of debate. Thus the rule is most unfair in its application to general debate on this occasion. I want the RECORD further to show that I would have made a point of order that a quorum was not present before the gentleman now addressing the House began to speak, were it not for the fact that would only have penalized others who wish to speak in the matter of time.

Mr. REED of New York. I want to thank the gentleman, and I want to

thank the gentlemen on both sides of the House. I realize the hour is late. I recognize how inconvenient it is for many Members, but things so shaped up here that this is the only time I could take without cheating other Members, who are not here, of their opportunity to address this House on what I consider the most important subject that has been before this House.

I should like the Members to think this thing over. All my life I have been a great respecter of the Constitution. I had a great professor on the Constitution in college, and I got very much interested in the Constitution as a charter of liberties which we should all support.

I want to call the attention of the Members to the fact that the commerce clause was considered by the fathers of the Constitution and by the great jurists ever since as the second most important provision in the Constitution. Of course, if we look back and see how they tried to hamper our trade—that is, all the major countries of the world of that day—it is perfectly understandable why they proposed to protect the very heart of this Nation, which is its markets. I want the Members of the House to think this thing over before we, as the Congress, abdicate our responsibility on the second most important clause in the Constitution, according to the jurists and to the framers of the Constitution.

Mr. DORN of New York. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield.

Mr. DORN of New York. Would the gentleman at this time read his motion to recommit?

Mr. REED of New York. I can; it is not very long. It is technical, but I am perfectly willing to read it.

It is as follows:

Mr. REED of New York moves to recommit the bill H. R. 1 to the Committee on Ways and Means with instructions to report the same back to the House forthwith with the following amendments:

Page 11, line 21, after "SEC. 4.", insert "(a)."

Page 11, after line 24, insert:

"(b) The second sentence of subsection (c) of section 7 of the Trade Agreements Extension Act of 1951, as amended (19 U. S. C., sec. 1364 (c)), is hereby amended to read as follows: 'If, as a result of investigations and hearings, a majority of the commissioners voting find that a product on which a concession has been granted is (as a result, in whole or in part, of the duty or other customs treatment reflecting such concession) being imported in such increased quantities (either actual or relative) as to cause or threaten serious injury to the domestic industry producing like or competitive products, such finding shall be final and conclusive and the President shall take action to prevent or remedy such injury unless he determines that the national security requires that no such action be taken. If the President does not, within 60 days, take the action referred to in the first sentence of this subsection, he shall immediately submit a report to the Committee on Ways and Means of the House and to the Committee on Finance of the Senate stating why he has not made such adjustments or modifications, or imposed such quotas'."

Mr. VORYS. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Ohio.

Mr. VORYS. As I understand, in the extension last year there was some provision that if there was a tie vote in the Tariff Commission the President would break the tie. Would the gentleman's amendment have effect on that provision, or is that provision still carried in the law?

Mr. REED of New York. I think that is in the present law.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield.

Mr. SIMPSON of Pennsylvania. The item to which the gentleman from Ohio refers is not affected by this motion to recommit. That determines that where there is a tie vote in the Tariff Commission, both sides of the controversy to which the tie applies shall be sent to the President, and he determines which one of the two he may consider. This refers to a majority vote.

Mr. VORYS. As I understand, the tie-vote provision which was a matter of compromise last year is continued under H. R. 1?

Mr. SIMPSON of Pennsylvania. It is not touched in H. R. I.

Mr. REED of New York. It does not touch it at all.

Mr. MILLS. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] be permitted to extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. DINGELL. Mr. Chairman, I have very little to add to the excellent remarks of the distinguished chairman of our committee and to the remarks which I have made on previous occasions on trade-agreements legislation, beginning with the establishment of the program and on each extension since that time. I have always stated that this is very good legislation. It has proved itself, and it has been very beneficial to our country. These statements need no proof, because they are predicated on facts and figures based on the operation of the trade-agreements program.

I would like to point out to this Committee that those who claim that this program has harmed them and the country have become so repetitious each time this legislation is under consideration that but for seriousness of the misinformation of these false prophets, it is almost amusing. They return to the hearings held by our committee over and over again, after telling us the last time that if we do not kill the program they will most assuredly perish. The facts indicate that they, generally speaking, become more prosperous year in and year out.

Many of the statements made before the House Ways and Means Committee opposing H. R. 1 have had such a familiar ring that I was led to look back to the debate on the extension of the Trade Agreements Act of 1945 10 years ago.

In 1945, I gave this summary of the testimony before our committee:

Throughout the hearings the minority (opposition) failed to make out a case. Such instances as appeared against the extension of the trade agreements were, for the most part, trying to reinforce the minority with arguments which were based upon unfounded fears. Repeatedly they admitted that thus far they had not been hurt, but they insisted they could not be sure about the future.

Today, 10 years later, I begin to wonder if some of these witnesses have never heard the old fable of the little boy who cried "Wolf." I wonder how gullible they believe we Members of this great Congress are? For example, one of the associations in the chemical industry has testified since 1943 that if the Trade Agreements Act were not amended to give more protection to the chemical industry that that industry would suffer. A few days ago the same association again appeared predicting dire things if the President were granted authority to reduce tariffs further. These fearful words came from spokesmen for an industry that has grown 50 percent in the past 6 years—those years during which we were warned that the effect of the Trade Agreements Act would be seriously detrimental to the industry. American industry as a whole has grown at the average of 3 percent every year for 25 years. The chemical industry has grown at more than 3 times that rate.

Another Cassandra is the independent producer's segment of the oil industry. Since 1940 they have objected to the trade agreements program. Although they have prospered with assistance of a 27.5 percent depletion allowance, they still ask for additional protection for the industry. And they ask for additional protection at a time when the domestic crude oil industry is operating at a near all-time peak. Is it not time for these groups to learn that fallacious cries of "Wolf" soon cease to be believed?

I have consistently supported the trade-agreements program since it was first proposed under the leadership of Franklin Delano Roosevelt and that great Secretary of State, Cordell Hull. I support H. R. 1 with great confidence. During the past 20 years, this program has demonstrated conclusively its positive advantage to the United States economy and to our relation with the rest of the world. It will have the same positive effect in the years ahead.

I regret to see that the critical state of world affairs is now being used by almost all opponents of the trade-agreements program. National defense is too serious a question today to have it used as an argument for special protection to give industries higher profits and less competition. The President and his Cabinet tell us that this bill is essential to our national defense and security, and who is in a better position than they to judge?

I pointed out in 1945 that considerations of our national safety had already been provided for in the administration of the act by the inclusion of representatives of the Defense Department on the group administering the act. Additional safeguards have been added since 1945. Section 2 of Public Law 464, 83d Congress, extending the Trade Agreements Act provides that no action shall be taken "to decrease the duty on any article if the President finds such reduction would threaten domestic production needed

for projected national defense requirements."

If there is a true problem of preserving particular industries or skills for national defense there are ways of meeting those problems that are more precise and effective than restrictions on imports.

I am proud that the representatives of my own great city—the thriving metropolis of Detroit—have not appeared before the Committee as members of the Cassandra chorus opposing H. R. 1. Quite the contrary. Experience has proved to them the value of the trade-agreements program. As the representatives of the Detroit Board of Trade stated before the committee, "dollars earned in the United States by foreign exporters will either directly or indirectly return home through the purchase of goods of United States manufacturers." The Detroit Board of Trade representative stated that they estimated 1 out of every 7 employed in manufacturing in Detroit owed his living to foreign trade to a substantial degree.

I know that Detroit is not unique in the benefit it obtains from foreign trade. Every city and State in the Union benefits to some degree. United States exports reached over $15 billion in 1954. This was at a time when our foreign-aid program had dropped substantially. In fact, as a recent Federal Reserve Board study shows, foreign demand for United States exports in 1954 kept business activity in the United States from declining as much as it would have had it been solely dependent upon the domestic market. Foreign trade acted as a cushion to soften the impact of the recession we had last year.

Over 4⅓ million jobs in the United States are provided by exports and imports by the handling and processing involved. This is a significant contribution to employment in the United States.

Naturally, in carrying out a program of this size there do develop some bruises and minor errors. One instance which I have in mind particularly involves the beverage industry. More specifically, it relates to the discrimination on the part of the Canadians because of their provincial taxes on beer. During the hearings I discussed this situation with the Secretary of State. These provincial taxes have been superimposed upon an already high Canadian tariff on American beers. The result is that it is next to impossible to obtain American beer in Canada.

I am bringing this matter to the attention of the House not because I feel that the program, by and large, has not operated as we intended it to, but because of the fact that this is one of those instances—admittedly a rather minor one in the overall picture, but of great importance to the beer industry—in which we have had, in my opinion, some errors. This is more of a case of the principle of the program not being carried out than it is a case of the program being carried out. I have, of course, an interest in each and every industry in the country being treated fairly and as intended under this program. I point out the situation in the case of the beer industry because there is a matter of principle involved which illustrates my point very specifically.

I might say that as a result of this violation of principle, I have introduced a resolution which I frankly consider an extreme action, but even as such I feel it is justified. I do not propose that this resolution be adopted now, because traditionally such legislation has not been a part of our trade-agreements legislation, and I do not want to nullify or impair the extension of this program. However, this resolution is pending and is subject to being called up should our committee decide that no other course can or will be pursued to eliminate this discrimination. My reason for introducing this resolution is to strengthen rather than weaken our trade-agreements program.

I am pleased that the bill amends the most-favored-nation provision of existing law so as to make it mandatory that the President, as soon as practicable, withdraw most-favored-nation treatment from a country where reasonable efforts on his part to get a particular country to cease its discriminatory treatment against American commerce, in those cases where such treatment, in his opinion, defeats the purpose of our trade agreements, are unavailing.

I am also pleased that the bill specifies the type of provisions which may be included in trade agreements so as to make it clear that the President has authority to deal with discriminatory treatment and devices against our products. This, in my opinion, should strengthen the hand of the President in dealing with such situations.

There is another matter which has to do with our trade about which I have expressed concern, and that is the 3 cents per pound processing tax on coconut oil. Originally this tax was covered into the Treasury of the Philippine Islands; however, upon our giving those islands their independence in 1946, we in my opinion failed to recognize this and continued to collect the tax, turning it into our own Treasury. The very purpose for the establishment of this tax was violated when this was done. This tax is unfair to American industry, such as the manufacturers of soaps and candies, to whom coconut oil is an essential ingredient of their products, and above all it is an unjustified burden on American consumers. This tax, contrary to expanding trade and promoting friendly relations between us and the Philippines, does just the reverse. If we are to continue collecting this tax, the least we should do is to turn it over to the Philippine Government. The best thing to do would be to repeal it.

Mr. Chairman, in my opinion the time has long past when we should be satisfied with periodic extensions of the trade-agreements program of from 1 to 3 years. I would like to see the act made permanent, without any loss of advantages or protection whatever to the people and industries in this country. If it were permanent, we all know that Congress always has the power to revise, amend, or repeal in part or whole whenever a law becomes obsolete or is not carrying out our intent. However, I am satisfied with a 3-year extension and I intend to vote for the bill.

I again say that this is a most beneficial piece of legislation, and we ourselves stand to gain more from it than anyone else.

Mr. MILLS. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. KING].

Mr. GROSS. Mr. Chairman, I make the point of order that a quorum is not present.

Mr. COOPER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BOLLING, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, had come to no resolution thereon.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. MILLER of Maryland and to include extraneous matter.

Mr. RIVERS and to include an address.

Mrs. BUCHANAN and to include a statement.

Mr. KING of California (at the request of Mr. DOYLE).

Mr. REECE of Tennessee.

Mr. BUCKLEY (at the request of Mr. MILLS).

Mr. VAN ZANDT (at the request of Mr. SIMPSON of Pennsylvania) and to include an editorial.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. HOEVEN (at the request of Mr. MARTIN), for 1 day, February 17, 1955, on account of official business.

Mr. OLIVER P. BOLTON (at the request of Mr. SCHENCK), on account of illness.

ADJOURNMENT

Mr. MILLS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 25 minutes p. m.), under its previous order, the House adjourned until tomorrow, Friday, February 18, 1955, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

446. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation entitled "A bill to provide running mates for certain Staff Corps officers in the naval service, and for other purposes"; to the Committee on Armed Services.

447. A letter from the Secretary of Commerce transmitting a draft of proposed legislation entitled "A bill to authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938, and for other purposes"; to the Committee on Interstate and Foreign Commerce.

448. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 4 of the Displaced Persons Act of 1948, as amended; to the Committee on the Judiciary.

449. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders suspending deportation as well as a list of the persons involved, pursuant to Public Law 863, 80th Congress, amending subsection (c) of section 19 of the Immigration Act of February 5, 1917, as amended (8 U. S. C. 155 (c)); to the Committee on the Judiciary.

450. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders granting the applications for permanent residence filed by the subjects, pursuant to section 6 of the Refugee Relief Act of 1953; to the Committee on the Judiciary.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ABBITT:

H. R. 4165. A bill to provide for the issuance of a special postage stamp in honor of Thomas Paine; to the Committee on Post Office and Civil Service.

By Mr. ALLEN of California:

H. R. 4166. A bill to amend the Internal Revenue Code of 1954 to permit employees to deduct their contributions under private unemployment compensation disability benefit plans where such contributions are in lieu of contributions otherwise required by State law; to the Committee on Ways and Means.

By Mr. ANFUSO:

H. R. 4167. A bill to encourage the improvement and development of marketing facilities for handling perishable agricultural commodities; to the Committee on Agriculture.

By Mr. BOGGS:

H. R. 4168. A bill to amend the Natural Gas Act; to the Committee on Interstate and Foreign Commerce.

By Mr. CHUDOFF:

H. R. 4169. A bill to regulate subsistence expenses and mileage allowances of civilian officers and employees of the Federal Government; to the Committee on Government Operations.

By Mr. DOYLE:

H. R. 4170. A bill to amend the Social Security Act to provide for payment under the Federal old-age and survivors insurance system of child's insurance benefits to children who have attained the age of 18 but are incapable of self-support because of physical or mental disability, and for other purposes; to the Committee on Ways and Means.

By Mr. FERNÓS-ISERN:

H. R. 4171. A bill to permit certain officers and employees of the Puerto Rico Reconstruction Administration paid on a monthly or per annum basis to acquire civil service status; to the Committee on Post Office and Civil Service.

By Mr. FJARE:

H. R. 4172. A bill to repeal the provision of the Second Deficiency Appropriation Act, fiscal year 1935, which requires recoupment of certain Federal funds spent for school construction, and to provide for the return of amounts heretofore recouped under such provision; to the Committee on Interior and Insular Affairs.

By Mr. GRANAHAN:

H. R. 4173. A bill to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. GUBSER:

H. R. 4174. A bill to provide for grants to teachers' colleges so that teachers may be better prepared to assist in the prevention of narcotic addiction; to the Committee on Education and Labor.

By Mr. KEOGH:

H. R. 4175. A bill to amend the Tariff Act of 1930 so as to allow containers for certain petroleum products and derivatives to be temporarily imported without payment of duty, and for other purposes; to the Committee on Ways and Means.

By Mr. McMILLAN:

H. R. 4176. A bill to provide that feed furnished in disaster areas under Public Law 115, 83d Congress, shall be made available for feeding working stock and hogs; to the Committee on Agriculture.

By Mr. SMITH of Mississippi:

H. R. 4177. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to require that a farm worker perform full-time agricultural labor for an employer on at least 90 days in a year to be covered under the old-age and survivors insurance system; to the Committee on Ways and Means.

H. R. 4178. A bill to further define self-employed individuals for purposes of the Federal old-age and survivors insurance system; to the Committee on Ways and Means.

By Mr. VINSON:

H. R. 4179. A bill to amend the Vinson-Trammell Act of March 27, 1934, as amended, to provide for the tonnage composition of the United States Navy with respect to vessels, and for other purposes; to the Committee on Armed Services.

By Mr. HYDE:

H. J. Res. 220. Joint resolution to reimburse uncompensated leave to Government Printing Office employees earned during the fiscal year 1932; to the Committee on House Administration.

By Mr. BASS of Tennessee:

H. Res. 146. Resolution to authorize the Committee on Agriculture to investigate certain practices in administration of acreage allotments and marketing quotas; to the Committee on Rules.

By Mr. BUCKLEY:

H. Res. 147. Resolution to provide funds for the expenses of the investigations and studies authorized by House Resolution 144; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. CANFIELD: Joint Resolution No. 14, Laws of 1954 of the State of New Jersey, memorializing the Congress of the United States to amend the Hayden-Cartwright Act of 1934 and subsequent Federal-aid highway acts relative to the use of motor fuel and motor-vehicle-tax receipts for nonhighway purposes; to the Committee on Public Works.

By Mr. FORAND: Resolution of the Rhode Island General Assembly memorializing Congress to implement and execute plans and recommendations of the Corps of Army Engineers relative to the dredging of Bullock Cove in the town of East Providence; to the Committee on Public Works.

By Mr. HESELTON: Resolutions of the House of Representatives, Commonwealth of Massachusetts, memorializing Congress to pass legislation granting educational benefits to children of members of the Armed Forces killed in combat during World War II and in Korea; to the Committee on Veterans' Affairs.

By the SPEAKER: Memorial of the Legislature of the State of Colorado, memorializing the President and the Congress of the United States to consider revision of the Sugar Act of 1948 in regard to sugar quotas established for domestic sugar-beet production; to the Committee on Agriculture.

Also, memorial of the Legislature of the State of Massachusetts, memorializing the President and the Congress of the United States to pass legislation granting educational benefits to children of members of the Armed Forces killed in combat during World War II and in Korea; to the Committee on Veterans' Affairs.

Also, memorial of the Legislature of the Territory of Alaska, memorializing the President and the Congress of the United States relative to requesting passage of H. R. 247, relating to moneys received from mineral lands in Alaska; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN of California:

H. R. 4180. A bill for the relief of Mary Ishii; to the Committee on the Judiciary.

By Mr. BARTLETT:

H. R. 4181. A bill for the relief of P. F. Claveau, as successor to the firm of Rodger G. Ritchie Painting & Decorating Co.; to the Committee on the Judiciary.

By Mr. BAUMHART:

H. R. 4182. A bill for the relief of the Highway Construction Co. of Ohio, Inc.; to the Committee on the Judiciary.

By Mr. COON:

H. R. 4183. A bill for the relief of Demetrios K. Georgaras; to the Committee on the Judiciary.

By Mr. FJARE:

H. R. 4184. A bill for the relief of Vera Agnes Dupuis Voorhies; to the Committee on Interior and Insular Affairs.

By Mr. FINE:

H. R. 4185. A bill for the relief of Zabel Vartanian; to the Committee on the Judiciary.

By Mr. FINE (by request):

H. R. 4186. A bill for the relief of Emanuel M. Snyder; to the Committee on the Judiciary.

By Mr. FRIEDEL (by request):

H. R. 4187. A bill for the relief of Leonides Glynos; to the Committee on the Judiciary.

By Mr. GRANT:

H. R. 4188. A bill for the relief of Jackson Manufacturing Co., Inc.; to the Committee on the Judiciary.

By Mr. JENNINGS:

H. R. 4189. A bill for the relief of Mrs. Maria Johanna Van Hassel (Glenn) Banks; to the Committee on the Judiciary.

By Mrs. KEE:

H. R. 4190. A bill for the relief of Wadih Saleh; to the Committee on the Judiciary.

By Mr. McMILLAN:

H. R. 4191. A bill conferring jurisdiction upon the United States District Court for the Eastern District of South Carolina to hear, determine, and render judgment upon certain claims of Roderick D. Strawn; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 4192. A bill for the relief of Yahya Rafi Mayeri; to the Committee on the Judiciary.

By Mr. NORBLAD:

H. R. 4193. A bill for the relief of Urho Paavo Patokoski, his wife, and their three children; to the Committee on the Judiciary.

By Mr. PELLY:

H. R. 4194. A bill for the relief of John Soudas; to the Committee on the Judiciary.

H. R. 4195. A bill for the relief of Antonios Vasillos Zarkadis; to the Committee on the Judiciary.

H. R. 4196. A bill for the relief of Mrs. Ellen Nellie Brent; to the Committee on the Judiciary.

By Mr. RABAUT:

H. R. 4197. A bill for the relief of Fouad Mikhail Zada, his wife, Sabat Zada (nee Leon or Laoun); and their minor child, Michel; to the Committee on the Judiciary.

By Mr. TRIMBLE:

H. R. 4198. A bill for the relief of Howard L. Gray; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

104. By Mr. SMITH of Wisconsin: Resolution unanimously adopted at a mass meeting of Americans of Lithuanian descent of the city of Racine, Wis., February 13, 1955, expressing gratitude to our Government, which has never recognized the Soviet occupation of Lithuania and has always demonstrated a favorable attitude toward her cause for independence; to the Committee on Foreign Affairs.

105. By the SPEAKER: Petition of Dusan Grgas, San Pedro, Calif., relative to her son being admitted to the United States from Yugoslavia as a citizen; to the Committee on the Judiciary.

106. Also, petition of Bernard Gelles & Co., New York, N. Y., regarding denial of equality in compliance with Public Law 480; to the Committee on Agriculture.

107. Also, petition of the chairman, Americans of Lithuanian Descent, Portland, Oreg., expressing gratitude to the United States for the constant support extended to the cause of independence for Lithuania and her neighbors of Latvia and Estonia; to the Committee on Foreign Affairs.

108. Also, petition of the secretary, Lithuanian American Council, Inc., Racine, Wis., expressing gratitude to the United States for its favorable attitude toward Lithuania in her cause for independence; to the Committee on Foreign Affairs.

109. Also, petition of the employees of shipfitting department, Maryland Drydock Co., Baltimore, Md., relative to reducing from 65 to 60 the age for social-security retirement; to the Committee on Ways and Means.

EXTENSIONS OF REMARKS

The Institute of Fiscal and Political Education

EXTENSION OF REMARKS

OF

HON. B. CARROLL REECE

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1955

Mr. REECE of Tennessee. Mr. Speaker, I wish to take this opportunity to commend the objectives of the joint resolution introduced recently in this House by the gentleman from Pennsylvania [Mr. FLOOD], seeking to promote the teaching in American schools of the differences between the theories and practices of the American way of life and the theories and practices of atheistic communism.

This joint resolution proposes to establish a commission to study the testimony relating to the theories and practices of communism taken under oath by the committees of the Senate and House of Representatives and by any agency of the executive branch of the United States Government, and, on the basis of this study, to prepare material for a book to give the fullest possible information on Communist theories and practices. The commisison would also be authorized to prepare suggested curricula of studies suitable for use in the teaching of courses in schools, colleges, and universities in order to show the basic differences between the theories and practices of the American way of life and the theories and practices of atheistic communism.

I agree with the gentleman from Pennsylvania that there is need for instruction in our public schools as well as colleges and universities regarding the encroachment upon democratic institutions by the Communist world conspiracy. Communist techniques have long been employed to capture the mind of our youth. The principal defense of our democratic institutions remains to counteract this menace with the teaching of the truth. Indeed, one of the best means for inspiring confidence in our American Republic is to compare it with such police states as Soviet Russia or Communist China.

The Pennsylvania Bar Association has led the way in urging the teaching of the differences between democracy and communism in our schools by a commendable resolution adopted in the year 1954. The American Bar Association also has taken this problem under advisement. In its 77th annual meeting in Chicago, in August 1954, Judge Walter M. Bastian, of the Court of Appeals of the District of Columbia, then chairman of the standing committee on citizenship, proposed the following resolution:

> Whereas the American Bar Association believes that enlightened citizenship requires intelligent understanding of world problems, free discussion, and courageous thinking: Be it
>
> *Resolved*, That the facts of the theory and practice of communism be taught in appropriate forms at all levels in all educational institutions of the United States in conjunction with the teaching of the theory and practice of the Government of the United States of America under the Federal Constitution; and be it further
>
> *Resolved*, That this association stand ready to implement the purposes of this resolution by aiding in the preparation of suitable material and otherwise through its standing committee on American citizenship.

Action on Judge Bastian's resolution is still pending before the American Bar Association.

Not only the legal profession, but also the teaching profession has recognized the need for instruction which will compare democracy and communism. In 1953 Dr. Erling M. Hunt, professor of history in Teachers College, Columbia University, declared:

> Since the demobilization that followed World War II there has been widespread conviction, somewhat uncertainly implemented, that young Americans should understand the contrasts between democracy and communism.

In supporting instruction to this effect in the public schools, Professor Hunt further said:

> So far as communism is concerned, the schools are, I believe, basically responsible for inoculating young citizens against it.

As the gentleman from Pennsylvania [Mr. FLOOD] has well said, there are no generally acceptable textbooks on communism available for use in the public schools. It is difficult to teach a course in the public schools without a textbook on the subject. Lack of adequate textbooks is one of the reasons why the task of alerting students to communism has moved slowly in our elementary schools and high schools. Another reason for this lack of progress has been the hesitancy of teachers to engage in what some critics call indoctrination. Furthermore, the already overcrowded curricula of our public schools seems to defy the introduction of any new subject. In spite of these obstacles, however, the time has come when educators should find space in the curricula of our schools for a serious comparison of American democracy with communism.

In view of the reluctance of commercial publishers to contract for publishing a high-school textbook on communism, the board of trustees of the Institute of Fiscal and Political Education, in November 1954, voted to arrange for the preparation of such a textbook. This project was undertaken as a public service.

The Institute of Fiscal and Political Education holds an absolute charter granted by the board of regents of the University of the State of New York, which was obtained through the good offices of John W. Davis, former Democratic candidate for President of the United States.

The purpose of the institute, as outlined in its charter, is to promote, solely in the interests of higher and secondary education, the broadest possible public understanding of technical and practical problems in fiscal and political fields by preparing, publishing, and distributing bulletins, pamphlets, studies, charts,

and other sources of information and also by disseminating such information through public discussion, through collaboration with institutions of higher learning, by radio and otherwise.

The President of the institute is John Marshall, former First Assistant Attorney General of the United States under President Coolidge and President Hoover. Serving on the board are such educators as Dr. Wilson M. Compton, former president of Washington State College; Dr. Felix Morley, former president of Haverford College; Dr. Forrest H. Kirkpatrick, dean of students, Bethany College; Dr. O. Glenn Saxon, professor of economics, Yale University; and, Dr. John Lee Coulter, former president of North Dakota A. & M. College. Former Ambassador Arthur Bliss Lane is on the board as well as such eminent counselors at law as Donald R. Richberg, Lowell Wadmond, and Henry A. Wise; together with R. A. Hummel, chairman of the board of the Lone Star Cement Corp.; John Payson, vice president of the International Bank of Washington; former Congressman Charles S. Dewey, eminent banker and known, no doubt, to most of you; W. Royce Powell, prominent public relations director; and, the managing director, Harry G. Marquis.

The institute has engaged in several educational projects such as a program known as Washington Service—a series of pictorial booklets on political economy. Among the authors were the late Senators Robert A. Taft, Pat McCarran, and Burnet R. Maybank. Other Senators who expressed their views in this service were HARRY BYRD, STYLES BRIDGES, HOMER CAPEHART, PAUL DOUGLAS, EVERETT DIRKSEN, KARL MUNDT, ESTES KEFAUVER, and ALEXANDER WILEY. I, too, prepared a booklet for this series.

Another interesting and valuable educational program which the institute has undertaken is known as Operation Freedom. This is a series of full color, pictorial booklets dramatizing each section of the Bill of Rights. These pamphlets are used as collateral text material in the study of American history and the American way of life, and are recommended for use in the seventh and eighth grades of elementary schools. They have been approved by municipal school systems in many parts of the country.

I heartily agree with the gentleman from Pennsylvania [Mr. FLOOD] that a great service can be performed by the Commission To Make Available Information as to the Basic Differences Between the Theories and Practices of the American Way of Life and the Theories and Practices of Atheistic Communism. There are, however, two considerations which require attention. First, the study of the Commission is to be limited to the evidence taken under oath before the Congressional committees and the agencies of the executive branch of the United States Government. But there is a vast reservoir of information regarding the theory and practice of communism aside from evidence taken under oath. Such information includes the writings of Communists and ex-Communists, the reports of many reliable scholars, newsmen, and other observers, and documents of foreign governments. A textbook for the public schools should draw on all these sources.

Second, American education has been, since the founding of the Republic, in the hands of local authorities. Textbooks prepared by a central government are alien to American tradition. Under our American system, each school board in each school district should be free to determine the textbooks which are to be used in the public schools. In other words, competitive scholarship and competitive professional skill should guide the selection of textbooks for the American youth.

The Institute of Fiscal and Political Education proceeded with considerable care in arranging for the preparation of its experimental textbook. In view of the fact that many teachers are unprepared to teach a comparison of democracy and communism, the institute decided to issue both a textbook and a teacher's guide or handbook. Again, in view of the fact that high-school curricula are already overloaded, the institute decided to publish four textbooks; one designed for schools that can give an 18-week course, and 3 other textbooks for courses respectively of 9 weeks, 6 weeks, and 3 weeks. In other words, the institute has attempted to meet the needs of every high-school curricula in the country.

The institute gave careful consideration to the selection of the scholar to whom the task of preparing the textbooks and teacher's guides should be entrusted. It eventually selected Dr. Kenneth Colegrove, professor emeritus of political science of Northwestern University. Several considerations guided this choice. Dr. Colegrove is a distinguished scholar. His professional degree of doctor of philosophy was taken at Harvard University. In recognition of his book on the American Senate and World Peace, Columbia University in 1944, conferred on him the honorary degree of doctor of letters. His books and articles in learned journals on comparative government and international relations are universally esteemed. His record as a teacher of young men and women has been noteworthy. His service to the discipline of political science as secretary of the American Political Science Association has endeared him to the teaching and scholarly profession. In addition, he has had practical experience in the affairs of the Republic, having served as consultant in the Office of Strategic Services during the Second World War, as consultant to Gen. Douglas MacArthur in Tokyo immediately after the war, and later as consultant to the State Department.

In another respect, Dr. Colegrove is unusually competent to prepare textbooks comparing democracy and communism. For the past 15 years, he has written the articles on Asia, Communism, Civil Liberty, Democracy, Dictatorships, and the Union of Soviet Socialist Republics for the World Book Encyclopedia and its annual supplements, volumes which are widely used in the high schools of the United States. In fact, his comparison of democracy and dictatorships has long been one of the features of this popular encyclopedia for young students. In the yearbook of Collier's Encyclopedia for 1954, another publication extensively used in high-school libraries, he has a leading article on Techniques of Communism.

Dr. Colegrove has brought to the preparation of the textbooks and teacher's handbook a keen appreciation of the needs of high-school students, partly acquired when, before completing his university training, he began his professional career by teaching in an Iowa high school.

At the outset of his project, Dr. Colegrove made a survey of the literature which should be drawn upon in preparation of a textbook and teacher's handbook. Seeking to conform the textbook to the best pedagogical methods, Dr. Colegrove was fortunate in securing the continuing advice of one of America's outstanding educators, Dr. Erling M. Hunt. Dr. Hunt is professor of history and head of the department of the teaching of social studies in Teachers College, Columbia University. He is past president of the National Council of the Social Studies, and former editor of Social Education. He is also coauthor of the World's History, published in 1947, with a revision in 1954, by Harcourt, Brace & Co. This is one of the most successful history textbooks for high schools.

I would like to quote a recent statement by Dr. Colegrove. It reads:

> Anyone who undertakes to write a textbook on democracy and communism should approach his task with humility and a deep sense of responsibility. He should always bear in mind that no one person has a monopoly on wisdom. He should seek advice and consultation at every stage of the project.
>
> American young men and women must be taught the truth. Accuracy is paramount. At the same time, indoctrination must be avoided. Our American democratic process should extend into public-school education. The essential characteristic of a representative republic is the fact that the citizens actively participate in government. By the same token, in our educational system, our boys and girls should participate in the learning process. In other words, they should be led to draw their own independent conclusions from data presented in a textbook or by the teacher in the classroom. Instead of confronting pupils with iron-bound maxims they should be induced to weigh the evidence and to form their own judgments.
>
> At the same time, teachers and textbooks should not neglect the spiritual values. This precept is more easily uttered than carried out, particularly in case young students are to be induced to form their own value judgments. Perhaps the most approved method is to emphasize American history and traditions as a basis for comparison with other systems. In any event, the character and personality of the teacher is far more important than the content of the textbook.
>
> In comparing national systems, every effort must be made by both teacher and textbook writer to avoid engendering hatred of other peoples. Textbooks that inculcate hate of potential enemies have been one of the causes of war. While maintaining loyalty to truth and freedom, textbooks should inspire sympathy for and understanding of all peoples.
>
> It is sometimes said that teachers in the public schools refrain from making comparisons between democracy and communism because of fear of entering into a con-

troversial subject. The existence of any such fear is probably exaggerated. Many able teachers are already giving instruction in a comparison of democracies and totalitarian regimes. America has a million loyal, courageous, and devoted teachers. Any hesitancy on their part to teach a comparison of democracy and communism has been largely due to the fact that school boards and school administrators have not been in general agreement as to the necessity for including this subject in the curricula.

The issue is clear. Shall such an important educational project be carried out by a privately supported, tax-exempt organization which is known for its historical and objective approach or shall it be done by the Federal Government, which then will be making further inroads into the field of education instead of leaving it to the State, county, and municipality where it rightfully belongs.

I do not believe, and I am sure you will agree, that the Federal Government should go into the textbook business.

The outline of the complete textbook which is serving as the basis for discussion of the proper content of the textbook is as follows:

DEMOCRACY AND COMMUNISM—A HIGH SCHOOL TEXTBOOK

TABLE OF CONTENTS

Introduction

1. Why study democracy and communism:
(1) Citizens of a republic should be well informed.
(2) Dangers of ignorance.
(3) World conflict between communism and democracy.
(4) Suppression of liberty.
(5) Dictatorships and war.
Chart: Map of the democratic and Communist worlds.
2. What is democracy?
(1) Our form of government.
(2) Participation by the people.
(3) Respect for human beings.
(4) Respect for law.
Chart: Four aspects of democracy.
3. What is communism?
(1) The promise of the good life: Theory and practice.
(2) The deception of citizens.
(3) The people in a dictatorship.
(4) Destruction of constitutional government.
Chart: Four aspects of communism.
4. What is liberty?
(1) Protection of human rights.
(2) Promotion of justice.
(3) Justice through law.
(4) Freedom of opportunity.
Chart: Four fundamentals of liberty.
5. Is American liberty worth fighting for?
(1) Experience of the Pilgrims and Puritans.
(2) Views of Washington, Jefferson, Madison and Lincoln.
(3) Declaration of Independence.
(4) Constitution of the United States.
(5) Price of liberty: Eternal vigilance.
Chart: History of liberty in the United States.
6. Communism and liberty.
(1) The police state in Soviet Russia.
(2) Loss of liberty in Poland.
(3) Destruction of freedom in Czechoslovakia.
(4) Slavery of the Baltic Republics.
(5) The Red Terror in China.
Chart: Loss of liberty in Communist countries.
7. How America encourages independent thought.
(1) How Americans won freedom of speech.
(2) Guaranties of free speech and press.
(3) Education for all.
(4) The American people control the public schools.
(5) What the public schools teach.
Chart: The American public schools teach freedom.
8. How communism controls thought.
(1) Obedience to the "party line."
(2) Teaching hate in Communist schools.
(3) Discipline of young Communists.
(4) Censorship of newspapers, books, and art.
(5) Education of the "Soviet man."
Chart: Communist control of thought: Behavior of the "Soviet man."
9. Why some men and women become Communists.
(1) Communist promises to slum dwellers.
(2) Promises to unemployed.
(3) Appeals to minority races.
(4) False idealism.
(5) The urge for power.
Chart: Communist inducements for recruits.
10. How a Communist cell works.
(1) Daily life of a Communist member.
(2) Study of Communist doctrine.
(3) Teaching the party line to novices.
(4) Obedience to the party leader.
(5) Sabotage and espionage.
(6) What is the compensation for this hard work?
Chart: Workday of a Communist.
11. Democracy in action.
(1) Practice conforms to theory.
(2) Representative government.
(3) Free elections.
(4) The right to oppose.
(5) The two-party system.
(6) The making of law.
Chart: The democratic process.
12. How Soviet Russia deceives the Russian people.
(1) The U. S. S. R. constitution is a delusion.
(2) Faked elections.
(3) The people have no voice in government.
(4) False propaganda.
Chart: Methods of deception in the U. S. S. R.
13. How Red China deceives the Chinese people.
(1) Imitation of Russian communism.
(2) No free elections.
(3) False propaganda.
(4) Brainwashing in Red China.
(5) Deception of the peasants.
Chart: Methods of deception in Red China.
14. The Communist Party in Soviet Russia.
(1) Limited membership in the Communist Party.
(2) The grades of leadership.
(3) The Politburo or Presidium.
(4) Party discipline.
(5) The purges.
Chart: Organization chart of Communist Party.
15. How the Communist Party runs the Russian Government.
(1) The Council of Ministers.
(2) The Supreme Soviet.
(3) Dictatorial control by the Politburo or Presidium.
(4) A false federal system.
(5) Secret government.
Chart: Organization chart of the U. S. S. R. Government showing the party controls.
16. The Communist Party in all countries.
(1) The World Revolution.
(2) Local Communist Parties.
(3) Direction by the Politburo or Presidium in Moscow.
(4) The former Communist International.
(5) The Cominform.
(6) Enforcement of the "party line."
Chart: World control of the Communist conspiracy.
17. The Bolshevik Revolution.
(1) The Communist manifesto of Marx and Engels (1848).
(2) Lenin as world strategist.
(3) Seizure of military power in Russia.
(4) The dictatorship of the proletariat.
(5) The Red terror.

Postal Pay Raise

EXTENSION OF REMARKS
OF
HON. CHARLES A. BUCKLEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 17, 1955

Mr. BUCKLEY. Mr. Speaker, I have introduced legislation to provide for a 10-percent pay increase for postal workers, and I have spoken to individual members of the Committee on Post Office and Civil Service to urge that they act promptly on this or similar legislation. On Tuesday, February 15, 1955, I submitted a statement to the committee in support of my bill, as follows:

Mr. Chairman, during the last Congress legislation was passed providing for an increase in the salaries of postal employees. There is no doubt but that this legislation merited more consideration than it received. The increase it provided was totally inadequate, but because the bill was vetoed by the President, the postal workers did not receive even this small measure of relief. I believe we owe it to these employees to take prompt action at this Congress to increase their salaries and make the effective date retroactive. If the bill is vetoed then we should vote to override.

I have introduced a bill which would provide a 10 percent increase in the pay schedules of postal employees. I am very much aware of the need for such increases since in my district and in the New York area generally there are a number of postal workers and other Federal employees, and I know from conversations with them that they have all they can do to make ends meet. Many have suffered income losses from the various reorganization and reclassification programs and from reductions in grade brought about by post-audit actions of the Civil Service Commission. There is reason to believe that very often employees are forced to take reductions in grade because of reduced appropriations.

The Government worker today is called upon to carry an extra workload due to the policy of the administration to reduce Federal payrolls through attrition, which means that vacancies occurring through retirement, death, and resignation, are not filled. These are conditions over which employees have no control. If after 2 or 3 years a man in private industry had his pay reduced because some supervisor had made a mistake in allocating his job to the proper pay scole, the unions would call a strike of all employees. Yet this can happen to a Government employee and there is little or nothing he can do about it. If the Budget Bureau imposes a ceiling on an appropriation for a Government agency and employees have to be laid off through reductions in force or transferred to another post or reduced in grade as a result of it, there is nothing the Federal worker can do but accept it. He may have to readjust his standard of living, he may have to run his old car for another year or two, and cut out some of the little things in life he and his family have learned to enjoy, but there isn't anything he can do except appeal to Congress for an increase in pay.

The postal worker is underpaid. This is truth, not fiction. I marvel at the fact that postmasters are able to recruit qualified men at the extremely low rate of pay at which new employees must start.

I urge you gentlemen to approve an increase in pay which will be equitable and proper. Let me also urge you to proceed with haste since this matter has been pending for a long time and we must keep faith with those who have been waiting so patiently for us to act. I hope this committee will report a bill and send it to the floor before the end of this month. It is the only way in which we can demonstrate that we mean what we have said, that we do intend to keep our promises, that we will make this one of the first legislative enactments of the 84th Congress.

Postal Pay Increases

EXTENSION OF REMARKS
OF
HON. CECIL R. KING
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 17, 1955

Mr. KING of California. Mr. Speaker, under leave to extend my remarks in the RECORD, I include my statement before the House Committee on Post Office and Civil Service urging postal pay increases:

Mr. Chairman and members of the committee, believing as I do that our postal employees are entitled to at least a 10-percent wage increase across the board, I have introduced such legislation and am again appearing before your committee to urge favorable consideration of such an increase in the hope the committee in its wisdom will concur.

I also believe that consideration of a postal salary increase should be completely dis-

associated from the postage-rate increase. In my opinion, there is no basis for controversy on the wage increase whereas there will be serious controversy on the postage-rate proposal.

During the greater part of the last 2 decades, postal and other Federal employees have been unable to compete with increased prices. Wages of a worker, including Federal employees, must be considered in the light of cost of living. In a period during which our nation as a whole enjoyed unprecedented national prosperity, Federal workers have been stepchildren of our American economy.

Inadequate wages for Government workers can lead only to an inferior caliber of personnel, expensive recruiting and training experience, decreased efficiency, and, in the final analysis, poor Government operation. The combination of these undesirable conditions inevitably results in more costly Government to every taxpayer.

The cost of Government is properly the concern of each of us. No one advocates useless spending or the waste of our Public Treasury. However, in the matter of wages for Federal employees, there is involved a very human question as well as a moral obligation on the part of those responsible for determining salaries. The human question can be satisfied only if the worker is given a wage that will enable him to provide proper and adequate care for his family. A moral responsibility exists as long as Federal employees do not have collective-bargaining rights and in the absence of economic privileges accorded workers in private industry in a given wage dispute.

These two responsibilities should weigh heavily on those charged with establishing Federal salary schedules. They were completely ignored last year in the veto of the wage legislation approved by the 83d Congress. The current attitude of some persons in the executive branch of Government seems to be a take-it-or-leave-it offer, without reference to the needs of the employees or the justice of their case for better wages. This amounts to a callous disregard of more than 2 million Federal workers and their families and a complete evasion of the moral responsibility on the part of our Federal Government to pay fair and adequate wages.

In my judgment, a pay raise is long overdue for our deserving postal employees and I trust the committee will promptly and favorably report a substantial increase in their compensation.

Postal Salary Increase Legislation

EXTENSION OF REMARKS
OF
HON. VERA BUCHANAN
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 17, 1955

Mrs. BUCHANAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following statement submitted by me to the House Post Office and Civil Service Committee in support of an adequate and realistic salary increase for postal workers:

Mr. Chairman and members of the committee, I wish to thank you for this opportunity to state my views in support of legislation providing an adequate and realistic wage increase for postal workers. Such an increase is long overdue and I respectfully request your favorable consideration of H. R. 1592 and H. R. 2183 introduced by Congressman JAMES H. MORRISON and GEORGE M. RHODES, respectively.

There is general agreement that there should be an increase in the salaries of postal employees. H. R. 1592 and H. R. 2183, providing an increase of 10 percent, represent, I submit, an absolute minimum for those workers who have been underpaid for so long despite a constant rise in our standard of living. The last salary increase was in 1951 and the rise in the cost of living since then makes it imperative that the pending adjustment not only be adequate but that it be made as soon as possible.

As I stated to this committee during the postal pay legislation hearings last year it is a grave reflection on our Government that many employees of our Post Office Department, one of the largest businesses in the world, are forced to supplement their inadequate salaries with outside work in order to meet the increasing cost of living today.

I know what it is to be a housewife. I can understand the frustration of the wives of postal workers in attempting to make ends meet on salaries which are far removed from the real needs of the family.

The postal system is a vital part of our Government and the Government has an obligation to see that it is operated as efficiently as possible. One sure way of undermining this efficiency is by continuing to pay salaries which are grossly inadequate. Postal employees are entitled to a decent wage that will enable them to care for their families.

The bill proposed by the Postmaster General embodying his reclassification plan is completely unrealistic and delegates power to the Postmaster General that is both unwarranted and unnecessary, and does not provide a fair and reasonable salary increase to postal workers.

I sincerely urge this committee to report out H. R. 1592 or H. R. 2183 and give the Congress an opportunity to pass this long needed legislation as early as possible.

Lincoln and Eisenhower

EXTENSION OF REMARKS
OF
HON. EDWARD T. MILLER
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Thursday, February 17, 1955

Mr. MILLER of Maryland. Mr. Speaker, last evening one of my fine Maryland colleagues in the other body, Senator J. GLENN BEALL, spoke before the Republican Club of Prince Georges County, Inc., at the Prince Georges Golf and Country Club. Senator BEALL's remarks were characteristically to the point and of particular interest at this time. Under leave granted, I here include his address:

What would Abraham Lincoln, the first Republican President, say today of this land of 162 million Americans. Perhaps he would not today express himself any differently than he did in 1856 when he said:

"We are a great empire. We stand at once the wonder and the admiration of the whole world, and we must inquire what it is that has given us so much prosperity, and we shall understand that to give up that one thing—free government—would be to give up all future prosperity.

"This cause is that every man can make himself. It has been said that such a race of prosperity has been run nowhere else."

Lincoln started life as a laborer and never ceased to love those who worked by hand to better themselves and their nation. His implicit faith in the ability of those who were willing to work for their own good and for the good of their neighbor has been an abiding principle of the Republican Party ever since.

On the other hand, he did not fear property and wealth as some have feared and even tried to destroy it in the recent past. He recognized the need for capital so that the means for building a better nation would be available to the bold planners who shared his faith.

Lincoln warned that the heavy hand of government could stifle economic growth as well as the growth of equality and personal liberty. He wanted more than anything else for the individual man to have his fair chance to improve his lot—to build a home, a business, to be free to fulfill his individual destiny.

As a party, we Republicans have held to those beliefs. We have fought to retain the meaning they have for the Nation.

Although our world is vastly different from what it was in Lincoln's day, the essence of our problems is little changed. We face the same issues of freedom, of the relation between levels of government and individuals, of subversion and loyalty, and of the future course of our Nation.

Storm clouds were gathering when Lincoln entered the White House nearly 100 years ago. But he did not flinch. Through the terrible years that followed his leadership held the Nation together.

When President Eisenhower took office, the sky once more was overcast. And he has not flinched.

He has acted as Lincoln did before him. He has cut beneath the party battle to eternal truths. He has stated principles, defined differences, and clarified issues.

And, as was demonstrated by the overwhelming vote of confidence of both Houses on his Formosa resolution, the country is united behind him.

Now, let us see what the administration has done—and what it proposes to do.

The record for 1953 and 1954 shows that—

1. The Korean fighting and bloodshed was ended.
2. Honesty, integrity, and efficiency were restored to the Government.
3. Peacetime prosperity was achieved with 1953 the best and 1954 the next best in history.
4. Truman's spending plans were cut by $10 billion and taxes reduced nearly 7½ billion dollars a year.
5. Inflation was halted—the dollar stabilized.
6. The 20-year trend toward centralization of power in Washington was reversed.
7. Highest security standards for Government jobs were set and 2,400 risks removed.
8. Social-security and railroad-retirement benefits were extended and improved.
9. Equality of treatment was promoted and racial segregation ended in many areas.
10. United States and free world defenses against Communist aggression were strengthened.
11. Wage and rent controls ended.
12. A start made on the peacetime use of atomic energy.
13. The Department of Health, Education, and Welfare was established and hospital building and vocational rehabilitation expanded.
14. Record Federal aid for highways was voted.
15. Housing aids to help more families own better homes were enlarged.
16. Tidelands restored to the States.
17. Flexible farm-price-support and surplus-disposal programs provided.
18. Postal service was improved.
19. Veterans and civil-service employees benefits have been increased.

An impressive record indeed. But what is past is prologue. Now let us look at our party's program for 1955 as proposed by President Eisenhower in his state of the Union message on January 6.

Highlights of the program include:

Tireless labor to make the peace more just and durable, sufficient military strength to discourage resort to war, encouragement of United Nations efforts to limit armaments, mutual and gradual reductions of foreign trade tariff barriers, extension of the Selective Service Act.

Strengthened Reserves and increased benefits for career servicemen, continuation of present tax rates, looking to a reduction in 1956, a nationwide water-resources policy firmly based in law, a new program to meet pressing national highway needs, establishment of a Federal coordinator of public works.

Alleviation of problems of low-income farm families, strengthened Federal disaster-insurance programs, extension of the Small Business Act of 1953, continuance of the 83d Congress' housing program, challenging private industry to meet housing problems fully after 1958.

A program to improve existing health services, including Government reinsurance, Federal Government coordination in school expansion, assistance to States to cope with juvenile delinquency, a Federal Advisory Commission on the Arts in Health, Education, and Welfare, establishment of a 90-cents-an-hour minimum wage, extension of coverage, and Taft-Hartley Act amendments.

The modification of immigration laws, Hawaiian statehood, reduction of the voting age in Federal elections, District of Columbia self-government and suffrage, protection of voting rights of overseas servicemen, and extension of the Reorganization Act and Intergovernmental Relations Commission.

I think the first President of our party would agree that this is indeed a comprehensive, forward-looking program in the best Republican tradition.

Now, although our history has spanned nearly a century between Lincoln and Eisenhower, we still have today the same standards of republicanism held aloft by the party and the American people—the same standards of fair play.

These standards of fair play, I'm afraid, do not always apply to the Democratic Party. I have here a column by Mr. Gould Lincoln of the Washington Evening Star with which I am heartily in accord. I quote:

"The concentrated Democratic attack on Vice President NIXON which began immediately after the 1954 campaign and is now continuing with almost daily sniping, apparently has two basic and impelling reasons," the reporter says. "The first is to rid the Democratic Party of the Communist issue—the Red issue—which has plagued the Democrats for years and has hurt them in a number of States. Not having the courage to attack the President himself, their second aim is to strike at the man closest to him—the Vice President of the United States.

"So beginning with former Democratic National Chairman Stephen A. Mitchell and continued by Adlai Stevenson, Speaker Sam Rayburn, Senator Richard L. Neuberger, and by other freshmen Democrats in Congress, the drive is on to picture the Vice President as merely a smear artist and as such, entirely unworthy, a man who hits below the belt. Their theme song is that he made the Democrats out to be a parcel of traitors over the last score of years, and disloyal at the very least.

"The facts in the case, as revealed by a perusal of the Vice President's campaign speeches, are that the Vice President did no such thing. What he did was to accuse the Democrats of stupidity because they did not recognize the Communist menace; that they did not take the steps necessary to check infiltration of the Reds, and that when cases were called to their attention they did nothing about them. For example, the cases of Alger Hiss and Harry Dexter White.

"The Vice President said repeatedly that communism should not be a political issue, and that there was no difference between the loyalty of Democrats and Republicans. But, he added, some misguided officials of the Truman administration were blind or indifferent to the danger from the Communists.

"That is the kind of criticism which hurt—and which was effective against the Democrats in the 1950, 1952 and 1954 campaigns.

"The Democrats don't want any more of it.

"They have, they think, disposed of Senator JOE MCCARTHY of Wisconsin in such a way that he will not be effective in his attacks on them. He took no real part in the last campaign. Now they have turned on Mr. NIXON, who made effective use of the Red issue and is capable of doing so again.

"Senator NEUBERGER, without mentioning the Vice President by name, but plainly indicating Mr. NIXON was his target, recently criticized the latter's campaign against him, Senator NEUBERGER.

"As a matter of fact, Senator NEUBERGER was 1 of the 5 leftwing Democratic candidates singled out by Mr. NIXON in his Pocatello address on October 25, 1954, when the Vice President asserted that the gains that the Democrats would make, if they took over the 84th Congress, inevitably would come from the ADA wing of the party.

"The other four were Glen Taylor, of Idaho, who ran for Vice President on the Henry Wallace ticket in 1948; former Representative John Carroll, of Colorado; Senator O'Mahoney, of Wyoming, and former Representative Yorty, of California.

"Whether it was Mr. NIXON's campaigning or not, 3 out of these 5 Democrats were defeated in their races for the Senate.

"Mr. NIXON is for the present, at least, holding his own fire. His defense is being made by other Republicans, among them Republican National Chairman Leonard W. Hall. Mr. Hall said it should be clear to every one who reads the papers and hears the TV and radio that there is now underway a 'highly-organized campaign to besmirch the Vice President. The technique is to smear him by falsely accusing him of smearing others. This is one of the lowest tricks in politics and in this instance destructive only to its perpetrators. DICK NIXON is one of the most effective campaigners in history. It is because he tells the truth and is effective that he is under attack.'

"But should Mr. NIXON find it necessary to reply, he is quite capable. Further, he knows a lot more about the Communist activities in this country than do his detractors. He was mainly responsible for the conviction of Alger Hiss. No one is going to say to him, 'You never got a Communist.'

"Nor can the Democrats get away from the fact that they were blind to what was going on when Hiss and White were active in the Government."

Now without exception, Mr. NIXON approached his discussion of the security question by establishing the loyalty of the vast majority of Democrats. In my opinion he never questioned the loyalty of any Democrat. He did repeatedly question ignorance, blindness, or carelessness on the part of some of the leaders of the previous administration.

Then he demonstrated that it was these people who were most interested in the election and an anti-Eisenhower Congress. Here are a few more of his actual quotes:

In Houston on October 4, 1954, "I have found that the great majority of Republicans and Democrats approve of the way the Eisenhower program is restoring standards of loyalty, honesty, and integrity in government."

"The issue in 1952 was not the issue of the relative loyalty of Democrats and Republicans. That was never the issue then—it is not the issue now," he stated in Philadelphia.

In Norwalk, Conn., the Vice President said, "The great majority of all of our people regardless of the party to which they belong are loyal Americans. And I have found that Democrats are just as interested as Republicans in developing an effective program for dealing with disloyal elements."

Then, in a Fresno speech, he said, "The ADA leftwing which is calling for the election of an anti-Eisenhower Congress is not truly representative of the principles of the Democratic Party. Its spokesmen and its policies are unworthy of the traditions of that great political party. There is no question but that millions of Democrats completely disagree with this group in its attacks on the President's loyalty program."

Those do not sound like the words of a smear artist.

They do not sound like the words of a man who would make out the opposition party to be a parcel of traitors.

No, they have more the tone and strength of a man who was a great force in cementing to our future the constitutional freedoms and personal liberties which emerged from the dreams of our Founding Fathers.

They sound more like the words of Abraham Lincoln, a man who worked with the commonsense of Christian humility and the political wisdom to perpetuate the principles of the Republican Party—even as we are working here tonight in Prince Georges County.

The Christian in Politics

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1955

Mr. VAN ZANDT. Mr. Speaker, during a conference last fall of the Blair County, Pa., ministerium held in the city of Altoona, Pa., it was my privilege to deliver the following address on the subject the Christian in Politics:

THE CHRISTIAN IN POLITICS

(Address by the Honorable JAMES E. VAN ZANDT, of Pennsylvania)

In speaking to you on the subject the Christian in Politics it is appropriate to consider briefly some of the definitions or statements defining politics.

We are told for example by Webster that "politics is the art and science of government."

James Freeman Clarke says: "A politician thinks only of the next election—a statesman of the next generation."

And finally Daniel O'Connell admonishes that "Nothing is politically right that is morally wrong."

To these definitions I wish to add the following statement attributed to Andrew Oliver of Boston and written over 155 years ago. It summarizes, in telling fashion, what I think is a brief and comprehensive word picture of the term "politics" and is as true today as when uttered over a century and a half ago. Andrew Oliver said "Politics is the most hazardous of all professions. There is not another in which a man can hope to do so much good to his fellow creatures. Neither is there any in which by mere loss of nerve he may do widespread harm. Nor is there another in which he may so easily lose his own soul. Nor is there another in which a positive and strict veracity is so difficult.

"But danger is the inseparable companion of honor."

With all the temptations and degradations that beset it politics is still the noblest career any man can choose.

When I decided to become a candidate for Congress I was told in a jovial manner, and then again by some serious minded friends that in entering the political arena I was choosing a career in life that has been described by careless slanderers as a cesspool of inquity.

How often have we heard the caustic remark, "that politician," or "its just politics," or "I'm not going to vote for any of them, they're just a bunch of politicians."

Such unworthy remarks are directed daily at persons in public life by thoughtless people that it is little wonder that many good men and women shun public office.

President Eisenhower in a public pronouncement, warmed the hearts of the great army of honest public servants when he admonished those who have an active interest in political affairs "to wear their political badge with considerable pride." He continued: "For politics ought to be the part-time profession of every citizen who would protect the rights and privileges of free people and who would preserve what is good and fruitful in our national heritage."

"Politics," said the President, "must be the concern of every citizen who wants to see our national well-being increased and our international leadership strengthened. In that combined sense politics is the noblest of professions."

The Chief Executive of this great Republic seems to have echoed the thoughts of Andrew Oliver, of Boston, uttered 155 years ago, thoughts that are as applicable in this hydrogen-atomic age as they were in the infant days of the Republic.

It is a serious setback to the millions of American citizens interested in good government to reflect upon the widely publicized results of a Gallup poll published in 1953. This poll revealed that 70 percent of the persons interviewed stated they would not like to see their sons go into politics as a career.

This attitude is disturbing because the poll was not sectional or confined to any group of partisans.

The expressed opposition to politics as a career was nationwide and extended to all walks of life. Since politics should be, and essentially by nature is, an honorable profession inseparable from the welfare of society, such a nationwide indictment is not to be dismissed lightly.

When it is revealed that a profession that touches the life of every man, woman, and child is regarded as having fallen into disrepute, it is imperative that an explanation must be sought for such an unwholesome situation.

It is true that in politics there are found weak-kneed persons who are not as Ceasar's wife "above suspicion."

Yet considering the constant temptations that confront even the most virtuous, it would be too much to expect that in the field of politics all men would be paragons of virtue endowed with infinite wisdom and actuated by a sincere desire to fully justify the confidence placed in them.

In all segments of American life we have misfits who do not measure up to their responsibilities. Yet we refrain from denouncing their profession or vocation in life and charging it as being wholly responsible for harboring such misquided mortals.

By the same token we should, in exercising Christian charity, recognize the frailties of human nature and refuse to be stampeded into subscribing to the wholesale indictment of corruption and moral degradation leveled collectively at all persons in political life.

We should, on the other hand, examine such a sweeping indictment and try to find the reason for such widespread criticism. In so doing, we will find that among the chief causes for the scornful attitude directed toward those in political life is the fact that some unscrupulous and irresponsible politicians, by their conduct, have reflected discredit on all public servants and have cast the stigma of suspicion and distrust on them as a class.

In addition to corrupt public officials who are few in number, due to the high and exacting standards required of men in public affairs, there is the regrettable tendency on the part of the public to characterize every politician as demogog and a knave, thus judging all of them by the misconduct of a relatively few who have fallen by the wayside in violating the public trust. Such sweeping criticism is unjust and can serve but one purpose, and that is to discourage good men and women from entering politics.

For the few corrupt politicians that are exposed from time to time, there is a vast army of loyal and faithful public servants who should not be made to suffer by careless criticism directed at the sins of the few.

A Senate committee report on ethical standards of Government published in 1951 contains the testimony of Comptroller General Lindsay Warren, recognized as a militant crusader for higher moral standards in the public service. While testifying before the Senate committee he expressed his opinion that "an overwhelming majority of Government people are honest, capable, and conscientious."

The Senate committee, in its conclusions, went so far as to say "the ethical standards of public officials are probably higher than those prevailing in business and other walks of life."

It is convincingly evident from the results of the Gallup poll and the tendency to degrade politics that it is time the American public must begin to discriminate between the good and bad politician. This is difficult to do, however, when public apathy is so prevalent on election day, that only about half of the American people qualified to vote exercise their precious franchise.

Herein lies the solution to this distressing indictment of those in political life who, in Webster's definition, are engaged in a career in that lofty profession defined as "the art and science of government."

Undoubtedly many interviewed in the Gallup poll exercise their right to vote. Yet when we realize that a recent report stated there would be over 100 million Americans privileged to vote on November 2, based on the previous voting records of the American people, it will be a modern miracle if the 1952 vote which was recorded at 61½ million will be equaled, let alone surpassed.

The point I wish to make is that when only about half of the American people go to the polls are we not guilty, by comparison, of only a half-hearted effort in electing capable and honest public officials to administer the affairs of government? Are we not indicting ourselves when we complain of "that bunch of politicians" when half of us refrain from exercising the precious privilege of voting for public officials who literally hold our future as American citizens in the palms of their hands?

If we cry out against "stuffed ballot boxes" are we not aiding the culprits in political life by "starved ballot boxes"? Clean and honest government will never be achieved by half-hearted efforts on our part.

When only half of us vote it shows that we only half care about how our Government is operated. Such an attitude of indifference is certain to permit the election of persons we later criticize.

Yet, if we spent an hour on election day in casting our vote we could have helped to avert such a calamity.

The churches of the Nation are of utmost importance in the crusade for good government because they are eternally dedicated to the seemingly endless struggle against the forces of evil. Therefore, as spiritual laboratories, they watch over, nurture, and develop the inner man from the time his name is inscribed on the cradle roll until the day that he is summoned for a final accounting by the same God who made him.

In the interim the Christian mode of living becomes ingrained on his heart and in his soul as he absorbs the eternal truths taught him regarding his purpose here on earth. Fortified with the Christian way of life it follows that any man devoted to his faith in Almighty God is certain with the help of divine grace to lead an exemplary life, and in so doing merit the respect of his men. Such a man is an asset to his community and a force for good in its civic life. If he has the inclination and the will to enter politics the community, State, or Nation is richer by his presence for he is capable of rendering public service of the highest order based on the Christian ideals which have been indelibly inscribed on his heart and in his soul.

How often in recent years when the very foundation of our form of Government has been menaced by sinister and atheistic forces, have we heard repeated over and over again the stirring prayer of the poet as he implores divine providence:

"God give us men!
A time like this demands strong minds,
great hearts, true faith and ready
hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor;
Men who will not lie."

The churches of America from their spiritual reservoirs of manpower, have supplied such men and will continue to do so.

From personal experience I know that the thousands of God-fearing men I have met have elevated public life by their services to mankind. Their edifying conduct and spotless reputation have served to rout the scoffers who jokingly, or in earnest, regard politics as a questionable and disreputable means of making a living.

The church can gain nothing from becoming engaged in partisan politics, yet it fails in its mission if it hesitates to take an unmistakable position on any moral issue affecting the spiritual welfare of its members. Such a solicitous attitude does not require that the church identify itself with any particular political party for it would be folly to attempt to destroy the freedom of its members to select the political party of their choice.

The point is that a good Christian will practice his faith in everyday life and by so doing, he transmits his sense of moral responsibility to others, regardless of whether he is an elected public official or prefers to portray the role of the average American citizen.

With the granting of the franchise to women in 1920 and since some 30 million of them voted in 1952 as compared to over 31 million men, the family now plays an important part in deciding political issues. The Christian family, therefore, can wield the balance of power in any election, provided its members become informed on the issues and above all vote.

It is inspiring to realize that there is a mounting interest in Washington in the spiritual side of official life. Such increased interest is edifying and is a good example to the rest of the Nation. Prayer breakfasts attended by President Eisenhower are held at frequent intervals in the Mayflower Hotel and the response to the invitations extended greatly exceed the fondest expectations of the sponsors. In addition, a prayer room has

been erected in the United States Capitol where Members of Congress may retreat to a chapel-like atmosphere and engage in silent meditation.

During the 83d Congress legislation was approved adding the words "under God" to the pledge of allegiance to the flag. This spiritual attitude that is being publicly displayed in official circles in Washington, reveals that despite the stereotyped and baseless slanders against politicians as a class, there are countless men in public office who are concerned not alone for the material needs of the Nation but they are convinced, like our forefathers, that Almighty God has dominion over the affairs of this Nation. They know that the inscription on the great seal of the United States when translated from Latin says: "He has favored our undertakings." They know, too, that on our coinage the founders of this Republic inscribed, "In God we trust," and that Abraham Lincoln at Gettysburg, expressed the same basic idea when he said that this Nation's "new birth of freedom" would be "under God."

Holy Scripture also reminds us of the Master's majestic and dramatic words in defining our duty to God and to the state, "Render to Caesar the things that are Caesar's and to God the things that are God's."

Our Divine Lord was making it crystal clear that the church and state should work in harmony—each in its proper field for each has rights over man and both have common origin in God.

With this divine interpretation of the relationship of government to God, Christian men and women, because of their dedication to the religious ideals upon which this Nation was founded, can serve their country well in political life because they are aided by their love of God and love of their neighbor.

With such an abiding faith in their country, their neighbor, and their God they are the instrument through which, by their interest in politics, public office can be elevated to its proper place in our everyday lives, thus refuting the accusations of those who degrade it when they speak of it as a career to be shunned.

The Late Senator Burnet R. Maybank

EXTENSION OF REMARKS
OF

HON. L. MENDEL RIVERS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1955

Mr. RIVERS. Mr. Speaker, on September 1, 1954, I was on an official military inspection trip with my then chairman of the Armed Services Committee, DEWEY SHORT. Our duties carried us to the Headquarters of the United States Army in Europe located in Heidelberg, Germany. On the particular evening of this date we had just finished a dinner given in our honor by the High Commissioner of Germany, the Honorable James B. Conant, when a note was handed to me by the Department of the Army telling me of the untimely death of Senator Burnet R. Maybank. I was shocked and grieved at this tragic news and immediately dispatched my condolences to Mrs. Maybank.

I knew it was impossible for me to return in time for the funeral, accordingly I continued my trip and completed my responsibilities incident to the itinerary set by the chairman.

Upon arriving home in late September, I released to the press my feelings on the tragic loss which South Carolina suffered as a result of Senator Maybank's death.

No South Carolinian whom I can recall had more important assignments as a United States Senator than did Maybank at the time of his death. When the Democrats were in power, Maybank was the chairman of the very important Banking and Currency Committee. This committee has jurisdiction in the Senate over almost every phase of our economic life—the banking, the housing, the money market, the securities business—and those things which vitally touch the living mechanism of our breathing economy. Consequently, the working man and the financier alike were affected by the deliberations of this committee.

It was not unnatural that Maybank should head this committee. He distinguished himself early in life at my alma mater, the College of Charleston, as one peculiarly adept in mathematics and economics. He was awarded the mathematics prize at the College of Charleston for excellence.

In the early 30's, Maybank gained national prominence when he solved the financial problems of the city of Charleston during the early days of the greatest depression ever to hit this Nation. For this unusual feat he was called upon to perform important tasks throughout South Carolina during this era when the New Deal was in its infancy. Maybank was loyal to the precepts of the New Deal throughout his political career. He was a liberal in the true sense of the word, but he was a constitutional liberal. However, he never let his enthusiasms for the new order dim or alter his basic philosophy of believing in States rights.

At the time of his death, Maybank was also a member of the important Appropriations Committee of the Senate. He was a member of the Subcommittee on Military Appropriations. He was my greatest help on money for our military, when the Committee on Armed Services authorized projects for the Nation and South Carolina particularly. I recall, vividly, last year it was Maybank alone who assisted me in getting the Navy appropriation raised, thereby assuring the money for the important Navy construction program in South Carolina, notably the Beaufort Air Base.

Mr. Speaker, there has to be teamplay between the House and the Senate. Neither branch can operate effectively without the aid of the other. Each branch is a coequal of the other; unless the House acts, the Senate is helpless; and, conversely, without the Senate's aid the House is powerless.

Mr. Speaker, despite the great work on the committee on which I hold membership, the obligations and authorizations for construction of the vast military enterprises in my State without the money to carry these on, they would never become realities. In the partnership necessary to effectuate these worthy objectives for our national security, I lost a comrade in Burnet Maybank, whose place it will take many years to fill.

Mr. Speaker, it is not an easy task to serve in the Congress today. The manifold duties and multiplying demands made on Members of Congress in and through all the vast ramifications of this complex and intricate modern day government increasingly draw upon our strength and endurance, adding yearly to the terrific toll of human genius and human life. Anyone who, like Burnet Maybank, survives a political campaign in which his life's history is reviewed in detail and during which he moves constantly and uninterruptedly under the pitiless searchlight of publicity, must of necessity possess some virtue. Maybank remained sweet when accused falsely. He was silent to the tongue of slander. He never once, despite the heat of the campaign, dignified his opponent by answering him according to his kind. He rose to distinction in the Senate because of his personal worth, his mental capacity, untiring industry, and absolute honesty. On such an ascent to the top, the path is steep and rugged. Thorns instead of roses, Maybank endured them all.

Out of this turbulent strife and clash of opinion, out of the heat of debates and conflicting interests, out of the atmosphere of uncertainty which we are all forced to breathe, there come the priceless compensation and the immeasurable joy of mutual confidence and respect, of lasting friendships. In no other body of men do I believe one could possibly find such a fine spirit of generous and wholesome friendships in such a splendid feeling of comradeship.

I suppose this is due to the fact that each of us realizes the baptism of fire which we all daily endure in the performance of our responsibilities in the public interest. When death comes, jealousies are forgotten, individual interests and purposes are buried with the comrade whom we memorialize today. Beneath it all, personalities and eccentricities are subordinated to unity and interests of mankind.

Maybank died at his post of duty, as he would have it. In the words of the poet he would have said:

Let me live out my years in heat of blood
Let me die drunken with the dreamer's wine
Let me not see this soul-house built of mud
Go toppling to the dust—a vacant shrine.
Let me go quickly like a candlelight
Snuffed out just at the heyday of its glow
Give me high noon—let it then be night
Thus would I go.
And grant me, when I face the grisly thing,
One haughty cry to pierce the gap, perhaps
O let me be a tune-swept fiddle string
That feels the master melody—and snaps.

He "felt the heat of blood" and went "quickly like a candlelight snuffed out just at the heyday of its glow." At last he has gained rest from his exacting labors and has gone to his reward for having served God and country well.

Mr. Speaker, to Burnet Maybank, in life's relentless journey to the sunset:

But such a tide as moving seemed asleep;
Too full for sound and foam
When that which drew from out the boundless deep
Turned again home.

SENATE

FRIDAY, FEBRUARY 18, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O Thou God and Father of us all: From all the traditions which separate us and write our names in different camps of thought and conviction, we pause for the upward look which makes us one in solemn yet glad communion with Thee. When together we face the things that matter most, and a revealing sense of Thy eternity seizes us, we pour contempt on our pride of opinion and accomplishment; we lay aside our haughty self-sufficiency, and humbly pray that we may keep step with Thy will for us and for all Thy children.

In this night of human tragedy, no matter of what else the ebbing years may rob us, grant us courage in the midst of fear, faith amid the mists of doubt, and hope like a beacon amid the encircling gloom of despair. Teach us so to live and so to toil and so to play our part in this age on ages telling that, doing the right as Thou dost give us to see the right, we may face with clear conscience the gaze of our contemporaries and the judgment of posterity. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, February 15, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF JOINT RESOLUTION

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on February 15, 1955, the President had approved and signed the joint resolution (S. J. Res. 14) extending an invitation to the International Olympic Committee to hold the 1960 Olympic games at Detroit, Mich.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its clerks, announced that the House had passed a bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes, in which it requested the concurrence of the Senate.

ANNUAL REPORT OF UNITED STATES CIVIL SERVICE COMMISSION—MESSAGE FROM THE PRESIDENT

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Post Office and Civil Service:

To the Congress of the United States:

I transmit herewith the Annual Report of the United States Civil Service Commission for the fiscal year ended June 30, 1954.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, *February 16, 1955.*

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, and withdrawing the nomination of Luther V. Taylor, Sr., to be postmaster at Belmont, Miss., which nominating messages were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

LEAVES OF ABSENCE

Mr. CLEMENTS. Mr. President, I ask unanimous consent that the junior Senator from Louisiana [Mr. LONG] and the junior Senator from New Mexico [Mr. ANDERSON] be excused from attendance on the sessions of the Senate next week to attend the atomic energy tests in Nevada.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BUSH. Mr. President, on behalf of the senior Senator from Maine [Mrs. SMITH], I ask unanimous consent that she be excused from attendance on the sessions of the Senate for the period of her absence during her visit in the Far East.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSIONS

On request of Mr. CLEMENTS, and by unanimous consent, the Subcommittee on Internal Security of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

Mr. NEELY. Mr. President, I ask unanimous consent that while the Senate is in session the Committee on the District of Columbia be permitted to meet during the next 2 weeks as frequently as may be necessary in order to conduct hearings on the bill (S. 669) to provide an elected mayor, city council, school board, and nonvoting delegate to the House of Representatives for the District of Columbia, and for other purposes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ENTITLED "RESEARCH AND DEVELOPMENT PROCUREMENT ACTION REPORT"

A letter from the Director, Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, a confidential semiannual report entitled "Research and Development Procurement Action Report," for the period July 1 to December 31, 1954 (with an accompanying report); to the Committee on Armed Services.

AUDIT REPORT ON NATIONAL FUND FOR MEDICAL EDUCATION

A letter from the executive vice president, National Fund for Medical Education, New York, N. Y., transmitting, pursuant to law, an audit report on that fund, for the year ended December 31, 1954 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS

Petitions, etc., were laid before the Senate, or presented and referred as indicated:

By the PRESIDENT pro tempore:

Two joint resolutions of the Legislature of the State of Oregon; to the Committee on Appropriations:

"House Joint Memorial 2

"To the Honorable Senate and the House of Representatives of the United States of America, in Congress assembled:

"We, your memorialist, the Senate and the House of Representatives of the State of Oregon, in legislative session assembled, most respectfully represent and petition as follows:

"Whereas the Federal Government, through its construction of multiple-purpose projects, has become a major supplier of electric power to the Pacific Northwest; and

"Whereas the present and continuing growth of the region, including Oregon, requires the further and immediate development of its low-cost power potential in order to provide the energy base for industries, job opportunities, and the needs of its people; and

"Whereas the John Day project on the Columbia River between Oregon and Washington is one of the major integral units in the overall plan of comprehensive development of the Columbia River and has already been authorized and approved as such by the Congress of the United States (81st Cong., 2d sess., House Document No. 531); and

"Whereas its construction will complete slack water navigation from the mouth of the Columbia River to Pasco, Wash., a distance of some 328 miles; and

"Whereas it will provide approximately 500,000 acre-feet of storage for flood-control purposes and will also provide irrigation and recreational benefits; and

"Whereas such project will produce in excess of 1,100,000 kilowatts of low-cost power, fully integrated with the Federal grid and the Northwest power pool and close to Oregon load centers; and

"Whereas the growth of the region requires over 500,000 kilowatts of new power capacity annually and such multipurpose

projects as John Day must be started immediately in order to be completed and to avoid a serious power shortage by the early 1960's; and

"Whereas various local public utility agencies have offered to advance funds toward the preliminary engineering and planning costs of John Day and have indicated a willingness to advance over one-half the estimated cost of the project to expedite its construction by the United States as a Federal project: Now, therefore, be it

"Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein), That the Congress of the United States be and it hereby is memorialized to (a) appropriate immediately the funds necessary to enable the Corps of Engineers to complete the preliminary investigations and planning for the John Day project; and (b) indicate its intention to build the John Day project promptly and solely with Federal funds by making the necessary appropriation to start construction immediately upon completing the preliminary planning or, in the alternative, enact without delay such enabling legislation as is required to permit local agencies to advance funds, under appropriate arrangements with the United States, so that construction of such project by the Federal Government can be initiated immediately; be it further

"Resolved, That the secretary of state of the State of Oregon be and hereby is directed to send a copy of this memorial to the President of the United States, to the Honorable Douglas McKay, Secretary of the Interior of the United States, to the President and Chief Clerk of the United States Senate, to the Speaker and the Chief Clerk of the House of Representatives of the United States, and to each Member of the Congress.

"Adopted by house January 28, 1955:

"E. A. GEARY,
"Speaker of House.

"Adopted by senate February 8, 1955:

"ELMO E. SMITH,
"President of Senate.

"House Joint Memorial 3

"To the Honorable Senate and House of Representatives of the United States of America, in Congress assembled:

"We, your memorialists, the 48th Legislative Assembly of the State of Oregon, in legislative session assembled, most respectfully represent and petition as follows:

"Whereas the control of floods in the Willamette River Basin has long been recognized by the Congress to be necessary and desirable; and

"Whereas certain river control projects have been built by the United States and are in service within the Willamette drainage area; and

"Whereas the early construction of other flood-control facilities on certain tributary streams is urgently needed to balance operation of already existing facilities and thereby check recurring and aggravated damage to lands and property adjacent to the principal uncontrolled streams; and

"Whereas the Green Peter flood-control project on the Middle Fork of the Santiam River and the Cougar project on the McKenzie River are among the most urgently needed to round out the Willamette Basin river-control program; and

"Whereas full utilization of the hydroelectric power potential of the Green Peter and Cougar sites would add 120,000 kilowatts of electric generating capacity at strategic points in an area where power requirements are rapidly increasing; and

"Whereas local electric utilities, 1 municipal and 1 private, have shown willingness to finance and construct such electric facilities as an integral and coordinated part of the desired flood-control plan, thereby relieving the United States Government of that part of the costs: Now, therefore, be it

"Resolved by the House of Representatives of the State of Oregon (the Senate jointly concurring therein), That the Congress of the United States be and it hereby is memorializing to make available funds to begin the planning and construction of the flood-control facilities needed at the Green Peter and Cougar projects and, at the same time, authorize the licensing by the Federal Power Commission of hydroelectric installations to be financed and constructed by local agencies in harmony with the overall Willamette River Basin development plan; be it further

"Resolved, That the secretary of state of the State of Oregon be and hereby is directed to send a copy of this memorial to the President of the United States, to Douglas McKay, Secretary of the Interior of the United States, to the President and Chief Clerk of the United States Senate, to the Speaker and the Chief Clerk of the House of Representatives of the United States, and to each Member of the Congress.

"Adopted by house January 25, 1955:

"E. A. GEARY,
"Speaker of House.

"Adopted by senate February 8, 1955:

"ELMO E. SMITH,
"President of Senate."

By Mr. LANGER:

A resolution of the Senate of the State of North Dakota; to the Committee on Agriculture and Forestry:

"Senate Resolution 5

"Resolution requesting procedures by the Commodity Credit Corporation when belt run sampling is had on grain for terminal storage

"Whereas flax is one of the most important cash crops in this State; and

"Whereas the Commodity Credit Corporation apparently may arbitrarily determine to have Federal inspection based on a belt run sample of grain for terminal delivery, resulting often in a much greater percentage of dockage than was evident at the country elevator by usual tests, resulting in a loss to the country buyer: Now, therefore, be it

"Resolved by the Senate of the State of North Dakota, That when such belt run sampling is had by the Commodity Credit Corporation and there appears to be substantial disagreement with the country elevator test, the Commodity Credit Corporation be requested to advise the shipper, and hold such grain shipment, pending negotiations with the shipper for tests to be made by other accepted trade methods; be it further

"Resolved, That copies of this resolution, properly authenticated, be transmitted by the secretary of state to the Secretary of Agriculture, the head of the Commodity Credit Corporation, and to the Members of the North Dakota delegation in Congress.

"C. P. DAHL,
"President of the Senate.
"EDWARD LENO,
"Secretary of the Senate."

A concurrent resolution of the Legislature of the State of North Dakota; to the Committee on Interstate and Foreign Commerce:

"House Concurrent Resolution S

"Concurrent resolution memorializing the President of the United States to continue service of Northwest Airlines to Honolulu

"Whereas the State of North Dakota has enjoyed a growing volume of trade and commerce with the Hawaiian Islands through the direct one-carrier service of Northwest Airlines to Honolulu; and

"Whereas the elimination of said service will abruptly halt this development and adversely affect the economy of North Dakota and the upper midwest: Now, therefore, be it

"Resolved by the House of Representatives of the State of North Dakota (the senate concurring therein), That the President of the United States be respectfully urged to reconsider his decision to discontinue such service in the light of the best interests of the people of the State of North Dakota; be it further

"Resolved, That copies of this resolution be forwarded by the chief clerk of the house of representatives to the President of the United States and the North Dakota congressional delegation.

"K. A. FITCH,
"Speaker of the House.
"KENNETH L. MORGAN,
"Chief Clerk of the House.
"C. P. DAHL,
"President of the Senate.
"EDWARD LENO,
"Secretary of the Senate."

RESOLUTIONS OF GENERAL ASSEMBLY OF RHODE ISLAND

Mr. GREEN. Mr. President, on behalf of myself, and my colleague, the junior Senator from Rhode Island [Mr. PASTORE], I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, two resolutions adopted by the General Assembly of Rhode Island.

The PRESIDENT pro tempore. The resolutions will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The resolutions, presented by Mr. GREEN (for himself and Mr. PASTORE), were received, appropriately referred, and, under the rule, ordered to be printed in the RECORD, as indicated:

To the Committee on Finance:

"Resolution requesting the Senators and Representatives from Rhode Island in the Congress of the United States to take the proper steps necessary to protect and preserve the Rhode Island lace-manufacturing industry

"Whereas the American lace-manufacturing industry, 54 of whose 80 plants are located in Rhode Island, has suffered and still suffers increasingly serious difficulties as a result of tariff reductions effectuated under the trade agreement with France which became effective June 15, 1936; and

"Whereas reductions in tariffs since that date have driven the manufacture of veilings in America completely out and badly handicapped the manufacture of bobbinet and all other products of lace machines; and

"Whereas in addition to the above circumstances under which the industry has suffered grave injury, there is at present before the Congress a bill, H. R. 1, which would grant the Executive the right to reduce to 50 percent all tariffs that are over 50 percent of the value of the imported goods and reduce all other tariffs 15 percent at the rate of 5 percent per year for 3 years; and

"Whereas French and other foreign officials are already drawing up lists of duties they wish cut, including lace duties, in the event of passage of H. R. 1; and

"Whereas any further reduction in duties on lace may well mean the annihilation of the American lace-manufacturing industry and the loss of employment by its thousands of skilled employees, many of whom are located in Rhode Island: Now, therefore, be it

"Resolved, That the Senators and Representatives from Rhode Island in the Congress of the United States be and they are hereby urgently requested to take the proper steps necessary to protect and preserve the Rhode Island lace-manufacturing industry; and be it further

"Resolved, That duly certified copies of this resolution be transmitted by the secretary of state to the Senators and Representatives from Rhode Island in the Congress of the United States."

To the Committee on Public Works:

"Resolution memorializing Congress to implement and execute plans and recommendations of the Corps of Army Engineers relative to the dredging of Bullock Cove in the town of East Providence

"Whereas the Corps of Army Engineers has submitted plans and recommendations to the Congress of the United States for the dredging and improvement of Bullock Cove, so-called, in the town of East Providence to the end that a protected mooring basin may be created at such site; and

"Whereas the implementation of the aforesaid improvements and protection of said Bullock Cove would be useful and instrumental in protecting property of citizens of the town of East Providence who reside adjacent to the shoreline of said cove, which said property has been severely damaged and its very existence threatened by the depredations of hurricane Carol; and

"Whereas if said cove is not protected in accordance with the recommendations of the Army engineers, it is feared that much of said property could not withstand the onslaught of additional storms of gale or hurricane proportions; and

"Whereas Bullock Cove has been, during previous world wars, a center of defense, vessel construction, including warships of the minesweeper class, and is now the site of two boat-construction yards; and

"Whereas said cove will no longer be suitable for such important industrial and defense uses in the event that the said recommendations of the Army engineers are not speedily implemented; and

"Whereas said Bullock Cove has been and now is a center for a sizable fishing fleet which has now been deprived of facilities for fueling, loading mooring by the effects of said hurricane; and

"Whereas said fishing industry, which is centered in said Bullock Cove, will be seriously impaired in the absence of the dredging and improvement of said cove; and

"Whereas it is feared by numerous citizens of this State and particularly of the town of East Providence, that Congress may not appropriate sufficient funds to implement and execute the plans and recommendations of the Army engineers relative to the dredging of Bullock Cove in the town of East Providence: Now, therefore, be it

"Resolved, That the State of Rhode Island, through the general assembly, now requests the Congress of the United States to give favorable consideration to the implementation and execution of the plans submitted by the Corps of Army Engineers relative to the dredging of Bullock Cove and the improvement thereof and the creation at said site of a protected harbor of refuge; and be it further

"Resolved, That the Senators and Representatives from Rhode Island in said Congress be, and they hereby are, earnestly requested to use their concerted effort to bring about the implementation and execution of said plans and recommendations; and be it further

"Resolved, That the secretary of state be, and he is hereby authorized to transmit to the Senators and Representatives from Rhode Island in the Congress of the United States duly certified copies of this resolution."

RESOLUTIONS OF NORTH DAKOTA TURKEY FEDERATION

Mr. LANGER. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, two resolutions adopted by the North Dakota Turkey Federation, relating to the turkey industry.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Resolution 1

Whereas turkey production has been unprofitable due to the fact that the turkey producers have been caught in a squeeze between supported grain prices and unsupported turkey prices: Therefore be it

Resolved, The North Dakota Turkey Federation strongly urges the Secretary of Agriculture to make available directly to all turkey, poultry, and livestock growers light weight wheat and supported feed grains at a price 50 percent lower than the loan value.

Resolution 3

Whereas the turkey growers of North Dakota believe in free enterprise and individual initiative; and

Whereas there is agitation from certain quarters for price supports and quota controls: Therefore be it

Resolved, We of the North Dakota Turkey Federation request the Secretary of Agriculture to refrain from interferring with the turkey industry in any manner. We ask that he do not apply quotas or price supports of any kind.

IRVING J. MORK,
Executive Secretary, North Dakota Turkey Federation.

RESOLUTION OF ASSOCIATION OF CLERKS OF THE DISTRICT COURTS OF MINNESOTA

Mr. HUMPHREY. Mr. President, I present, for appropriate reference, and ask unanimous consent to have printed in the RECORD, a resolution adopted by the Association of Clerks of the District Courts of Minnesota, relating to the enforcement of judgments in certain cases.

There being no objection, the resolution was referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

RESOLUTION OF THE ASSOCIATION OF CLERKS OF THE DISTRICT COURTS OF MINNESOTA

Resolution for the amendment of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended

Whereas, under the provisions of the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, the period of limitation for the enforcement of a judgment is extended for a period depending on certain factors in the case in question; and

Whereas the records and files of the office of the clerk of the court, in which such judgment is entered, does not contain information to indicate which judgments are so extended, as to the period of limitation by reason of this act, makes it necessary to continue all judgments as unexpired as to the limitation period and to search such judgment records and to certify as to existence, or nonexistence, of such judgments for the statutory limitation period prior to the enactment of the Soldiers' and Sailors' Civil Relief Act of 1940; and

Whereas for the reason above stated, the judgment dockets in the clerk of court offices have become voluminous, as a result of the vast majority of such judgments not affected by the provisions of such act, but which are continued in the judgment dockets for lack of information in the files and records to indicate which affect military personnel, although they have, in fact, expired under the statutory period of limitation; and

Whereas an amendment to said act, to require the filing of affirmative information, in the specific file concerned, as to the military service of the judgment debtor, or creditor, would retain the protective features of the act, and enable the clerks of court to remove the judgments, which have in fact expired from the current judgment dockets, and would permit more accurate and practical searching for and certification of such judgment dockets: Now, therefore, be it

Resolved by the Association of Clerks of the District Courts of Minnesota, in convention assembled in the city of St. Paul, Minn., on the 21st day of January 1955, That the Congress of the United States so amend the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, to provide that in all cases where the period of limitation for the enforcement of a judgment in any State is extended by reason of the military service of the judgment debtor, or judgment creditor, such judgment shall not constitute a lien against any property of the judgment debtor beyond the normal period of limitation unless within such limitation period, the judgment creditor shall file, or cause to be filed, in the office of the clerk of the court where such judgment is entered an affidavit affirmatively setting forth the facts, as to the military service of the judgment debtor, and, to the best of his information and belief, the date of his entry into such service, length of such service, date of discharge or other termination of such service, and any other material information.

EDNY D. DIBBLE,
President.
OLIVE PETERSON,
Secretary.

ELIMINATION OF APPENDIX VOLUME FROM BOUND SET OF CONGRESSIONAL RECORD

Mr. HUMPHREY. Mr. President, I am in receipt of a letter from the Washington director of the American Library Association, relating to a resolution adopted by the Joint Committee on Printing on June 22, 1953, pertaining to the elimination of the Appendix volume from the bound set of the CONGRESSIONAL RECORD. I ask unanimous consent that the letter may be printed in the RECORD, and appropriately referred.

There being no objection, the letter was referred to the Committee on Rules and Administration, and ordered to be printed in the RECORD, as follows:

AMERICAN LIBRARY ASSOCIATION,
Washington, D. C., February 3, 1955.

The Honorable HUBERT H. HUMPHREY,
United States Senate,
Washington, D. C.

DEAR SENATOR HUMPHREY: The resolution passed by the Joint Committee on Printing in the 83d Congress which eliminated the Appendix volume from the bound set of the CONGRESSIONAL RECORD is causing grave consequences to libraries in their service to the public. According to the resolution "all extraneous matter, including but not limited to newspaper and magazine articles, editorials, addresses, radio programs, commentators' stories, resolutions from organizations and individuals, letters from constituents, etc., together with Members' remarks preceding same, appearing in the Appendix of the daily CONGRESSIONAL RECORD, shall be omitted from the permanent form of the CONGRESSIONAL RECORD."

Libraries are responsible for the preservation of material and the subsequent recourse to it. The deletion of material from the bound volumes after once being printed in the daily RECORD requires a library to retain both the bound volumes and the daily for the complete record. The paper backed daily RECORD is not easily preserved for library use. Too, the necessity for having two sets of the CONGRESSIONAL RECORD on hand to serve the public poses a terrific housing problem for

libraries, not to mention the added expense of binding the daily RECORD.

The bound volumes of the CONGRESSIONAL RECORD for the 2d session of the 83d Congress were printed with no listing of the material deleted. There is no way by which you can locate this information unless you could have access to a set of the daily RECORD. Since this printing is completed, it is the suggestion of the American Library Association that a separate index of this material be prepared and sent to subscribers of the bound CONGRESSIONAL RECORD. Material should not be deleted after printing without some record of what happened to it.

It would also be the hope of the American Library Association that the Joint Committee on Printing might again consider the question of amount and kinds of material which go into the daily RECORD. Once printed in the daily RECORD libraries feel that all material should be retained in the bound volume. To librarians this is a vital problem. It is our hope that you can assist in bringing about a reconsideration of the resolution of June 22, 1953, by the Joint Committee on Printing.

Sincerely,

JULIA D. BENNETT,
Director, ALA Washington Office.

PENSION BENEFITS—LETTER AND RESOLUTION

Mr. THYE. Mr. President, I present and ask unanimous consent to have printed in the RECORD the contents of a letter I have received from the chairman of the fourth district service board, Minnesota department of the American Legion, together with a resolution adopted by the fourth district post service officers relative to establishing pension benefits for widows and dependents of deceased World War II and Korean veterans on the same basis as are now available to widows and dependents of veterans of World War I.

There being no objection, the letter and resolution were ordered to be printed in the RECORD, as follows:

ST. PAUL, MINN., *February 11, 1955.*

Senator EDWARD THYE,
Washington, D. C.

DEAR SENATOR THYE: I am writing you at the request of the American Legion post service officers in the fourth district. There are 40 Legion posts in this district each of which is represented by a service officer whose primary responsibility is to assist disabled veterans, their widows, and dependents.

The service officers report that they are running into many dependents of deceased World War II and Korean veterans, in their particular neighborhoods, who are suffering hardship because of their inability to qualify for pension. Many of these dependents are convinced that the deceased veteran was suffering from a service-connected disability at date of death but their conviction is almost valueless in view of the difficulty of establishing service-connection when the only man who knows all the facts is gone. There are also a number of cases where it appears the veteran's death was probably caused by a service-connected disability. The difficulties of proof are the same in these cases, though explanation to the dependents is more difficult.

The service officers solicit your support of this legislation and request that you do everything possible to secure its passage.

You will find a resolution enclosed which expresses the views of Legion members in the fourth district of Minnesota.

Sincerely yours,

THOMAS MALONE,
Chairman, Fourth District Service Board.

Whereas widows and children of World War II and Korean veterans are not entitled, under existing laws and regulations, to a pension from the United States unless the deceased veteran was suffering from a disability established as service-connected; and

Whereas many widows and children of World War II and Korean veterans are in need of this pension but because of existing laws and regulations their applications for such are denied forcing them to forego the necessities of life and accept public relief in order to exist, and

Whereas the people of this Nation through their elected representatives have granted the right to pension to widows and children of World War I veterans even though such deceased veterans did not protect the rights of their dependents by proving the existence of a service-connected disability: Now, therefore, be it

Resolved, by the post service officers, fourth district, American Legion, Department of Minnesota, That they favor and strongly urge that the Congress of the United States pass legislation giving to widows and children of World War II and Korean veterans the same rights to a pension as are now posessed by widows and children of World War I veterans.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of New Jersey (for himself, Mr. IVES, Mr. BENDER, Mr. THYE, Mr. DUFF, Mr. SALTONSTALL, Mr. CASE of New Jersey, and Mr. BUSH):

S. 1091. A bill to provide for assistance to States in their efforts to promote, establish, and maintain safe work places and practices in industry, thereby reducing human suffering and financial loss and increasing production through safeguarding available manpower; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. SMITH of New Jersey when he introduced the above bill, which appear under a separate heading.)

By Mr. DIRKSEN:

S. 1092. A bill to provide for the issuance of a special postage stamp in commemoration of the 100th anniversary of Illinois State Normal University; to the Committee on Post Office and Civil Service.

By Mr. BEALL (for himself, Mr. NEELY, and Mr. MCNAMARA):

S. 1093. A bill to fix and regulate the salaries of teachers, school officers, and other employees of the Board of Education of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

(See the remarks of Mr. BEALL when he introduced the above bill, which appear under a separate heading.)

By Mr. JOHNSTON of South Carolina:

S. 1094. A bill to amend section 402 of the Federal Employees Uniform Allowance Act, approved September 1, 1954; to the Committee on Post Office and Civil Service.

By Mr. MCNAMARA:

S. 1095. A bill to extend the time within which local educational agencies may complete applications for payments under Public Law 815 in certain hardship cases; to the Committee on Labor and Public Welfare.

By Mr. KEFAUVER:

S. 1096. A bill for the relief of John Lloyd Smelcer; and

S. 1097. A bill for the relief of Clorimondo Mancia; to the Committee on the Judiciary.

By Mr. NEUBERGER:

S. 1098. A bill to amend the act of July 31, 1947, as amended, to provide for the disposition of certain materials on lands within national forests, and for other purposes; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. NEUBERGER when he introduced the above bill, which appear under a separate heading.)

By Mr. GREEN:

S. 1099. A bill to amend the Army and Air Force Vitalization and Retirement Equalization Act of 1948 to correct injustice and to provide for the payment of certain amounts of compensation to officers who were found under the provisions of that act to have been removed from the active list of the Army without justification and who were subsequently restored to the active list or advanced on the retired list; to the Committee on Armed Services.

By Mr. LEHMAN:

S. 1100. A bill for the relief of Lieselotte Helmholz;

S. 1101. A bill for the relief of Martino Palmeri;

S. 1102. A bill for the relief of August Cohn;

S. 1103. A bill for the relief of Frank Novacek and Zore Novacek; and

S. 1104. A bill for the relief of Zoltan Klar and his wife, Vilma Hartmann Klar, and their minor son, Tibor Klar; to the Committee on the Judiciary.

By Mr. MARTIN of Iowa:

S. 1105. A bill for the relief of Mrs. Lieselotte Emilie Dailey; to the Committee on the Judiciary.

By Mr. MARTIN of Iowa (for himself and Mr. HICKENLOOPER):

S. 1106. A bill for the relief of Pak-Chue Chan, Oi-Jen Tsin Chan (nee Tsin), Chee Tao Chan, and Wai May Chan; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 1107. A bill to amend section 502 of the Servicemen's Readjustment Act of 1944, so as to increase the maximum amount in which farm realty loans may be guaranteed thereunder; to the Committee on Labor and Public Welfare.

By Mr. HUMPHREY:

S. 1108. A bill for the relief of Sada Zarikian; to the Committee on the Judiciary.

By Mr. BRICKER:

S. 1109. A bill to amend subsection 401 (e) of the Civil Aeronautics Act of 1938, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. BENNETT:

S. 1110. A bill for the relief of Concetta Speranza Tapp, widow of Floyd William Tapp; to the Committee on the Judiciary.

By Mr. PURTELL:

S. 1111. A bill for the relief of Eric A. Cummings;

S. 1112. A bill for the relief of Luca Saltarelli;

S. 1113. A bill for the relief of Andreas Gerassimos Grigoratos;

S. 1114. A bill to waive any claims of the United States for the repayment of loans made by the Department of State to Harry H. Thomas and Jeanne A. Thomas;

S. 1115. A bill for the relief of Ursula Ann McFarland; and

S. 1116. A bill for the relief of Mrs. Elizabeth M. Casey; to the Committee on the Judiciary.

By Mr. PURTELL (for himself and Mr. BUSH):

S. 1117. A bill to amend section 162 (a) of the Internal Revenue Code of 1954 relating to deduction of trade or business expenses; to the Committee on Finance.

By Mr. LANGER:

S. 1118. A bill for the relief of Katharine Schneeberger; to the Committee on the Judiciary.

By Mr. MAGNUSON:

S. 1119. A bill to amend the Civil Aeronautics Act of 1938, as amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. THYE:

S. 1120. A bill to enlarge and extend the special school milk program; to the Committee on Agriculture and Forestry.

By Mr. CASE of South Dakota:

S. 1121. A bill to authorize the Secretary of the Army to make a monetary allowance in lieu of providing a headstone or marker for the unmarked grave of a soldier or a member or former member of the Armed Forces; to the Committee on Armed Services.

(See the remarks of Mr. CASE of South Dakota when he introduced the above bill, which appear under a separate heading.)

By Mr. LEHMAN:

S. 1122. A bill for the relief of Szloma Kleidermacher and his wife Sarah Kleidermacher and their children Ruchla, Abram, and Toba Kleidermacher; to the Committee on the Judiciary.

By Mr. HILL (for himself, Mr. YOUNG, Mr. CHAVEZ, Mr. IVES, Mr. MURRAY, Mr. NEELY, Mr. DOUGLAS, Mr. LEHMAN, Mr. KENNEDY, Mr. MCNAMARA, Mr. CLEMENTS, Mr. HENNINGS, Mr. HUMPHREY, Mr. JACKSON, Mr. KEFAUVER, Mr. KILGORE, Mr. LANGER, Mr. LONG, Mr. MAGNUSON, Mr. MANSFIELD, Mr. MONRONEY, Mr. MORSE, Mr. NEUBERGER, Mr. PASTORE, Mr. PAYNE, Mr. POTTER, Mr. SCOTT, Mr. SMATHERS, Mr. SPARKMAN, and Mr. SYMINGTON):

S. J. Res. 46. Joint resolution providing for an objective, thorough, and nationwide analysis and re-evaluation of the human and economic problems of mental illness, and for other purposes; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HILL when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. PURTELL:

S. J. Res. 47. Joint resolution to designate the musical composition by John Phillip Sousa, known as The Stars and Stripes Forever, as the official national march of the United States of America; to the Committee on the Judiciary.

DEVELOPMENT AND EXPANSION OF INDUSTRIAL SAFETY PROGRAMS

Mr. SMITH of New Jersey. Mr. President, on behalf of myself, the Senator from New York [Mr. IVES], the Senator from Ohio [Mr. BENDER], the Senator from Minnesota [Mr. THYE], the Senator from Pennsylvania [Mr. DUFF], the Senator from Massachusetts [Mr. SALTONSTALL], my colleague the junior Senator from New Jersey [Mr. CASE], and the Senator from Connecticut [Mr. BUSH], I introduce for appropriate reference a bill to assist the States in the development and expansion of industrial safety programs. The important objectives of this bill are a part of the current legislative program of President Eisenhower and the Department of Labor. The President requested $2 million in his budget message for this program in fiscal 1956.

During the year 1953, 15,000 deaths and 2,034,000 injuries occurred in the course of industrial employment. The cost, direct and indirect, of these accidents has been estimated by the Department of Labor to be approximately $4.5 billion.

While the regulation of industrial safety is a proper function of the States, except where the national interest is directly affected, the current resources of State agencies for safety development programs have been so limited that they preclude even one inspection per plant annually in more than three-fourths of the States.

This bill would provide substantial impetus to State industrial safety programs by allotting funds to States on the basis of the number of wage earners, industrial hazards, financial need, and other relevant factors. Each State would get a minimum of $15,000. States would be required to supply matching funds of not less than 25 percent of the total expenditures in the first 2 years, 33⅓ percent in the second 2 years, and 50 percent thereafter.

Mr. President, I ask unanimous consent that the full text of this bill be printed in the RECORD at the close of my remarks.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, will be printed in the RECORD.

The bill (S. 1091) to provide for assistance to States in their efforts to promote, establish, and maintain safe work places and practices in industry, thereby reducing human suffering and financial loss and increasing production through safeguarding available manpower, introduced by Mr. SMITH of New Jersey (for himself and other Senators), was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That this act may be cited as the Industrial Safety Act.

SEC. 2. (a) The Congress hereby finds and declares that the establishment and maintenance of safe work places and practices in industry reduce human suffering and financial loss and increase production through safeguarding available manpower. The purpose of this act is to assist the several States in their efforts (1) to develop and promote the acceptance of standards for establishing and maintaining safe work places and practices in industry through the voluntary cooperation of labor and management, and (2) to prepare and promulgate regulations for the purpose of requiring safe work places and practices and to foster the observance of such regulations.

(b) There are hereby authorized to be appropriated (1) for the fiscal year ending June 30, 1956, and for each fiscal year thereafter, sums for making payments to States which have submitted and had approved by the Secretary State plans under section 3 of this act, and (2) such sums as may be necessary for administrative and other expenses of the Department of Labor in administering this act: *Provided, however*, That no funds appropriated pursuant to this section shall be expended and no plan under section 3 shall provide for a safety program as to coal mines and coal mining subject to the Federal Coal Mine Safety Act, as amended (55 Stat. 177, U. S. C., title 30, secs. 451, et seq.).

SEC. 3. (a) To be approved a State plan for carrying out the purposes of section 2 (a) must—

(1) Delegate a single State agency, which must be the State agency administering labor laws for the establishment and maintenance of safe work places and practices in industry, to administer such plan;

(2) Provide such methods of administration as are found by the Secretary to be necessary for the proper and efficient operation of the plan, including after June 30, 1956, (a) methods relating to the establishment and maintenance of personnel standards on a merit basis, except that the Secretary shall exercise no authority with respect to the selection, tenure of office, and compensation of any individual employed in accordance with such methods; and (b) a training program for the personnel necessary for the administration of the plan;

(3) Provide for fostering the observance of State laws or regulations respecting safe work places and practices in industry; and for the development of standards for establishing and maintaining safe work places and practices in industry;

(4) Include a program for the promotion of observance of safety precautions through the voluntary cooperation of employers and employees in industry, which program may include cooperation with any nongovernment safety organization active in the State;

(5) Provide for financial participation by the State in all parts of the State plan and such distribution of funds for enforcement and promotional functions as to assure the application throughout the State of standards necessary to the establishment, promotion, and maintenance of safe work places and practices in industry; and

(6) Provide that the State agency will make such reports in such form and containing such information as the Secretary may from time to time reasonably require to carry out his functions under this act and comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports.

(b) The Secretary shall approve any State plan which complies with the provisions of subsection (a) of this section.

SEC. 4 (a) The funds appropriated for the purposes authorized in section 2 (b) shall be allotted by the Secretary among the several States annually in accordance with regulations to be prescribed by him providing for such allotment on the basis of (1) the number of wage earners, (2) the special hazards in industry, (3) the financial needs of the respective States, and (4) such other factors as the Secretary finds relevant. The Secretary is hereby authorized to make reallotments from time to time where the amount allotted to any State has not been absorbed by that State and he finds that any other State is in need of additional funds to administer its plan. The Secretary shall from time to time estimate the amount to be paid to each State under the provisions of this section and he shall thereupon prior to audit or settlement by the General Accounting Office pay to the State the amount so estimated. The annual payment to any State during the first and second bienniums after July 1, 1955, shall not exceed 75 percent and 66⅔ percent, respectively, of the annual expenditures under the State plan during those periods. The payments to any State for any subsequent year shall not exceed 50 percent of the expenditures under the State plan for each year: *Provided*, That the annual payment to any State under this section shall not be less than $15,000.

(b) Amounts paid to a State under this section shall be expended solely for carrying out the purposes set forth in section 2 (a), in accordance with the State plan. When any part of the amount so paid to any State for any fiscal year is not so expended for carrying out such purposes within such fiscal year, the Secretary is authorized, in such manner as he may determine, to adjust subsequent amounts to be paid by the amount not so expended.

SEC. 5. In the case of any State plan which has been approved under this act, if the Secretary, after reasonable notice and opportunity for hearing to the State agency administering such plan, determines, on the record, that in the administration of the plan there is a failure to comply substantially with any requirement of this Act or any provision required by this act to be included in the plan, he shall notify such State agency

that further payments will not be made to the State until he is satisfied that there is no longer any such failure to comply.

SEC. 6. The Secretary is further authorized, to the extent he deems it necessary and appropriate in order to carry out the provisions of this act, to utilize the services of experts and consultants, as authorized by section 55a of title 5 of the United States Code. Such experts and consultants may be reimbursed for expenses incurred in connection with their work for the Department in accordance with section 73–b–2 of title 5 of the United States Code.

SEC. 7. The Secretary is further authorized to issue such regulations governing the administration of this act, cause to be made such investigations, and appoint, subject to the civil-service laws, such employees, as he deems necessary to carry out his functions and duties under this act, and shall fix the compensation of such employees in accordance with the provisions of the Classification Act of 1949, as amended.

SEC. 8. As used in this act "State" means any State of the United States, the District of Columbia, Alaska, Hawaii, Puerto Rico, or the Virgin Islands.

SEC. 9. The term "Secretary" means the Secretary of Labor, United States Department of Labor.

SEC. 10. The Secretary shall include in his annual report to Congress a full account of the administration of this act.

DISPOSITION OF CERTAIN MATERIALS ON LANDS WITHIN NATIONAL FORESTS

Mr. NEUBERGER. Mr. President, I introduce, for appropriate reference, a bill which proposes to amend the laws governing the acquisition of certain minerals on the public lands of the United States.

This bill is designed primarily to accomplish two objectives.

First. It provides that common varieties of sand, stone, gravel, cinders, pumice and pumicite be acquired under the Materials Act, and that these materials shall no longer be the subject of any mining claims.

Second. The bill proposes to amend the Materials Act so as to give the Secretary of Agriculture the same authority under the act as to public lands administered by him as the act presently gives to the Secretary of Interior.

I believe that this proposed legislation is necessary in order to avoid the unnecessary acquisition and possible misuse of public lands by interests which desire only to exhaust the supplies of these common minerals, which are generally located on or close to the earth's surface, and also to substitute the certainty and simplicity of contractual purchase for the complexity and controversy of proving a valid mining claim. A similar proposal has previously passed the House of Representatives with the support of the executive agencies concerned. I believe that the public policies to be served by it are so obvious and uncontroversial as to justify the hope that this proposed legislation may be enacted by the 84th Congress.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1098) to amend the act of July 31, 1947, as amended, to provide for the disposition of certain materials on lands within national forests, and for other purposes, introduced by Mr. NEUBERGER, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

PRIVATE PROCUREMENT OF HEADSTONES OR MARKERS BY NEXT OF KIN OF DECEASED SERVICEMEN

Mr. CASE of South Dakota. Mr. President, I introduce, for appropriate reference, a bill to authorize the Secretary of the Army to make a monetary allowance in lieu of providing a headstone or marker for the unmarked grave of a soldier or a member or former member of the Armed Forces. I desire to make a brief statement in connection with the bill.

The bill would allow the next of kin of deceased servicemen to be paid the amount which it costs the Government to provide a headstone or marker, so that such persons may make purchases of their own choice.

This is important, I believe, because sometimes the next of kin desire something more than the plain stone or marker furnished now at Government expense.

The bill would also permit the next of kin to deal directly with monument makers in their own communities, many of whom are old family friends.

I commend the bill to the attention of the committee and the Senate.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1121) to authorize the Secretary of the Army to make a monetary allowance in lieu of providing a headstone or marker for the unmarked grave of a soldier or a member or former member of the Armed Forces, introduced by Mr. CASE of South Dakota, was received, read twice by its title, and referred to the Committee on Armed Services.

HUMAN AND ECONOMIC PROBLEMS OF MENTAL ILLNESS

Mr. HILL. Mr. President, on behalf of myself, the junior Senator from North Dakota [Mr. YOUNG], the Senator from New Mexico [Mr. CHAVEZ], the senior Senator from New York [Mr. IVES], the senior Senator from Montana [Mr. MURRAY], the junior Senator from West Virginia [Mr. NEELY], the Senator from Illinois [Mr. DOUGLAS], the junior Senator from New York [Mr. LEHMAN], the Senator from Massachusetts [Mr. KENNEDY], the junior Senator from Michigan [Mr. MCNAMARA], the Senator from Kentucky [Mr. CLEMENTS], the senior Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the junior Senator from Washington [Mr. JACKSON], the Senator from Tennessee [Mr. KEFAUVER], the senior Senator from West Virginia [Mr. KILGORE], the senior Senator from North Dakota [Mr. LANGER], the Senator from Louisiana [Mr. LONG], the senior Senator from Washington [Mr. MAGNUSON], the junior Senator from Montana [Mr. MANSFIELD], the Senator from Oklahoma [Mr. MONRONEY], the senior Senator from Oregon [Mr. MORSE], the junior Senator from Oregon [Mr. NEUBERGER], the Senator from Rhode Island [Mr. PASTORE], the Senator from Maine [Mr. PAYNE], the senior Senator from Michigan [Mr. POTTER], the Senator from North Carolina [Mr. SCOTT], the Senator from Florida [Mr. SMATHERS], my colleague, the junior Senator from Alabama [Mr. SPARKMAN], and the junior Senator from Missouri [Mr. SYMINGTON], I introduce, for appropriate reference, a joint resolution providing for an objective, thorough, and nationwide analysis and reevaluation of the human and economic problems of mental illness, and for other purposes. I ask unanimous consent that a statement prepared by me in explanation of the joint resolution may be printed in the RECORD.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The joint resolution (S. J. Res. 46) providing for an objective, thorough, and nationwide analysis and reevaluation of the human and economic problems of mental illness, and for other purposes, introduced by Mr. HILL (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The statement presented by Mr. HILL is as follows:

STATEMENT BY SENATOR HILL

I am today introducing a joint resolution aimed at encouraging a thorough-going, nationwide analysis and reevaluation of every aspect of the problem of mental illness.

Certainly the one most shocking and frightening of the health problems which confront the Nation today is the appalling cost, both in human and economic terms, of mental illness. When one realizes that over 47 percent of all the hospital beds in the United States are occupied by mental patients and that the direct economic cost of mental illness to the taxpayers of the Nation is over $1 billion a year and is increasing at the rate of $100 million a year, it should be obvious to all that we must develop some new departures in our attempts to meet this problem.

The governors of the 48 States, through the Council of State Governments, have been working together in a vigorous attempt to cope with these problems. Now the American Medical Association's Council on Mental Health and the American Psychiatric Association, together with other professional organizations in the field, have decided that our best hope to find a solution to this staggering problem lies in a thorough-going, nationwide analysis and reevaluation of our entire approach to the problems of mental health. They believe, and I agree, that every aspect relating to present methods of diagnosing, caring for, treating and rehabilitating the mentally ill, as well as methods of preventing mental illness, should be objectively reevaluated and new approaches sought. I agree with the organizations mentioned that such a review and reevaluation of the problem can best be conducted by such nongovernmental agencies and organizations as those cooperating with the AMA's council and the APA. I believe it is the responsibility of the Federal Government to offer financial assistance in the conduct of such nongovernmentally directed undertaking. The bill I have today intro-

duced would carry out this desirable concept by making available over a 3-year period a substantial grant to be made upon recommendation of the National Advisory Mental Health Council to qualified nongovernmental agencies, organizations or commissions composed of representatives of leading national medical and other professional associations for the kind of survey and reevaluation needed. The sums which would be authorized in the bill are designed to supplement and not replace similar funds which it is hoped will be made available from private sources. Hearings on the bill will, I believe, bring out an accurate estimate of the total cost which will be involved in such an undertaking.

The council of the American Medical Association and the American Psychiatric Association are to be commended for the initiative and fine sense of public responsibility they have shown in formulating plans for this most important undertaking. They and the other professional groups which have offered to cooperate with them in carrying it out deserve to receive such measure of help from the Federal Government as may be found necessary. The results of their undertaking may well prove as important in the field of mental health as the Flexner Commission report was in the field of medical education at the turn of the century.

Mr. HILL. Mr. President, I ask unanimous consent that the joint resolution may lie on the desk until the first meeting of the Senate after its meeting on Tuesday next, for the purpose of enabling other Senators, who may wish to do so, to join in the sponsorship of the joint resolution.

Mr. LANGER. I shall be glad to join in the sponsorship of the resolution offered by the Senator from Alabama.

The PRESIDING OFFICER (Mr. McNAMARA in the chair). Is there objection to the request of the Senator from Alabama? The Chair hears none, and it is so ordered.

HOUSE BILL PLACED ON CALENDAR

The bill (H. R. 3828) to adjust the salaries of judges of United States courts, United States attorneys, Members of Congress, and for other purposes, was read twice by its title, and ordered to be placed on the calendar.

INCREASE IN LIMIT OF EXPENDITURES BY COMMITTEE ON THE JUDICIARY, RELATING TO INTERNAL SECURITY

Mr. JOHNSTON of South Carolina (for Mr. EASTLAND, himself, and Mr. JENNER) submitted the following resolution (S. Res. 58), which was referred to the Committee on the Judiciary:

Resolved, That the limitation of expenditures under Senate Resolution 366, 81st Congress, relating to the internal security of the United States, agreed to December 21, 1950, is hereby increased by $260,000, and such sum together with any unexpended balances of the sums previously authorized to be expended under such resolution and Senate Resolution 172, 83d Congress, agreed to January 27, 1954, Senate Resolution 46, 83d Congress, agreed to January 30, 1953, Senate Resolution 314, 82d Congress, agreed to May 29, 1952, Senate Resolution 198, 82d Congress, agreed to September 27, 1951, and Senate Resolution 7, 82d Congress, agreed to January 29, 1951, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee and covering obligations incurred under such resolutions on or before January 31, 1956.

INCREASED COMPENSATION FOR MEMBERS OF CONGRESS AND THE JUDICIARY—AMENDMENTS

Mr. THYE submitted amendments, intended to be proposed by him to the bill (S. 462) to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes, which were ordered to lie on the table and to be printed.

Mr. BUSH. Mr. President, I submit amendments, intended to be proposed by me to Senate bill 462, to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes, and ask that they be printed and lie on the table. The purpose of the amendments is to separate the question of congressional salaries from the consideration of judicial salaries.

The PRESIDENT pro tempore. The amendments will be received, printed, and will lie on the table.

CIVIL AERONAUTICS ACT OF 1955—AMENDMENTS

Mr. MAGNUSON submitted amendments, intended to be proposed by him to the bill (S. 1119) to amend the Civil Aeronautics Act of 1938, as amended, and for other purposes, which were referred to the Committee on Interstate and Foreign Commerce, and ordered to be printed.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. BUSH:

Lincoln Day address delivered by him at Glastonbury, Conn., on Saturday, February 12, 1955.

By Mr. MARTIN of Iowa:

Address delivered by him before the Executives Club of Chicago, Ill., on February 16, 1955, relating to the United Nations commission on international commodities trade.

By Mr. KUCHEL:

Address delivered by him at Lincoln Day luncheon, in Los Angeles, Calif., on February 10, 1955.

By Mr. ERVIN:

Statement prepared by him relative to Rinaldo Burrus Page.

By Mr. NEUBERGER:

Address entitled "The Challenge to Public Power," delivered by him at the 13th annual meeting of the National Rural Electric Cooperative Association at Atlantic City, N. J., on February 16, 1955.

By Mr. BRICKER:

Report by a subcommittee of the Committee on Interstate and Foreign Commerce, concerning certain foreign shipyards and other questions of interest to the committee.

NOTICE OF HEARING BY COMMITTEE ON ARMED SERVICES IN RE FALLOUT FROM HYDROGEN BOMBS

Mr. KEFAUVER. Mr. President, I desire to give notice that on next Tuesday, February 22, at 10 o'clock a. m., in the room of the Committee on Armed Services, a hearing will be held to review the civil defense operation, particularly in reference to information recently published relative to fallout after the explosion of hydrogen bombs.

The hearing is being held pursuant to instructions of the Chairman of the Committee on Armed Services, the distinguished junior Senator from Georgia [Mr. RUSSELL]. At the hearing a number of witnesses from the Atomic Energy Commission and the Office of Civil Defense will be heard.

This is a matter of great interest and will set forth some of the problems confronting those who are charged with the responsibility of civil defense.

I ask unanimous consent to have printed in the RECORD, following these remarks, an editorial entitled "Defense Against Fallout," published in the Washington Post and Times Herald of Thursday, February 17, 1955.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

DEFENSE AGAINST FALLOUT

The Atomic Energy Commission and the administration have acted wisely in making public a summary of the radioactive after effects of nuclear explosions. Hard facts are the basis for intelligent planning; and Chairman Strauss' measured statement about the fallout seeks to give the facts in perspective. We suspect that the apprehensions about public panic as a result of this sort of disclosure will prove wholly unjustified. Most of the present information about the fallout, although never before released officially, has been known for some time through various printed stories. Such stories may have caused some alarm, but they also have been greeted with a considerable degree of apathy; perhaps because people simply do not want to think about a cataclysm they feel they can do nothing about. This feeling of futility is, if anything, more deadly than fear.

Full understanding of the great dangers about which Mr. Strauss spoke remains essential. Radioactive fallout from a hydrogen explosion could contaminate an area the size of New Jersey and make it uninhabitable for weeks if not months, even if the bulk of the population managed to survive the blast effects and the immediate lethal dosage of radioactivity. The use of the H-bomb to deny territory could be as significant strategically as the destructive effect itself. Nevertheless, there are many relatively simple precautions that can be taken by way of shelter and discipline, as the Atomic Energy Commission points out, that would greatly reduce the loss of life from radioactivity.

Why is there apathy to even the most gruesomely realistic accounts of the H-bomb danger? Because, in this newspaper's opinion, the people have not been presented with a convincing alternative to the paralyzing prospect of being roasted or gamma-rayed to ashes if hydrogen war should start. Surely it is time for a radical new look at the status of civil defense.

The sad fact is that in its net impact civil defense still is in an appalling state of disorganization—not for lack of effort on the part of persons working in it, but because of insufficient attention at the top levels of

Government. Congress has treated civil defense more or less as a joke, in part, no doubt, as the result of a "can't happen here" complex, but also in part because legislators have not been satisfied that the planning is practical. Despite the hard work of many persons, the program is rife with contradictory assumptions and outmoded instructions. For example, in the District of Columbia, which presumably would be one of the major targets, the air-raid warning system so far is of little value; it is impossible to distinguish between the feeble siren tests and an ordinary two-alarm fire. There is little point in recruiting air-raid wardens and ground observers unless they can be instructed realistically in what will be expected of them.

Apathy and futility are luxuries the country cannot afford. Even in the event of all-out hydrogen attack, estimates are that 65 percent of the population would survive; with adequate civil defense as much as 95 percent would survive. But an adequate program will not come about accidentally. It can only be obtained if men of stature will attach serious importance to the program and if the makeshift expedients are replaced with consistent, hard-headed planning at the top level. Such planning ought to envisage specific instructions to cities as to the kind of blast and fallout they could expect and the practicable evacuation and shelter measures they ought to prepare. It ought to be related to the amount of early warning that may be provided—the present stage, when the margin of warning would be small and immediate shelter ought to be sought; the period in which 1 to 4 hours of warning would be possible and large-scale evacuation would be feasible; and, finally, the era of the awesome intercontinental ballistic missile if it should be developed.

None of this is in any way a substitute for enforcible disarmament. The only sure defense against the H-bomb is to control it (and this newspaper reiterates its proposal of last Friday for an internationally monitored moratorium on H-bomb tests as a starter). But even in the absence of international control Americans can do a great deal to protect themselves, given some more vigorous planning and leadership. It is absurd for the country to be spending hundreds of millions of dollars on continental defense and an early warning system and then to permit the necessary follow-through at the civil defense level to be dissipated in lethargy and confusion. Americans have a history of responding sensibly if they are told frankly and realistically what is necessary. The administration and Congress bear a joint responsibility to provide this leadership and the money that will be required to make it effective.

UNITED STATES FOREIGN POLICY—ADDRESS BY HON. JOHN FOSTER DULLES

Mr. SMITH of New Jersey. Mr. President, on Wednesday, February 16, our Secretary of State, Hon. John Foster Dulles, delivered an important address before the Foreign Policy Association at the Waldorf-Astoria, in New York City.

The subject of the address was our foreign policy in Asia.

As a member of the Foreign Policy Association for many years and a former active trustee, I had the privilege of attending this dinner and heard Secretary Dulles deliver the address. The address was noteworthy for many reasons. Secretary Dulles, after rapidly reviewing the collective security treaties we have entered into with the countries of the Far East during the past couple of years, pointed out that treaty pledges, no matter how sound, "will never restrain powerful and ambitious rulers who do not accept the restraint of moral law."

In another part of his speech he said:

We dare not relax, because the moment of relaxation is the moment of peril. Treaty declarations must be backed by a purpose that is ever sustained by an intelligence that is ever alert and by power which is ever ready and able to punish aggressors so that aggression will not pay.

Also in another part of his speech he drew a distinction between the people of the Russian state and the Communist Party itself. Mr. Dulles said:

We should keep that distinction in mind. The time may come—I believe it will come—when Russians of stature will patriotically put first their national security and the welfare of their people. They will be unwilling to have that security and that welfare subordinated to the world wide ambitions of international communism. If their point of view should prevail—

And by that Mr. Dulles meant the point of view of the Russian people as distinguished from the Communist Party—

then, indeed, there could be a basis for worthwhile negotiation and practical agreements between the United States and the new Russia. Then there might be reactivated the historic friendship between our countries and our peoples.

Mr. President, in my judgment, this is one of the most important suggestions the Secretary of State has made. If we could only reach through the Iron Curtain of the Government of Russia to get at their people, reach behind the Red Chinese Government in Peiping to get at the Chinese people, who have always been our friends, we possibly could begin to see the dawn of the day when world peace might be in sight.

But, Mr. President, this can never be brought about by appeasement or by further yielding to the inroads of Communist demands.

After pointing out the reasons why we collaborated with the Nationalist forces on Formosa to evacuate the Tachen Islands and to regroup their forces, Secretary Dulles said:

It has been suggested that Nationalist China should go further and surrender to the Chinese Communists the coastal positions which the Communists need to stage their announced attack on Formosa.

Mr. President, I am personally aware of these pressures to have us take this negative appeasement position, and I am happy to call the attention of my colleagues to the firm and yet statesmanlike way Mr. Dulles met this issue. He said:

It is doubtful that this would serve either the cause of peace or the cause of freedom.

The Chinese Communists have been the initiators of violence in this area. They have already formally declared their intention to take Formosa by force. If the Chinese Nationalists now oblige by making it easier for the Chinese Communists to conquer Formosa will they (the Chinese Communists) be less apt to do so?

Secretary Dulles answered his own question by saying:

I doubt it.

Those of us who have been watching this situation heartily commend the Secretary of State for these positions which he has taken in this important address. He develops this thought further later in the speech:

It should not, moreover, be carelessly assumed that peace and security will be promoted merely by the non-Communist nations indefinitely granting one-sided concessions of the Communist Nations.

A great danger in Asia is the fear of many non-Communists peoples that the United States has no real intention of standing firmly behind them. Already that fear has mounted to the danger point. We accepted in Korea an armistice which the Chinese Communists boisterously misrepresent as a "victory" for them. We acquiesced in an Indochina armistice which reflected the defeat of the French Union forces at Dien Bien Phu. We aided the Tachen evacuation. The reasons were compelling, nevertheless the result added a few square miles to the Communist domain.

If the non-Communist Asians ever come to feel that their Western Allies are disposed to retreat whenever communism threatens the peace, then the entire area could quickly become indefensible.

As the situation now exists, neither the cause of freedom, nor United States security, nor world peace and security, would be promoted by undermining the faith of the free Asian peoples in our strength and in our willingness to use that strength to restrain those who violently menace liberty. The American people have, through the Congress, made their own resolution clear. That is a verdict which the Government accepts as sound and which it will soberly execute.

I am quoting these excerpts from the Secretary's statement because it seems to me that the press is completely confused as to some of the things he said, especially his insistence on continuing the policy we have followed up to this time.

Mr. President, on the question of the defense of the islands to which these quotations have referred, I should like to add one more thought. It has been suggested to me that if the United States defends the islands of Quemoy and Matsu, it would only be for the purpose of giving Chiang Kai-shek and the Nationalist Army two steppingstones to the attack of the mainland of China. We made it abundantly clear in the debate on the recent resolution and the China Treaty that we would not participate in any program for the invasion of the mainland, or permit the Nationalist forces unilaterally to make any such attempt. But it must be borne in mind that the maintenance of a strong Nationalist Army on Formosa with a real threat to the mainland of China, which threat would need the islands of Quemoy and Matsu to make it effective, is a very clear and necessary deterrent to any aggressions by Moscow-supported Red China in violation of either the Korean Armistice or the Armistice in Indochina. It is my considered judgment that the forces of the Western powers, represented by the ROK's in Korea, and the Nationalist Army on Formosa, and the Vietnamese in Indochina, must be maintained in full strength and in a posture ready for action in the event of any further Communist aggression in Asia, or for that matter, in Western Europe as well.

Mr. President, our Secretary of State, speaking of course for the President of the United States, has very firmly and

convincingly told the world of our interest in the freedom, independence and self-determination of the peoples of the Far East, and other parts of the world. The very heart of this policy is a free and independent China, really liberated from the exploitation or domination of any outside power. If and when the Communist Chinese people, or the Russian people, for that matter, are able and eager to speak for themselves, they will find a warm welcome in the hearts of the people of America.

Mr. President, I ask unanimous consent that the full text of Mr. Dulles' significant speech be printed in the body of the RECORD at the close of my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE JOHN FOSTER DULLES, SECRETARY OF STATE, BEFORE THE FOREIGN POLICY ASSOCIATION, WALDORF-ASTORIA HOTEL, NEW YORK CITY, FEBRUARY 16, 1955

OUR FOREIGN POLICIES IN ASIA

I am glad to be again with the Foreign Policy Association. I first spoke before you 35 years ago. So this is, in a sense, an anniversary. I know well of your work. It is good work and I am glad that it is going on, bringing to our citizenry a better knowledge of our foreign policy.

I

The broad goal of our foreign policy is to enable the people of the United States to enjoy in peace the blessings of liberty. Under present world conditions we cannot achieve that goal by thinking of ourselves alone. We must help other peoples to be free. Thus, enlightened self-interest combines with high principle to lead us to do for others what, if conditions were reversed, we would want them to do for us.

Our task is not an easy one; nor one that can be discharged without sacrifice and risk. Stormy winds blow from Moscow and Peiping.

In Moscow, Foreign Minister Molotov pours 17,000 words of abuse upon the western powers. In Peiping, Foreign Minister Chou bitterly attacks the United States and threatens to use all the force at his command to capture Formosa.

A heavy responsibility devolves upon the President daily, and upon the Congress, in making delicate decisions which may spell the difference between peace and war.

All of us would like to see peace permanently assured. We long for some simple and certain formula which would relieve us of the present anxious tasks. But perhaps we are learning a needed lesson, that there is no easy way to win peace.

Twice in our generation efforts have been made to secure peace by broad agreements to abolish war. The Pact of Paris of 1928 binds over 60 nations to renounce war as an instrument of international policy. But shortly after it was made, the nations fought in Europe, Asia, and Africa.

The United Nations Charter of 1945 binds 60 nations to refrain in their international relations from the threat or use of force. But there has been armed aggression in Korea which was promoted by Soviet Russia, and later Communist China was found guilty of armed aggression there.

It is good that mankind should by great pronouncements demonstrate its hatred of war and its determination to outlaw war. Idealism is indispensable. But it would be dangerous to assume that treaties or pledges alone would relieve us of the burdensome tasks we undertake in the struggle for peace.

Treaty pledges, no matter how solemn, will never restrain powerful and ambitious rulers who do not accept the restraints of moral law and who are not responsive to the will of the people. As against such despots there must be other and further restraints.

Thus the struggle goes on. We dare not relax, because the moment of relaxation is the moment of peril. Treaty declarations must be backed by a purpose that is ever sustained, by an intelligence that is ever alert, and by power which is ever ready and able to punish aggressors so that aggression will not pay.

Whenever the advocates of peace seem to lack these qualities, then peace is in jeopardy. On the other hand, so long as those qualities are manifestly present, then we can have good hope that the battle for peace will be won.

That hope is the more justified because modern weapons possess such immense destructive power. That fact is frightening. But the very fact that it is frightening means that even the most reckless will pause before taking action which would bring modern weapons into play.

During these days the Soviet and Chinese Communists are probing deeply the intentions of the free nations. But we need not feel worried or despondent, for what the despots will discover from their probing ought to restrain them.

In Europe there seems no retreat from the basic resolve to create the Western European Union and so to end the disunity of Western Europe. To replace that disunity and weakness with unity and strength will be the greatest single contribution which could be made to the cause of peace.

In Western Europe there are over 200 million highly civilized people. They possess in the aggregate the intellectual and material resources to be both prosperous and safe—provided only that they are united in spirit and properly organized to work together. When this unity is achieved, great things will come about. Western Europe will not only have the strength to solve its own internal and external problems but will be a mighty force to preserve world peace.

II

In the Far East the United States has responded to the desire of others that we join with them to assure their security. During the last 4 years, the United States has become party to security treaties with Korea, Japan, the Republic of China on Formosa, the Philippines, Australia, and New Zealand. Also we have joined the 8-power Manila Pact for the security of Southeast Asia.

The total of these treaties is a mutual security system which, starting from the Aleutian Islands in the north, runs in a great arc to the South Pacific. This constitutes a defensive bulwark for freedom in that part of the world.

What has thus been done by many n- ·ions is important. Also important is the manner in which the United States has played its part, particularly during recent days.

When the Congress convened last January, it was organized by the Democratic Party. So when the Manila Pact and the China Treaty were submitted, they were submitted by a Republican President to a Democrat-controlled body. The same was true of President Eisenhower's request for congressional authority to use the Armed Forces of the United States in the Formosa area.

Nevertheless, the two treaties were ratified and the congressional authority was granted. This was done promptly and with virtual unanimity.

These events demonstrate a national unity and capacity for action which is needed in the world today. Too often representative processes lead to such partisanship and such consequent delays that hostile forces are encouraged to believe that democracies are inherently ineffective. The Government of the United States has shown the contrary. Partisanship was wholly subordinated to the national good, so that action of great importance could be taken with deliberation, but with decisiveness.

For this the Nation can be grateful to the leadership and to the general membership of both parties in the Congress. I know that they would expect me to pay special tribute to WALTER F. GEORGE, who, as Chairman of the Senate Foreign Relations Committee, carried the heaviest aggregate burden of responsibility in relation to the three acts to which I refer.

We can all take pride, as Americans, in this demonstration of national unity and capacity. Because of it, free men throughout the world can face the future with better hope and new confidence.

III

While the capacity of the representative form of government has been recently demonstrated in the United States, there has been occurring in Moscow an extraordinary demonstration of despotic disarray. The Prime Minister of the Soviet State was peremptorily summoned to a high Soviet session in the Kremlin and subjected to the public humiliation of hearing another read his resignation and his confession of "my guilt."

With that Communist verdict we need not quarrel. But the full significance of what has occurred is still obscure and perhaps the last act of the drama has not yet been played.

Undoubtedly, we see an elemental, personal struggle for power. But also one can perceive the outlines of a basic policy difference. There must be those who are primarily concerned with the welfare, security and greatness of the Soviet Union and its people. There are others who would have the Soviet Union and its power serve primarily as a tool of international communism and as a means of achieving its worldwide ambitions. These two ends, the one symbolized by the state, the other by the party, do not always coincide.

To us, the party and the state in Russia usually seem indistinguishable, because many individuals serve in dual capacities. But Lenin and Stalin constantly emphasized the distinction between the two. "The party," said Stalin, "is not and cannot be identified with the state power."

We should keep that distinction in mind. The time may come—I believe it will come—when Russians of stature will patriotically put first their national security and the welfare of their people. They will be unwilling to have that security and that welfare subordinated to the worldwide ambitions of international communism. If their point of view should prevail, then indeed there could be a basis for worthwhile negotiation and practical agreements between the United States and the new Russia. Then there might be reactivated the historic friendship between our countries and our peoples.

IV

Let me turn now to deal with some of the substantive problems which arise out of the two Far Eastern treaties to which I have referred—the China Treaty and the Manila Pact.

The United States is firmly committed to the defense of Formosa and the Pescadores. These islands became part of the Japanese Empire in 1895. They continued as such for half a century, until they were relinquished by Japan as a result of her defeat in war—a defeat principally wrought by the efforts and sacrifices of the United States.

These islands form an important part of the Western Pacific defense system which I have described. The people of the islands eagerly seek our help.

Thus Formosa and the Pescadores have been properly a matter of concern to the United States.

In 1945 our long-time ally, the Republic of China, was entrusted with authority over these islands. In 1950, when the aggression against Korea occurred, President Truman ordered our Pacific Fleet to defend Formosa against possible Chinese Communist attack. Now, that determination has been converted into our Mutual Defense Treaty with the Republic of China.

It is important to note that the treaty, except as it relates to United States territories, covers only the islands of Formosa and the Pescadores, and an armed attack directed against those islands. The congressional authority is to secure and protect Formosa and the Pescadores against armed attack, and to make secure and to protect "related positions and territories" as the President judges "this would be required or appropriate in assuring the defense of Formosa and the Pescadores."

The President did not use our Armed Forces to help the Chinese Nationalists to hold the Tachen Islands and Yushan and Pishan, lying some 200 miles north of Formosa. These islands were virtually unrelated to the defense of Formosa and the Pescadores. We helped the Chinese Nationalists to evacuate these islands and regroup their forces, so as to avoid a bloody and wasteful battle which would have inflamed public emotions. Thus, Nationalist China and the United States have made an important contribution to the cause of peace.

It has been suggested that Nationalist China should go further and surrender to the Chinese Communists the coastal positions which the Communists need to stage their announced attack on Formosa.

It is doubtful that this would serve either the cause of peace or the cause of freedom.

The Chinese Communists have been the initiators of violence in this area. They have already formally declared their intention to take Formosa by force. If the Chinese Nationalists now oblige by making it easier for the Chinese Communists to conquer Formosa, will they be less apt to do so? I doubt it.

The United States has no commitment and no purpose to defend the coastal positions as such. The basic purpose is to assure that Formosa and the Pescadores will not be forcibly taken over by the Chinese Communists. However, Foreign Minister Chou says they will use all their force to take Formosa and they treat the coastal islands as means to that end. When the Nationalists voluntarily evacuated the Tachen Islands, the Chinese Communists' comment was: "the liberation of these islands has created favorable conditions for our People's Liberation Army in the liberation of Formosa."

Thus the Chinese Communists have linked the coastal positions to the defense of Formosa. That is the fact which, as President Eisenhower said in his message to Congress about Formosa, "compels us to take into account closely related localities." Accordingly, we shall be alert to subsequent Chinese Communist actions, rejecting for ourselves any initiative of warlike deeds.

It is hardly to be expected that the Chinese Communists will renounce their ambitions. However, might they not renounce their efforts to realize their goals by force?

Such renunciation of force is one of the basic principles of the United Nations, and the United States had hoped, and still hopes, that the United Nations may be able to effect a cessation of the present hostilities. President Eisenhower, in his message to Congress dealing with this matter, made clear that the United States would welcome action by the United Nations which might bring an end to the active hostilities in the area. The Government of New Zealand has brought this situation before the Security Council, and the United States, in the interest of peace, went to the length of voting to invite the Chinese Communists to come to the Security Council to discuss the matter.

In 1950 the Chinese Communists had accepted a Security Council invitation in relation to Korea. However, this time the Chinese Communists contemptuously rejected the invitation.

We sincerely hope that this decision of the Chinese Communists is not irrevocable and that they will abide by the principles of the United Nations rather than challenge by force the defensive obligations of this country. In any event, we believe that their attitude toward the United Nations Security Council has not ended the responsibility of that body which by the charter, has the "primary responsibility for the maintenance of international peace and security."

It should not, moreover, be carelessly assumed that peace and security will be promoted merely by the non-Communist nations indefinitely granting one-sided concessions to the Communist nations.

A great danger in Asia is the fear of many non-Communist peoples that the United States has no real intention of standing firmly behind them. Already that fear has mounted to the danger point. We accepted in Korea an armistice which the Chinese Communists boisterously misrepresent as a victory for them. We acquiesced in an Indochina armistice which reflected the defeat of the French Union forces at Dien Bien Phu. We aided the Tachen evacuation. The reasons were compelling, nevertheless the result added a few square miles to the Communist domain.

If the non-Communist Asians ever come to feel that their Western allies are disposed to retreat whenever communism threatens the peace, then the entire area could quickly become indefensible.

As the situation now exists, neither the cause of freedom, nor United States security, nor world peace and security, would be promoted by undermining the faith of the free Asian peoples in our strength and in our willingness to use that strength to restrain those who violently menace liberty. The American people have, through the Congress, made their own resolution clear. That is a verdict which the Government accepts as sound and which it will soberly execute.

V

Let me turn now to southeast Asia. In a few hours I shall be going to Bangkok to attend the first meeting of the council created under the Manila Pact for the security of southeast Asia.

We shall at Bangkok deal with the problem of organizing the treaty council. Also we shall begin to deal with the three substantive problems assigned to the council, namely military security, security against subversion directed from without, and economic welfare. I cannot anticipate what the decisions will be, but I am confident that our gathering will show the advantages of cooperation between the East and the West.

Some Asians retain a fear, derived from past colonial relationships, that close ties with the Western powers will lead to their being dominated by the Western powers. It is essential that that fear should be dispelled.

An important step in that direction was taken at Manila when, at the inspiration of President Magsaysay, the eight powers there signed the Pacific Charter. Thereby we dedicated ourselves to promoting self-government and to securing independence for all countries whose peoples desire it and are able to undertake its responsibilities. Also, we agreed to cooperate in the economic, social, and cultural fields in order to promote higher living standards, economic progress, and social well-being.

However, words are not enough. It is necessary to infuse these words with the breath of life. That, I hope, will be done at Bangkok. Those who gather there will meet as equals. We shall, I think, find ways to diminish the risk of armed attack against the treaty area and the danger of subversion from without. Also we shall begin to study economic problems. These are not capable of any dramatic and spectacular solution, but they do respond to steady, painstaking, and sympathetic efforts.

The first task is to deal with fundamentals. That we are already doing, particularly in the basic realm of education. United States universities and colleges are cooperating with Asian institutions in Thailand, the Philippines, and Pakistan. Many United States technicians are serving in Asia in economic, educational, and health tasks, and the number is being increased. Our cooperation is already beginning to show results in better food and better health, and we are together taking the first steps to expand trade, to increase private investment, and to raise standards of living.

In such ways, we can justify man's faith in freedom.

There should indeed be no cleavage between the Western and Asian nations. Our concept of the nature of man had its beginning in Asia, where East and West met. We believe that all men are the creation and concern of a universal God and that He has endowed every person with a right to develop in accordance with the dictates of his individual reason and conscience.

That religious faith, politically translated into the Magna Carta, the French Declaration of the Rights of Man, and our own Declaration of Independence, was, as Lincoln said of our Declaration, nothing exclusive but designed to provide liberty, not alone to the people of this country, but hope for the world for all future time.

We also realize that, if human liberty is to be a reality, there must be an economic as well as a political foundation. The impoverished and the destitute cannot be truly free. So we recognize that economic values are essential to give reality to the moral and political values that we cherish.

Such a philosophy is indeed very different from that of Soviet communism.

Soviet communism denies the principle of human equality and instead substitutes the principle of class rule.

It denies that men are capable of self-government and substitutes the principle of dictatorship, the so-called dictatorship of the proletariat.

It denies nationalism, except as it can be used as a slogan to drive a wedge between East and West and prepare the way for an absorption of the peoples by international communism.

It preaches a new doctrine of segregation. The peoples of Asia, it is said, must be segregated from the peoples of the West. The new nations of Asia must be segregated from association with others.

The guile behind this is obvious. The Soviet and Chinese Communists know that their combined power can dominate the Eurasian Continent. If the other nations of Europe and Asia stand alone, they will be unable to resist the iron embrace of international communism.

At the Berlin Conference last year, Mr. Molotov denounced NATO and proposed a European security system which would exclude the United States. Now, the Soviet and Chinese Communists denounce the Manila Pact, because it may bring to Southeast Asia the strength needed to resist Communist aggression.

The Bangkok Conference will enable the free nations of the West and of the East to begin a vital demonstration. They can show that, through association as sovereign equals, they can each help the other to independence, security, and well-being.

That result accords with the high ideals with which our Nation was founded. It is in keeping with what our people have sought throughout their history. So our delegation goes to Bangkok with confidence, because we know that our mission is sustained by national faith and national purpose.

RESULT OF SCIENTIFIC POLL ON MINNESOTA FEPC LAW

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD the result of a scientific poll on Minnesota's Fair Employment Practices Commission law, which appeared in the February 6, 1955, issue of the Minneapolis Tribune. The result of the poll is further evidence of the growing support in the United States for the principle of equal opportunity of employment.

There being no objection, the result of the poll was ordered to be printed in the RECORD, as follows:

FEPC LAW FAVORED BY 85 PERCENT OF STATE ADULTS

Minnesota men and women strongly favor the passage of a State FEPC (fair employment practices) law.

In a survey just completed by the Minnesota Poll, 85 per cent of the people interviewed throughout the State are in favor of such a measure.

Eleven percent are opposed, and 4 percent are undecided.

Some of those opposed (3 percent of the State sample) say they would support an FEPC law that applied "just to jobs on the public payroll—that is, jobs paid from tax money."

Fifty-four percent of the entire group interviewed believe that if the 1955 legislature does adopt an FEPC law, it should be "quite strict" so far as penalties for violations are concerned.

Thirty-one percent would prefer that the law be "quite mild." The rest give qualified answers or are undecided on that point.

Gov. Orville L. Freeman last month urged passage of "an enforceable fair employment practices act which will give assurance that there will be no economic discrimination against anyone based on race, color, creed, or national origin."

Interviewing in the Minnesota poll survey was conducted between January 19 and January 24, with more than 60 field reporters in all parts of the State putting this first question to a representative cross section of Minnesotans aged 21 and older:

"Some States have laws providing that everyone is to have an equal chance to get a job on his own merits, regardless of his race or religion. Such laws are often called FEPC, or fair employment practices, laws. Do you think Minnesota should have a State FEPC law, or should not?"

The replies:

	All adults	Men	Women
	Percent	*Percent*	*Percent*
Should have	11	82	87
Should not	11	14	7
Other	(1)	(1)	1
No opinion	4	4	5
Total	100	100	100

[1] Less than 1 percent.

In February 1953, a similar survey showed 84 percent of the State's adults in favor of an FEPC law.

The latest study shows these proportions of Minnesota groups endorsing the idea of an FEPC law:

Eighty-six percent of the city residents, 85 percent of the people in small towns, and 82 percent of the farmers.

Eighty-eight percent of the independent voters, 86 percent of the Democratic-Farmer-Laborites, and 81 percent of the Republicans.

Seventy-seven percent of the people in the upper economic group, 87 percent of those in the middle group, and 85 percent of those in the lower economic group.

Eighty-two percent of the labor union members.

Ninety percent of the men and women in the 21–29 age bracket, 84 percent of those in the 30–49 age group, and 83 percent of those 50 years and older.

"We're trying to overcome racial segregation, and this seems a good way", a Marshall man said. "Everyone should have an equal chance to work", a Solway farmer observed. "If all men were honest we wouldn't need FEPC, but all aren't", a Pine City man said.

Opponents of FEPC made comments like these:

"That is not a law which can be enforced" (an Eveleth man); "it would bring too many Negroes up north" (a Fairmont man); "it would be inviting trouble" (a Red Wing man).

Those against a Minnesota fair employment practices measure were asked:

"Would you favor or oppose an FEPC law in Minnesota that applied just to jobs on the public payroll—that is, jobs paid from tax money—but not to jobs in private business?"

These were the answers of the 11 percent of the total sample who were asked the question:

	Percent
Would oppose that too	6
Would favor that	3
Other or undecided	2
Total	11

The final question was asked of the entire cross-section, including proponents and opponents of FEPC:

"Suppose the Minnesota legislature does adopt an FEPC law this year. As far as penalties for violators are concerned, do you think the law should be quite strict or quite mild?"

The replies:

	All adults	Men	Women
	Percent	*Percent*	*Percent*
Quite strict	54	52	56
Quite mild	31	36	27
Qualified	2	2	1
No opinion	13	10	16
Total	100	100	100

Among people who favor an FEPC law, 57 percent think the penalties should be quite strict, while 30 percent would prefer them to be quite mild. Opponents of the measure are evenly divided on the matter of penalties.

One of the frequent comments of people favoring the stricter form of law was, "There's no use having an FEPC law if it cannot be enforced."

LITHUANIAN INDEPENDENCE DAY

Mr. BUSH. Mr. President, the 37th anniversary of Lithuania's independence, which tragically proved to be short-lived, occurred this week.

During her period of independence, from 1918 to 1940, Lithuania was an honored member of the family of free nations, faithfully fulfilling all her obligations in the international community.

The contrast between those happy days and the present is deplorable. It has been described by the Lithuanian American Council in these words:

Today, a rigid Soviet censorship hides from the world the continuing deportations under the guise of "volunteer" work elsewhere, the collectivization of a once most prosperous nation, the slave labor camps, the systematic efforts of the Soviet occupational regime to organically merge Lithuania into the Soviet system; the extermination of the hostile anti-Soviet element by killings of the resistant groups; by russification and colonization by Russian elements.

But the spirit of freedom remains alive in Lithuania. As this proud and virile nation survived other oppressions, so shall it survive this one. On the occasion of this 37th anniversary of Lithuanian independence, America sends a message of sympathy to the Lithuanian people in their hours of trial, and of hope that one day they may again enjoy the happiness they once had as a free and independent nation.

Mr. BEALL. Mr. President, I ask unanimous consent to have printed in the RECORD a statement which I have prepared on the celebration of Lithuania's independence.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR BEALL

THIRTY-SEVENTH ANNIVERSARY OF LITHUANIA'S INDEPENDENCE

On February 16, 1955, nearly 1 million Lithuanian-Americans celebrated the 37th anniversary of Lithuania's independence.

During her period of freedom, from 1918 to 1940, Lithuania was an exemplary nation and an honored member of the family of free nations, honorably fulfilling all her obligations.

Laws passed during that period greatly lessened the influence of Communist propaganda. Her land-reform law of 1922, the first in all Europe, was one of the most important as 73 percent of the population was engaged in agriculture.

Universal compulsory education (1930) reduced the illiteracy from 64 percent to 15 percent. From 1919 to 1939 the number of pupils in grammar schools alone rose from some 45,000 to nearly 300,000.

Lithuania's state opera, the theater and ballet attracted internationally famous conductors and artists and added luster to the culture of this ancient nation.

Now, under Soviet domination, a rigid censorship conceals from the world the continuing deportations under the guise of "volunteer" work elsewhere; the collectivization; the slave labor camps; the systematic efforts of the Soviet occupational regime to merge Lithuania organically into the Soviet system; the extermination of the hostile native anti-Soviet element by killings of the resistance groups.

But Lithuania has not succumbed. She still fights on.

So it was fitting that these Lithuanian-Americans, these descendants of an ancient race, should solemnly observe an independence denied in the home country.

Mr. MARTIN of Iowa. Mr. President, on behalf of the senior Senator from Nebraska [Mr. HRUSKA] I ask unanimous consent to have printed in the RECORD at this point a statement prepared by him on the subject of Lithuanian Independence Day.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HRUSKA

I am proud to join with other Members of the Senate and House in noting February 16 as the 37th anniversary of the independence of Lithuania.

The commemoration of the freedom of this valiant nation continues to be a bleak one, with Lithuania still enslaved behind the Iron Curtain. Americans of Lithuanian descent retain an indomitable determination to continue the battle for the freedom of their homeland. I am sure that spirit is reflected in the hearts of their countrymen imprisoned in the iron grip of the Soviets.

The enslavement of Lithuania was another milestone in the Soviet march toward world domination or chaos. It should serve as a determined resolution for all Americans to stand firm against Soviet aggression spearheaded by bullets or by the creeping infiltration which has served the masters of the Kremlin so well.

One of the blackest marks in the black history of the Soviet dictators is the 30-year long trail of peace treaties and agreements violated to serve their purposes. Three peace agreements with Lithuania, signed by the Red rulers in 1920, 1933, and 1939, now serve as no more than monuments to the ruthlessness of the Red rulers.

It is small encouragement that these violated agreements have served a purpose. Piled on top of other treaties torn to shreds by the Kremlin, they have alerted the free world to the contempt in which international law and order is held by the Soviets.

The submergence of Lithuania into the Soviet regime has served to put other free nations on their guard. The Soviet aggressors are being thwarted by ever more effective barriers to their tactics of creeping infiltration as well as naked military aggression.

May the increased vigilance of the free world reaffirm the hope of Lithuanians everywhere for celebration of unblemished independence days in the future.

Mr. PURTELL. Mr. President, the day before yesterday, February 16, marked the 37th anniversary of Lithuania's independence.

I wish to present a brief tribute to the Lithuanian nation on the 37th anniversary of their national independence.

Commemoration of this 37th anniversary of Lithuanian independence ought to remind all the free world of one important fact, and that is the brutal character of world communism, and in particular of the Soviet Russian regime. Destruction of Lithuanian independence in June 1940 was by itself an act criminal enough for the world to long remember. But certainly one of the most brutal aspects of Soviet activity in Lithuania—one which the world will never forget—was the well-calculated, methodical plan of deportation of Lithuanians from their native land to distant parts of the Soviet Empire.

Deportations from Lithuania and her sister Baltic States, Latvia and Estonia, did not come about until after the Soviet occupation in June 1940. However, this diabolical scheme for destroying all anti-Communist Baltic peoples was devised in October 1939, perhaps even before, and at a time when all three Baltic States had concluded pacts of mutual assistance with Moscow. These pacts, far from being "mutual," were imposed upon the Baltic States and opened the door for Soviet domination in the Baltic region. On October 11, 1939, immediately after the pacts were concluded, the Soviet secret police, the NKVD, issued the notorious order No. 001223 which set forth detailed instructions for the arrest and deportation of all "anti-Soviet and antisocial elements" in the Baltic States.

Thus, it is clear beyond a shadow of a doubt that long before Lithuania was forcibly annexed to the Soviet Union an order had already been issued which was designed not only to destroy Lithuanian independence but to destroy as well the Lithuanian people. Soviet infidelity with regard to the mutual assistance pact is further underscored by the fact that order No. 001223 was officially given and remained in effect at the same time the Soviet Government promised to respect the territorial integrity and national independence of Lithuania.

In May 1941 preparations were made by the People's Commissariat for State Security of the Lithuanian S. S. R. for the deportation of all the "hostile and criminal and socially dangerous element." Between June 14 and June 21, 1941, 34,260 persons were deported to distant areas in Siberia and the Arctic. Since the second Soviet occupation in 1944, there have been several waves of deportations from Lithuania. In 1948 and 1949 about 10 percent of the Lithuanian population was deported by the Soviets to Siberia in an effort to break the resistance of the Lithuanian farmers against forcible collectivization of their land.

Such is the brutal character of the Soviet regime. Lithuania has felt the full force of this Soviet brutality and the Lithuanian people have undergone indescribable hardships in their efforts to retain their dignity and identity as a people. A lesser people could not bear the tremendous burdens imposed by Sovietization. But the Lithuanians are a great people. They are a people who have known Russian oppression before and survived, and today they shall survive as a nation and a people in spite of the intensity of Soviet oppression, for resistance, patriotism, and hatred of oppression are virtues rooted deep in the Lithuanian soul. The Lithuanian people and the Lithuanian nation are not forgotten. The Lithuanian national aspirations will not be forgotten.

CZECH STUDENTS INFORMATION SERVICE

Mr. MARTIN of Iowa. Mr. President, on behalf of the senior Senator from Nebraska [Mr. HRUSKA] I ask unanimous consent to have printed in the RECORD at this point a statement prepared by him on the subject of the Czech Students Information Service.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HRUSKA

We sadly note today that it has been 7 years since free Czechoslovakia was perverted into a Communist satellite. But it is with pride that we also commemorate the symbol of hope that the Czech student has become in the world's resistance to Soviet aggression.

We, of Czech descent in the free world, are responsible for saluting the now-obscured struggle these students are making against oppression of the mind, because there will be no such observance behind the Iron Curtain.

The gallant stand of the students of Charles University, as the Communists choked off freedom in Czechoslovakia in February 1948, remains to the world a milestone in the struggle for the liberty of man. Subdued by clubs and guns, the Czech students sank into the iron grip of the Communist aggressors. But hints of their determined battle against the Red regime leak out through the Iron Curtain. The Reds have admitted the arrest of hundreds of student leaders and more thousands have been expelled from the universities. Some have slipped through the barbed wire to freedom, some 1,000 of them now living in the United States.

To us, who live in freedom, the sacrifice of the Czech students has not been in vain. The Communists learned 7 years ago this month, that although they strangle every source of independent opposition from leaders of the nation, they also must conquer youth's determination to resist although it may be against hopeless odds.

By this dynamic action, the Czech students forged a kinship with youth everywhere, dedicated to reaffirming the world's faith in freedom and truth.

Once proud institutions of study and free research in Czechoslovakia now are only part of the Communist machine to stamp out well-machined, robot minds which will not question the dictates of the Kremlin. But the student remains the spearhead of freedom.

By Czechoslovakia's Red masters, the student has been branded "the most reactionary element in today's Czechoslovakia." The number of "nonreliable" students expelled from Czech schools probably has reached some 20,000 since the Red coup.

Youth continues to demonstrate its faith in the free thought that is the cornerstone of our democratic systems. February 25, 1948, has become a symbol that generations to come, tomorrow's leaders, have learned the price that must be paid for freedom. And they are determined to continue the search for freedom and truth, whatever the sacrifice.

ORDER TO DISPENSE WITH CALL OF THE CALENDAR ON MONDAY

Mr. CLEMENTS. Mr. President, I ask unanimous consent that on Monday, when the Senate meets following the adjournment today, the call of the calendar, provided for under the rule, be dispensed with.

Mr. LANGER. Mr. President, will the Senator yield for a question?

Mr. CLEMENTS. I am glad to yield.

Mr. LANGER. I did not understand the request of the distinguished Senator from Kentucky.

Mr. CLEMENTS. I asked unanimous consent that the calendar call be dispensed with on Monday next.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE PROGRAM

Mr. BUSH. Mr. President, will the Senator from Kentucky be kind enough to advise the Senate what his plans are with respect to the legislative program of the Senate? Several Senators have made inquiry along that line.

Mr. CLEMENTS. I shall be happy to do so.

No legislative business will be transacted today, and the Senate will adjourn whenever the Members of the Senate desire that it adjourn.

On Monday it is the intention of the acting majority leader to ask the Senate to consider the following measures, although they will not necessarily be called up in the order in which I shall list them:

Calendar No. 26, S. 462, to increase the salaries of justices and judges of United States courts, Members of Congress, and for other purposes.

Calendar No. 29, Senate Resolution 20, authorizing the employment of additional personnel by the Committee on

Post Office and Civil Service and appropriating funds therefor.

Calendar No. 30, Senate Resolution 40, continuing the authority of the Committee on Labor and Public Welfare to investigate employee welfare and pension plans and funds subject to collective bargaining.

Calendar No. 31, Senate Resolution 41, authorizing additional expenditure and employment of further temporary assistants by the Committee on Government Operations.

Calendar No. 32, Senate Resolution 56, to print for the use of the Committee on the Judiciary additional copies of the report entitled "The Korean War and Related Matters."

Calendar No. 33, Senate Concurrent Resolution 9, to print for the use of the Committee on the Judiciary additional copies of certain parts of the hearings on interlocking subversion in Government departments.

Calendar No. 34, S. 913, to eliminate the need for renewal of oaths of office upon change of status of employees of the Senate.

Calendar No. 35, S. 456, relating to the regulation of nets in Alaska waters.

Calendar No. 36, Senate Joint Resolution 42, to amend the National Housing Act, as amended.

I wish to repeat, Mr. President, that these measures probably will not be taken up in the order I have announced them today. It is likely however, that the three measures to be first called up will be Calendar No. 29, Senate Resolution 20; Calendar No. 30, Senate Resolution 40; and Calendar No. 31, Senate Resolution 41.

REGISTRATION BY SENATOR MORSE AS A DEMOCRAT

Mr. NEUBERGER. Mr. President, it is the right of every citizen in a democracy to change his political allegiance according to the dictates of his conscience.

The Democratic Party of Oregon and of the Nation welcomes the enrollment in its membership of WAYNE L. MORSE, the distinguished senior Senator from my State. I should like to add that last night, in Lane County, Oreg., the senior Senator from Oregon registered as a Democrat. He is now officially a member of the Democratic Party.

As the junior Senator from Oregon, I say to Senator MORSE that we respect the long period of soul searching and study which led him from the political party of his original choice and to the party of Jefferson, Jackson, Wilson, Roosevelt, and Truman.

As a Democrat, Senator MORSE still can be an independent, although with a small "i" rather than a large "I." Our party is the party of men and women who are independent in viewpoint, humanitarian in outlook, and unfettered in action. It is the only political party which has endured since the founding of this vast Nation. It has survived because it has represented all Americans rather than any narrow segment of our society. It is the party of true independents like WAYNE MORSE, of men who put ideals above any label or superficial identification.

CHANGE OF PARTIES IN UNITED STATES TRADITION

In my State, some of Senator MORSE's political enemies have criticized him as fickle. Yet many of the greatest of Americans have changed political parties. This illustrious list includes such men as Lincoln, Theodore Roosevelt, George W. Norris, Wendell Willkie, and others.

So far as my wife and I are concerned—and in Oregon Mrs. Neuberger and I operate as a team—we intended to support Senator MORSE for reelection in 1956 whether he ran as an Independent or as a Democrat. Indeed, I said as much at a luncheon at Atlantic City, N. J., on February 16, 1955, with which I was honored by Oregon's delegates to the 13th Annual Convention of the National Rural Electric Cooperative Association. On that recent occasion I declared:

> A political party is not sacred. It is merely a means to an end. Its purpose is the expression by a large number of people of certain principles of government. When a party ceases to stand for those principles which satisfy the ideals of an individual citizen, he is entitled as a free man to seek some other party.

I should like to add that the delegates to the rural electric conference, representing many Oregon counties and farming areas, concurred heartily.

DEMOCRATS THE PARTY OF ALL PEOPLE

Naturally, I rejoice that Senator MORSE has decided to associate himself with the Democratic Party—the party that stands for the welfare of the average man and woman. For example, Senator MORSE has advocated conservation and use of our natural resources in the interest of all the people. The Republican Party, as now constituted, has turned its back upon that program—a program, incidentally, which dates back to such Republicans as Theodore Roosevelt, Gifford Pinchot, Hiram Johnson, and Charles L. McNary. The Democratic Party, conversely, has fought to preserve our public-power and conservation programs. Where else could Senator MORSE go except into the Democratic Party?

In 1956 Senator Morse will be reelected as a Democrat. Issues, rather than political partisanship, will decide the votes of Oregon's people. I look forward to informing the men and women of Oregon of the high regard with which my senior colleague is looked upon in the Nation's Capital, by political foe and friend alike. I have never heard a person speak against Senator MORSE's integrity, honor, scholarship, or capacity for faithful public service.

These qualities will loom large in the Oregon senatorial election of next year. The number of Americans who give their allegiance blindly to one party or another, without thought of the fundamental principles at stake, is happily declining. A spirit of genuine political independence—an independence in the best American tradition—will rule in Oregon in 1956 when the people again go to the polls. This will be to the advantage of our new Democratic Senator, WAYNE L. MORSE.

In conclusion, Mr. President, I should like to say that Senator MORSE's very dear and close friend, the Senator from New York [Mr. LEHMAN], who is unable to be present today, asked me to say that he is proud and pleased and that he shares in our satisfaction that the senior Senator from Oregon, of whom he is a very close friend, as I am also, has decided to be formally and officially a member of the great Democratic Party.

Mr. CLEMENTS. Mr. President, will the Senator from Oregon yield?

Mr. NEUBERGER. I yield.

Mr. CLEMENTS. Mr. President, I should like to associate myself with the remarks of the junior Senator from Oregon in his welcome to the senior Senator from Oregon on entering the fold of the Democratic Party. It is another example, to cite the statement of the Senator from New Mexico, of good commonsense being shown. But it is also proof that the Democratic Party is big enough and broad enough for all Americans who wish to see this great country grow and prosper.

Mr. KEFAUVER. Mr. President, will the Senator from Oregon yield?

Mr. NEUBERGER. I yield.

Mr. KEFAUVER. Mr. President, as one Member of the Senate on the Democratic side, I wish to express my great pleasure at the decision which the senior Senator from Oregon has made. In my opinion, the senior Senator from Oregon is a great, courageous, and able Member of the Senate, and one of the finest with whom I have ever had the pleasure of serving. He stands by and fights for his convictions, regardless of party affiliation, and I am certain he will continue to do so. I think it should be said that he has tried very, very hard to get the Republican Party to take a forward look, to be interested in the proper development of the Nation's resources, and to evince a proper appreciation of civil liberties. It cannot be said that he has made the decision to join the Democratic ranks without having done everything humanly possible to persuade the Republican Party to adopt the attitude which many thought it would have taken when it returned to power. I can well understand how the senior Senator from Oregon has been disappointed in what has happened in the Republican Party.

I know that as a Democrat he will be enabled more forcefully to present his views and to be an even greater Senator from the great State of Oregon. I wish to congratulate not only our party, but the people of Oregon, upon the decision which Senator MORSE has made. It will be a great pleasure to work with him as a Democratic Senator. I know that as a Democrat he will accomplish even more for the people of his State than he has accomplished heretofore.

Mr. ERVIN. Mr. President, will the Senator from Oregon yield?

Mr. NEUBERGER. I yield.

Mr. ERVIN. Mr. President, as one who is licensed by the Democratic Party to exhort political sinners to righteousness, I should like, on behalf of the Democratic Party, to extend to our erring brethren on the other side of the

aisle an opportunity at this time to confess their past political misdeeds and get right with the Lord and join the Democratic Party. [Laughter.]

Mr. KEFAUVER. Mr. President, will the Senator from Oregon yield?

Mr. NEUBERGER. I yield.

Mr. KEFAUVER. Mr. President, there is only one Member present on the Republican side of the aisle. I am sure we should be glad if he would accept the invitation just offered. [Laughter.]

Mr. NEUBERGER. Mr. President, the Senator from Minnesota [Mr. HUMPHREY] asks to be associated with the welcome to the senior Senator from Oregon [Mr. MORSE] on his becoming a member of the Democratic Party.

Mr. HILL. Mr. President, I listened with much interest to the words of my distinguished colleague, the junior Senator from Oregon, welcoming into the Democratic Party the distinguished senior Senator from Oregon. Whether or not we agree with the distinguished senior Senator from Oregon on different questions, we all recognize his great ability, his magnificent courage, his devotion to our country and its institutions, and his indefatigable efforts for the maintenance of peace for ourselves and for all peoples.

As the acting majority leader, the distinguished senior Senator from Kentucky [Mr. CLEMENTS] has so well said in welcoming the senior Senator from Oregon into Democratic ranks, the Democratic Party is big enough, broad enough, and great enough for all Americans. Certainly we welcome this outstanding American, the senior Senator from Oregon, to the Democratic Party.

Mr. LANGER. Mr. President, will the Senator from Alabama yield?

Mr. HILL. I yield.

Mr. LANGER. Mr. President, I am very curious to know who is going to be the senior Senator from Oregon. Will it be Senator NEUBERGER or Senator MORSE?

Mr. HILL. I may say to my distinguished friend from North Dakota that since the distinguished senior Senator from Oregon [Mr. MORSE] has been in the Senate a longer period of time, I should say he would be the senior Senator from Oregon.

LOCATION OF THE BONES OF SITTING BULL

Mr. LANGER. Mr. President, there has been some discussion as to where Sitting Bull is buried. Some time ago a number of persons from South Dakota came to North Dakota and stated that the bones of Sitting Bull were buried in South Dakota. I have a record showing that the bones of Sitting Bull were auctioned off in the North Dakota Legislature a short time ago and are scattered all over the State of North Dakota. They are not in the State of South Dakota. As a matter of fact, they are in the State of North Dakota; and the so-called statue erected to the memory of Sitting Bull in the State of South Dakota is a fraud.

I ask unanimous consent that an article by Russ Greenlee, published in the Devil's Lake (N. Dak.) Journal of February 5, 1955, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REAL BONES OF SITTING BULL AUCTIONED IN NORTH DAKOTA SENATE

(By Russ Greenlee)

BISMARCK.—The end of this Sitting Bull business is not yet.

In the senate Wednesday, Senator Carroll Day, of Grand Forks, came up with a box of bones sent him, he reported, by E. C. Christie, of Cavalier County as "the real bones of Sitting Bull."

Day's explanation was that some North Dakotans had been tipped of a raid by South Dakotans on Sitting Bull's grave at Fort Yates, and had salvaged the relics of the Sioux leader and substituted the remains of a bobcat.

Day handed over the box of bones to Senator Ole Johnson, of Cavalier County. Johnson delivered the trophy to President Pro Tempore Oliver Bilden.

Ray Schnell, of Dickinson, a former lieutenant governor, had been called to speak to the senators. Schnell is an auctioneer, and someone proposed that he auction off the bones to raise funds for the March of Dimes.

A total of $225 was obtained from the senators for various bones, all of which were returned to the box.

Schnell, by the way, prefaced his remarks with a declaration that he had appeared only as a Senate visitor.

"I am not here," he emphasized, "to look for an appointment to the board of higher education."

Schnell, who recently made a tour of several southwestern range States, where drought had been pronounced, said North Dakota appears lush by comparison.

The haystacks in this State look especially heartening to him as a cattleman.

"Some of the States I visited," he said, didn't produce enough grass for a jackrabbit."

NEW EVIDENCE IN DIXON-YATES DEAL

Mr. HILL. Mr. President, during the past week we have witnessed a building up of the Dixon-Yates campaign to label all opposition to this improvident arrangement as partisan politics in its worst form. The barrage continues almost daily.

The other day, Mr. Dixon hailed the decision of the Securities and Exchange Commission with a boast that even the closest scrutiny has not turned up anything. Apparently the gentleman meant that no one has uncovered any wrongdoing or questionable conduct on the part of those who are responsible for the Dixon-Yates deal.

Mr. President, I am taking the time of the Senate this afternoon because I am convinced that there do exist certain essential facts concerning this deal which have not been made public. There is definite indication that these facts have been deliberately concealed from the Congress and the American people. These facts strongly suggest important and substantial questions which must be investigated to the fullest. The facts and circumstances I am about to describe make it essential and necessary that the Bureau of the Budget and the Atomic Energy Commission be called upon to make a full and complete disclosure of the part played by certain individuals and the corporations they represented in the development of the Dixon-Yates arrangement.

Mr. President, a vice president and director of the First Boston Corp.—one of the country's largest and most influential banking institutions in the utility field—was acting as a consultant to Mr. Dodge, the Director of the Bureau of the Budget, during the very period when the Dixon-Yates deal was being put together. There exists persuasive evidence that this man participated in conferences and meetings on the Dixon-Yates matter, which were held in the Budget Bureau at the very time when the First Boston company was making arrangements for financing the Dixon-Yates plant. The same company, the First Boston Corp., also helped arrange the financing for the OVEC combine, which was put together to supply power for AEC's production plant near Portsmouth, Ohio.

In the Dixon-Yates case which was tried before the Securities and Exchange Commission, two rather important items emerged in the course of the hearings.

Mr. Dixon, president of Middle South Utilities, testified that he had had conversations with representatives of the First Boston Corp. concerning the debt financing of the Dixon-Yates proposal, sometime prior to February 25, 1954, the date when Middle South and the Southern Co. made their first proposal to the Atomic Energy Commission. There was also produced in that proceeding—that is to say, the proceeding before the Securities and Exchange Commission—a "confidential" memorandum dated March 2, 1954, which Mr. Yates, the chairman of the board of the Southern Co., had circulated to all the directors of the Southern Co., as well as to certain other persons. This "confidential" memorandum related to the Dixon-Yates proposal to AEC of February 25, 1954; and in the memorandum, Mr. Yates stated:

> The First Boston Corp. had advised Mid-South and Southern they can sell $114,000,000 of 3½-percent bonds to insurance companies under present market conditions.

Other testimony which also was brought out in the proceeding before the Securities and Exchange Commission, shows that the participation of the First Boston Corp. in the Dixon-Yates matter not only began at an early date, but also continued as the proposal developed. From the evidence to which I have just referred, it is clear that the First Boston Corp. has had a hand in the arrangements for providing Dixon-Yates with somewhere between $99 million and $120 million.

There was also produced in that proceeding—I refer to the same proceeding before the Securities and Exchange Commission—a memorandum dated March 3, 1954, prepared by T. G. Seal, who, I am advised, is a vice president of Ebasco Services. Ebasco, it will be recalled, is the large utility service company which works hand-in-glove with Mr. Dixon and his Middle South Co., and was responsible for the "Ebasco fiasco" at Paducah, which cost the Government so many millions of dollars.

The memorandum was obtained from the Dixon-Yates people, and was also introduced in evidence in the SEC hearing. At this point I should say it is clear that Mr. Seal and others affiliated with Ebasco Services have played an important part in the development of the Dixon-Yates arrangement.

Mr. KEFAUVER. Mr. President, will the Senator from Alabama yield for a question?

Mr. HILL. I should like to proceed with my statement, that I might get it into the RECORD in orderly fashion. However, if the subject the Senator from Tennessee has in mind is germane to the matter now under discussion, I shall yield.

Mr. KEFAUVER. I think it is germane, if the Senator from Alabama will yield to me.

Mr. HILL. Yes, I yield.

Mr. KEFAUVER. The Senator from Alabama has been discussing the connection between Dixon-Yates and Ebasco Services. I am sure the Senator from Alabama is familiar with the conclusion or the statement appearing in the report of the Langer Subcommittee on Monopoly and Antitrust Matters—a subcommittee of the Judiciary Committee—which indicates that Ebasco is the wholly owned service company of Electric Bond & Share; that Electric Bond & Share, instead of receiving a percentage from the operating companies, now receives a percentage of the revenues of the operating companies, through the services performed by Ebasco; that, as a matter of fact, Ebasco—Electric Bond & Share—is still left intact; and that that should have been one of the considerations taken into account by the Securities and Exchange Commission in passing upon the legality of this whole deal.

Mr. HILL. Yes; and, of course, Ebasco is the company which the Mid-South Co. and other companies used in what is called the Ebasco fiasco, which was the building of the plant near Joppa, Illinois, for the Atomic Energy Commission.

Mr. KEFAUVER. Is it not also true that originally the Dixon-Yates group had intended to use Ebasco as the contractor for the building of the plant at West Memphis, Ark.; but upon the public criticism of the bad showing that Ebasco had made at the Paducah plant, the Dixon-Yates group finally decided not to use that company as the contractor, but to use it only as the engineer or supervisor, or something of that kind?

Mr. HILL. I think the record to which the Senator from Tennessee has referred confirms exactly what he has just said.

Mr. KEFAUVER. So Electric Bond and Share, through Ebasco, the holding company which was ordered to be broken up, is being reinstituted and is having a larger control or hold over the manufacture and distribution of electric power in this region, through Ebasco, which is connected with the Dixon-Yates?

Mr. HILL. Yes. There, again, I think the record of the subcommittee of which the Senator from Tennessee is a member confirms the facts he has just stated.

Mr. KEFAUVER. I thank the Senator from Alabama.

Mr. HILL. Mr. President, in order that Senators may have this picture clearly in mind, I shall repeat a few of the last things I have stated in the course of my remarks.

There was also produced in the proceedings before the Securities and Exchange Commission a memorandum dated March 3, 1954, prepared by T. G. Seal, who, I am advised, is a vice president of Ebasco Services. Ebasco, it will be recalled, is the large utility service company which works hand-in-glove with Mr. Dixon and his Middle South Co., and was responsible for the Ebasco fiasco at Paducah, which cost the Government so many millions of dollars. The memorandum was obtained from the Dixon-Yates people, and was also introduced in evidence in the SEC hearing. At this point I should say it is clear that Mr. Seal and others affiliated with Ebasco Services have played an important part in the development of the Dixon-Yates arrangement.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. HILL. I am glad to yield to the Senator from Connecticut.

Mr. BUSH. I am interested in what the Senator from Alabama has said about the Ebasco fiasco. That designation had escaped my notice. I have not heard any such expression as that before. I had not heard that there was any fiasco in connection with the activity. I presume the expression referred to the Ohio Valley Electric Co.

Mr. HILL. It refers to the Joppa plant built by EEI. It was called a fiasco because of the many millions of dollars which it cost the taxpayers of the United States above and beyond what the estimates of the cost had been.

Mr. BUSH. Whose estimates?

Mr. HILL. The estimates made by the AEC and the companies which were engaged in supplying the power for the AEC.

Mr. BUSH. During what period of time was that plant built?

Mr. HILL. The plant was built 2 or 3 years ago. I do not recall the exact date, but it was 2 or 3 years ago.

Mr. BUSH. If that be true, then the plant was built during an inflationary period, when costs were rapidly rising. Is that not correct?

Mr. HILL. No; that is not correct. The plant was built afterward.

Mr. BUSH. Was the plant built during the Korean war?

Mr. HILL. There was no excuse or justification for the excess cost. The cost of the plant far exceeded the estimates which were made at the time the contract was let.

Mr. KEFAUVER. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. MCNAMARA in the chair). Does the Senator from Alabama yield to the Senator from Tennessee?

Mr. HILL. I am glad to yield.

Mr. KEFAUVER. Was not the matter handled so badly and expensively that the Government finally took the contract away from the company and discharged it?

Mr. HILL. That is my understanding. The whole story has been put into the record of both the appropriate subcommittee of the Committee on the Judiciary, and the Subcommittee on Independent Offices of the Committee on Appropriations. I am sure the story has been put in the record of the Joint Committee on Atomic Energy.

In this connection, I might say that while the costs for the Joppa plant, which was being built by EEI, went far beyond the estimates, the Shawnee plant which the TVA built for the Atomic Energy Commission at Paducah, Ky., was built well within the estimated costs.

I wish also to say to the distinguished Senator from Connecticut, because he raised a question about inflation, that the plant built by EEI and the plant built by TVA at Paducah were constructed at the same time. The EEI plant cost far beyond the estimates. The TVA plant was constructed well within the estimates of costs.

Not only that, Mr. President, but the delivery and the time of delivery of power for our great nuclear program for the development of atomic energy, were very important. The power from the TVA-built plant was delivered ahead of time. The EEI was far behind the schedule which had been fixed.

Mr. President, the particular memorandum to which I wish to refer—and I am speaking of a memorandum from T. G. Seal which went into the record of the proceedings before the Securities and Exchange Commission—is an account of a meeting which was held at the Bureau of the Budget on March 2, 1954, attended by various representatives of the Bureau of the Budget, Mr. Seal, and a Mr. Wenzell. The memorandum is interesting on a number of counts, but for present purposes I shall refer to one item in particular.

First, it is now clear that the Mr. Wenzell referred to in the Seal memorandum is Adolphe H. Wenzell, a vice president and director of the First Boston Corp., the banking house which Mr. Dixon and Mr. Yates testified had undertaken to arrange the debt-financing for Dixon-Yates. In the memorandum Mr. Seal did not identify Mr. Wenzell as an officer of the First Boston Corp. Instead, he listed his name along with the names of other representatives of the Bureau of the Budget, leaving the impression that Mr. Wenzell was a part of the regular Bureau of the Budget team. In the next to the last paragraph of the memorandum Mr. Seal stated:

> Following my visit with Mr. Cook—

He was evidently referred to the Mr. Cook who was deputy manager of the Atomic Energy Commission—

> Mr. Wenzell rejoined me in our office.

That evidently means the office of the Ebasco. I understand it has an office in the Cafritz Building in Washington. They did not meet in the office of the Bureau of the Budget. Mr. Wenzell went to the office of Ebasco to meet Ebasco's vice president and representative in this matter, Mr. Seal. It was evidently a private conversation between the two.

I shall read from the beginning of the last paragraph of the memorandum:

Following my visit with Mr. Cook, Mr. Wenzell rejoined me in our office about 5 p. m., when he had finished his day with the Budget Bureau people and told me that the memorandum had been finished and that Mr. Clapp of the TVA and General Nichols of the AEC and the Budget Bureau people were to get together today, March 3, in Mr. Hughes' office at 9 a. m., for further intra-Government discussions. We hope to hear how these discussions eventuate later today.

Last Friday morning I telephoned Mr. Hughes, the Director of the Bureau of the Budget, to obtain from him the facts concerning Mr. Wenzell's employment by the Bureau of the Budget. I was unable to reach Mr. Hughes—I was told he was at the time at the White House—so I discussed the matter with Mr. McCandless, Assistant Director of the Bureau of the Budget. He told me that Mr. Adolphe H. Wenzell had served as a consultant to the Bureau, but said he would have to talk to Mr. Hughes before he could supply me with any information with respect to the period of Mr. Wenzell's employment, the nature of his duties, and the work he performed for the Bureau. I asked Mr. McCandless to have Mr. Hughes supply me with the information as quickly as possible and in writing.

Saturday I received a letter from Mr. Hughes in which he confirmed Mr. Wenzell's employment as a consultant to the Bureau of the Budget beginning May 20, 1953, and ending March 2, 1954. Mr. Hughes stated that Mr. Wenzell had served intermittently during that period for a total of 34 days, and that he had been retained by Mr. Dodge to serve without compensation as a consultant on various phases of the TVA power program. The letter discussed in some detail the nature of Mr. Wenzell's work on the TVA power program but Mr. Hughes did not see fit to mention Mr. Wenzell's participation in the Dixon-Yates matter.

Nowhere in the chronology released by the Budget Bureau on August 21, 1954, and which was supposed to contain all the facts about the Dixon-Yates deal, did Director Hughes make any reference whatever to the First Boston Corp. or to Mr. Wenzell.

I am sure that every Member of this body will recall the fanfare with which these releases were made and the statements by representatives of the Bureau of the Budget and the Atomic Energy Commission which accompanied the releases. The American people were told that the chronologies provided a full and complete account of the Dixon-Yates deal. When Mr. Hughes testified before the Joint Committee on Atomic Energy, on December 4, 1954, he said:

All basic information that I have on the subject is already public knowledge. * * * the complete facts on the background of this problem have been publicly available for more than 2 months. Nevertheless, misstatements and misrepresentations have continued almost daily. The facts have been told, but evidently seldom heard. Therefore, I welcome this opportunity to review those facts before your committee.

Even in the letter which I received from Budget Director Hughes on Saturday, which letter I shall place in the RECORD, Mr. Hughes did not make any reference to Mr. Wenzell's part in the Dixon-Yates proposal. Mr. President, I now ask unanimous consent to have the letter printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit A.)

Mr. HILL. Mr. Seal's memorandum frankly states that the purpose of the March 2 meeting, which was attended by Mr. Wenzell, was to brief the Bureau of the Budget officials in anticipation of their meeting with TVA officials the following day. Mr. Seal's memorandum makes this pertinent statement with respect to the Dixon-Yates proposal and the comments of the Bureau of the Budget officials:

Their comments (of the Budget Bureau officials) were not critical so much as they represented an effort to get thoroughly posted on the reasons for the figures, anticipating an argument from TVA, etc.

Mr. President, it is startling indeed to find that an officer of the First Boston Corp., who presumably that very day was serving as an adviser and consultant to the Bureau of the Budget, later the same day met with Mr. Seal to discuss the status of the Dixon-Yates negotiations. But even more startling is the fact that the First Boston Corp. was arranging the financing on a deal in which one of its officers was advising the Government, and apparently the same officer had access to important confidential information concerning governmental policies and actions concerning the same transaction—the Dixon-Yates deal.

Last summer the President directed the Bureau of the Budget and the AEC to make a full disclosure concerning the origins and development of the Dixon-Yates contract. It is clear that important facts and circumstances surrounding the transaction were concealed. It is now essential and imperative that the Joint Committee on Atomic Energy obtain access to all available records and data, in order that the full story surrounding the role played by these individuals and the corporations they represented may be thoroughly investigated and all the facts revealed to the American people. I urge the joint committee to act, and to act as quickly as it can.

EXHIBIT A

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D. C., February 11, 1955.

Hon. LISTER HILL,
United States Senate,
Washington, D. C.

MY DEAR SENATOR HILL: This is in reply to your inquiry of earlier today as to whether Mr. Adolphe H. Wenzell had ever been employed by the Bureau of the Budget and, if so, the nature of his employment.

Bureau of the Budget records show that on May 20, 1953, Mr. Wenzell was invited to serve as a consultant without compensation, to Mr. Joseph M. Dodge, then Director of the Bureau of the Budget. Mr. Wenzell's consultative services were used intermittently for a total of 34 days between May 20, 1953, and March 2, 1954, when he completed his work.

Mr. Dodge advises me that Mr. Wenzell was engaged as a technical expert to advise the Director of the Budget regarding the accounting system of the Tennessee Valley Authority, particularly as to comparison of its annual reports of earnings with those of private industry, which has differing requirements as to taxes, interest, etc. Mr. Wenzell was requested to analyze and explain the differences in the two types of accounting systems and their significance in measuring real results. Mr. Wenzell was also asked to review the allocation system for distribution of costs between power, navigation, flood control, and other purposes, concerning which the Bureau of the Budget makes recommendations to the President.

I trust that this provides the information you desire.

Sincerely yours,

ROWLAND HUGHES,
Director.

Mr. GORE. Mr. President, will the Senator from Alabama yield to me?

Mr. HILL. I yield to my distinguished friend, the Senator from Tennessee, who has been so deeply interested in all matters concerning the Dixon-Yates contract, and who also is a distinguished member of the Joint Committee on Atomic Energy. I am delighted to yield to him.

Mr. GORE. I appreciate the generosity of the senior Senator from Alabama.

First, I wish to congratulate him upon his able presentation of a strange set of circumstances, only now brought to light.

Mr. HILL. I am sure the distinguished Senator from Tennessee will confirm all I have said, to wit, that it was proclaimed to the people throughout the land that all the facts about the Dixon-Yates deal had been presented.

Mr. GORE. I was present when Mr. Hughes made the statement the Senator from Alabama has quoted.

I find it strange and shocking that the vice president of one large corporation, namely, Ebasco, and the vice president of another large corporation, namely, the First Boston Corp., are in the role of briefing the Bureau of the Budget as to what the Bureau of the Budget presumably should say to the TVA, when next the TVA presented itself.

Mr. HILL. That is certainly the very definite conclusion to be drawn from Mr. Seal's memorandum.

Mr. GORE. What would the Senator from Alabama understand the term "briefing" to mean?

Mr. HILL. I should say they were to present to the officials of the Bureau of the Budget the arguments and everything else which they thought would be helpful to those officials in trying to put over the Dixon-Yates deal and in trying to get the TVA to go along with the deal.

Mr. GORE. In other words, those two vice presidents of large corporations—one of them wearing both the hat of a consultant of the Bureau of the Budget and also his hat as vice president of his own company—were in the role of telling the Bureau of the Budget what it must do and what it must say. This goes a long way toward proving what the able senior Senator from Alabama said earlier, namely, that the large financial

houses of the country dictated the Dixon-Yates deal.

Mr. HILL. The evidence is certainly here, I say to my distinguished friend, the able Senator from Tennessee; and I wish to thank him for the contribution he has made in connection with the presentation of this matter today.

THE FUTURE OF THE PRESIDENT'S ATOMS-FOR-PEACE PROGRAM

Mr. BRICKER. Mr. President, as acting chairman of the Raw Materials Subcommittee of the Joint Committee on Atomic Energy, I recently had the pleasure of heading a five-man group on a tour of some of the countries off the beaten path. Our primary purpose was to learn at firsthand what action is best calculated to advance the President's atoms-for-peace plan.

The subcommittee has submitted its official report on the trip. But since I was the only Senator in the group, I am taking this opportunity to express to the Senate some purely personal conclusions. First, however, it might be well to trace briefly the development of President Eisenhower's proposal in the United Nations and in the Congress.

President Eisenhower unveiled his atoms-for-peace plan on December 8, 1953. In that historic address to the U. N. General Assembly, the President said that atomic weaponry "must be put into the hands of those who will know how to strip its military casing and adapt it to the arts of peace." The President concluded on this note of hope and challenge:

> Against the dark background of the atomic bomb, the United States does not wish merely to present strength, but also the desire and the hope for peace.
>
> To the making of these fateful decisions, the United States pledges before you—and therefore before the world—its determination to help solve the fearful atomic dilemma—to devote its entire heart and mind to find the way by which the miraculous inventiveness of man shall not be dedicated to his death, but consecrated to his life.

The President's magnificent address placed the atom in true perspective. It exploded the growing myth that America seeks to monopolize an inherently dangerous force. No presidential address in many years has been more widely or more deservedly praised. As a member of the Joint Committee on Atomic Energy, I shall do all I can to help make the President's hope a reality.

As a first step toward harnessing the atom for peace, the 83d Congress amended the Atomic Energy Act. The 1954 amendments authorize the President to make agreements for cooperation with other countries concerning the nonmilitary applications of atomic energy. Under this authority, and subject to appropriate safeguards, the President may make agreements involving distribution of fissionable materials and disclosure of atomic energy information.

In his speech to the General Assembly, President Eisenhower recommended that a U. N. international atomic energy agency be created. This agency, said the President, "could be made responsible for the impounding, storage, and protection of the contributed fissionable and other materials." The President described as "the more important responsibility" of the proposed U. N. agency the power to allocate contributed fissionable material among the nations of the world. Finally, the President conditioned his proposal on Soviet participation.

In amending the Atomic Energy Act of 1946, the Congress provided, however, that the agreements for cooperation could be made only on a bilateral basis. The President was not given power to transfer nuclear materials or classified atomic energy information to the United Nations or to any other group of nations. It is now clear that the Congress acted wisely in not fully implementing the President's original plan. Viewing the matter with the benefit of hindsight, we may all be pleased with the modifications in the President's plan which have been inspired, at least in part, by the prudence of the last Congress.

Ambassador Lodge discussed this new approach in the last session of the U. N. General assembly. He said that the U. N. agency, instead of being an atomic bank, would be a clearinghouse for information. Speaking of the original plan, Mr. C. D. Jackson said in the General Assembly debate last year:

> Therefore, the United States, consulting with the other nations willing and eager to participate, realized that the bricks, and steel, and concrete, and real estate, and scientists, and technicians, and instruments, and workers, and guards required to set up and maintain the physical custody of the fissionable material would not only entail a great delay in getting the plan into operation but would also be needlessly expensive to the United Nations. These producing and processing nations do not feel they need this complicated and expensive machinery, and they can move faster without it. (Department of State Bulletin, November 29, 1954, p. 832.)

Everything that I saw and heard on my recent trip supports that statement by Mr. Jackson.

Of course, the United States can participate by treaty in an international atomic energy agency having the powers outlined by the President in his original proposal. I would oppose any such treaty, because it would hinder progress toward the bold and imaginative goal set by the President.

There are many advantages in basing an atoms-for-peace plan on bilateral agreements as opposed to vesting primary responsibility in a U. N. agency.

First, we avoid Soviet obstruction by dealing with other nations individually. Even a veto-proof international atomic energy agency could be tied up in knots by Soviet propaganda, by dilatory tactics, and by the many apples of discord at the disposal of the Communists.

Second, U. N. energies in the atomic field should be concentrated on disarmament. That work, however hopeless it may seem at times, is far more important than the so-called atoms-for-peace plan. It is foolish for the U. N. to undertake work which sovereign nations, acting independently, can do better. It is worse than foolish for the U. N. to attempt such work at the expense of more important work which only an international body is competent to perform.

Third, implementation of the President's program requires prompt action. After the program is underway, prompt decisions will be essential to its success. We cannot afford to wait on some 40 to 60 nations to act as a group. President Eisenhower's bold program demands swift and decisive leadership. The United States is uniquely qualified to provide that leadership. Let us assume this great responsibility instead of dissipating it in the United Nations.

Finally, Mr. President, agreements for cooperation in the peaceful uses of atomic energy must be tailored to the needs of individual countries. For example, the recent sale of heavy water to India ties in admirably with the program of that Government. The Indian Government will be able to go ahead with its plans for a large research reactor without being held up until it completes its own plant for heavy water production. No two countries are exactly alike in terms of economic development; resources, scientific and material; tradition and culture; and benefits sought from this fabulous source of energy. Each country I visited has a different scale of priorities in the development of atomic energy; a different capacity to contribute to the common fund of knowledge and experience.

While we were in India we discussed with the atomic energy commission of that country the possibility of the United States selling heavy water to that commission for the development of their reactor, or lending it to them in advance of their ability to produce this needed facility for their reactor. At that time they were willing to accept an advance, with the assurance that they would return an equal amount once they got into production.

The world will never realize the full benefits of the atoms-for-peace plan if it relies on the U. N. Its divided counsel cannot provide leadership in this field. Its zeal to compel universal conformity in all the affairs of life through multilaterial agreements would stall, and eventually discredit, a plan that is both generous and practical.

Having recently seen some of the problems at firsthand, I agree fully with the editorial conclusion of the Wall Street Journal on September 8, 1954—that the U. N. connection with the atoms-for-peace plan should be kept as nebulous as possible.

I ask unanimous consent that this editorial, entitled "Lighting the Light," be printed in the RECORD at this point as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LIGHTING THE LIGHT

"Our many proposals for peaceful use of the atom have so far been cynically blocked in the councils of the world, but we shall proceed onward. We shall proceed now—under safeguards set forth in our law—to share atomic technology with others of good will."

With these words President Eisenhower launched the country's first commercial size

atomic powerplant. And with them he also set in motion the simplest, and what is very likely the best, of all plans for an international sharing of the benefits of atomic energy.

Our Government, the President disclosed, is beginning negotiations with Belgium on building an atomic reactor in that country. Tomorrow talks begin with Canada on an exchange of atomic information. Negotiations with other friendly nations, including Great Britain, are to follow.

Here is a design for progress with a promise of success. For it begins with the application of atomic energy to peacetime purposes here at home and it proceeds abroad on the principle that we will negotiate individual exchanges with individual nations fitted to their own and our respective needs. We do not have to wait any longer for a meeting of minds of a great array of nations.

That, it seems to us, is its great advantage over the other proposals that have been put forward. And it is, ironically, an advantage for which we are partially indebted to Russia, the very nation which cynically blocked all the other programs from the Baruch plan to the United Nations pool proposed by the President himself.

If the Russians had agreed, the Baruch plan would probably have been adopted and instead of being now in the process of relaxing restrictions on atomic technology we should have the whole buried under a supranational monopoly which could be, and undoubtedly would be, hamstrung by those self-same Russians. And who could hold out much hope for a U. N. pool arrangement where such decisions as a reactor plant for Belgium or some other country would be subject to political decisions of a body in which the Soviets had a prominent voice?

That would have been at least a clumsy way to do some simple things. Now we can go ahead with more direct measures. Decisions need not wait on action by governments not directly involved.

There is still some talk of setting up an international agency to coordinate the efforts of the nations that do join together and perhaps giving this agency some nebulous U. N. connection. Past experience would certainly suggest keeping this as nebulous as possible.

When President Eisenhower launched the construction of the atomic power plant this week he explained that his task was simply to "light the light and the project will be started."

The world has waited a long time, in fear and hesitation, to bring the benefits of atomic energy to peaceful purposes and to find a way of sharing them. We have waited so long because we waited on complicated and grandiose schemes. Perhaps the better way is simply to light the light and let the project get started.

Mr. BRICKER. I should now like to comment briefly on the trip itself. The purpose of our trip was twofold. First, we wanted to visit Australia and see for ourselves just how the multi-million-dollar American investment in uranium resource development is getting along. Second, as I have already indicated, we wanted to find out at firsthand some of the things we need to know if we are effectively to follow up the President's atoms-for-peace plan. Through its revision of the Atomic Energy Act, the 83d Congress last July both permitted and encouraged closer collaboration with friendly foreign nations in peaceful uses of atomic energy. That was, of course, only a first step.

It is generally known that most of the development in the atomic field has been carried forward by nations which are advanced in science and in industry. United States cooperation with such nations should result in early benefits for the entire free world.

But apart from the nations advanced in science and industry are many others, for the most part non-European, who are notably friendly to the United States. They have a longer road to travel if they are to achieve economic and political stability and to become bulwarks of freedom. In many of these nations, the United States is already spending much money by way of foreign aid and military assistance programs. The atoms for peace plan also calls for spending. How much is needed? Where can the funds best be employed? How ready are the nations we visited to begin cooperation in peaceful atomic programs? These are some of the questions we tried to answer through our trip.

I ask unanimous consent that there be printed in the RECORD at this point in my remarks part I of the report of the Raw Materials Subcommittee.

There being no objection, part I of the report was ordered to be printed in the RECORD, as follows:

REPORT OF THE RAW MATERIALS SUBCOMMITTEE ON ITS VISIT TO AUSTRALIA

The Raw Materials Subcommittee of the Joint Committee on Atomic Energy accepted an invitation received during the fall of 1954 from the Government of the Commonwealth of Australia to visit their uranium mines and refineries and discuss with them the progress being made in the field of atomic development in Australia, particularly as it relates to the activities of the United States in this same field. Since this required a long journey, the subcommittee sought to combine with its Australian visit discussions and inspections of atomic activities involved in peaceful atomic development in a substantial number of southeast Asian and middle eastern countries.

In the 5 weeks between November 15 and December 20, the subcommittee visited and held conferences with Government, scientific, and industrial leaders in the following countries: New Zealand, the Commonwealth of Australia, the State of South Australia, the Philippines, Formosa, Thailand, India, Pakistan, Iran, Turkey, Greece, Spain.

The majority of the subcommittee's time involved discussions of peaceful atomic developments with a particular view to exploring at firsthand how bilateral agreements for cooperation, made possible under the provisions of the new Atomic Energy Act of 1954, might be achieved rapidly in the countries which we visited. Eight days of our trip were spent in Australia where our time was devoted about equally between uranium raw material and peaceful atomic developments.

A detailed discussion of our observations regarding the raw-materials situation in Australia and the prospects for peaceful uses of atomic energy in all the countries which we visited are set forth in this report.

PART I. GENERAL OBSERVATIONS

1. In Australia the committee found a flourishing and rapidly expanding uranium mining industry. At Radium Hill and Rum Jungle we found the most modern mining and milling plants actively producing large quantities of uranium concentrates for the free world. Geologic exploration and prospecting is active over large areas of the Northern Territory, Queensland, and South Australia, and numerous uranium finds are being made. We think it is important to note that in Australia, as in Canada, South Africa, the Belgian Congo, and the United States, the prospecting is done and uranium is mined and refined under a private enterprise system, and that in those areas where the system is most free, development has been most rapid.

2. The response which we met everywhere to the announcement of the willingness of the United States to participate directly with foreign countries in the development of peaceful uses of atomic energy is far more overwhelming than we had heretofore appreciated.

3. Every country we visited has some competent scientific and engineering talent already at work in the atomic field, but all countries need direct assistance in evaluating how fast and how far they can go in this application of atomic energy, in setting up training programs within their own country to supplement existing personnel, and training programs in the United States for key personnel so that they may return to their countries and train others.

4. The plans and programs which were presented to us appeared uniformly realistic. Nowhere did we encounter government officials or scientists who underestimated the size of the job involved in peaceful applications and the period of time over which these can be achieved. Despite the widespread belief throughout the countries we visited that atomic power applications will come on a wide scale earlier than is practical in most cases, the government and scientific leadership in these countries has correctly evaluated the prospects.

5. It is our conclusion that all United States cooperation in the field of peaceful atomic application must be coordinated within some formal structure. As hopeful as are the prospects for an international atomic development agency, it is our observation that bilateral agreements for cooperation tailored to meet the needs of the individual countries can and must be entered into promptly so that peacetime atomic development may get underway on a broad scale, despite any delays which may be encountered in the establishment of the international agency.

6. We were impressed in every country by the fact that the details of the opportunities for atomic contributions to the local economies are inadequately understood by United States representatives abroad. As a result, we recommend that the full committee take whatever steps it can to urge the Executive to establish a program which would include as a minimum creating small teams of diversified talent which could be sent on request to countries such as those we visited for the purpose of assisting in an evaluation of the ways and means by which peaceful atomic applications could be realized. Out of such evaluations there should arise agreements for cooperation based on firsthand knowledge of the needs and capabilities of each country.

7. In the interim, prior to precise evaluation and formulation of the programs in these countries, and others like them, a general minimum agreement for cooperation might profitably be drawn up by the Executive as a basis for initial atomic relationships with such friendly countries. The subcommittee is of the opinion that official United States assistance should flow within the framework of such agreements for cooperation and that these minimum-term agreements should be entered into promptly with as many friendly countries as is possible. The subcommittee observed repeatedly that if the United States fails to come forward with some concrete and formal way of demonstrating its willingness to get on with atomic cooperation immediately with these countries, some substantial portion of the good will inherent in the provisions of the Atomic Energy Act of 1954 which envisages such cooperation will be lost.

8. And, finally, the subcommittee would like to point out that in most cases United States atomic aid to countries such as those

which we visited need not involve large financial assistance during the early period of cooperation. In fact, we observed in many places that basic laboratory equipment, such as Geiger counters and scalers, costing only a few thousand dollars, would make it possible for the small groups of competent scientists already in these countries to begin making substantial contributions to their own countries as well as to science generally. This is especially true in the fields of uranium exploration, agricultural experimental work, medical activity—including clinical work, biology, and basic research.

An outstanding example of the assistance which the United States can render at little or no cost was encountered in India. There the Government has plans for the construction of a large research reactor which will use heavy water as a moderator. The Indian Government is already beginning construction of a heavy water production plant which it has every reason to expect will be able to furnish the quantity necessary by the time this first large research reactor is ready to start operating. What the Indians need is an assurance from the United States that, in the unlikely event that their own heavy water production plant falls behind schedule, they can rely on a loan of heavy water from the United States to get their reactor in operation promptly. In the first place, the Indian production schedule appeared to us to be realistic; in the second place, even if the United States should have to loan this material to India, it would certainly be for a reasonable time. The total cost of our assurance to India would be no more than the theoretical interest on the heavy water inventory which might be tied up for a few months in their reactor. Such an assurance from us would constitute the kind of genuine cooperation from the United States that is needed to prove our good intentions.

The members of the subcommittee deeply appreciate the opportunity afforded them in making this trip to discuss these matters with responsible individuals in the various local settings and found it of immeasurable value. We know of no substitute which could give the kind of understanding we believe we have acquired. We believe that an opportunity has been created to speed up bilateral agreements for cooperation with the nations which we visited, and that this opportunity alone is sufficient recompense for the arduousness of the trip which we undertook.

PART II. RAW MATERIALS

The original basis for planning the committee's trip to Australia was an invitation from the Commonwealth of Australia to visit the uranium mines and the uranium processing plants which had recently been constructed in the northern territory and in the State of South Australia.

Sydney: In Sydney, Australia, discussions were held with Gen. J. E. S. Stevens, Chairman of the Australian Atomic Energy Commission, and members of his staff. These discussions covered both the raw-materials picture and the atomic-energy research picture. That same evening the committee held discussions with Hon. O. H. Beale, Q. C., Commonwealth Minister of Supply, to whom the Atomic Energy Commission of Australia reports.

Canberra: The next day the committee visited Canberra. Further discussions were held with Mr. Beale; Senator W. H. Spooner, Minister for National Development; Dr. H. G. Raggatt, secretary of the Ministry for National Development, who is one of the world's outstanding geologists; and the members of the Australian Atomic Energy Commission concerning uranium developments in the Commonwealth of Australia, with particular reference to the activities in the Northern Territory where the famous Rum Jungle deposits are located.

Melbourne: In Melbourne the committee talked with Mr. P. B. Nye, Director of the Commonwealth Bureau of Mineral Resources, and his staff. The discussions related to the general geology of Australia and the areas of Australia considered favorable for uranium occurrence from a geologic standpoint and a résumé of recent uranium discoveries in the Northern Territory and in the State of Queensland. The committee was much impressed with the large number of uranium occurrences which have recently been found near Rum Jungle, in a new area about 200 miles north and east of Rum Jungle, and in the Mount Isa area in the State of Queensland. The Commonwealth Bureau of Mineral Resources is vigorously pursuing a geologic program designed to aid the uranium prospector. We were impressed with the similarity between its operations and those of the United States Geological Survey in the Colorado Plateau area.

Adelaide: In Adelaide the party had the pleasure of being escorted on its visit to the uranium properties and production plants by Hon. T. Playford, Premier of the State of South Australia, assisted by Sir A. Lyell McEwin, Minister of Mines for the State of South Australia, and Mr. S. B. Dickinson, Director of Mines for the State of South Australia.

The State of South Australia operates the Radium Hill mine and mill, a uranium refinery at Port Pirie, and a large ore-dressing laboratory and pilot plant in Adelaide.

The committee visited the pilot plant and laboratories during its first day in Adelaide. These two facilities compare favorably with similar laboratories in the United States and have done an excellent job in developing and pilot planting the uranium-refining processes used at Radium Hill and Port Pirie and the new processes which were recently installed at Rum Jungle. The excellence of this laboratory and pilot plant is attested to by the fact that the Commonwealth Government of Australia contracted for the Rum Jungle pilot plant work with the South Australian government and several of the large mining companies in Australia are currently having uranium work done for them at this laboratory. We were pleased to note that that laboratory has close working arrangements with the United States Atomic Energy Commission.

The second day in South Australia the committee journeyed to the Radium Hill mine, which is located about 150 miles north and east of Adelaide. The committee went underground in the Radium Hill mine and also visited the mill and the townsite. The entire Radium Hill project is a model of modern mining practice and compares favorably with the best mining camps in the world.

Broken Hill: The committee stayed over night at Broken Hill, in New South Wales, just over the line from South Australia. Broken Hill is one of the world's great zinc-lead deposits.

This overnight stop gave the committee the chance to talk with executives of the Zinc Corp., Ltd., which recently set up a subsidiary to operate the Rum Jungle properties under contract with the Commonwealth of Australia. The personnel to staff this new subsidiary, known as Territory Enterprises, was drawn in good measure from the Broken Hill operations. The committee was most favorably impressed with the managerial ability of the Zinc Corp. staff in Broken Hill.

Port Pirie: The committee next visited the Port Pirie refinery, which is nearing completion, and should go into operation in the spring of 1955. This plant will refine the uranium concentrates produced by the mill at Radium Hill and make a high-grade product suitable for shipment to the United States. This refinery, like the Radium Hill plant, is owned and operated by the government of the State of South Australia.

Rum Jungle: Following the committee visit to the South Australian Uranium Properties, we flew directly across Australia to the capital of the Northern Territories, Darwin, where the committee met with the Administrator of the Northern Territories, Hon. F. J. S. Wise. The next day the committee drove with Mr. Wise 60 miles south of Darwin on a fine paved highway to the Rum Jungle mine, mill, and townsite. The Rum Jungle property has a small exploration shaft, but actual mining will be done through an open pit. We visited the open pit, where excavation of the overburden is well under way. This work was being carried out with the most modern American excavation equipment under a subcontract with a large English construction contractor. The party also visited the Dyson mine, which is just a few miles from the Rum Jungle mine, known locally as White's mine.

The new mill at Rum Jungle had just recently gone into operation and the committee was pleased to see that it was running smoothly and efficiently and fully living up to its design criteria. We also visited the brand new townsite for the Rum Jungle properties known as Batchelor, and were very favorably impressed with the modern housing and up-to-date shopping center in what had been a wilderness 5 years ago.

The committee came away with the strong conviction that the money which the United States had advanced on loans to the Government of the Commonwealth and of South Australia had been prudently and efficiently expended and that Australia now has two large producing uranium properties which are daily adding to our uranium supply. The high degree of activity in uranium prospecting and the number of uranium strikes in the past 2 years gave every indication that Australia will become one of the world's great sources of uranium in the next decade.

PART III. PEACEFUL USES OF ATOMIC ENERGY

New Zealand, as part of the British Commonwealth of nations, is already beginning to play an important part in the integrated atomic-energy program organized from London. One type of atomic powerplant which promises commercial power at an early date will require heavy water, a material which we are using in the new production reactors at Savannah River.

In New Zealand there is what the scientists call a geothermal zone which runs diagonally across North Island. These extensive hot springs can provide a cheap source of the heat necessary to produce heavy water in commercial quantities as well as low-cost electricity. Development of this natural resource is under way. We spent a day high in the mountains of New Zealand inspecting the experimental work going on there and talked at length with their works manager.

We also talked informally with members of an advisory team who had been sent to New Zealand from the Harwell Laboratories in England and learned certain things of interest about the British program which have not been available to us through other channels. It should be pointed out that no information was discussed which the United States holds classified, but the collective working knowledge of the party made many things which were said by those with whom we talked throughout the trip meaningful—far more meaningful than those same statements can be expected to be to United States diplomatic representatives abroad.

In addition to inspecting the geothermal area in New Zealand, we talked to Government and scientific representatives in Wellington with particular regard to their electric power needs in the future and their agricultural and medical research programs. We found that radioisotopes are already being used in New Zealand to improve grasses and dairy products.

We were particularly intrigued with a radioisotope experiment performed in New Zealand a few years ago. In a research project

employing radioactive cobalt it was found that much of the soil of New Zealand was deficient in cobalt. This cobalt deficiency adversely affected the growth of grass and seriously reduced the nutritional value of the pasture grasses. As a result of this discovery the New Zealand farmers undertook to spray their pastures with cobalt. This spraying was done from airplanes. The New Zealand grass is now among the finest in the world. The committee observed eloquent evidence of this fact in the millions of sheep and cattle we saw grazing on every side as we drove through North Island. Here is one dividend from the peaceful atom which has meant much to the New Zealand economy and has awakened the interest of every New Zealander in atomic energy.

There are many similar developments in the field of agriculture in the United States which offer great potential benefits to the New Zealand economy. If an agreement for cooperation authorized in our new Atomic Energy Act could be entered into promptly it would benefit both of us. It is clear that New Zealand is so far from the existing sources of radioisotopes in the United States and England that an effective experimental peacetime atomic program will require the construction of a research reactor capable of producing isotopes somewhere in that part of the world.

New Zealand does not face an electric power shortage within the next 20 years, for she has adequate hydro and geothermal energy sources to take care of her growing industrial economy up to 1975. However, New Zealand does not have an adequate supply of fossil fuels and in the period beyond 1975 her demand will exceed the potential capacity of these hydro and geothermal resources. Beginning in the seventies, New Zealand will have to depend on atomic energy to meet her additional electric power needs. New Zealanders are therefore anxious to learn about atomic power and follow its development in the United States and throughout the world so that they may be in a position to build and operate their own atomic powerplants cheaply and efficiently.

We had the good fortune of meeting and talking with Dr. Watson-Munro in Wellington. Dr. Watson-Munro is New Zealand's leading physicist. He was about to go to Australia to head the scientific atomic effort in that country. We were therefore able to get a projection of his thinking with regard to the Australian program.

Australia

In Australia, there is vigorous public, political, scientific, and industrial interest in all phases of atomic development. The Commonwealth Government has plans for the construction of a major research reactor within the next 3 years. Our group met with the Australian Atomic Energy Commission in Sydney and talked at length with both the administrative and scientific members of the organization. Their Atomic Energy Commission, headed by General Stevens, is a small, compact and purposeful organization. Their first major atomic laboratory is nearing completion. Increased atomic activities are finding support not only in the capitol at Canberra but among industrialists throughout the country.

There are both Government and private plans for the construction of large research reactors in the Commonwealth of Australia. It appears likely that the first of these will be under construction within the next 2 years. From these machines the Australians hope to learn more about reactors generally and get on with designing and building their first atomic powerplant. Because the United States has been unable, due to statutory restrictions in the Atomic Energy Act of 1946, to give active assistance on reactor development to the Australians, most of the assistance so far has come from England. Now that the Atomic Energy Act of 1954 is in effect and not only permits, but encourages, the cooperation of the United States in this field, the Australian Commission is looking forward to similarly close cooperation with the United States. We believe the Joint Committee would find it a pleasure to join other American groups in being host to representatives from the Australian Commission later this year. There is every reason to believe that an initial agreement for cooperation with Australia can be entered into promptly and profitably, so that when such representatives arrive in our country there will be a legal framework to implement our cooperation with them.

We also met with Prime Minister Menzies and his Cabinet at Canberra, and with the Minister of Supply, the Honorable O. H. Beale, on several occasions. There is every reason to expect that atomic energy can make great contributions to the Australian economy in the fields of agriculture, medicine, and electric power. This is a nation of 9 million people living in a land larger than the United States. They are ambitious and have a high standard of living, but they are beset with the economic problems of a rapidly expanding economy. They deeply appreciate the fact that the United States is their strongest partner in the Pacific and that they must rely on United States leadership and aid to protect them against the advances of communism in the Orient. The Australians showed themselves to be a resourceful people with an understanding of what can be achieved by self-help and hard driving organization. Despite the close ties which exist between Australia and Great Britain, we sensed everywhere that Australia looks to the United States as a close and warm ally.

We spent 3 days in South Australia conferring with Premier Playford and the members of his government and their various industrial organizations. It is important to bear in mind that Australia is a federal union and that they have a degree of autonomy far exceeding that to which we are accustomed. It is truly a confederation of states though this in no way diminishes the prestige of the Commonwealth Government. It is important to bear this in mind when dealing with the Commonwealth of Australia and with the individual states. South Australia contains a substantial portion of the uranium resources of Australia and is a proud and separate entity with a rapidly growing industrial complex. We were deeply impressed with the efficiency and substantial character of the entire atomic energy program in South Australia.

South Australia needs atomic power. The state is now planning to supplement the conventional electric resources available to its electricity trust with atomic energy in the early 1960's and is looking to the United States for extensive technical guidance in achieving this goal.

We had an opportunity to inspect the laboratories which have been built outside of Adelaide by the South Australian Government and members of the party met with the electricity trust for a detailed discussion. Plans are now going forward to equip existing powerplants to burn either coal or oil, in order to make maximum use of the recent oil discoveries on the west coast of Australia. Another project is going forward to make use of the brown coal deposits which exist in South Australia. But these resources are not sufficient to meet the long-term needs of the rapidly expanding industrial complex in this state. Therefore, the electricity trust is planning on supplementing its electricity resources with atomic power beginning in 1963. This is a realistic plan which will require hard work on the part of the South Australians and considerable technical assistance and guidance on the part of Great Britain and the United States. We were impressed by the fact that the South Australians have managed to work out the plan for meeting their electric power needs in such a way as to bring atomic power into their picture at approximately the same time as we have been informed here in the United States it is reasonable to begin to place reliance on this resource.

As a first step the South Australian government plans to build a research reactor of modified United States design at the University of Adelaide. They hope to have this machine running sometime in 1958 or 1959 and are prepared to finance it themselves. Of course, they will require outside technical assistance. Their total program appeared to us to be most well-conceived. These people are stanch allies of ours in a critical part of the world and are earning our equally warm support.

From South Australia we traveled north across the great Australian desert, stopping on the way for a brief visit at the joint Australian-British guided missile test range known as Woomera. It was on this range not many months ago that the British conducted their second series of atomic weapons tests.

On the northern coast of Australia we stopped and went back into the hinterland to inspect the famous uranium mining area known as Rum Jungle.

The Philippines

From Australia our subcommittee went north to the Philippines. We met with President Magsaysay at Manila and talked with him and his staff about the prospects of peacetime applications for atomic energy. We were all impressed with the fundamental grasp which the top Government leaders of the Philippines have on what atomic energy can do for their country and the modest and realistic attitude which they take for its achievement. The general standard of living in the Philippines today is far too low and the amount of industrialization which has been possible thus far is insufficient for a modern nation. Atomic energy can do much to improve both of these areas. There are many young Filipinos trained in American universities who are familiar with varying aspects of atomic energy. There is basic research going on now at the great university in Manila.

The Filipinos have an excellent agricultural college and several fine agricultural experiment stations. Dr. Paul B. Pearson, of the Biology and Medicine Branch of the Atomic Energy Commission, who closely follows the agricultural program of the Commission, visited the Philippines and toured their agricultural stations just a week after the committee's visit. We met with Dr. Pearson after his visit and found ourselves in agreement with him as to the challenge offered by their interest and competence. Here obviously is a case where the early signing of an agreement to cooperate would make it possible to put the peaceful atom promptly and effectively to work.

Our Filipino friends are ready to cooperate with us both to the end of improving their agricultural and industrial lot and to the advancement of a science still too little understood. They would make valuable allies in our common war against the scientific unknown.

Formosa

Formosa was our next stop. On Formosa our subcommittee met with representatives of both the American missions there and the Governments of Free China and of Formosa. We explored ways in which radioisotopes could be used to improve the agricultural production on Formosa and to raise the standards of health there. This island economy could profit from such experimental atomic work.

Thailand

One of our most thrilling experiences occurred during our visit to our friendly and warm allies in Thailand. Until the word

went out several months ago of our plan to visit Bangkok, there was no organized government activity in the field of atomic energy in Thailand. This is not to say that there were not a number of interested and competent individuals at work individually and in small groups, but they lacked any cohesive plan and any specifically directed Government support. We found upon our arrival that a new atomic energy committee had been formed, headed by the deputy prime minister. The third meeting of their committee was with our subcommittee. It was an impressive meeting—impressive because of the realism and directness of their statements. The people of Thailand can be benefited, especially in the fields of medicine and agriculture, through the use of radioisotropes, and they might profitably use a small research reactor. We understand that they will shortly make proposals to our State Department for an agreement for cooperation. The United States would do well to seize upon this opportunity quickly and demonstrate to the people of Asia that the peacetime benefits of atomic energy which the United States stands ready to offer are real and in many instances can be of almost immediate benefit to their economy.

India

India has a large and rapidly expanding atomic energy program. Its nature is not well understood outside India, and we ourselves found that we had arrived with some misconceptions. Particularly in the fields of physics, chemistry, and biology the Indians are making outstanding contributions. This is no backward nation when it comes to modern science. Indians of all ages in their laboratories are earning their rightful place in the scientific and engineering fraternity. We visited first in Calcutta and then in New Delhi to talk with some of the people, both government and scientific, about what they are doing and what they hope to do.

Calcutta: Our visit in Calcutta, though brief, we felt was an important one. It gave us an opportunity to talk at firsthand to people who are actively working in the field of atomic energy. It was our pleasure to meet again with Dr. Saha, of the University of Calcutta, with whom the full joint committee had the pleasure of meeting here in the Capitol last year.

We found particularly interesting the serious commentaries we obtained in India on the hollowness of the offers which have been made by the Soviet Union to assist this part of the world. We were given well founded testimony on the complete unwillingness of the Soviet Union to bring any real benefits and contribute any real scientific and engineering knowledge to the end that the people of India may enjoy the benefits of atomic energy.

New Delhi: In New Delhi we had the pleasure of meeting with many representatives of the Indian Government, though unfortunately Prime Minister Nehru was not in the city. We met with the Indian Atomic Energy Commission and learned much more about their program than had been available to us previously. We came away with the distinct impression that the Indian atomic effort is an important one not only to India but to the advancement of science. Concrete plans are actually going forward and some construction is underway looking toward the first of two large research reactors, both on modified, unclassified American design.

We visited the National Physical Laboratory, which is renowned for its development of the so-called solar cooker which uses the heat of the sun to cook food and heat homes. Here in this institute Dr. K. S. Krishnan, director of the laboratory, and a member of the Indian Atomic Energy Commission, took members of our party on a tour of one of the finest scientific laboratories we have ever visited. This institute is well equipped and well staffed to do work in basic science. Work is nearing completion on the construction of a large particle accelerator.

There are ways in which we can assist in the prosecution of this program at little or no dollar expense to the United States, yet in ways which would be deeply appreciated by the Indians, and would be of real assistance to them. It is our own hope that ways can be found in the near future, again through an agreement for cooperation, to extend this assistance.

Pakistan

In Karachi we had the very real pleasure of meeting first with Prime Minister Mohammed Ali, and later with the Council of Scientific and Industrial Research for Pakistan. Long and hard though the road ahead is for the people of Pakistan, they see and are attempting to grasp the opportunities to make their passage along that road both faster and better through the use of atomic energy. They have already established a central research laboratory in Karachi and will shortly open three regional laboratories.

We noted with interest upon our return to the United States an announcement of the intentions of those in the Briitsh atomic-energy program to assist in the development of these laboratories. Scientists and Government administrators alike made it clear to us while we were there conferring with them that they must have assistance and would welcome it particularly from the United States.

We flew north to Peshawar near the Khyber Pass in order that we might meet with the faculty of the university there, since it is on their campus that the first regional laboratory is to be established. In the barren foothills of the Himalayas we talked long and earnestly with men trained here at our own Oak Ridge and Argonne and at Princeton—men of scientific and technical stature who are trying already with their limited resources to bring their country the beenfits of this most revolutionary science.

Iran

In Teheran we met with Prime Minister Zahedi and his Minister of Foreign Affairs, as well as other members of the Iranian Government. The economic difficulties of Iran have been much eased by the recent settlement of the long oil dispute. The ways and means by which atomic energy can help raise the standards of living in Iran and improve health are not unlike those everywhere, but the problems of organizing such programs are not as far along as those in most countries which we visited. It is entirely possible that a small United States task force—3 or 4 men—for a few months might be able to give real assistance on this score. Again we wish to emphasize that we are not suggesting multi-million-dollar-foreign-aid programs but the carefully selected, prudent expenditure of $5,000 or $10,000 here and there in the way that will do the most good and at the most propitious moment. Large sums of money too late are no substitute for timely assistance on a modest scale.

Turkey

At Ankara we were all impressed by the large assembly of learned scientific ladies and gentlemen who were brought together to meet with us. We had no prior knowledge of the extent of the scientific talent available in Turkey which can be devoted to bringing peacetime atomic benefits to that country. What we learned was most encouraging.

It was an unexpected pleasure to meet Professor Alisbah, professor of higher mathematics at the University of Ankara, who is also a member of the Institute for Advanced Studies at Princeton. He was only one of those whom we met in Turkey who are tangible evidence that here is a country which is able to make contributions in this field of science. We always have too few really competent minds tackling the problems of the scientific unknown. We personally found the Turkish plans for an atomic cancer institute of special interest and were impressed that there are more than just plans, that the first laboratory is already in operation. Our countries could benefit mutually from a program of closer cooperation in peacetime atomic pursuits.

Greece

In Greece, as in Iran, we found the need for atomic agricultural and medical benefits to be very great indeed and the present means of bringing them to the people far too limited. The American taxpayer has spent large sums to aid the Greeks in repelling the Communist threat, and the Greeks have made wise use of this help. The country is today a vigorous member of the free world. However, it still faces grave economic problems. Food production is primitive by our standards. The country's power resources are quite limited. To the long-range goal of raising the Greek standard of living and achieving a stabilized economy, atomic energy—if wisely used—can contribute and even provide short cuts both in dollars and time. Here also our responsibility is great, out of humanitarian as well as ideological kinship.

Spain

Our meeting with the Spanish Nuclear Energy Commission in Madrid was a highlight of our trip. This aggressive group is carrying out its basic nuclear development program primarily through grants to existing institutions. For example, they have a large electronics and instrument development group at the University of Madrid, as well as a reactor development group there. They have concrete plans for building a reactor which they seriously hope can be of the swimming-pool type which has been successful here in the United States. They recognize their need for a larger number of trained people, particularly in the field of reactor engineering. General Vigon, president of the Commission, and Dr. Otero were especially anxious to learn how the new provisions of the Atomic Energy Act would permit them to enter into an agreement for cooperation with the United States. The Spanish experience in recent months with the United States technical-assistance program under our new treaty and agreements has convinced them that the kind of assistance they need in their nuclear program can best be obtained from the United States. They need direct technical assistance from Americans who have built and operated research reactors of the sort the Spanish Nuclear Energy Commission is planning to build. They need assistance in setting up a training program in Spain as well as an opportunity to send Spanish scientists and engineers to the United States for training. They are interested in much more than just electric power. Spain has an agricultural extension service and good central medical facilities which could effectively use many of the things the United States has learned in these fields.

RAW MATERIALS SUBCOMMITTEE,
(83d Cong., 2d Sess.),
JOHN W. BRICKER,
Acting Chairman,
STERLING COLE,
CARL HINSHAW,
JAMES E. VAN ZANDT,
THOMAS A. JENKINS.

Mr. BRICKER. Mr. President, I concur fully in these general observations. Since the subcommittee report relates in considerable detail the places we visited and the people we met, I shall not go into the details of this pleasant, though arduous, journey.

To sum up our trip, I should like to make three general observations. Many of the nations we visited have enormous problems and limited resources. These are the very nations which need the atomic shortcuts to improvements in standards of living, in agricultural and industrial output, and better health. These atomic shortcuts can be provided at a modest cost in dollars, material, and manpower. We found no country on our itinerary devoid of scientific talent in the atomic field. All of us on the Joint Committee on Atomic Energy have had to struggle with the problems of getting adequate scientific personnel to tackle all the basic scientific research tasks at hand. Here in these countries are energetic and competent people, anxious to use their talents to our common advantage. The last Congress provided the legal basis for making such cooperation possible. We must do everything in our power to see to it that these provisions of the law relating to international agreements for cooperation are used to the fullest without delay or redtape.

Secondly, I was impressed by the relatively small investment that such an atomic-aid program would involve. Time after time I talked with eager men and women well trained in atomic science whose energies would be available to contribute both to their own nations and to science generally if they had but a few radiation instruments. They could be bought for from $5,000 to $25,000 per laboratory.

If I might hazard a guess, a quarter of a million dollars spent today promptly, and in the right places, can do more good than $250 million appropriated all at once 5 years from now. I would use the quarter of a million for 25 grants in the 12 nations we visited, giving each laboratory $10,000 worth of radiation instruments.

I must say that I returned deeply impressed with the value of face-to-face conversations with the scientific and governmental leaders in their own countries. All of us who made the trip returned with a better sense of what is possible; how our atoms-for-peace program can be advanced; and what is needed to make it of real benefit to the common people on whom free government depends throughout the world. I shall not soon forget how much can be done for so little in many parts of the world where the potentialities of the atom remain untapped.

In conclusion, I should like to point out what I regard as the most dangerous pitfalls in the administration of the President's atoms-for-peace plan.

The first is that of overselling a good program. The deserts of the world are not going to bloom overnight. For many nations cheap atomic power is decades away. False expectations raised by hucksters on the Federal payroll can benefit only the Communists.

The second great danger is that administration of the program will be entrusted to giddy humanitarians, to doctrinaire Socialists, or to callous bureaucrats. This is a practical program for practical men of science. There is no place in this program for the social worker or the socialistic planner. And I sincerely hope that negotiations for agreements for cooperation do not become ensnarled in a mass of redtape or in the niceties of diplomatic protocol.

The third pitfall is an all too common American failing. We are naturally, and I think justifiably, proud of our own traditions, culture, and economic system. However, we seem to be infected with an irresistible urge to force American political, economic, social, and cultural institutions on other people. It is not at all certain that the underdeveloped countries want a degree of efficiency which means that small villages, small farms, and handicraft industries must be sacrificed. It is presumptuous to think that no people can be happy, or that they are necessarily inferior, if they do not possess, or do not aspire to, the American standard of living. There are many things vastly more important. Nothing is more certain, however, than that an effort to transplant unmodified all the distinctive aspects of our civilization on foreign soil would bring down on us the hatred of the world. This obsession to improve other people whether they like it or not was revealed, unwittingly, in an article appearing in the February issue of American Mercury. This was the concluding paragraph of a story on the discovery of a tribe of people in an unexplored region of New Guinea:

> Whether the lost people of Lavani like it or not, they are about to be whisked thousands of years through time—from the darkest stone age into the middle of the atomic age.

Let us pray that the atoms-for-peace plan will never be used to lift people, whether they like it or not, from what they have to what we think they should have.

And, finally, I hope that the atoms-for-peace plan, both at home and abroad, will not become just another bauble with which to excite the avarice of mankind. If we live only for an ever-rising standard of living, we shall never know freedom from want. Our wants will be unlimited, far beyond the power of the atom to satisfy. To secure for ourselves and others the benefits envisioned by President Eisenhower in his atoms-for-peace plan, we must adhere to values which spring from sources higher than the appetites of man.

Mr. President, on this trip I was impressed with an expression I heard in one country. It was that the government of that country was trying to lift the standard of living of its people, and could utilize atomic energy to fulfill that purpose. I could not help think that governments alone do not lift standards of living for their people, but create an atmosphere in which the standards of living of the people can improve. The people must do it for themselves. There must be an individual yearning and an individual ability to lift one's own standard of living. When we put the matter solely on a control basis, we do not fulfill the yearnings of the people.

There cannot be a lifting of the standard of living of a people by material resources alone. It must be accomplished by a spiritual uplifting of the people, by a higher degree of freedom, and by individual creative ability, enhanced and encouraged in an atmosphere of freedom brought about by the government.

In this problem, complex as it is, the United States can take a leading role, by helping the nations of the world to attain better health and better industrial conditions, and, finally, an opportunity for development generally.

We found everywhere—and this fact is reported in the bulletin which I have submitted for the RECORD—a desire for better health conditions, and a great interest in the availability of and the possibilities that will arise from the use of atomic energy.

We found everywhere a desire to increase agricultural production. In many of the countries we visited, people live just above a bare minimum standard of living. In many places there is today actual hunger. If the soil, which has been bleached out and eroded and washed out, can be brought back to production by new scientific processes, certainly much will have been contributed to the happiness of these countries, and ultimately of the world.

In the field of industry there is everywhere a desire for more and more power. In one of the countries we visited the power had become depleted, and one of their production centers had been closed down. As a result, in the hotel at which we were staying the elevators were not operating and the lights were cut off during a part of the time. In all the countries we found a desire for more production of the things that their people need. Essential for such production is the source of energy and power that might ultimately come from atomic reactors.

As I said before, Mr. President, in this program we do not wish to overencourage, but we desire to be practical in our approach.

I wish to express to the Members of the Senate the gratitude I feel for the opportunity to make this trip, to observe the needs of various countries of the world, and to get a glimpse of the possibilities which confront the United States in the great program of helpfulness which I know is inspired by the leadership of this Nation.

Mr. BUSH. Mr. President, will the Senator from Ohio yield?

Mr. BRICKER. I yield.

Mr. BUSH. Mr. President, I wish to compliment the Senator from Ohio on his most enlightening address on the subject of his recent very important trip. I compliment him highly and very sincerely. I hope those Senators who were not present this afternoon to hear the Senator from Ohio will read his address in the RECORD, because he has told us something which we all should know and appreciate.

Mr. BRICKER. I thank the Senator from Connecticut. I wish to say, in response, that we have here, I think, possibly the greatest opportunity available to us in any single field for building good will and helping the other peoples of the world to a better way of life. Their resources are, of course, limited. We have spent from $12 billion to $13 billion on the program, and if we can turn it

now from the destructive aspect, which it has been, primarily, up to this time, toward peaceful uses, I think not only will we strengthen our position in the world, but we will be doing more than we could possibly do with many times the amount of dollars sent abroad.

There was another very encouraging aspect which came from members of governments with whom we talked, namely, that the United States has an adequate supply for defense purposes and that our program has advanced to such a point that we can contribute 200 or more pounds to international use. England has contributed some 40 pounds for that purpose. The people have learned that now we can turn what has been a threat to the world to the help of the peoples of the world. To me, as an American citizen and as a Member of this body, that was one point of encouragement which emphasized the possibilities for the future in this great field.

THE BONN AGREEMENTS OF 1952 AS AMENDED BY THE PARIS PROTOCOL OF 1954 (S. DOC. No. 11)

Mr. GEORGE. Mr. President, the so-called London-Paris accords, which have the effect of amending the contractual agreements with Germany which the Senate approved in 1952, are now pending before the Foreign Relations Committee—Executives L and M, 83d Congress, 2d session.

Unfortunately for purposes of clarity, the protocol to the German agreement is in the form of substitute language for provisions in the earlier protocol. Thus, it is virtually impossible for the Senate to get any clear idea of the action it is expected to take without reading the 1952 convention as amended by the 1954 protocol.

I ask unanimous consent, therefore, to have the Convention on Relations Between the Three Powers and the Federal Republic of Germany, as amended by the 1954 Protocol on Termination of the Occupation of Germany, printed as a Senate document. It will thus be possible for the Senate and the Committee, when they consider the London-Paris accords, to have before them a document which will embody the actual agreements as they will be in effect if approved by the parties thereto.

Mr. LANGER. Mr. President, will the Senator from Georgia yield?

Mr. GEORGE. I am glad to yield.

Mr. LANGER. How many copies will be printed?

The PRESIDING OFFICER (Mr. McNAMARA in the chair). The law provides for a definite number.

Mr. GEORGE. The law provides for a definite number. I am not able to give the Senator that information. It will be an indispensable document when it is printed. Otherwise, the subject is not understandable. The document will not be so large as the manuscripts before me would indicate, because many of the pages in this manuscript are only half pages.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Georgia? The Chair hears none, and it is so ordered.

UNITED STATES VERSUS CAPPS—THE "POTATO CASE"

Mr. BRICKER. Mr. President, I ask unanimous consent to have printed in the RECORD the opinion of the Supreme Court of the United States in United States of America, petitioner, against Guy W. Capps, Inc., on writ of certiorari to the United States Court of Appeals for the Fourth Circuit, together with an article from the Wall Street Journal entitled "The Potato Case," and another article from the Wall Street Journal headed "Supreme Court's Silence on Spuds Gives New Ammunition to Treaty Curb Backers."

There being no objection, the opinion and articles were ordered to be printed in the RECORD, as follows:

SUPREME COURT OF THE UNITED STATES—No. 14, OCTOBER TERM, 1954

UNITED STATES OF AMERICA, PETITIONER, *v.* GUY W. CAPPS, INC.

(On writ of certiorari to the U. S. Court of Appeals for the Fourth Circuit)

(February 7, 1955)

(Mr. Justice Burton delivered the opinion of the Court.)

In this case the United States district court directed a verdict for respondent because petitioner failed to present evidence of either a breach of contract or resulting damages sufficient to sustain a verdict for petitioner. The court of appeals, however, affirmed the judgment on the ground that the alleged contract was unenforceable. For the reasons hereafter stated, we agree with the district court that the evidence was not sufficient to sustain the alleged breach of contract. Accordingly, we do not reach or pass upon the other grounds discussed by the court of appeals.

In 1948 the crops of Irish potatoes in the United States and Canada were among the largest on record. As a result, the United States, in section 1 (b) of the Agricultural Act of 1948 (68 Stat. 1247, 1248), obligated itself to support the sale of such potatoes at 90 percent of their parity price. This program was carried out through agreements of the Commodity Credit Corporation to purchase, from eligible growers or dealers in the United States, all Irish potatoes harvested before January 1, 1949, provided such potatoes could not be sold commercially at 90 percent of parity. As the unsupported Canadian prices were lower than the supported prices in the United States, it became profitable to import Canadian potatoes despite the tariff and freight charges. Recognizing that fact, Congress authorized investigations by the Tariff Commission, under the President's direction, which might lead to imposing quantitative limitations on imports or to increasing import fees. (62 stat. 1248–1250, 7 U. S. C., sec. 624.)

However, without resorting to that procedure, the United States acted through diplomatic channels. Its Acting Secretary of State and the Canadian Ambassador exchanged notes on November 23 1948, purporting to consummate an executive agreement effective at once. (For their text see appendix, infra, at 10–14.) Of special significance to this litigation are the undertakings made by Canada, in its note, to place its Irish potatoes under export control, to withhold export permits for the movement of table stock potatoes to the United States, and to issue export permits for the shipment of Canadian certified seed potatoes to the United States only under specified circumstances. Those circumstances were that the shipments be limited to specified States where there was a legitimate demand for certified seed potatoes and to a short period before the normal seeding time. Permits were to be granted only to exporters having firm orders from legitimate United States users of Canadian seed potatoes, and those exporters were "to have included in any contract into which they might enter with a United States seed potato importer a clause in which the importer would give an assurance that the potatoes would not be diverted or reconsigned for table stock purposes" (Appendix, infra, at 11). The agreement terminated June 20, 1949.

In December 1948 Guy W. Capps, Inc., a Virginia corporation, respondent herein, bought 48,544 one-hundred-pound bags of Canadian certified Irish seed potatoes from H. B. Willis, Inc., of Charlottetown, Prince Edward Island, a Canadian exporter. Before the exporter's shipment of them on the steamship *Empire Gangway* to respondent at Jacksonville, Fla., respondent wired the exporter as follows: "Certified seed potatoes loaded on steamship *Gangway* are for planting in Florida and Georgia." The shipment arrived at Jacksonville January 9, 1949.[1] On January 11, the potatoes were all invoiced by respondent to the Atlantic Commission Co. at Jacksonville as "48,544 Sax Canada No. 1 seed potatoes at $3.35 f. o. b."[2]

In January 1951 the United States filed the instant action against respondent in the United States District Court for the Eastern District of Virginia, claiming that the above circumstances constituted a contract between the exporter and respondent for the benefit of the United States. The complaint alleged further, upon information and belief, that, in January 1949, respondent, in violation of such contract, "sold the 48,544 sacks of seed potatoes for table stock purposes" to the damage of the United States in the amount of approximately $150,486, "in that for each quantity of potatoes so imported from Canada and sold for table stock in the United States, a substantially equivalent quantity of potatoes produced in the United States was offered for sale to the Department of Agriculture, and had to be and was purchased by the Department under the Agricultural Act of 1948."

Respondent's motion to dismiss the complaint for failure to state a claim upon which relief could be granted was denied. (100 F. Supp. 30.) However, at the close of petitioner's case and after argument of counsel, the court directed a verdict for respondent.

[1] January 10, 1949, the Acting Chief of the Potato Division, Fruit and Vegetable Branch of the United States Department of Agriculture, wired respondent:

"Have been informed ACCO (Atlantic Commission Co.) representative, Jacksonville, Fla., claiming you have special permission from Department to sell Canadian seed for edible use, if no demand for seed. Please advise basis for claim. Account such disposition is contrary to the intent of United States-Canadian agreement and to Canadian requirement regarding diversion or reconsignment."

January 11, 1949, respondent wired in reply: "Have not made such statement. Only put seed (potatoes) Jacksonville for seed purposes" and, later, on the same day:

"I realize fully the agreement with Canada, its intent, and want to and expect to cooperate with the program. I am only bringing in seed for seed purposes. Canadian dealers are now quoting seed same territory I am selling. Have had quotations as low as 365 hundredweight delivered Norfolk, past week."

[2] "Less 10,000 Sax Canada No. 1 seed potatoes at $3.65 f. o. b." These 10,000 sacks were immediately resold by the Atlantic Commission Co. to respondent. Of them, 8,730 were invoiced by respondent on the same day as "Canada No. 1 seed potatoes" in 7 lots to 4 separate dealers in Florida and Georgia, at prices between $3.75 and $4 per hundredweight. There was no evidence as to the disposition of the remaining 1,270 sacks.

Judgment was entered accordingly. The court's findings of fact and conclusions of law were contained in its oral opinion. That opinion, which has not been published, included the following highly significant statements:

"The action here is for breach of contract made between a Canadian exporter and Capps, the American importer, and specifically of a stipulation placed in that contract which the court has held was for the benefit of the United States.

"The expression constituting that stipulation is that certified seed potatoes loaded on the S. S. *Gangway* are for planting in Florida and Georgia. Now, assuming that the court is correct in holding that that stipulation is an agreement within the meaning of the Executive treaty or an assurance, as it is called in the Executive treaty, to the effect that the potatoes would not be diverted or reconsigned for table stock purposes—I say assuming that the court is correct in holding that this provision is an assurance—there is no proof here sufficient to go to the jury that there has been such a diversion or reconsignment, or that there has been a lack of diligence or care on the part of this defendant to see to it that its assurance was carried out.

"In the first place, the only diversion or reconsignment was from the defendant to the Atlantic Commission Co. Now that was not a diversion or reconsignment for table stock purposes. Nor does it evidence any want of care on the part of the defendant to see that the assurance was kept, because the evidence shows that this defendant had from year to year sold to Atlantic potatoes exclusively for seed purposes. The evidence does not justify or would not justify the jury in drawing a conclusion that it was a reckless abandonment by the defendant of its obligation to see to the use of these potatoes because the defendant had the right to rely upon its previous experiences.

"But going further, and assuming that it was incumbent upon the defendant to follow up and see that this reconsignment did not lead to the use of the potatoes for table purposes, we find that the A. & P., to whom Atlantic sold, did sell seed potatoes. It is true that it was not its entire trade in potatoes, but it did sell a large amount, described as its secondary function, for seed purposes, and the other sales by Atlantic to wholesalers or to the trade, as it is spoken of, were to firms which used potatoes for seed purposes or disposed of them for seed purposes, so that the sales by the defendant here were equally consistent with the compliance as with the violation of the assurance."

The court of appeals disagreed with the district court on the above points.[3] However, it affirmed the judgment on the ground that the international agreement, which the contract between respondent and the exporter sought to carry out, was void. The court regarded it as not authorized by Congress and as contravening the provision for procedure through the Tariff Commission. The court also held that the suit must fail because no cause of action had been created by Congress for this type of injury (204 F. 2d 655, 658–661). We granted certiorari to determine whether the significant constitutional and statutory questions discussed by the court of appeals were necessary for the decision of the case and, if so, to give them consideration (346 U. S. 884).

We have first examined the record in order to pass upon the preliminary questions on which the court of appeals disagreed with the trial court. (See *Walling* v. *General Industries Co.* (330 U. S. 545, 547, 550), and see also, *Story Parchment Co.* v. *Paterson Parchment Co.* (282 U. S. 555, 560, 567–568).)

Respondent's alleged obligation is stated in its first telegram, which must be read in the light of the above-mentioned correspondence between the United States and Canada. That correspondence recognized that importations of Canadian seed potatoes, as well as of Canadian table stock potatoes, might displace eligible American potatoes in American commercial markets and thus might add to the burden of the American price-support program. The correspondence, nevertheless, did not seek to exclude Canadian seed potatoes. On the contrary, it provided for the continuance of shipments of seed potatoes to specified States in the United States, during a short period immediately prior to the normal seeding time. In addition, Canada agreed to require its exporters to secure assurance from each importer of Canadian seed potatoes that such potatoes would not be diverted or reconsigned for table stock purposes. In effect, this agreement stopped the regular Canadian-American trade in Canadian table stock potatoes, while preserving such trade in Canadian seed potatoes. There was no suggestion that each importer, during the short open season for Canadian seed potatoes, had to take any new or extraordinary affirmative steps to see to it that the ultimate purchasers never ate their seed potatoes, or that each American retailer of Canadian seed potatoes, in its usual course of business, segregated such potatoes from table stock potatoes in any manner not customary in the sale of seed potatoes.

The undisputed evidence showed that the entire shipment to Jacksonville was made in containers with markings and tags identifying the potatoes as "Canadian No. 1 seed potatoes." There was no showing that this identification was separated from the potatoes at any point short of the ultimate offering of some of the potatoes at retail. There was, in short, no evidence that any of the potatoes were at any time reconsigned or otherwise treated except as had been customary in prior commercial dealings in seed potatoes.

At Jacksonville the entire shipment was invoiced by respondent to the Atlantic Commission Co. as "Canada No. 1 Seed Potatoes." Most of the 10,000 sacks (which, at the time of their delivery to that company in Jacksonville, were resold by it to respondent) were invoiced by respondent to other customers in a like manner.[4] The Atlantic Commission Co., in turn, invoiced to its purchasers, in the same manner, the sacks which it received from respondent. Of them, 13,627 sacks were invoiced by the Commission Co. to its parent company, the Great Atlantic & Pacific Tea Co., at 3 points in Florida and 1 in Georgia, but 1,641 sacks were invoiced to points in Alabama. The Great Atlantic & Pacific Tea Co. primarily sold foodstuffs but also dealt in vegetables for planting purposes, such as seed potatoes, onion sets, and cabbage sets. It sold seed potatoes not only to home gardeners but to planters of small commercial acreages. The Commission Co. invoiced the remaining 24,926 sacks to over 30 separate dealers in Florida and Georgia, but invoiced 2,309 to points in Alabama. All of the consignees were dealers in vegetables and groceries, and the primary volume of their trade was in articles for food. But there was testimony that some of these dealers customarily handled seed potatoes for planting purposes and there was no evidence that any of them did not. Respondent previously had sold seed potatoes to the Atlantic Commission Co. and that company had used channels of distribution comparable to those used in this instance. There was no evidence of the reconsignment of any of these seed potatoes for table stock, or of the diversion of any of them from the commercial channels theretofore usually used for sales of seed potatoes in this area during the planting season. Exception has not been taken to the States designated or to the times when the sales were to be made.

The evidence also did not support the suggestion that some of these potatoes were unsuitable for planting in the areas designated. It was not enough that one witness said that only 20 percent of the original shipment consisted of potaoes belonging to the three most popular varieties grown in Florida in that year.

There was no evidence of bad faith, neglect or carelessness on the part of respondent in performing its contractual obligations. There was no evidence of any intent of respondent that the potatoes be sold for table use. It freely acknowledged the existence of the international agreement and declared its purpose to cooperate with it.

It was conceded that these potatoes were specially suited for use as seed but also that they were of high-grade edible quality. There was, however, no evidence that any substantial part of these potatoes ultimately was eaten. The most that appeared was that 10 pounds of the seed potatoes were sold by a grocery in St. Augustine, Fla., to two women who appeared to be housewives buying for home use. There was also evidence that a few potatoes, probably from the shipment, were sold to customers of the same type by a Jacksonville store and by an A. & P. market in Atlanta, Ga.

In sum, all that respondent did was to sell seed potatoes, labeled as seed potatoes, in seeding time to concerns which normally dealt in seed potatoes. Under these circumstances, the district court was not clearly in error in making the findings it did or in directing the verdict for respondent on the ground that no breach of contract was shown (*Walling* v. *General Industries Co.* (330 U. S. 545)).

In view of the foregoing, there is no occasion for us to consider the other questions discussed by the court of appeals. The decision in this case does not rest upon them.

Affirmed.

APPENDIX

EXCHANGE OF NOTES BETWEEN THE CANADIAN AMBASSADOR TO THE UNITED STATES AND THE ACTING SECRETARY OF STATE OF THE UNITED STATES, NOVEMBER 23, 1948

THE CANADIAN AMBASSADOR TO THE SECRETARY OF STATE

CANADIAN EMBASSY,
Washington, D. C., November 23, 1948.

The Honorable GEORGE C. MARSHALL,
Secretary of State of the United States,
Washington, D. C.

SIR: I have the honor to refer to the discussions which have taken place between the representatives of the Government of Canada and of the Government of the United States of America regarding the problems which would confront the Government of the United States in the operation of its price support and other programs for potatoes if the imports of Canadian potatoes, during this current crop year, were to continue to be unrestricted. After careful consideration of the various representations which have been made to the Canadian Government on this subject, the Canadian Government is prepared to:

1. Include Irish potatoes in the list of commodities for which an export permit is required under the provisions of the Export and Import Permits Act.

2. Withhold export permits for the movement of table stock potatoes to the United States proper, excluding Alaska.

3. Issue export permits for the shipment of Canadian certified seed potatoes to the

---

[3] "We have little difficulty in seeing in the evidence breach of contract on the part of defendant and damage resulting to the United States from the breach" (204 F. 2d, at 658).

[4] See note 2, supra.

United States, but only under the following circumstances:

(a) Export permits will be issued to Canadian exporters for shipments to specified States in the United States and such permits will only be granted within the structure of a specific schedule. The schedule is designed to direct the shipment of Canadian certified seed potatoes into those States where there is a legitimate demand for certified seed potatoes and only during a short period immediately prior to the normal seeding time. A draft of this schedule is now being jointly prepared by Canadian and United States officials.

(b) Export permits would only be granted to Canadian exporters who could give evidence that they had firm orders from legitimate United States users of Canadian seed potatoes. Canadian exporters would also be required to have included in any contract into which they might enter with a United States seed potato importer a clause in which the importer would give an assurance that the potatoes would not be diverted or reconsigned for table stock purposes.

(c) The Canadian Government would survey the supply of Canadian certified seed potatoes by class and consider the possibility of giving precedence to the export of foundation and foundation A classes of certified seed.

(d) The names and addresses of the consignees entered on the export permit would be compiled periodically and this information would be forwarded to the United States Government.

In instituting a system which has the effect of restricting exports of Canadian potatoes to the United States, the Canadian Government recognizes a responsibility to the Canadian commercial grower in certain surplus potato areas and is prepared to guarantee a minimum return on gradable potatoes for which the grower cannot find a sales outlet. Although the details of such a program have not been finalized, it is anticipated that the Canadian Government will announce, at approximately the same time as potatoes are placed under export control, a floor price which will be effective April 1, 1949, for certain carlot shipping areas in the East. To implement this program the Canadian Government would inspect the potato holdings of commercial growers in Prince Edward Island, and several counties of New Brunswick, on or after April 1 and would undertake to pay a fixed price for every 100 pounds of Canada No. 1 potatoes found in the bins. It is not anticipated that any actual payment would be made at that time and it would be understood that, if any of the potatoes examined were subsequently sold or used for seed purposes, the owner would forfeit any claim for assistance on such potatoes. In other words, the Canadian Government would make no payment on potatoes which move into export trade or which are used for seed purposes.

It should be noted that the Canadian proposals to institute export permit control on Canadian potatoes and to inaugurate a price support program are contingent upon assurances from the United States Government that:

(a) The United States Government will not hereafter impose any quantitative limitations or fees on Canadian potatoes of the 1948 crop exported to the United States under the system of regulating the movement of potatoes from Canada to the United States outlined herein.

(b) The Canadian Government proposal, as outlined herein, to guarantee a floor price to certain commercial growers in the Maritime Provinces would not be interpreted by United States authorities as either a direct or indirect subsidy and that in consequence there would be no grounds for the imposition of countervailing duties under section 303 of the United States Tariff Act of 1930 (46 Stat. 687).

If the United States Government in its replying note accepts the Canadian proposals and gives to the Canadian Government the assurances required, as outlined above, this note and the reply thereto will constitute an agreement on this subject.

Accept, Sir, the renewed assurances of my highest consideration.

H. H. WRONG.

THE ACTING SECRETARY OF STATE TO THE CANADIAN AMBASSADOR

NOVEMBER 23, 1948.

His Excellency HUME WRONG,
Ambassador of Canada.

EXCELLENCY: The Government of the United States appreciates the assurance of the Government of Canada contained in your note No. 538 of November 23, 1948, that the Government of Canada is prepared, contingent upon the receipt of certain assurances from the Government of the United States to establish the controls outlined therein over the exportation of potatoes from Canada to the United States.

In view of the adverse effect which unrestricted imports of Canadian potatoes would have on the potato programs of the United States and the fact that it is anticipated that the Canadian proposal will substantially reduce the quantity of potatoes which would otherwise be imported into the United States, and in the interest of international trade between the United States and Canada and other considerations, the United States Government assures the Canadian Government that it will not hereafter impose any quantitative limitations or fees on Canadian potatoes of the 1948 crop imported into the United States under the system of regulating the movement of potatoes to the United States outlined in the Canadian proposal.

The Government of the United States also wishes to inform the Canadian Government with respect to that Government's proposal to guarantee a floor price to certain commercial growers in the Maritime Provinces, that in the opinion of the Treasury Department, the operation of such a proposal as outlined by the Canadian Government would not be considered as a payment or bestowal, directly or indirectly, of any bounty or grant upon the manufacture, production, or export of the potatoes concerned and no countervailing duty would, therefore, be levied, under the provisions of section 303, Tariff Act of 1930, as a result of such operation of the proposal on potatoes imported from Canada.

The United States Government agrees that your note under reference, together with this reply, will constitute an agreement on this subject.

Accept, Excellency, the renewed assurances of my highest consideration.

ROBERT A. LOVETT,
Acting Secretary of State of the United States of America.

Treaties and Other International Acts, Series 1896, Department of State, Publication 3474.

[From the Wall Street Journal of February 15, 1955]

THE POTATO CASE

Last week the Supreme Court decided *United States* v. *Capps*, litigation known among lawyers as "the potato case." In doing so, the High Court left unanswered the question of the legality of an executive agreement placed squarely before it by the fourth circuit court of appeals.

There were two questions before the High Court in the potato case. One was whether a man named Capps had violated a contract—flowing from an executive agreement—which prohibited him from selling Canadian potatoes in this country for table use. The other was whether the executive agreement itself was legal. The High Court exonerated Capps on the ground that he had not violated the contract. But it passed over the question of whether the executive agreement was legal even though the court of appeals held that it was not.

Now the High Court had a right to act thus and we certainly impute no wrong motive to what was done. Courts are reluctant, and in most cases doubtless rightly so, to decide a case on a constitutional question when it can be decided on a question of evidence.

Still, it seems to us that, as an article on this page today points out, the High Court's decision adds up to an implication that this particular executive agreement was all right.

For the evidence and the executive agreement are inextricably mixed in the Capps case. How can a contract based on an executive agreement be valid if the agreement is not valid? Or, said another way, if the contract was valid the executive agreement must also have been legal. It seems to us that that is the only inference to be drawn from the High Court's silence.

If, however, it was a valid agreement, where do the prerogatives of the executive department begin and where do the powers of the Congress end?

Many learned lawyers have inferred from other Supreme Court decisions that there is small limit—if any at all—to what can be done through treaties and executive agreements, even to the point of overriding the Constitution.

It is puzzling to us why there is so much opposition to spelling out in exact language just how far such international agreements should go. It is even more puzzling why such a basic question as safeguarding the Constitution should be, politically, such a hot potato.

[From the Wall Street Journal of February 15, 1955]

POTATOES AND PACTS—SUPREME COURT'S SILENCE ON SPUDS GIVES NEW AMMUNITION TO TREATY-CURB BACKERS

(By William H. Fitzpatrick)

Less than 12 months ago the United States Senate was in steamy debate about some Missouri ducks and a need for amending the Constitution. This year, when the debate about treaties and executive agreements begins again, the ducks will be dished up with some Irish potatoes grown in Canada and sold in Florida.

If all this sounds like an improbable legislative potpourri, there's some reason for it. The ducks and the potatoes figured in United States Supreme Court cases which many lawyers think have stretched the power of treaties and executive agreements to the point of overriding the Constitution.

In the duck case (*Missouri* v. *Holland*) the danger comes, as some lawyers see it, from what the Court had to say. In effect the Court said that Congress, through a treaty, acquired powers that Federal courts previously had said the Congress did not have through the Constitution. This and subsequent cases led to proposals to amend the Constitution so that some restraints would be placed on treaties and executive agreements. Senator BRICKER's amendment was whittled away bit by bit, but 60 Senators voted for the amendment by Senator GEORGE to spell out more plainly the limits of the treaty and executive agreement powers; it lost by only one vote.

Now just the other day the United States Supreme Court decided the potato case—*United States* v. *Capps*. The proponents of new constitutional safeguards see dangers in that decision not from what the Court had to say but from what the Court did not say.

This case reached the High Court this way: In 1948, Congress supported Irish potatoes at 90 percent of parity. Canadian potatoes were unsupported, and their price was lower despite tariff and freight charges. A great many Canadian potatoes found their

way into the United States and United States potatoes sought the shelter of 90 percent of parity. As a remedy the Congress authorized investigations by the Tariff Commission, under the President's direction, looking to a limitation of imports or to an increase in import fees.

Instead of following the directive of the Congress, the executive department acted through diplomatic channels and an executive agreement was signed by the Acting Secretary of State Robert A. Lovett and Canada's Ambassador Hume Wrong. The agreement was that Canada would restrict export of potatoes to the United States with the exception of seed potatoes and the American importers of the seed potatoes would be obligated to guarantee that the potatoes would be planted and not eaten.

MR. CAPPS' TROUBLES

Subsequently, Guy W. Capps, Inc., a Virginia importer, brought in for use in Florida and George 48,544 sacks of certified Irish seed potatoes which Capps sold to a commission house. The United States Government then sued Capps for $150,000 on the ground that the importer had sold the potatoes for table use in violation of the agreement between Canada and the United States.

The amount of damages was arrived at by Government attorneys who reasoned that every sack of imported potatoes which found its way into the food market displaced an equal amount of domestic potatoes—so this meant the Government had to buy that many more domestic potatoes under the price support program.

The case was tried in the Eastern District Court in Virginia and the Federal judge there decided against the Government, saying that there was not sufficient proof that Capps had sold the potatoes other than as seed potatoes.

The Government appealed the case and the Fourth Circuit Court of Appeals also decided against the Government—but on different grounds. The judges of the Fourth Circuit found that there was some damage to the Government because of breach of contract on the part of Capps, but they said that the executive agreement entered into by the State Department and the Canadian Ambassador was void.

These judges said that this agreement was void because it had not been authorized by the Congress and that it contravened the provision set up by the Congress for procedure through the Tariff Commission.

Thus a far more important question than the Government's loss through any contract breach was posed—and answered—by the Fourth Circuit Court of Appeals. The question was whether the executive department could evade a clear Congressional directive designed specifically to carry out an act of Congress and attempt to settle an issue in its own way. The appeals court judges said "No."

The United States Supreme Court, when the case finally reached its docket, chose not to look at the question of executive agreements at all. The high court decided that the District judge was right when he ruled there was insufficient evidence of a breach of contract.

But in its choice between the two different rulings it is fair to infer that the high court did not want to touch on the question of executive agreements overriding Congressional directives. It is, in fact, the practice of the court not to decide a case on a Constitutional question where the decision may be found in some other question. And in the potato case it was not necessary to do so since the high court could agree with the District Court that evidence of breach of contract was lacking.

However, in this District Court decision there seems to be an underlying assumption that there was a valid executive agreement between the United States and Canada.

NOT ENOUGH FOR A JURY

The district court's opinion said in part: "Now, assuming that the court is correct in holding that that stipulation (to sell the potatoes only as seed) is an agreement within the meaning of the executive treaty or an assurance, as it is called in the executive treaty, to the effect that the potatoes would not be diverted or reconsigned for table stock purposes—I say assuming that the court is correct in holding that this provision is an assurance, there is no proof here sufficient to go to the jury" that any wrong was done.

So the questions raised are: Could a contract limiting the resale use of Capps' potatoes have existed under the circumstances without the executive agreement? And if the State Department was not empowered—as the appeals court said it was not—to make such an agreement, then how could any contract based on the agreement be valid?

While the Supreme Court did not specifically say the executive agreement was valid it went on to answer the question whether Capps had violated it, and answered that question by agreeing with the district court. Thus by logic and implication the Supreme Court's silence on this question of the power of executive agreements to override the will of Congress is a tacit admission that such power exists.

In any event, those who support the proposals to limit the treaty and executive agreement powers will certainly assume exactly that until the High Court does speak out directly on the subject.

Indeed, the assumption is a reasonable one, for there is small basis for believing that the High Court would hold otherwise in the case of a congressional mandate when a previous decision has held that a treaty (in *Missouri* v. *Holland*) can override the tenth amendment and grant power to enact legislation which would be unconstitutional in the absence of the treaty. Also, the Supreme Court has held (in *U. S.* v. *Pink*) that an executive agreement could override the part of the fifth amendment protecting property rights.

SIGNIFICANT LETTERS

The Court said: "If the President had the power to determine the policy which was to govern the question of recognition (of Russia), then the fifth amendment does not stand in the way of giving full force and effect to the Litvinov assignment." The Court even held that the exchange of letters between Mr. Roosevelt and Mr. Litvinov had the stature of a treaty.

In view of what the courts have said and not said, it may be fairly asked whether any other part of the Constitution can stand in the way of giving full force and effect to other executive agreements or treaties. It is a question which not only lawyers but Senators will soon be asking themselves.

ADJOURNMENT TO MONDAY

Mr. BIBLE. Mr. President, since there does not appear to be any further business at this time, I move that that Senate adjourn until Monday next, at 12 o'clock noon.

The motion was agreed to; and (at 1 o'clock and 51 minutes p. m.) the Senate adjourned until Monday, February 21, 1955, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 18, 1955:

DEPARTMENT OF THE ARMY

Chester R. Davis, of Illinois, to be Assistant Secretary of the Army, vice Charles C. Finucane, appointed Under Secretary of the Army.

FEDERAL RESERVE SYSTEM

Charles Noah Shepardson, of Texas, to be a member of the Board of Governors of the Federal Reserve System for the remainder of the term of 14 years from February 1, 1954, vice Paul Emmert Miller, deceased.

UNITED STATES CIRCUIT JUDGE

Ben F. Cameron, of Mississippi, to be United States circuit judge, fifth circuit, vice Edwin R. Holmes, retired.

UNITED STATES PUBLIC HEALTH SERVICE

The following candidates for personnel action in the Regular Corps of the Public Health Service:

I. FOR APPOINTMENTS, SUBJECT TO QUALIFICATIONS THEREFOR AS PROVIDED BY LAW AND REGULATIONS, TO BE EFFECTIVE DATE OF ACCEPTANCE

To be assistant surgeons

John W. Glotfelty — John F. Ice
James D. Tovey — Inez L. Ice

To be assistant dental surgeon

George J. Yocum

WITHDRAWAL

Executive nomination withdrawn from the Senate Friday, February 18, 1955:

POSTMASTER

Luther V. Taylor, Sr., to be postmaster at Belmont, Miss.

HOUSE OF REPRESENTATIVES

FRIDAY, FEBRUARY 18, 1955

The House met at 11 o'clock a. m.

Rev. Francis J. Blake, Holy Family Church, Nutley, N. J., offered the following prayer:

Let us pray.

Almighty and eternal God, supreme and perfect Lawmaker, to know whom is to love, to serve whom is to reign, look graciously upon these Thy servants, the chosen representatives in their Government of the people of the United States of America. Strike their memories, so that they may be ever grateful for Thy past blessings; illumine their intellects so that they may increasingly know Thy truth; strengthen their wills so that they may always seek Thy and Thy people's good. Grant that the silvered oratory of their deliberations may ever enjoy the golden sunshine of Thy blessing. Grant that these who govern Thy people may always be governed by Thee. Through Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MIGRATORY BIRD CONSERVATION COMMISSION

The SPEAKER laid before the House the following letter of resignation, which was read by the Clerk:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D. C., February 17, 1955.

Hon. SAM RAYBURN,
Speaker, House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: I hereby tender my resignation as a member of the Migratory Bird Conservation Commission.

Respectfully submitted.

PRINCE H. PRESTON,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to the provisions of title 16, section 715a, United States Code, the Chair appoints as a member of the Migratory Bird Conservation Commission to fill the existing vacancy thereon the gentleman from Missouri, Mr. KARSTEN.

SPECIAL ORDER GRANTED

Mr. O'HARA of Illinois asked and was given permission to address the House for 30 minutes on Wednesday, February 23, 1955, following the legislative program of the day and the conclusion of any special orders heretofore entered.

CONSTRUCTION OF AERONAUTICAL RESEARCH FACILITIES

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 148), which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 2581) to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

TRADE AGREEMENTS EXTENSION ACT OF 1955

Mr. COOPER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 1, with Mr. BOLLING in the chair.

The Clerk read the title of the bill.

Mr. COOPER. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. HOLIFIELD].

Mr. HOLIFIELD. Mr. Chairman, I ask unanimous consent to proceed out of order for 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOLIFIELD. Mr. Chairman, on yesterday a colloquy ensued on the floor in which my right to qualify and to vote on the pending legislation was questioned. At that time I withdrew my request for an opportunity to address the House under a question of personal privilege and I do not seek that at this time. I do believe, however, in the interest of keeping the RECORD straight, and in view of the fact that this colloquy appears on page 1684 of yesterday's RECORD, that I should make a simple statement of the facts.

I was seated in the righthand side of the Chamber between two of my colleagues, the gentleman from Illinois [Mr. PRICE] and the gentleman from California [Mr. SISK], when my name was called. Due to the confusion of our conversation, I failed to respond until the next name was called. Immediately thereafter my colleagues from California [Mr. SHEPPARD and Mr. KING] called me from my seat and I stepped outside the door to confer with them on a matter concerning our delegation. I stepped back in and waited until the end of the rollcall when I appeared in the well and qualified. I have been informed that my action was taken in full accord with the rules of the House. I will say, in justice to the gentleman from West Virginia [Mr. BAILEY] that he immediately came to my side and apologized for his challenge, telling me that some of his own colleagues from West Virginia had informed him that I was present.

I bear no malice or ill will, because I consider the gentleman from West Virginia [Mr. BAILEY] as one of my close friends of many years' standing, and it was simply a mistake. However, in view of the closeness of the vote, I felt the House deserved this explanation.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I am glad to yield to the gentleman.

Mr. McCORMACK. The gentleman from West Virginia is one of the hardest fighting Members of the House, and we all respect him. Of course, we know that in the heat of battle many things happen; we all do things that on mature reflection we would not do. But I can testify to the fact that my friend the gentleman from California [Mr. HOLIFIELD] was around here all day on the floor of the House. I had one conference with the gentleman for at least 10 minutes on a matter concerning our Committee on Government Operations. The gentleman was here all day.

Mr. HOLIFIELD. I was here all day, and I thank the majority leader.

Mr. PRICE. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. PRICE. I can also testify to the fact that the gentleman from California was in the Chamber during the rollcall, because he was sitting beside me during most of the call. I remember his going down and talking to Mr. SHEPPARD, and I know that he was in the Chamber during the rollcall.

Mr. HOLIFIELD. I thank the gentleman. As I said before, I bear no malice or ill will toward the gentleman from West Virginia because we know how earnestly he is involved in this bill and how earnestly he fights for the things he believes right. We all make mistakes at times; I make them myself.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. KING].

Mr. KING of California. Mr. Chairman it will be my purpose to speak in favor of the enactment of H. R. 1, the Trade Agreements Extension Act of 1955. It will also be my purpose to discuss with my colleagues here in the House a particular industry with respect to which I do not believe the trade agreements authority has been either properly or wisely used. I refer to the American tunafish industry.

The bill, H. R. 1, which is before us today, was introduced by our distinguished chairman of the Committee on Ways and Means, the Honorable JERE COOPER, of Tennessee. It would extend the authority of the President to enter into trade agreements to June 30, 1958.

I support H. R. 1 because I realize that our foreign economic policy is an integral part of our overall foreign policy. To attempt to disassociate the one from the other would be most impractical. The President of the United States has stated, "If we fail in our trade policy, we may fail in all." During the committee's public hearings held on H. R. 1, 6 members of the Cabinet and the Director of the Foreign Operations Administration appeared before the committee and reiterated this theme as expressed by the President. In expressing their endorsement of this measure, these officials from the executive branch of our Federal Government assured the committee that the trade agreements program would be administered in such a way as to give proper recognition to the well-being of our domestic economy and the best interests of American agriculture, labor, and industry.

I am impressed by the persuasion of the President of the United States and his Cabinet officers that this authority will be used to improve the prosperity of the United States and to strengthen the free world alliance against communism. I respect their commitment that this expanded authority will be administered in such a way as to foster the interests of all segments of our economy.

There can be no question that the United States is today the most potent economic force in the world. Whatever foreign economic policy the United States may adopt will greatly influence the activities of other nations in this respect. However, it is essential that if a liberalized foreign economic policy on the part of the United States is to be a success we must see to it that the other nations of the free world similarly liberalize their trade programs. There are but two ways to combat communism throughout the world, either economically, or by violence.

Without referring to any specific data, a study of any statistics of American production, exports and imports clearly indicates America's essential need for foreign markets in which to sell our surplus production. To be paid in dollars

for our exports we must be ready to pay dollars for our imports. With 4.3 million jobs attributable to work created by our export and import trade, it is obvious that the best interests of America lie in expanding rather than contracting the volume of trade we do with other nations. The United States now has trade agreements relations with 42 countries. The vast preponderance of the total volume of our foreign trade is done with nations with whom we have existing trade agreements.

Thus, I support the continuation of the trade agreements program and the enactment of H. R. 1. In doing so, I would like to express my concern with the manner in which the peril-point and the escape-clause provisions of existing law have been administered.

It was clearly the intent of Congress at the time these safeguards were adopted that they should be used to stave off the threat of injury or to correct actual injury to our domestic industries. In my opinion, proper consideration has not been given to the congressional intent in using the peril-point and escape-clause safeguards. I believe I can properly assure my colleagues in the House that the Committee on Ways and Means will take a very active interest in regard to these matters in the future.

In my great State of California we have a tuna-fishing industry that is now struggling for its very survival because of the manner in which the trade agreements program has been conducted by the executive branch of our Government. There exists today widespread unemployment in the domestic tuna-fishing industry. Many small-business men with substantial investments in ships, which can be used only for fishing for tuna, find themselves confronted with operating losses which jeopardize their investments. I will not detail the present tariff status of tunafish but merely state that tariff reductions have been substantially accomplished to the extent possible under the law and that certain categories of tunafish are on the free list. Some of the tariff concessions were made in negotiations with countries who were not even principal suppliers or even substantial suppliers and then other more important sources of American imports took advantage of the most-favored-nation clause to swamp our markets.

In the face of this tariff reduction the imports of fresh or frozen tuna have increased from 9.1 million pounds in 1948 to an estimated 103.3 million pounds in the first 9 months of 1954. Imports of canned tuna have similarly increased. Because of these rising imports and the threatened destruction of our domestic tuna industry I introduced remedial legislation in the 82d Congress which passed the House of Representatives and which was reported favorably by the Senate Finance Committee. To my regret and to the detriment of our tuna-fishing industry this legislation failed to pass in the Senate.

In the 83d Congress I again introduced remedial legislation but no consideration was given to it during that time with the result that our domestic industry further deteriorated. With the convening of the 84th Congress I introduced H. R. 674 to again aid the tuna-fishing industry.

Mr. Chairman, it is my prediction that if the Trade Agreements Authority delegated to the President is not more wisely administered so as to properly safeguard the interests of our domestic industries, the Congress will find increasingly numerous instances in which congressional action will be necessary to prevent the destruction of American jobs and investment. The time has already come when such congressional action is needed with respect to the American tuna-fishing industry.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Florida [Mr. HERLONG].

Mr. HERLONG. Mr. Chairman, as a member of the House Committee on Ways and Means, it is a pleasure for me to join with our distinguished chairman, the Honorable JERE COOPER, and my other colleagues on the committee in presenting to the House the bill H. R. 1.

The pleasure I derive from joining in the support of this important and far-sighted legislation stems from the fact that I am convinced the enactment of this measure will represent a substantial contribution to the prosperity of our American agriculture, industry, and labor, and at the same time strengthen America's foreign policy.

During the course of the committee's extensive public hearings and thorough executive sessions on H. R. 1 I have been interested in determining whether or not our efficient American industries might be hurt by this modest liberalization and extension of the trade agreement's authority of the President. I did not wish to support legislation that would cause damage to a segment of our economy or an important industry.

To be frank, I was somewhat concerned about the effect this legislation might have on the cotton textile industry which exists in the southeast region of our Nation. I want to see America's textile plants flourish. I want more manufacturing establishments and businesses to come not only to the South but to arise in all the other areas of our country.

Thus, in spite of the fact that foreign trade is a necessity for the industries of my own State and is essential to the South's tobacco farmers, cotton growers, and fertilizer producers, to cite only a few, I wanted to get the facts on what this legislation would do for all America. I wanted all the facts, so that I could assure myself that, if I supported H. R. 1, I had done what was best in the national interest, as well as what was best for the Southeast and for Florida. The facts were a revelation, and those facts are why I support H. R. 1.

A lot of my southern friends were concerned about the effect of this bill on textiles. They had been hearing from people in the cotton textile industries with all manner of complaints about what this bill would do to them.

I found that, although spokesmen for the cotton textile industry had been appearing in opposition to the Trade Agreements Act since before World War II to claim that the industry would be ruined if the program continued, production of cotton cloth was actually higher in 1954 than in 1939. Production was higher by more than a billion square yards. I found that, though these spokesmen told of how the program would force our wage levels down to that of oriental countries, the witness of the American Cotton Manufacturers Institute stated that the "cotton textile industry is proud of the fact that over the last 20 years it has succeeded in raising the average wage rate paid its employees by roughly 500 percent." That 20 years, by the way, is the 20 years in which the reciprocal trade agreement program has been in operation.

I found that, although all the ills of the cotton textile industry were attributed by these witnesses to imports, actually we only brought in about one-half of 1 percent of our domestic production last year.

I found also that our cotton textile industry has an important stake in the export market. The United States exported to foreign markets over 6 percent of our entire production of cotton cloth in 1954. Now, you cannot have your cake and eat it, too. To anyone who investigated the facts, it is apparent that our textile industry's best interests lie in insuring that we maintain and expand our export markets without too much concern over insignificant imports which were only one-tenth of our exports.

In the absence of outright dollar grants there is no way that the Nations of the free world can buy our exports unless we are willing to import. Because of our dominance in world economic affairs, it is a safe assumption to make that United States policies in fields connected with tariff are of key importance both to the American and the foreign public. The pattern of trade policy that the United States adopts will certainly be carefully observed and probably emulated by our allies in the free world. Therefore, it is almost certain that the adoption of a stringent and unduly protective foreign economic policy on the part of the United States would result in increased trade barriers to our American exports.

How would the cotton textile industry fare if we stopped all imports but in the process lost our export markets? That additional 6 percent of production thrown on our domestic market if they could not export it would have an infinitely greater impact on the industry than imports of one-half of 1 percent could conceivably have.

I am concerned that our cotton textile manufacturers have apparently let the protectionist advocates in their industry appear as their spokesmen. I am worried that this attitude toward international trade will help the protectionist elements in Cuba, Venezuela, and Canada get barriers imposed on our exports of cotton textiles to these, our main foreign markets.

The Canadian Minister, C. D. Howe, recently stated that an industry can not pursue two self-contradictory goals—unrestricted access to the markets of others, combined with freedom to keep out imports. I hope the statesmen in

our cotton textile industry will assert their leadership and protect the true interests of their industry.

My investigation also showed that despite efforts to attribute the 22-percent drop in employment between 1951 and 1954 in the textile mills to import competition, production of cotton textiles was 200 million square yards greater in 1953 than in 1951. The drop in employment was not due to imports. It was due to technological progress in the industry itself.

I also found statements from the industry that the peril-point and escape-clause provisions have not been effective in protecting the industry. How they know that is beyond me. In the first place, the peril-point findings of the Tariff Commission have never been breached by any President in the administration of the Trade Agreements Act. In the second place, the cotton textile industry has never petitioned for an escape-clause investigation.

If I were not convinced that H. R. 1 provides all reasonable assurance of adequate protection to the cotton-textile industry, as well as to other efficient American industries, I would not support it. Secretary of State Dulles, Secretary of Commerce Weeks, and Secretary of the Treasury Humphrey all assured the Ways and Means Committee that the interests of American industry, as well as of labor and agriculture, would be carefully taken into account in any tariff negotiations.

The program outlined in H. R. 1 is, as indicated by the Secretary of Defense, important to our national security. It is also a program to protect the interests of American workers and producers.

The bill before the House avoids any precipitous changes which would disrupt our economy. Only a 5-percent-a-year reduction is permitted. The peril-point and escape-clause provisions remain unimpaired. The Committee on Ways and Means has stated in its report that careful attention will be given to the administration of the escape clause. Every opportunity is given interested persons and organizations to present their points of view for the guidance of the President. Furthermore, any reductions in tariff rates must be done gradually over a 3-year period. This will provide an adequate period to permit adjustments to be made, if any are required.

In conclusion, I want to point out that a most important part of our leadership in the free world's efforts to deter Soviet aggression is to provide an economic foundation for a strong mutual defense. We must find a way to increase strength and security to counter both the Communist threats of aggression and the Communist efforts to foster disunity among the free world nations. This problem is more important today than it has ever been.

The President of the United States has warned, "If we fail in our trade policy, we may fail in all." To my many Republican friends on the left side of the aisle, I would say that our President is also the political leader of at least 50 percent of your party. In this matter of such great national importance he deserves the support of all of us here today. For these compelling reasons I urge the enactment of H. R. 1.

Mr. REED of New York. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS. Mr. Chairman, I am really happy for this chance to say a few words today because of what transpired here yesterday. The show put on here yesterday was the finest manifestation of political freedom I have ever seen. Men on both sides of the aisle listened to the voice of conscience and also to the voice of their constituencies. I hope they will do the same thing today. I hope we will stick together, because we, working together, have a chance to do yet what the people want us to do.

How can we do that? We can do that by voting for the motion to recommit. I think that motion to recommit which is difficult to draw will probably answer the wishes of every constituency everywhere in the country. At any rate, that is the last chance we have to do justice to our constituents and to our great country. I shall vote for the motion to recommit and if we lose I shall vote against the bill. If we do not win this afternoon, we have to go down before this on-rush of one-worldism. For myself, I do not want to be part of any one world program. The only one world that I will approve is the one that will come with the millennium I repeat that yesterday we made a fine showing, and I hope that the same forces that manifested themselves yesterday against political leadership and against congressional leadership and so forth, and who came to the front so magnificently, can stay together today. It is unfortunate that in a matter like this in which so many people are interested that we have to have some politics. I would prefer, if we could divorce ourselves from that, if possible, because the people back home who need this help and who do not know everything about congressional politics should not be deceived. I know the 200 or 300 or maybe 500 miners in my district who have not worked for a long time are not going to take any excuse that it is political—they want to know where their bread and butter is coming from and they would like to have a job and do an honest day's work like they have always done. I say, again, today is our chance to deliver to them what they are entitled to have.

With reference to this matter of reciprocal trade agreements—that has been before us on many occasions. It has been before us entirely too long. We had a chance last year to dispose of it, and we had what I thought was a fair bill which had been reported out by the Committee on Ways and Means. I mean it was fair from the standpoint of effort on our part and from a literary point of view and so forth. I do not know that I was so enthusiastically for it all, but anyhow, we had a pretty fair bill. But, somehow or other, they divided that bill—they split that bill into two parts and pressed both parts on for a vote in the House. We came on first with that part which I called a joke. It was not a substantial part of the bill. What did it provide? It provided for the appointment of a commission. That commission later became the Randall Commission. I said on the floor of the House at that time, when we went off on that tangent, that we were making a mistake and that I would not be in favor of that, and I was not in favor of it. I stated further, on this floor at that time, that the chances were, if a commission were appointed, because of my seniority, I would be appointed to the commission. I served notice at that time that I would not serve on any such commission because we did not need it. I did not know then what I know now or else I would have spoken even more vigorously than I did at that time. I thought that this group down here in Washington, which are supposed to work on these tariff matters and peril-point problems and on our tariff schedules and things like that, would not be more than a group of 25 or 30 people. The Committee on Ways and Means functions with less than that number as well as all these other big committees in the House and Senate. They function with less than that number. I was terribly surprised the other day when I asked how many of them there were on the payroll. How many do you think there were? About 350 of them. Three hundred and fifty of them working down there. Then, in spite of all this, they appointed a commission of I do not know how many to go around the world at $75 a day and their expenses, and what do you think they did. I think that the first thing they did was to name themselves the Randall Commission. I wish you would listen to me now. Do you know who this man Randall is? I have never seen him. I do not know him. He probably is a nice man. He never came before our committee. He is the man who is supposed to have written this bill. Why do you suppose he never came to see the Ways and Means Committee?

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I am glad to yield to the gentlewoman.

Mrs. CHURCH. I am sorry to interrupt the gentleman. I know he is most firm in his convictions, many of which I share. But, I would like to say that Mr. Clarence Randall, the president of Inland Steel, is one of the most honored civic-minded people in my district, a gentleman of high repute, and a man whose love for his country is second to none. I assure the gentleman that his efforts on the Randall Commission, on which he did a magnificent piece of work, whether we agree with the results or not, were in an utterly sincere attempt to help his country.

Mr. JENKINS. I am very glad that the gentlewoman has pointed that out, but I want to stay on this subject. That probably is all true and I do not doubt it at all, but we are now passing important legislation and we needed somebody to come before the committee to tell us what he meant by this bill which everybody said had been prepared by him. But when he did not come—do you know we asked a man over there who apparently was a close associate of Mr. Randall and who was from the commission, to see Mr. Randall and invite him to come to see us. This man came back and reported. What did he say? He said,

"Randall said the President would not let him come." Now then, gentlemen, let us think about that. Our great President, I do not think that he said that. Anyhow between them, whoever said that, or whatever happened, we never got a chance to see Mr. Randall. We never got a chance to ask him any questions. Just think of that. And that is not right. If he was so capable as to name a commission after him he should be anxious to show his appreciation. At any rate we ought to do things right. Until they are done right, they are wrong as far as I am concerned.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield.

Mr. GROSS. Does the gentleman have any rough figures on the amount of steel that is imported into this country from foreign countries, and what is the tariff on steel?

Mr. JENKINS. I do not have the exact figures. However, except for a few specialty items, imports of steel are negligible as compared to domestic production. I believe that the tariff ranges from 10 to 15 percent.

Now, there is one thing I have heard so often that I am really getting tired of it. They say "trade and not aid." Trade and not aid. If you could work that thing that would be all right. How are we going to work it when we have already given away millions and millions of dollars. We have given about all we have got to spare. I just returned from a trip around the world. Whenever you talk about aid that these foreign people need, when you talk about aid down in Calcutta for instance where I dare say that a thousand poor deserving women sleep on the pavements every night with their little babies nestled to their breasts, when you give aid to people all over the world who need it you have taken about all we have got and a whole lot more than we can spare. It just cannot be done.

You can get some people everywhere who will say that we ought to do this or we ought to do that. We ought to do whatever is right under all the circumstances. Where do I get my impression as to what is right, now? We are dealing with business people. We are not dealing with a lot of theorists. There was a man from Cincinnati who came before us, a fine gentleman, Mr. Taft, one of the finest people in the country. He has been coming before us year after year and he represents some organization. I do not know who it is exactly, but no doubt he represents some fine people. He comes from Cincinnati. He testified before the Ways and Means Committee for about 5 or 6 hours but I don't remember that he made any reference to any Cincinnati people as being among the list whom he represents. When I am talking about a business matter, I like to know what businessmen think about the matter. I have a report from the Chamber of Commerce in Cincinnati about this important matter. Here is what they say. They say, "We do not propose any attitude but one of friendly cooperation, with encouragement to other countries, but we believe the future prosperity of all can best be obtained by retaining a strong position for ourselves." They indicated strongly that they were opposed to H. R. 1.

That is what they say in Cincinnati. Who are they? There are about 25 or 30 officials of the Chamber of Commerce. Among them are the chief officials of some very large industries of Cincinnati. Also there are a number of the leading bankers of the city and a number of very big businessmen. In that list is the name of Mr. Charles Sawyer. That would be interesting to some of you Democrats. He is one of the finest men in the country in spite of the fact that he is a Democrat. He is a fine gentleman. That is the only thing wrong with him that I know of.

Now let us go a little further. Let us talk about some of these things. The gentleman from Florida said that nobody in his State was very much opposed to this measure. Mr. Chairman, it was pathetic that day after day, fine big-business men came before the Ways and Means Committee and testified positively against this bill. If you do not believe that, you just take this book of testimony and read it over. They came from every part of the country, from every place, and from every community they came. I was impressed with a man who came here from way down in Texas. He was a great wool producer. He almost made tears come to my eyes. I used to raise a few sheep myself, but he was a great raiser of sheep. You folks who need wool and woolen garments, you folks in the textile industry should read his testimony. That was testimony from a man direct from the field, a great producer of wool. His testimony was the same as all the sheepgrowers in the country. You surely are not going to turn them down. You cannot afford to do that, in order to do a little trade before aid.

Now let us talk about pottery. That is produced in great quantities in our section of the country. We have some of the finest pottery-producing plants in the world in my district. Eighty-six percent of all the dinnerwear purchased in the United States in 1953 came from some foreign country. Now think of that. All of these fine pottery producers in my country are faced with idleness. Some of them already are idle. I wish you would read the testimony of Mr. Joe Wells, of Newell, W. Va., who represents the United States Pottery Association of East Palestine, Ohio. He is to me the best authority on pottery in the whole country. He has appeared before our committee many times. I shall not worry you with many figures which I can supply easily. I shall only say that Mr. Wells said:

> Something like 86 percent of the present consumption of china tableware in the United States is imported.

He further says:

> We—
>
> Meaning the pottery business—
>
> have been steadily going down for years.

Men are going to be without work because our people are buying the pottery made in Japan, where people work for 6, 8, and 10 cents an hour, while in our potteries our men get $1.20 an hour. That is an old story, and I will not bother you with a lot of statistics like that. But figures count and so do the voices of my people back home. I hear the voice of my people, and I see them when I go home. I want to be able to go back home and tell them I have done the best I could for them and for my country. But we are not going to do the best we can for our country if we listen to the voice of aid and not trade; we had better aid ourselves first and then talk about aiding somebody else.

Let us get down now to glassware. We have, I think, in our district probably the finest glass plant in the United States—I am not sure about that—but it is a magnificent plant, located at Lancaster, Ohio. I am going to quote the word of one of the leading men in the world on facts relating to the glass business. He is the president of that plant himself, a fine, magnificent gentleman. His name is William Fisher. I will not read you all the letter. He says:

> We have from time to time indicated to you that we do not believe foreign manufacturers who pay their employees one-tenth or one-third of our wage rate should be given the special advantage this legislation would permit.

There is Mr. William Fisher, and he speaks for one of the finest glass factories in the United States. He has probably 2,000 men working in his plant and in his employment. This information came from him. I did not write to him, but he wrote to me and gave me very convincing figures.

I do not know much about textiles, but I know we had a great many people come in and talk about textiles, especially from the South—from the section of the country where Judge DAVIS comes from. We had some of the most lucid and the most convincing testimony about textiles. I do not see how many of the Members from the South can be for this legislation.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield to the distinguished gentleman from Georgia.

Mr. DAVIS of Georgia. I want to thank the gentleman for what he is saying and to tell him that I concur in his remarks.

Mr. JENKINS. I am glad to have the concurrence of the gentleman, because everybody knows there is no finer man in the whole Congress than our distinguished friend, Judge DAVIS, who has shown his high character on so many occasions here in our deliberations.

Now I want to talk for just a minute about oil and coal. We produce a lot of coal in my district and the surrounding area. I know there are a lot of fellows who think that the coal miner is someone kind of beneath somebody else. I was raised around the coal mines and used to work in the coal mines, so I know a little more about it than most of you. I want to tell you not to underestimate the coal miner. I will give you the story of one coal miner I knew who back in the old days worked a 10-hour day for a dollar a day. He raised his children, a large number of them, until 7 or 8 got to be schoolteachers and 2 or 3 got to be

lawyers. Some of them are fine businessmen. I tell you when you underestimate the coal miner you are just fooling yourself, because he is just as good a citizen as we have in this country.

Let me tell you a little also about the mineowner, about the man who owns the mine. I daresay that three-quarters or even nine-tenths of the Members of this Congress have never been inside of a coal mine. Many of these coal mines might cost as much as a million dollars. The owner has his works in there and his machinery in there; he has built houses for his people near his mines. He has made many plans and spent much money, and here comes somebody along and drops a lot of oil over here in the eastern coast, oil that comes from Venezuela, heavy residual oil that is dumped here for practically nothing. What has it done to the coal mines in West Virginia, in Ohio, in Pennsylvania, and other places where there are coal mines? It has practically ruined them. It is almost a shame that the Government has not taken notice of this long ago.

I say to you again, Mr. Chairman, you cannot dismiss this question by saying, "Trade, not aid." You cannot dismiss our people by telling them that kind of a story.

Mr. KELLEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. JENKINS. I yield to the gentleman from Pennsylvania.

Mr. KELLEY of Pennsylvania. It is strange to hear the arguments made by the proponents of the oil industry in reference to the damage done the coal industry. They try to point out that the coal industry has not been injured. I wonder what they think is being done with the residual oil that is being brought into the United States? They bring it in to seek a market and the only market they can get is that which displaces coal. They certainly do not bring it in to sell as food. The only thing it is used for is to displace coal.

Mr. JENKINS. I thank the gentleman for his statement.

Mr. Chairman, I want to say one thing that has not been mentioned here today or yesterday, either. The Committee on Ways and Means is not altogether an unwise committee. Sometimes our members are criticized. But do you not know that those members of the Ways and Means Committee who believe in this bill, H. R. 1, have convinced me of one thing. Here it is—they are scared to pass this legislation. They know H. R. 1 will not work. Why do I say that? Because one member of our committee has introduced a bill to provide that in all of these sections where there is going to be a lot of unemployment, in all those sections, the Government is going to come in and take those people away and teach them some new trade, or some other foolish notion like that. What do you think about that? That has been the most revolting idea that has come to me since I have been a Member of Congress all these years. They say they are going to send people in to take your people away. Do not send them into my section of the country because my coal miners will not go away. I serve notice that we are going to stay where our families are, where the fathers and mothers are buried. We live in America. We do not agree to anything like that. Just think about that. They have prepared that kind of a law. They are going to come in and take all of our people. They will try to come in and take your textile people, they may come in and take some of your farmers. They had better not come into our section because we are not going to go. We are going to stay where God put us and we are going to stay where we have a right to stay.

This is yet America.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Rhode Island [Mr. FORAND].

Mr. FORAND. Mr. Chairman, I am opposed to the enactment of the bill, H. R. 1, introduced by my friend and beloved chairman, the Honorable JERE COOPER.

I cannot support any measure which, in my opinion, will strike at the jobs and payrolls of the people from my great section of the United States, I refer to New England, and particularly my home State of Rhode Island. In my sincere and considered opinion that is what is at stake in the legislation that is before us today. In New England we are very much concerned over what consequences will flow to our textile, lace, jewelry, and rubber footwear industries if H. R. 1 is enacted.

In the past I have supported trade agreements program legislation every time it came before the House for consideration, and the record shows that in supporting such legislation, I have always maintained and insisted that in administering the program, the Executive should take appropriate steps to insure that he does not trade away an industry essential to our national welfare and security. I have always insisted that proper recognition be given to the line of distinction that exists between competition under free enterprise and destruction resulting from excessive imports of goods produced by sweat shop labor.

I was instrumental in having the escape-clause provision written into the law, at the time the Congress was writing the Trade Agreements Extension Act of 1951 and long before that to see that an escape clause was written into every agreement that was made. As a result, I am somewhat familiar with the congressional intent associated with the escape-clause provision of present law.

The intent of Congress was that the escape clause would be invoked by the President when it was shown that under an existing agreement imports of a particular article were of such quantity as to seriously injure or threatened to injure an industry.

The record of the Tariff Commission shows that the 59 applications made by industry for invocation of the escape clause were disposed of as follows: Pending 3, dismissed at applicant's request 3, terminated unanimously, without formal findings 2, dismissed after preliminary inquiry 8, Commission voting 3 to 3 on 3 cases, Commission split on 3 other cases, 5 to 1, 4 to 2, and 4 to 2.

The Commission decided againt escape action and made no report to the President in 22 cases, Commission decided in favor of escape action and sent a report to the President in 12 cases, and in 3 other cases, when the Commission voted 3 to 3 a report was sent to the President.

Out of 59 applications for relief under the escape clause filed with the Tariff Commission, 15 reports were sent to the President. In only 5 cases was the escape clause invoked, the President refusing to act on the other 10.

It is not surprising, therefore, that I am very much disturbed over the way in which this intended safeguard to domestic industry has been administered since its enactment.

At the time Secretary Dulles came before our committee in the recently completed public hearings on H. R. 1, I discussed with him the matter of the administration of the escape clause. In response to a question from me, Mr. Dulles indicated that the escape clause has had a psychological value in that it tends to cause foreign countries to cut down exports to the United States.

I will state categorically that the escape clause was not written into the law by the Congress of the United States for any psychological value it may have on foreign exporters but was instead included in the law to afford a safeguard and a measure of protection to our domestic industries.

Is it any wonder then that past experience prompts the question: "Who is to take the rap as a result of the new tariff powers given the President under the provisions of H. R. 1?"

The textile industry, including lace and narrow fabrics, is greatly concerned, and justly so, because textiles seem to be the principal item considered every time that a new agreement is considered. Tariff rates on textiles have been reduced to a point where any further reduction may well spell the doom of that industry.

This is very serious, particularly to my home State of Rhode Island where textiles furnished more than half of the job opportunities in the State a few years ago and today we find that this has been cut to about one-third, resulting in serious unemployment. Since 1951 the textile industry in New England has suffered substantial losses in production despite the fact that in the same period—from 1951 through 1954—all industrial production rose by 10 percent in the United States. The downward trend in the textile industry resulted in a reduction of 268,000, or 20 percent in the number of jobs in the textile industry. This loss in job opportunities in textiles is especially serious when it is considered that they have been heavily concentrated in relatively few communities. In 1950, 20 percent of all jobs in Rhode Island were in textiles. And let me point out to my colleagues that this loss of jobs is not limited solely to the New England area. In the 1951–54 period total textile jobs in the South declined by 41,000, or 7 percent.

An area or community stranded by the loss of one of its principal industries,

such as textiles, finds it extremely difficult to attract other industries. In New England the textile industry is still the largest manufacturing employer with 170,000 jobs. In each of the States in the area it is an important economic factor. It is virtually axiomatic that one textile job lost and not replaced means a loss to the community of twice the textile-wages cutoff. Many other New England industries such as trucking, railroads, textile machinery, utilities, and the innumerable suppliers of goods and services, are dependent upon the well-being of the textile industry for their existence.

The enactment of H. R. 1 could give to the Japanese textile industry the power to destroy our domestic industry. The cost of producing various cotton fabrics in the United States exceeds the cost of producing the same fabrics in Japan by 43 to 70 percent and permits the Japanese textile industry to undersell American manufacturers in the American market even under the present tariff rates. I would direct my colleagues' attention to page 1646 of the printed hearings on H. R. 1 and refer them to the table comparing production costs in the United States and Japan.

Under present tariff conditions America's textile industry has already sustained serious reductions in employment, production, and markets. Any further tariff reductions that may be made under existing authority or under the authority which would be granted by H. R. 1, will surely represent the trading away of our American textile industry. The fact that our textile industry has been prosperous in the past cannot be construed to indicate further tariff cuts are in order. The pattern of imports in the past, during the abnormal postwar period, is not as significant as the trend of more recent years where we find United States imports of cotton textiles from Japan increasing from a level of 30.6 million square yards in 1953 to 50.3 million square yards in 1954.

A segment of the textile industry is the American lace industry comprised of some 80 manufacturing plants located in 9 States. The principal part of the industry is concentrated in my State of Rhode Island. I say to you, my colleagues, that I speak from personal knowledge when I say that in many of the communities in which these plants are located, the textile and lace factories provide the principal payrolls in those communities. Those payrolls provide American homes, schools, and taxes.

Principal foreign competition for our American lace industry comes from France. It is estimated that the American wages are approximately eight times those paid by the French in the lace industry. The American lace industry holds no significant technological advantage in efficiency or equipment. The decisive factor in the ability of foreign competitors to undersell domestic producers is the wide disparity in wages. It is therefore apparent that reductions of tariffs in this area will surely constitute the destruction of a small but great American industry.

I invite your attention to another industry whose very existence would be threatened by the enactment of H. R. 1. I refer to the low- and medium-priced jewelry industry. Nearly 75 percent of this industry is found within 20 miles of Providence. It is the second ranking industrial employer in the State of Rhode Island. Approximately one-third of the people of Providence depend solely upon this industry for their livelihood as do entire communities in southeastern Massachusetts.

It is a characteristic of the industry that it has a high labor cost factor. It is an industry in which American technology cannot be converted into production efficiency. Wages in this industry range from 40 to 60 percent of manufacturing cost. Principal import competition comes from Japan and Germany. Prewar imports of $1.5 million a year have increased in the postwar period so that imports in 1953 amounted to nearly $15 million.

This rise in imports matches, in timing and proportion, the rejuvenation of the Japanese and German jewelry industries. Price comparison between the foreign and domestic producers readily explain this import increase. Japanese products are often landed, with duty paid, at 25 to 40 percent of the price of a similar domestic product. Imports from Germany are sold at 50 to 60 percent of domestic price.

A comparative study of the wages of our principal foreign competitors readily provides the basis for this extreme price differential. American jewelry production workers average about $1.47 an hour, German workers about 32 cents an hour, and Japanese shop workers about 12 cents per hour. In view of these figures, it is apparent that further tariff concessions in the area of low- and medium-priced jewelry will result in the elimination of another American industry.

Mr. Chairman, there can be no disagreement that the passage of H. R. 1 will inevitably increase imports, with the heaviest burden falling on those industries already struggling to survive. I submit to you that this is not the time to authorize further tariff reductions. We have not had adequate opportunity under normal competitive conditions to study the consequences of the tariff concessions that have already been granted. It is essential that we have a considerable period of time in which to determine whether our present tariffs, under conditions which might be termed "competitively normal," are too high or too low to afford an appropriate measure of protection to our American standard of living. I am also concerned that safeguards are not written into the bill which will assure that tariff concessions will be granted on a selective basis with proper recognition given to the objective that we do not trade away any American industry. Our American standard of living is part of our American heritage and must be guarded as zealously as the other American virtues.

Mr. Chairman, the views I expressed here today are widely shared by the people I have the honor to represent in this Chamber and in the testimony of that statement here follows a letter I wrote to the Randall Commission over a year ago. I sent similar letters to the Secretary of State and to the Tariff Commission. I also offer a letter I addressed to the President of the United States.

Also, I offer for the RECORD a resolution adopted by the General Assembly of the State of Rhode Island; a resolution adopted by the city council of the city of Woonsocket; an article appearing in the Pawtucket Times of December 17, 1954; an editorial appearing in the Pawtucket Times of February 1, 1955; an article by John C. Quinn appearing in a recent issue of the Providence Journal; and a resolution of the General Assembly of the State of Rhode Island approved by the Governor on February 11, 1955:

JANUARY 8, 1954.

CLARENCE B. RANDALL,
Chairman, Commission on Foreign Economic Policy, Education and Welfare Building, Washington, D. C.

DEAR SIR: The administration's slogan of "Trade not aid," plus recent newspaper reports that the Randall Commission looks with favor upon the idea of further reducing tariffs is causing a great deal of uneasiness and worry to many workers in my home State of Rhode Island, where unemployment is mounting every day, through the reduction of working hours in some plants, the laying off of a part of the work force in others, and even the outright closing down of still other plants where the companies go out of business.

Several reasons are given for this change, which is having a dire effect upon our economy, and in practically every case the adverse effect of the tariff on our industries is given as the major factor. This applies to textiles, rubber footwear, and laces.

The lace industry is a small industry. It employs only a few thousand people, and apparently is looked upon by some as the type of industry that can be sacrificed on the altar of "Trade not aid," in an effort to help bolster the economy of friendly foreign countries.

I cannot accept that philosophy and respectfully urge your Commission to reject it.

Many so-called small industries are located in Rhode Island. They mean much to us and must not be sacrificed. Instead, they should be encouraged and given protection.

The Lever lace industry, which comprises some 80 mills, has 53 of these mills in Rhode Island and furnish employment to nearly 10,000 workers.

The low wages paid foreign workers, as compared to the wages paid for comparable work in the United States, is so out of proportion that unless proper tariff protection is provided our plants may have to close and our workers forced to join the ranks of the unemployed.

The argument that workers displaced in this manner could be retrained and the manufacturers given financial assistance in a changeover to other lines is not a sound one in my opinion. This presents several questions.

The first question is: What wages would be paid to the trainees? I am sure it would be far below what these experienced lace workers are now earning. The second question is: What would happen to the aged and other workers who would not be amenable to retraining? How many of them would be forced to go on relief? The problem this would present is a most serious one, not only of economics, but also of morale, and should receive most serious consideration.

The cost of the readjustment of these people, plus whatever financial aid might be given to the manufacturers could well exceed the amount of aid now given foreign countries.

In the name, and on behalf of these workers in the lace, rubberwear, and textile industries, I strongly urge your Commission to give these workers most serious consideration before you recommend any reduction in existing tariffs on these items.

Sincerely yours,

AIME J. FORAND,
Member of Congress.

P. S.—For your information, I am enclosing several samples of the hundreds of letters I have received on the subject from lace workers in my district.

FEBRUARY 4, 1955.

The Honorable DWIGHT D. EISENHOWER,
President of the United States,
Washington, D. C.

MY DEAR MR. PRESIDENT: May I add my voice to those of several others who have already communicated with you relative to the possible further reduction in tariffs on textiles, both under the provisions of the bill H. R. 1, which is now under consideration by the House Committee on Ways and Means, and also in the pending treaty negotiations going on between the Government of the United States and the Government of Japan.

I am sure you are aware of the fact that the textile industry is one of the largest industries of this country and that its welfare is essential to the health of our economy, as well as to our national defense.

Textiles, including lace, constitutes the majority of the basic economy of our State of Rhode Island and, like other areas in New England, the Middle Atlantic States, and the South, where the textile industry is the chief industry, it is looked upon as the lifeblood of those communities. The industry has been depressed now for quite a long time and I am informed that in New England some 117,000 textile jobs have been lost, while in the Middle Atlantic States the figure is in excess of 25,000, while the figure for the South is around 52,000. All this in the space of about 2 years.

I realize that the vast majority of the people believe in reciprocal trade, but I feel that this program should not be carried on at the expense of a few industries, especially those like textiles, jewelry, lace, and rubber footwear, upon which the tariff rates have been constantly reduced. There is a point beyond which we should not go and I feel that that point has been reached, and it is for that reason that I join with others in requesting that you recommend to the Congress that the textile industry be excluded from the provisions of H. R. 1 and also from the negotiation with the Government of Japan.

With assurances of my highest esteem, I am

Very respectfully yours,

AIME J. FORAND,
Member of Congress.

STATE OF RHODE ISLAND
AND PROVIDENCE PLANTATIONS,
DEPARTMENT OF STATE,
Providence, January 19, 1955.

Hon. AIME J. FORAND,
House Office Building,
Washington, D. C.

DEAR REPRESENTATIVE FORAND: I am directed by the general assembly to transmit to you the enclosed certified copy of House Resolution 514, introduced by Representative Samuel Azzinaro, entitled "Resolution urging the President of the United States, the Congress of the United States, the Secretary of State of the United States, and the Tariff Commission to enact and maintain tariff rates on textiles, including lace, jewelry, and rubber goods imports," passed by the general assembly at the January session, A. D. 1955, and approved by the Governor on the 14th day of January 1955.

Very truly yours,

ARMAND H. COTE,
Secretary of State.

"H. 514

"Resolution urging the President of the United States, the Congress of the United States, the Secretary of State of the United States, and the Tariff Commission to enact and maintain tariff rates on textiles, including lace, jewelry, and rubber goods imports

"Whereas textile, jewelry, and rubber goods manufacturing are three of Rhode Island's major industries, employing over 54 percent of Rhode Island's manufacturing workers; and

"Whereas manufacturing is the foundation of the Rhode Island economy whereby over one-half of the entire State's population is directly or indirectly dependent upon such industries; and

"Whereas in all of these industries labor and labor costs are vital factors representing about 60 percent of the value of the manufactured product; and

"Whereas such products can be and are manufactured today in many parts of the world, often with the aid of the latest types of American equipment; and

"Whereas the consequent threat of price competition from low-wage countries abroad is very real; and

"Whereas recent studies by the United States Bureau of Labor Statistics indicate the large wage differentials which place American manufacturers at a decided competitive disadvantage; and

"Whereas the Rhode Island textile industry, including lace goods, represents about 30 percent of all manufacturing employment, and a total investment of $300 million; and

"Whereas the jewelry industry employs about 19 percent of Rhode Island manufacturing workers; and

"Whereas the manufacture of rubber products represents a substantial portion of industry in this State; and

"Whereas this tremendous percentage of Rhode Island industrial workers would be forced into the ranks of the unemployed upon the closing of the mills and factories of this State: Now, therefore, be it

"*Resolved*, That the President of the United States insist on increasing and maintaining proper tariffs on the imports of textiles, including lace, jewelry, and rubber goods imports; and be it further

"*Resolved*, That the Secretary of State of the United States enter into no agreements and make no concessions to any foreign nation which would affect adversely the manufacture and sale of textiles, including lace, jewelry, and rubber goods imports; and be it further

"*Resolved*, That the Congress of the United States, and more particularly the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives, take every legislative precaution in enacting proper legislation to insure the creation and maintenance of proper tariff rates on textiles, including lace, jewelry, and rubber goods imports; and be it further

"*Resolved*, That duly certified copies of this resolution be transmitted forthwith by the Secretary of State to the President of the United States, to the Secretary of State of the United States, to the Tariff Commission of the United States, to the chairman of the Senate Committee on Finance, and to the chairman of the Committee on Ways and Means of the House of Representatives, and to the Senators and Representatives from Rhode Island in the Congress of the United States earnestly requesting that each use his best efforts to bring about the enactment and maintenance of proper tariff rates on textiles, including lace, jewelry, and rubber goods imports, to the end that the manufacture and sale of such goods in the United States are not jeopardized."

STATE OF RHODE ISLAND
AND PROVIDENCE PLANTATIONS,
DEPARTMENT OF STATE,
OFFICE OF THE SECRETARY OF STATE.

I, Armand H. Cote, Secretary of State of the State of Rhode Island and Providence Plantations, hereby certify that the aforegoing is a true copy of resolution urging the President of the United States, the Congress of the United States, the Secretary of State of the United States, and the Tariff Commission to enact and maintain tariff rates on textiles, including lace, jewelry, and rubber goods imports, passed by the general assembly at the January session, A. D. 1955 and approved by the governor on the 14th day of January, 1955.

In testimony whereof, I have hereunto set my hand and affixed the seal of the State of Rhode Island, this 19th day of January, A. D. 1955.

ARMAND H. COTE,
Secretary of State.

CITY OF WOONSOCKET, R. I.,
February 3, 1955.

Congressman AIME FORAND,
House Office Building,
Washington, D. C.

DEAR SIR: I am enclosing herewith a copy of a resolution which the City Council of the City of Woonsocket, R. I., had before it at its regular meeting held February 2, 1955. The council then took the following action:

It was voted that this resolution be passed.

This copy is sent to you in accordance with instructions contained in the resolution.

Very truly yours,

W. CHESTER ROSE,
City Clerk.

Resolution in protest against lower tariffs on foreign-made textiles imported into this country

Whereas it is common knowledge that the entire textile industry in the United States has been in a depressed condition since 1952, even though other industries in this country have been prosperous; and

Whereas there is now pending before the Congress of the United States a bill proposing to give the President additional powers to adjust tariffs on imports into this country; and

Whereas the well-being and prosperity of the entire New England region is dependent on a solvent and active textile industry; and

Whereas textiles can be manufactured in foreign countries at a much lower cost than can be manufactured in the United States because of the much lower wages paid in said foreign countries and because of the much lower standard of living there prevailing; and

Whereas the productive capacity of foreign textiles has greatly increased in the recent past because of the installation in said foreign countries of modern textile machinery, said installation having been made possible under the foreign-aid program of the United States; and

Whereas because of said increased productive capacity, thousands of yards of foreign-made worsted and woolen goods are now being imported into the United States even under present tariff rates on foreign textiles; and

Whereas it is apparent that the present tariff rates on foreign textiles should be increased and not lowered in order to prevent the ruin of the entire textile industry,

the existence of which industry is so vital to the prosperity of New England and to the prosperity of the United States as a whole: It is hereby

Resolved by the City Council of the City of Woonsocket as follows:

SECTION 1. That the city council of this city hereby records its protest against the further decrease on present rates on foreign-made textiles.

SEC. 2. That the city council of this city hereby records its stand that the present tariff rates on textiles should be increased to a point sufficient to protect the textile industry of the United States.

SEC. 3. That forthwith upon the passage of this resolution a certified copy of same be forwarded to the President of the United States, to the Representatives in the Congress of the United States from the State of Rhode Island, and to the members of the Tariff Commission of the United States in Washington.

SEC. 4. This resolution shall take effect upon passage.

[From the Pawtucket (R. I.) Times of December 17, 1954]

ROBERTS FORMALLY PROTESTS ANY TARIFF CUTS ON TEXTILES

Governor Roberts today sent a formal protest to Secretary of State Dulles against making any tariff concessions on textile products on the ground that it would be disastrous to Rhode Island industry, business, and workers.

Textile production, the Governor pointed out, is the largest single industry in the State and employment in that field has already shrunk nationally because of the cutback in Federal military procurement and failure of citizen demand to take up the slack.

In the declining domestic market and intense price competition, the Governor added, many mills have been forced to close down and Rhode Island, as a consequence, now has 20,000 unemployed textile workers. Any action further reducing the domestic market, he said, would be disastrous to the State's economy and additional tariff concessions on textiles would necessarily have such an effect.

The Governor's letter follows:

"I am advised that negotiations involving possible tariff concessions on textile-mill products are to be conducted in Geneva early next year.

"Since the production of textiles is Rhode Island's largest single industry, employing at the present time over 38,000 workers, or 30 percent of total manufacturing employment, this is obviously a matter of grave concern to our State. In 17 of Rhode Island's 39 cities and towns, the textile industry represents the major part of industrial employment. Rhode Island industry produces virtually all types of textile products.

"As you are probably aware, the textile industry nationally has suffered from a serious slump in the past 2 years, due to reduction of Federal military procurement and the failure of civilian demand to take up the slack. Shrinking domestic markets have been accompanied by intense price competition which has forced many mills throughout the country to close their doors. In consequence, Rhode Island already has some 20,000 unemployed textile workers.

"In the face of this situation, any action which would further reduce the domestic market for American textile products or intensify the present keen price competition would obviously be disastrous for Rhode Island industry, Rhode Island business, and Rhode Island workers. Additional tariff concessions on textiles would necessarily bring about one or both of these highly undesirable results.

"I cannot urge you too strongly not to grant concessions on textile products at the forthcoming conference in Geneva."

[From the Pawtucket (R. I.) Times of February 1, 1955]

NEW ENGLAND MILLS NEED TARIFF PROTECTION

In the interest of the textile industry the Governors of the six New England States have made known to Congress their opposition to reduction in tariffs on textiles. Their special concern is with the proposal to permit President Eisenhower power to reduce by 50 percent tariffs on textiles made in Japan.

Attempts to solve one phase of the Japanese trade problem at the expense of the extremely vulnerable New England textile industry calls for the strong opposition of the six governors and the States' delegations in Congress.

A reduction in textile tariffs would cause great hardship. Such action is contrary to the interests of New England workers as well as to the national interest. Concessions to Japan would cause unemployment. That is matter of great concern. New England cannot afford more textile job losses. In the last four years more than 100,000 textile workers lost jobs in New England. Less than 50,000 of them found reemployment.

The textile industry is not a "growth" industry. It has substantial over-capacity and has no growing market. That it has no growing market is demonstrated by the following figures: per capita consumption of textiles has dropped 20 percent, cotton consumption is off 12 percent, sales are down 29 percent and prices down 44 percent.

That is the situation in the domestic market. Consider the damage inherent in concessions to Japanese textile operations. At this time Japanese combed ginghams are landed in New York at prices 5½ cents per yard below the cost of production in New England. In New England broadcloth production costs 29.7 cents a yard without profit. It is made in Japan for 20.7 cents a yard. Lawns which cost 26.4 cents a yard to manufacture in New England cost 15.6 cents a yard to make in Japan.

The New England-Japanese cost differential is much greater than the North-South textile differential, under which New England lost 75 percent of its cotton-synthetic textile industry and more than 250,000 jobs in the last 30 years. That experience in the domestic market manifests the greater injury which can be inflicted on the New England industry if the product of 12 cents an hour Japanese workers is allowed to flood the American market.

If in the interest of foreign policy and foreign trade tariff cuts must be made they should be put on the growing industries where increased imports can be absorbed in rising markets, and not on a vulnerable and declining activity, the textile industry of New England.

THE MILL CLOSES, AND 63.7 PERCENT OF WORKERS STILL LACK JOBS

(By John C. Quinn)

How are Providence area textile workers, made idle by mill liquidations, making out in tracking down new jobs? The answer would seem to be not too well.

Dr. William H. Miernyk, director of the Bureau of Business and Economic Research at Northeastern University, has just finished studying the case histories of 132 such displaced mill hands in the Providence labor market. His report paints this picture:

Forty-eight of the former workers—that is 36.2 percent of the cross-section interviewed—were working when questioned by the study group.

Of this group 34, or 25.6 percent, still were holding the same jobs they landed after the mills closed while the other 14, or 10.6 percent, had had to change jobs several times to stay on a payroll.

The remaining 84 idled workers—63.7 percent—were unemployed.

NINETEEN QUIT JOB HUNTING

That jobless figure includes 17, or 12.9 percent, who had held jobs at some time since their lay-offs; 48 or 36.4 percent—the largest single category—who had been out of work ever since the mills closed, and 19, or 14.4 percent, who had quit job-hunting and technically were withdrawn from the labor force.

The reemployed rate of 36.2 was lower than Dr. Miernyk recorded in Lowell, Lawrence, or Fall River studies, but was higher than New Bedford and a nontextile town which forced displaced workers to choose between new lines of work or new communities.

The Providence labor market sampling of 132 former mill workers was the smallest in the six-community analysis, but the report noted that the findings on practically every count followed the same ratio as was recorded throughout the area.

In this project, the Providence labor market coincides closely with the city's metropolitan area, taking in the Massachusetts towns of Attleboro, North Attleboro, Bellingham, Blackstone, Millville, Seekonk, Franklin, and Wrentham.

As background, it was noted that of the nonagricultural workers in this area in 1953, 33.2 percent were in textiles, 16.1 percent in jewelry, 11.1 percent in nonelectrical machinery, and all other categories run under 6 percent each.

For this area's survey, a sample of 10 percent of the displaced workers from each of three liquid mills was selected at random from lists provided by the CIO textile union. The mills were not named, but were identified in this way:

Mill A was a century-old dyeing and bleaching plant that closed in the spring of 1952 after its payroll shrank from a normal 350 to 200 workers.

Mill B. 1 of 3 Providence area subsidiaries operated by a large textile concern, produced fine-combed cotton goods. It was liquidated in December 1952, after its payroll dropped from 650 to 350.

Mill C was an integrated mill with combing, spinning, weaving, dyeing, and finishing operations. It closed in December 1953 with a loss of 2,000 jobs. This shutdown was the only surprise of the three because the plant had had a $5 million modernization just 2 years before.

ONE HUNDRED AND THREE QUESTIONED IN PERSON

The random selection of the three union lists gave a sample of 246 former workers. Of these 103 were interviewed in person and 29 replied to mail questionnaires for a study tally of 132.

The average age for this Providence sample was higher than in most of the other studies. About 80 percent of the women and 55 percent of men were more than 46. And there was also the highest proportion of men here, partly expected because of their prominence in dyeing and finishing work.

Table 1 included here pinpoints this distribution.

Table 2 speaks for itself in further detailing the luck of these displaced workers, according to sex, in hunting up new jobs.

As in all of the other study areas, the older workers ran into the toughest trouble in seeking reemployment, although the Providence age average was slightly higher.

Nevertheless, Dr. Miernyk found that all employed workers were under 55 years of age, two-thirds of the employed men were under 45, 53 percent of the employed women were between 46 and 55, and 75 percent of those not employed were past age 45.

Table 3 tells this story in detail.

TABLE 1.—*Age and sex distribution of the sample workers*

Age	Male		Female		Total	
	Number	Percent	Number	Percent	Number	Percent
Under 25	5	6.6	------	------	5	3.8
25 to 35	15	19.7	4	7.1	19	14.4
36 to 45	15	19.7	8	14.3	23	17.4
46 to 55	11	14.5	22	39.3	33	25.0
56 to 65	19	25.0	16	28.6	35	26.5
66 and over	11	14.5	5	8.9	16	12.1
Unknown	------	------	1	1.9	1	.8

TABLE 2.—*Experience of former millworkers*

Age	Male		Female		Total	
	Number	Percent	Number	Percent	Number	Percent
Employed, 1 job since layoff	23	30.3	11	19.6	34	25.6
Employed, several jobs since layoff	10	13.2	4	7.1	14	10.6
Unemployed, had job since layoff	27	35.5	21	37.5	48	36.4
Unemployed and out of labor market	7	9.2	12	21.4	19	14.4

TABLE 3.—*Age distribution by employment status*

EMPLOYED

Age	Male		Female		Total	
	Number	Percent	Number	Percent	Number	Percent
Under 24	5	15.2	------	------	5	10.4
25 to 35	11	33.3	1	6.7	12	25.0
36 to 45	6	18.2	4	26.7	10	20.8
46 to 55	2	6.1	8	53.3	10	20.8
56 to 65	9	27.3	2	13.3	11	22.9

UNEMPLOYED

Age	Male		Female		Total	
	Number	Percent	Number	Percent	Number	Percent
25 to 35	4	9.3	3	7.3	7	8.3
36 to 45	9	20.9	4	9.8	13	15.5
46 to 55	9	20.9	14	34.1	23	27.4
56 to 65	10	23.3	14	34.1	24	28.6
66 and over	11	25.6	5	12.2	16	19.0
Unknown	------	------	1	2.4	1	1.2

It will be noted there is no listing under employed for ages above 66 nor for unemployed under 25 because none of the 132 displaced workers were in these categories.

S. 163

Resolution requesting the Senators and Representatives from Rhode Island in the Congress of the United States to take the proper steps necessary to protect and preserve the Rhode Island lace manufacturing industry

Whereas the American lace manufacturing industry, 54 of whose 80 plants are located in Rhode Island, has suffered and still suffers increasingly serious difficulties as a result of tariff reductions effectuated under the trade agreement with France which became effective June 15, 1936; and

Whereas reductions in tariffs since that date have driven the manufacture of veilings in America completely out and badly handicapped the manufacture of bobbinet and all other products of lace machines; and

Whereas in addition to the above circumstances under which the industry has suffered grave injury, there is at present before the Congress a bill, H. R. 1, which would grant the executive the right to reduce to 50 percent all tariffs that are over 50 percent of the value of the imported goods and reduce all other tariffs 15 percent at the rate of 5 percent per year for 3 years; and

Whereas French and other foreign officials are already drawing up lists of duties they wish cut, including lace duties, in the event of passage of H. R. 1; and

Whereas any further reduction in duties on lace may well mean the annihilation of the American lace manufacturing industry and the loss of employment by its thousands of skilled employees, many of whom are located in Rhode Island: Now, therefore, be it

Resolved, That the Senators and Representatives from Rhode Island in the Congress of the United States be and they are hereby urgently requested to take the proper steps necessary to protest and preserve the Rhode Island lace manufacturing industry; and be it further

Resolved, That duly certified copies of this resolution be transmitted by the Secretary of State to the Senators and Representatives from Rhode Island in the Congress of the United States.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. FORAND. I yield to the gentleman from Arkansas.

Mr. HARRIS. As I understand what the gentleman refers to as the escape clause, when these conditions are found to be true, then that part of the agreement is nullified.

Mr. FORAND. The President notifies other countries that as of a given date—and I believe it is a 6-month lag—they will have to reduce the amount of merchandise sent in, or they will discontinue the agreement. That is my understanding.

Mr. HARRIS. That is what is meant by the escape clause?

Mr. FORAND. Correct.

Mr. HARRIS. I thank the gentleman.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Wisconsin [Mr. VAN PELT].

Mr. VAN PELT. Mr. Chairman, I rise in opposition to H. R. 1. In my opinion the reciprocal trade agreements program has proved harmful to industry, to agriculture, and to labor. In the brief time allotted to me I shall tell briefly why I think so.

Granted that our industry is more efficient than any in the world; still many of our smaller industries are no more modern than those of foreign countries. The cost of raw materials and the efficiency of workers is about equal. Consequently, wages constitute the chief difference in costs of production. As you know, wage rates in Europe and Japan range from one-third to one-tenth those paid in this country. Overtime pay abroad averages 25 percent above regular pay; here it averages 50 percent. Thus our costs are from 3 to 10 times as high as our competitors. How can we compete without protection?

Our industrial economy has reached its present status under a protective tariff. Costs have been geared to such a system. To remove tariffs entirely would seriously injure many industries.

It seems to me that the object of our tariff is to prevent our wage and labor standards from crumbling under the onslaughts of cheap foreign products.

Proponents of reciprocal trade claim that we must import in order to export. I believe that we do not need to expand exports and imports as much as other nations do. Our home market is extensive. To increase our export trade would be injurious to many of our allies. They must depend on foreign trade far more than we do. If we increase our exports we injure industries which are vulnerable to import competition.

Numerous industries vital to our defense literally have their backs to the wall. Cheap foreign imports have cut deeply into their markets. Trained personnel is drifting from the industries. Costs are mounting. Removal of present tariffs would force many out of business. Yet we must rely upon them in emergencies or bank on uncertain foreign sources.

In agriculture we face a serious problem. Under the price-support programs, farmers have enjoyed the protection of reasonable tariffs and import quotas. In order to maintain our price-support policy, it seems necessary to restrict the importation of farm products. It is self-evident that if agricultural products are imported into a domestic market already adequately supplied prices will be driven still further below the parity price. Any reduction in tariffs would unleash a flood of agricultural products which would further hamper any farm program the Government undertakes.

Proponents of increasing imports state that all that is necessary to carry out their program is a retraining of workers who are made redundant by increased imports. However, many more workers are employed in industries and agricultural pursuits that are exposed to injury from imports than are employed in producing and servicing all our export goods. The ratio is probably about 5 to 1. About 25 percent of our work force is employed in import-vulnerable industries. This group is found in all States. It seems to me that it would be difficult, if not impossible, to retrain one-quarter of our total work force. Not only is it not a feasible project economically, but it is even less desirable socially. Think of the forced retirement of older workers; of the disruption of social ties; of the ghost towns which would be prevalent in one-industry areas. This is too large an order for our economy to undertake.

In conclusion, I have tried to show that the reciprocal trade agreements program has not helped industry, agriculture, or labor. Of necessity, my remarks have been brief. I believe, however, that they can be buttressed by a wealth of factual information.

Like other Members of Congress I have received many letters from manufacturers describing the problems which they already face from foreign competition. As a part of this statement, I extend and revise my remarks and include

a number of typical letters I have received concerning H. R. 1:

The DIAMOND MATCH CO.,
Oshkosh, Wis., January 28, 1955.
Hon. WILIAM K. VAN PELT,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN VAN PELT: Tariff-making policy is a function of the legislative branch of the Government which should not be given up readily.

National policy for years has been wholesome competition, and the Congress has enacted many laws to maintain fair competitive measures.

Congress has enacted legislation to give the American workingman minimum hourly wage rates, 8-hour day, workmen's compensation, safety measures while working, collective bargaining, old-age pensions, child-labor laws, and many other benefits enabling the American employee to improve his status.

In other words, as in sports, lightweights do not compete with heavyweights, amatures do not compete with professionals, high schools do not play colleges, and all along the line recognition is given to the circumstances surrounding the competitors.

Business is somewhat similar. An American firm must follow the laws laid down by Congress. We cannot compete with the foreign producer who produces a low-cost product by ignoring methods prevailing here.

The laws and regulations governing employment make jobs better but do not produce them. They are inoperative to a man who does not have a job.

Trade agreements which do not recognize these factors may throw men out of work because of unfair competition.

Immigration laws are very strict, and many undesirable aliens are kept out of our country for various reasons. On the other hand, if the alien is admitted, he immediately comes under our laws, and the product of his endeavors has no advantage over fellow Americans.

If he stays in his own country, he often contributes to a product low in cost, because the safety measures used in America, do not prevail in many foreign countries, and their product is low cost not because of efficiency but rather because they ignore those factors believed to be essential here.

The American sense of fair play should not be ignored, and Congress is the protector on tariff issues.

It would be very unfortunate if the laws to protect the American workingman are a contributing factor in reducing his opportunity for employment.

Yours very truly,
THE DIAMOND MATCH CO.,
By FRANKLIN MOORE, *Manager.*

RIPON KNITTING WORKS,
Ripon, Wis., December 29, 1954.
Hon. WILLIAM K. VAN PELT,
Member of Congress,
House Office Building,
Washington, D. C.

DEAR CONGRESSMAN VAN PELT: In accordance with our telephone conversation this morning, I am enclosing the testimony submitted by the president of the National Association of Hosiery Manufacturers before the Committee for Reciprocity Information relative to tariffs on Japanese wool hosiery and slipper sox. I also submitted a table showing the extent to which the Japanese have taken over on slipper sox, the item which we conceived, originated, merchandise, nationally advertised, and successfully popularized with the American people. It seems totally unfair to us that Japanese labor earning 10 percent of what we are forced to pay, should with our Government's sanction and approval, force a 75-year-old company such as ours, to liquidate.

Three years ago there were some 60 manufacturers of slipper sox and today to my knowledge all but two of them have been forced out of business because of Japanese competition.

This is a crisis as far as we are concerned. Rather than drop the import duty as has been suggested by the Interdepartmental Committee on Trade Agreements, we feel that the duty should be raised to 100 percent unless we want to throw American men and women out of work to give jobs to the Japanese.

Anything you can do in behalf of our company and our employees will be greatly appreciated.

Sincerely,
RIPON KNITTING WORKS,
STANLEY M. HERLIN,
President and General Manager.

THE HOUGH SHADE CORP.,
Janesville, Wis., December 30, 1954.
Hon. WILLIAM K. VAN PELT,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN VAN PELT: It is hoped that this letter, together with other material which we are enclosing, will acquaint you more thoroughly with a small but relatively old industry which in many respects has its roots in Wisconsin.

The woven-wood-fabric industry manufactures woven-wood-slat porch shades, interior window shades, decorative floor screens, and ventilating folding doors for wardrobe closets. These products are sold direct to department stores and to dealers and builders through distributors.

Over 95 percent of the domestic output of these products originate in the factories of five small companies. These are: Hough Shade Corp., of Janesville, Wis.; Consolidated General Products with plants in Houston, Tex., and Waukesha, Wis.; Warren Shade Co., of Minneapolis, Minn.; the Columbia Mills, Inc., of Syracuse, N. Y.; and Williams Manufacturing Co., of Constantine, Mich. These 5 companies employ about 800 people in their factories. Their total capitalization last year was just over $3 million. Two of these companies have plants in Wisconsin and all of them buy their most important raw material from Wisconsin sawmills.

After many years of quite successful operation, the industry is now facing foreign competition which is absorbing more and more of the domestic market. The competition of imported bamboo products in extremely crude form, has gone on for many years. The domestic industry has been able to live with this situation, and up until about 3 years ago there appeared to be little change in the amount or quality of the imported products. There has, however, been a drastic change in this situation in the last 3 years. Figures submitted to the Committee for Reciprocity Information and the United States Tariff Commission on December 21, 1954, showed that during the past 3 years, there has been a tremendous increase in the rate of importation of competitive products from Japan. This increase has reached the point where this year 85 percent of the square footage sold in the domestic market was supplied by importers. Further it was demonstrated that during that same period there was a net decrease in that portion of the domestic market which the United States industry supplied. It is becoming increasingly obvious that present tariffs on woven-bamboo and woven-wood products are proving no deterrent to the importers of the competing foreign products.

As is pointed out in the enclosed statement of the Woven Wood Fabric Industry, the Japanese foreign competition consists of both bamboo and woven wood products. The entry into this country of woven wood products from Japan is a startling and recent development. This is a matter of special interest to the State of Wisconsin because the woven wood fabric industry is uniquely a Wisconsin industry. We say this because of the fact that the source of our chief raw material is basswood. As we have already stated, the whole industry relies on Wisconsin as a source of northern basswood, since this important forest product has been long recognized for its superiority in woven wood products.

The woven wood fabric which is now coming into this country from the Orient is manufactured largely from Tilia Japonica or Shina Wood. This species of tree belongs to the basswood family and the importers and retailers can and do represent the imported product as being made of "basswood." The words "northern basswood" have been used in conjunction with national advertising of our products for so many years that our customers and the general public think of woven wood fabric products and northern basswood as closely associated terms. The unlicensed use of the word "basswood" together with no labeling of the foreign product when it comes into the country in rolled-goods form and is partially assembled into the finished product here is misleading. The Federal Trade Commission has been asked to check on this aspect of the problem since it is obvious that herein lies a situation in which the buying public can be deceived. Such a deception takes place when a consumer buys a product made from this imported material. He will find it below the standard of quality established by the domestic manufacturers but has no way of knowing that it is of Japanese origin.

The extent to which foreign woven wood fabric and woven bamboo undersell our domestic products was stated in considerable detail by the writer in appearances before the Committee for Reciprocity Information and the Tariff Commission earlier this month and also in our industry statements filed with both the committee and the Commission. Copies are enclosed.

The plain fact is that Japanese labor costs permit underselling in spite of existing tariffs. This is due to the fact that the Japanese wood products worker averages about 11 cents per hour or $23 per month in wages as compared with $219.12 per month for the average worker in our industry.

We cannot emphasize too strongly the danger we see for our industry from this vast new enterprise which is apparently just getting underway in Japan to flood the American market with woven wood fabric products which apparently are going to be represented as basswood. We have been informed by importers that American woodworking machinery has been moved into Japan and it is from this machinery that the woven wood fabric products are being produced, which are of a much higher quality than the old product of woven bamboo. Consider if you will, the advantages of the Japanese industry as compared with the domestic industry, now that modern machinery is available to Japanese manufacturers and their labor costs remain less than one-tenth that of the domestic industry.

We are told that the matter of general tariff reduction is to come up for discussion in the House of Representatives early in the 1955 session. This we understand is in connection with the forthcoming negotiations concerning the General Agreement on Tariffs and Trade. We earnestly urge you to consider the comments in this letter together with the material contained in the statements which have been submitted to the CRI and the Tariff Commission. As a representative of the State of Wisconsin, we believe that you will feel as we do, that this is a matter of urgency with disastrous potential more far-reaching for our State than in any others.

Cordially yours,
HOUGH SHADE CORP.,
JOHN E. HOUGH, *President.*

Madison, Wis., February 11, 1955.

Hon. WILLIAM K. VAN PELT,
House of Representatives,
Washington, D. C.

DEAR REPRESENTATIVE VAN PELT: We here at Ray-O-Vac have been very much concerned for sometime, for ourselves and for industry in general throughout the country, because of the influx of low priced merchandise, often copying specifically, and competing with the products of this country made by labor with a high standard of living thereby creating a higher cost and a bad competitive situation with the cheap foreign goods.

Our own experience is in the flashlight case field. In the year 1948 there were 12,000 flashlight cases imported into the United States from Hong Kong and for the year 1954 this had increased to 6,874,000, or in the neighborhood of from 15 to 20 percent of the consumption of flashlight cases in this country. Cases which are copies of our own sell for 39 to 49 cents where we must get over a dollar at the distributor level. This has directly affected the operations of our flashlight case plant in Clinton, Mass., and we now are employing approximately 200 less people than were employed heretofore, this being a reduction of approximately one-third of our normal employment.

We are further concerned when we read in the morning's papers that bill H. R. 1 has been voted on favorably by the Ways and Means Committee and is now going to be considered on the floor of the House of Representatives. This bill, we understand, continues the program of negotiating reduced tariffs and may give additional latitude in this direction.

Free trade makes a good theoretical goal but until the concepts, business practices, and the elements which create the basic standard of living of peoples in various countries are in some measure comparable to ours, the employment of people in this country is going to suffer by a general influx of foreign goods made under low standard of living conditions.

My colleague here in Ray-O-Vac, Mr. J. C. Ryan, executive vice president, presents three basic American concepts of political and economic philosophy which differ greatly from those held by all the rest of the world:

1. Our attitude toward labor. We honor labor; the rest of the world debases labor.

2. Our attitude toward competition. We insist upon it; the rest of the world refuses it and holds tenaciously to the cartel system.

3. The idea of statism. We reject it; the rest of the world accepts it.

Don't you agree with me that our position in connection with the three items above is the basis for our high standard of living and our freedom for the individual?

It appears quite clearly to us that until there has been some change in general foreign attitude on the three concepts listed above, the standard of living will not be raised in other countries of the world and until this standard is raised, working people of those low standard countries will be unable to purchase a portion of the goods which they themselves manufacture and therefore these goods will be shipped to the United States at low prices to compete with our own production.

As manufacturers in the foreign field for foreign markets, we have firsthand experience with this subject. I request, in the interest of the American people and their standard of living and in the interest of American industry, that you oppose the continuance of the negotiating of tariffs as proposed in H. R. 1.

Yours very truly,

D. W. TYRRELL,
President.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Ohio [Mr. HENDERSON].

Mr. HENDERSON. Mr. Chairman, the issue before the committee today is a matter of grave concern to the industries and people of the 15th District of Ohio, where the provisions of H. R. 1 are well known and understood. I must inform my colleagues today that these provisions are most vigorously opposed by the people in my district, who recognize in them a direct threat to their economic welfare. They believe, as do I, that the passage of this legislation would signal the flooding of our markets with products on which the prosperity of my district is so vitally dependent. Coal, glass, and pottery are among the principal products of the 15th Congressional District, and in the case of each of these products there is a long and unhappy conflict with the wares of cheap foreign labor which have entered our market places because of low-tariff policies in the past. Further tariff reductions of the type authorized by H. R. 1 would spell economic disaster.

I must point out that the pottery and glass industries have been major sources of employment and income in southeastern Ohio. Likewise, these industries have for years suffered from the effects of lowered restrictions upon imports.

I believe that it is imperative that the consequences of this legislation be discussed clearly in this debate in terms of their effect on American prosperity. Since the pottery industry is an important component in the economy, I should like to point out what further tariff reductions on pottery products will mean. By way of explanation, the pottery industry includes not only producers of small household products but also a wide range of ceramic items. All members of the industry have been similarly affected by the problem of foreign competition. For instance, in my district the Mosaic Tile Co., a foremost manufacturer of floor and wall tile, with plants in several other American communities, must meet competition from the same foreign sources as producers of other pottery products.

Among the principal pottery-producing nations of the world, the hourly wage paid in foreign pottery plants is less than one-fourth of that received by American pottery workers. Since almost 65 percent of the total cost of products in the manufacture of pottery represents labor costs, the meaning of this basic fact is clear to any reasonable person who wishes to determine why American pottery so often cannot be competitive price-wise with foreign production.

I believe that the Congress must always be guided by the welfare of the American consumer. In this regard, some of the proponents of this bill have contended that the importation and sale in the American market of cheaper foreign products would create consumer demand and thereby strengthen our economic fabric. To my mind, such a superficial answer to this problem is economic woolgathering. Our economic welfare cannot be strengthened by a calculated policy which would destroy the purchasing power of any section of our Nation or segment of our productivity capacity.

The American standard of living, standing tremendously higher than the standards achieved in any Nation in the world, is based upon continued high purchasing power. No member of this Chamber, including the proponents of H. R. 1, wishes to create an economic climate of lowered wage rates and reduced spending power in this Nation. Nevertheless, I believe in the passage of this legislation as it is presently drawn, we may be taking a direct step toward that end. This conviction is necessarily based upon my intimate knowledge of the economy of southeastern Ohio and its long struggle with the tariff question.

Likewise, the coal industry in my district has suffered greatly from the importation of foreign residual fuel oil. The forced exodus of coal miners from our mining communities may be principally ascribed to oil imports. That such a process should occur has wrecked great personal hardship to our mine workers. I do not wish to minimize what this hardship has meant in either personal or economic terms. However, in an even larger sense, it may be calamitous, since our industrial strength is dependent upon coal to support the factories and utilities which are the sinews of America's military might. Should we have need to mobilize our economic forces, the closed mines and the decimation of our groups of skilled workers will constitute a problem of paramount gravity.

It has been alarming to me to hear the theory advanced that by some process of planned economic osmosis, workers in plants displaced by competition from abroad will be absorbed in other industries in other communities. It is even suggested that the Federal Government might lend assistance in this process. In other words, it is envisioned that the full exercise of the authority granted in this bill could create a situation akin to a gigantic chess game in which many of our established industrial facilities and the people and communities which depend upon them could be the pawns. This kind of State control through the creation of economic conditions necessitating it would be repugnant to me. If it is now believed that the Federal Government must minister to great domestic ills created by our tariff policy, then it would seem to me that our tariff policy itself must receive greater study. I believe the Congress should eliminate the necessity for such contrived largesse through the enactment of legislation which will protect and enforce our domestic and industrial strength on which the freedom of so much of the world has been dependent for almost two decades. Our policies must stimulate the prosperity of the free world, but let us not forget that it is America's industrial arsenal which has defeated tyranny in two world wars and stands today as the ultimate bastion of world security against Communist aggression.

Certainly, tariffs can be reduced in many instances without harming domestic producers. When this may be accomplished, I wholeheartedly favor such action in the belief that barriers to

trade among nations should be eliminated whenever possible. Yet, I cannot favor congressional authorization of any measure which will reduce American economic strength.

Mr. Chairman, I have received a great volume of communications from the people of the 15th district expressing their opposition to H. R. 1. These messages represent the concern of the operators of industrial and commercial enterprises, labor organization, and private citizens who recognize the threat this legislation poses. In conclusion, I wish to submit a petition signed by more than 1,000 men and women in the 15th district expressing this concern. This petition reads as follows:

To Hon. JOHN E. HENDERSON,
Representative from Ohio.

Whereas the Congress of the United States is currently considering a measure to extend the Reciprocal Trade Agreements Act and permit reduction of tariff restrictions on pottery, glass, and residual oil; and

Whereas the manufacture of pottery and glass is a very vital source of income in southeastern Ohio, as well as the source of millions of dollars in revenue for the Government; and

Whereas the existing low tariff has already proven most disastrous to the economy of Roseville, Crooksville, Cambridge, Newark, Lancaster, and other pottery communities in this section; and,

Whereas any further reduction of this tariff would spell utter ruin for pottery and glass industries, as they cannot compete on a free-trade basis with countries producing pottery and glass who pay a wage of less than one-fourth of the American standard.

Therefore, we the undersigned (1) pottery and glass manufacturers and employees. (2) suppliers, transportation companies, wholesale and retail dealers, jobbers, and their salesmen and employees, all incident to the manufacture and sale thereof. (3) tradespeople and employees, whose income and livelihood is dependent thereon. (4) property owners, taxpayers, and all others who would suffer untold loss from the ruin of the principal industry in this section of Ohio, do hereby humbly petition you, our representatives to heartily oppose this measure, and thus preserve these American industries for the American people.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New Hampshire [Mr. BASS].

Mr. BASS of New Hampshire. Mr. Chairman, in my careful study of President Eisenhower's proposal to extend the Reciprocal Trade Act, and its probable impact upon the economy of New Hampshire and New England, I have been much disturbed by the harm this bill could cause our textile industry, should textile tariffs be further lowered. This industry with all its related products is the second most important manufacturing industry in New Hampshire. Recently it has been facing serious problems of adjustment and is currently in a depressed condition. It is important to the economic health and prosperity of New Hampshire that everything possible be done to prevent further decline in this important business. A further general reduction in tariffs on textiles might well cause a substantial increase in textile imports, particularly from those countries such as Japan whose wage rates are only a fraction of our own. This would make for even more intensified competition and might well be the straw to break the camel's back of our New Hampshire textile industry.

With this in mind, I have been in direct contact with the White House for the past month to obtain reassurances from the President and his advisers that they are aware of this problem as it peculiarly affects our textile business, and further that tariffs on textile products will not be further lowered.

I have had frequent conferences with Dr. Hauge, the President's economic adviser, Sherman Adams, and others. I have written the President directly on this problem asking such assurance. I have been definitely advised that the President is well aware of the textile problem as it relates to foreign competition, and that he will not further lower tariffs, should the Reciprocal Trade Act be extended. With this assurance and with this knowledge that our textile industry in New Hampshire and New England will thus be adequately protected, I can in good conscience support H. R. 1 as amended by the committee. This is probably the most important part of President Eisenhower's whole program. I am in agreement with the basic objectives and purposes behind this bill, providing as it does for moderate, gradual, and selective reductions on certain tariffs on a reciprocal basis only. We must maintain and expand our foreign trade for many reasons vital to the security and prosperity of this country.

First. Unless we help keep the economies of our friends abroad strong and healthy, their will and ability to resist Communist aggression will be seriously impaired. For instance, if we deny Japan the right to trade with us, she has no recourse but to turn to China and Russia for trade in order to survive.

Second. Our own economy and prosperity to a large extent depends on our export business. Approximately 4,500,000 people in this country have jobs that depend directly or indirectly on our exports. But this is a 2-way street. Unless we enable these countries to obtain dollars by allowing them to sell their goods to this country, they cannot buy our exports. The alternative is to continue huge sums of money for foreign aid, which no one advocates.

Third. Agriculture in particular is very dependent on exporting its surplus products. In New Hampshire our egg, poultry, and milk products are in surplus and must find a market abroad. New Hampshire agriculture has a vital stake in this bill.

Fourth. Even our textile industry has a big interest in our exports. Actually we export far more textile products than are imported. For example 1952 and 1953 exports of cotton cloth were about 4 times imports.

Fifth. Nor should we forget the consumer who is too often forgotten. By expanding our foreign trade the consumer benefits in not having to pay high prices for those products otherwise protected by trade barriers eliminating competition from abroad. Competition is generally a healthy thing in our free economy.

For these reasons very briefly stated, and with assurance that the President is aware of the textile situation and will not further lower textile tariffs, I am supporting H. R. 1 and will vote against the motion to recommit.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. KEARNEY].

Mr. KEARNEY. Mr. Chairman, I want to speak to you this morning on behalf of three divisions of the glove industry, namely, the leather dress-glove industry, the fabric dress-glove industry, and the knitwool glove and mitten industry, all of which are located in my district and, for the most part, are concentrated in the county of Fulton, New York State.

The fine leather dress-glove industry is largely confined to the Fulton County area, where practically 100 percent of ladies' leather dress gloves are manufactured, as well as about 50 percent of men's dress gloves.

Supporting this industry in this same area we have tanners who process raw skins into finished leather, all of which goes into the manufacture of gloves. Besides this, we have other industries, such as box and thread manufacturers, and many others who are solely dependent on the glove industry for their business.

In the Fulton County area we have better than 6,500 workers who devote their entire time to the manufacture of gloves, and who are dependent upon this industry for their livelihood.

The problem of the leather-glove industry has been one of imports ever since its inception; and, from year to year, it has never known where its source of competition would be.

Back in 1934, France was the principal supplier, only to be driven out of the market by a lower-cost producing country, Czechoslovakia.

Since the war new countries have come forth; and today we have Italy, France, and Germany, all competing in the domestic market with our American manufacturers.

Glove manufacturers have never scorned the idea of sharing a portion of their market with foreign sources, and the nature of the business is such that it lends itself to good, healthy competition. On the other hand, we are aware of the fact that wage rates in the glove-producing areas of this country are almost five times higher than those of foreign producers.

To expect us in a handicraft industry to be five times more efficient than our foreign competitors is to expect the impossible, and is a goal that can never be attained.

It is the hand labor in the manufacture of a fine dress glove that gives it its value and prestige characteristics; and no one as yet has found a way to handle the skin of an animal, which varies in shape, size, and weight, just as the skins of human beings would vary, by mass-production methods.

It is because of this fact that so much hand labor is involved; and, with labor accounting for 40 percent of the cost of the direct manufacture of leather gloves, you can well understand why we need a

compensatory tariff to overcome the difference in the wage structure.

The same situation is true in tanneries. Glove leathers in foreign countries can be produced much cheaper than we can make them; and, inasmuch as we all buy in the same markets and have access to the same raw materials, it is this differential in labor rates that injures the earning power of manufacturers and depresses wage rates.

I would like to point out here that the leather-glove industry, as a whole, is a large international trader, purchasing over 90 percent of its raw materials from foreign sources, and 100 percent of its raw materials for fine leather dress gloves from foreign countries.

I ask you to visualize for a minute communities such as the cities of Gloversville and Johnstown, N. Y., where we have approximately 37,000 citizens; and almost every one of them dependent in one way or another on the fortunes of the leather-glove industry. You can well understand why I am so concerned about H. R. 1, which contemplates further reductions in our tariff rates over a period of the next 3 years.

For the most part the industry is made up of small units, located strategically throughout the cities and the county of Fulton, with each area depending on the local factories for their work.

Labor and management are constantly in a state of uncertainty, due to the fact that neither one knows from month to month just what foreign countries are going to do to their production, and labor never knows what they are going to do to employment. The result is that management never dares to take upon itself a forward planning program, and a worker is never sure just how many weeks of employment he is going to get from year to year.

It is time, in my opinion, for Congress to permit these industries to survive which so well typify the American way of life, and which have made such great contributions not only to the local economy, but to the national economy as well.

The glove industry was called upon during the war years to meet superhuman demands and to develop specialized gloves for every branch of our services. What a ridiculous position we would place ourselves in if we were to continue building planes, guided missiles, and so forth, and not be able to provide the men with the hand covering so necessary to give them maneuverability.

It has been called to my attention time and time again how foreign countries get around our tariff rates, and the many abuses that are taking place today without the proper authorities taking action against them.

In the same Fulton County area which we have mentioned, we have developed since 1945 another branch of the glove industry, namely, the manufacture of fabric gloves. Today this industry is being jeopardized by having one portion of its production cut 50 percent, and that is the manufacture of gloves made from synthetic fabrics. At the same time, our negotiators are considering further reductions on cotton-fabric gloves.

This industry is new to our community and asks nothing but a chance to survive; but nothing puts a damper on expansion more than the possible threat of being put in deathly competition not only with European countries, but with the lowest wage-earning country of them all, Japan.

It is well known to this committee that our living and wage standards are the highest in the world; and to expect us to compete with the low standard countries that exist in the Orient, where they admit paying less than 12 cents an hour, will place our industries in a hopeless position.

In the city of Amsterdam, N. Y., the home of the carpet industry, in my district, the 32d District of New York, the industry is practically at a standstill. Since the hearings were first scheduled on H. R. 1, from the city of Amsterdam, N. Y., alone, I have received approximately 4,000 letters and cards protesting the passage of the bill. In addition to these, a petition was forwarded to Washington signed by 16,000 residents of the county of Montgomery, N. Y., of which Amsterdam is the principal city.

The carpet industry is on a par compared with the leather-glove industry and the knit-glove industry as far as competition with foreign-made products is concerned. Under the present conditions, under present laws, American men and women cannot be kept at work. This is why I am opposed to the passage of this bill. I understand that today there are approximately 4,000 people out of work in the city of Amsterdam, N. Y.

The knit handwear industry was founded in my constituency late in the last century. It prospered until the mid 1930's. Oriental competition stepped in and pressed it to the wall. It was granted relief under the flexible provisions of the Tariff Act of 1930. The relief was nullified by the import fraternity, but the industry sustained itself by virtue of the then consumer boycott of Japanese goods resulting from the China invasion, which tempered the volume of imports.

Following World War II, the knit handwear industry, with typical American initiative, improved its product, for which it attained greater consumer acceptance and a wider market. However, American initiative, know-how, and greater efficiency were not enough to maintain the industry's position in the market, once Japanese imports reappeared, starting in 1948.

By 1950, unemployment was widespread, and the early demise of the industry was averted by the sudden outbreak of Korean hostilities. The industry then became heavily engaged in the production of military handwear, and orders for civilian merchandise suddenly came to life from distributors who feared their import resources might be cut off.

Nevertheless, knit glove imports mounted each year, steadily preempting more and more of the market at the expense of American labor, until last year more companies went out of business and more people were unemployed than at any time in the history of the industry.

The prospects for the future are even worse. Obviously, the need is for greater, rather than less, tariff protection. I doubt, in such conditions as this, whether even tariff rate increases would offset the inequities between American and oriental wages. I am positive that only a quota, equitably arrived at, may be the answer—such as is provided in the Trade Agreements Extension Act of 1951.

My deep concern for the knit handwear industry is keenly augmented by one cardinal consideration which transcends the social and economic factors in such a case. That is the importance of this industry to our national welfare.

Two major products of this industry are listed as critical items by the Quartermaster General of the Army: Glove inserts, wool, and mitten inserts, wool, which rank Nos. 5 and 11, respectively, on the Quartermaster's list of essential cold-weather clothing for class A troops who habitually operate in the forward lines. Only this industry makes those two essential items. No other substitute items are available to take their place.

It is a matter of public record that this industry is suffering an economic hemorrhage due to inadequate tariff protection. I leave it to your better judgment whether this or any similar industry is worth maintaining as part of the economic life of this Nation. By one means or another, I submit respectfully, its case should be given the most serious consideration in the consideration of this bill, which I oppose.

Surely, in view of the economic conditions existing in the 32d Congressional District of New York, which I have the honor to represent, no one in his right mind could expect that Representative to support H. R. 1.

In the city of Schenectady, just to give you a further indication of our economic conditions, let me say to you that the big American Locomotive plant is practically closed, with 9,000 American working men and women out of work, and the General Electric plant has laid off many workers.

I ask that the bill be defeated.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. Bow].

Mr. BOW. Mr. Chairman, there is probably very little new that can be said about this proposed legislation from the debates that we have heard in the past. There is one thing that I find that is somewhat new. We find the proponents of this legislation at this time suggesting that it is the legislation of a very distinguished and very great President of the United States. In the past when we have heard debates on this subject, the debate on the other side has apparently been the eulogy of a very distinguished former Secretary of State, Cordell Hull. Mr. Chairman, so far as I am concerned you cannot change a product or its quality by changing the label on the package.

Mr. Chairman, H. R. 1, the extension of the reciprocal trade agreements program, is a violation of constitutional principle as well as of common sense economics. I am opposed to this measure, as I have been to the preceding measures that established and continued the trade agreements program.

The authority to levy duties and collect tariffs is granted to the Congress in the Constitution. Section 8, article 1, states:

> The Congress shall have power to lay and collect taxes, duties, imposts, and excises.

It is, in my opinion, a violation of the Constitution for Congress to delegate this authority to any other branch of government or individual.

Congress has abdicated its authority and responsibility in many ways during the past 20 years, and in every instance the difficulties that have followed upon the act have served to demonstrate once again the wisdom of those men who, with divine inspiration, conceived the great document upon which our Government rests.

The grant of authority to the President to establish the conditions of international trade was wrong constitutionally, and experience proves that it was wrong economically as well.

It is wrong economically because it ignores the economics of international trade. It seeks to make international trade an appendage of the political relationships between countries, and it gives the diplomats life-and-death control over American industries and jobs while they pursue what, to them, are more important questions of national advantage.

We are living in an era when Americans seems to feel that they must in some way atone for the energy of their ancestors and the natural resources which together have given us a preeminence among nations. We atone by giving away billions of dollars worth of our resources—and now, when only the diplomats are still in favor of this cash giveaway—we are asked to subject ourselves to another sort of giveaway—a giveaway of jobs and investment by permitting unlimited competition with our own products. It is said that we must take the lead in establishing a closer understanding—a mutual good feeling—and that to do so, we must bolster the economies of foreign nations. We must make them more nearly our economic equals.

This is a fine and generous approach to international affairs. And we have come a surprising long way toward the objective. I do not believe we have had our money's worth from the $57 billion in grants and credits we have lavished upon former foe and friend alike since June 1, 1945.

We cannot argue with the statistics that show their amazing economic recovery. In every major industry the nations that received our aid are producing at rates far greater than they ever achieved before World War II. Agricultural production also has advanced to levels never reached before or during the war. The economic recovery of Europe, due in large measure to our assistance, is an accomplished fact. I append hereto a chart showing this progress. There is every reason to believe that these nations—if they abandon internal bickering—if they establish sound domestic economic policies—if they work hard—can continue their progress without further assistance from us.

Certain of our internationalists, recognizing that it is politically impossible to continue the aid program, succeeded in selling the slogan "Trade, not aid."

Americans—overburdened with debts and taxes—assumed to give away $50 billion in 10 years—found an appealing note in the suggestion that by encouraging trade we could dispense with the aid. Few stopped to consider that we should and would dispense with aid in any case. The quid pro quo idea caught their fancies.

This was not the case in the hundreds of American communities where the damage done by former trade concessions are apparent. Here the reaction has been different.

Here there are people out of work, factories closed, investments lost, because the fatuous policy of the free traders is destroying American enterprise, and in these communities we can find two reactions.

The first: Continue aid if necessary because aid is a debt upon all the American people, as the expense of any foreign policy should be, rather than a penalty on those whose products are in competition with cheap imports.

The second: Bitter rejection of both programs and a suggestion that the policy of our country must deal first with the welfare and prosperity of our own people.

If your job is gone, if your investments are lost, if the principal industry of your small town is out of business—if this occurs and seeking the reason, you are told by an official of the United States that it was necessary because America must encourage imports of a foreign competitor, some bitterness surely is excusable.

If, in addition, the representative of your State Department, a servant of your Government paid by the taxes you will no longer be able to pay, tells you it happened because you are an inefficient producer, bitterness is a mild reaction.

This is going on in America. As a result of 20 years of State Department and Executive interference with our tariff program, factories and shops are closing, jobs have vanished, investments are worthless, and many a small industrial city is left without support.

The representatives of these industries trooped before the Ways and Means Committee, along with representatives of other industries that are just beginning to see the handwriting on the wall. The mail of every Member of this House has contained factual examples of small American businesses in dire distress, or out of business, because they were stripped of the protection they are entitled to have from their own Government.

Read the list of industries adversely affected by cheap imports under the trade agreement program. Consider the farmers whose products are being forced into the surplus commodity cellars of our Government because the diplomats want to encourage competitive imports. There are few men in this House who cannot find a producer back home who is economically distressed by reason of this program.

The most distressing aspect of the situation is that this list grows longer each year. Depression and war-inspired markets disturbing the normal order, concealed for long years the full import of free trade. The first 15 years of the reciprocal trade agreement program, a period of abnormal world conditions, postponed the effects of reduced tariffs and inadequate protection. But, as time goes on, and as the recipients of our aid grow in economic capability, the damage to our own producers is becoming greater and more apparent. We are beginning to realize the full extent of the sacrifice we are asked to make in the name of free trade.

This is the sacrifice that we are making and continue to make each time we ignore the Constitution. No true and devout Christian will attempt to live his life outside the precepts of the Holy Bible. No true and patriotic American will attempt to preserve the liberties and freedoms of this Nation while violating and ignoring the Constitution.

Every man here knows what has happened to the price of eggs in the face of Canadian imports. Eggs are produced in every county in America, and almost everywhere they are the pin money of the farm wife. Eggs are one of the many commodities that have been stripped of protection by reciprocal trade agreement. Imports of eggs during the past several months have been a factor in driving the price down to a point where American farmers can ill afford to continue their production.

Our coal and oil industries similarly are victims of imports encouraged in the name of good-neighbor relations. Foreign dumping has cut production of oil in my own State of Ohio—it has inhibited the development of the vast new oilfields in North Dakota and Montana—and it has thrown thousands of coal mine workers out of work all over the Nation. Yet we are told that this is less important than the policy of maintaining good relations with Venezuela.

Metal mines all over America are closed. I believe there is not a single mercury producer in operation in this country today. Lead and zinc, copper and manganese are in dire straits. Subsidy programs are proposed to keep a bare minimum of these mines in operation against the day when their production may mean the difference between victory and defeat if the cold war becomes hot. The simpler, the cheaper, the natural solution, as the Tariff Commission recommended in fact—in the case of lead and zinc—would be the imposition of a reasonable duty upon imports.

I have copies of the testimony presented to the Ways and Means Committee by the pottery industry. This is an industry that comes close to home for me. Yet, I read that 86 percent of the china tableware purchased in the United States is imported and that the domestic pottery industry has changed from a profitable enterprise in 1948 to a losing business in 1954, with many fac-

tories closed and men out of work. It is interesting to note that nine separate reductions have been made in the duties upon china tableware since Congress abdicated its authority over tariffs and authorized the negotiation of executive trade agreements.

An interesting letter was received from the manufacturers of shears and scissors. Apparently this industry is just waking to the full import of trade agreements. We were furnished with copies of letters dated last October and November from the sales manager of a scissors firm who has just learned that Macy's in New York is able to sell foreign scissors at prices one-half or less than the minimum price he can offer. This industry is on the rocks. It is very nearly lost.

Needle files. Perhaps there are some who will think that needle files are not important. But here is another American industry that employs American men and women and that contributes to State, county, and Federal tax revenues. Last fall the United States Navy placed invitations to bid on 19,440 sets of 5½-inch No. 2 needle files. The lowest American bid was $4.45 per set. The contract was awarded to a British firm bidding $1.85. This sale directly affects workingmen in my district. They cannot makes the files at a profit even at the $4.45 figure. Are they to be sacrificed and their tax dollars spent to import competitive British products? Under present Executive orders, that is the only outlook they have.

I am in receipt of a very clear and concise statement of the plight of another American industry, from Mr. Robert G. Patterson, vice president in charge of sales for the Lamson & Sessions Co., of Cleveland, Ohio, manufacturers of bolts and nuts, which I include as part of my remarks:

Hon. FRANK T. BOW,
Washington, D. C.

DEAR SIR: Operating three plants in Ohio as we do, the writer is concerned with the administration expressed free trade policy and the fact that Congress has, in effect, relinquished its control of this vital problem. This preliminary statement is made in connection with the bolt, nut, headed, and threaded products we produce.

Export of our products, except in emergencies, has never been of great importance, approximately 4 percent, and up until 1954 imports were small. Lacking authentic figures, it is impossible to define the impact of imports to our industry. However, the following figures would prove of interest and point up the possible dangers of unrestricted importations.

Foreign bolt and nut products are now made on equipment equal to that of United States of America producers at wage rates approximating the amount per day we pay for 2 hours. Our finished product required in 1954 51.4 hours per ton produced, thus each ton of imported product reduced the work for industry employees by 1.28 weeks.

For the week ending January 5, 1955 the Import Bulletin of the New York Journal of Commerce reported imports of our industry products from Austria, Belgium, England, Germany, Holland, Japan, Switzerland, and Sweden. The exact weight is not obtainable, but using our average container weight on the reported containers, we find an imposing figure. The developed figures in the week ending January 5 show products amounting to 444.16 weeks of American production or a full year of employment for 8.88 men or women. A continuing import rate of like proportion would mean 444 less employees in our industry.

The State Department would, no doubt, consider these figures insignificant, but our industry is relatively small. Using only 2 percent of the United States of America steel production, there probably are not over 25,000 people employed in the industry. If these workers in our industry would be reduced by 17.7 percent—for safety let's call it 10 percent—such a figure applied to employed personnel in this country would be a severe jolt to the much discussed unemployment figures.

The writer does not have a patent answer to the problem discussed herein. Tariffs cannot be adjusted to meet the growing problem, but certainly some equitable limitation of allowed imports on a percentage basis could be applied. No doubt some other industries are threatened in a similar manner and it would, therefore, appear that Congress should take a realistic viewpoint toward the overall subject leading to recovery of lost powers and establishing suitable controls.

I would like to register violent opposition to H. R. 1 now under consideration by the House Ways and Means Committee.

Respectfully submitted.

ROBERT G. PATTERSON,
Vice President, Sales.

Here is a case history by a sound and conservative executive, showing exactly what free trade means in terms of prospective unemployment.

The sponsors of the reciprocal trade agreement program do not deny these facts. Some of them, of course, complain that the American victims of free trade are inefficient producers who should either improve or turn to other fields of endeavor. Others have gone so far as to develop proposed programs for the relief of distressed American producers. Such programs include Federal aid to relocate workers, Federal training courses to give them new skills, Federal loans to industry to convert to other products. In other words, the Government of the United States shall set about to destroy certain industries and then spend Federal funds to alleviate the distress. Can anything be more ridiculous?

Apparently certain industries have already been judged and found eligible for destruction. Pottery is one. Hand tools are another.

Whoever it is in the State Department who has this heady responsibility has determined that it is more important to be friendly with the Japanese potters than to maintain American industry—more desirable to have amicable relationships with German tool makers than to keep a thriving American business alive.

Oh, what power the Congress has given this arbiter of the fate of American business. Picture his deliberations; consider his vast authority; gaze with awe upon the functionary who can say that the American textile industry is inefficient—it must be sacrificed—off with its head.

Some may say that we do not have protection in the escape clause and peril-point provisions of the law. What flimsy excuses for the protection this Government owes itself and its citizens.

Consider that of 59 escape-clause proceedings, only 15 have resulted in decisions favorable to American industry, and in 10 of these the President has seen fit to override the advice of the experts in favor of the foreign producers. What protection is this that relies upon the verdict of one man? It is no protection at all.

I know that some of our people have been sold the free-trade bill of goods on the basis that it means lower prices for consumers. Completely ignoring the loss of jobs, of taxes, and of other advantages that result from local industry, people are led to believe that if they can buy Japan's pottery cheaper than our own, for example, that is to their advantage.

These arguments are heard time and again in relation to every commodity about which a question is raised. One sometimes wonders who will be left to buy the imports, when free trade is an accomplished fact and we find that cheap labor and lower taxes all over the world have put all American industry out of business.

Even before that may come to pass, American consumers may learn a hard lesson about prices and the friendliness of foreign nations. We almost learned it a few years ago when, with a withering wool industry, the victim of cheap imports, we found the British Commonwealth holding a virtual monopoly of the world's wool supply. Acting in unison through the empire pool, the British were then in a position to destroy our wool industry, and thereafter to set the world price at whatever figure they chose.

Do you suppose we would realize low prices on wool if we had none of our own? Do you suppose the foreign traders would be gracious and lenient and sell it to us for whatever price we might offer? Or do you think, as I do, that the end result of dependence upon any foreign source without competitive home industry will mean soaring prices and far greater cost to all of us. If for no other reason than to maintain a degree of independence and self-sufficiency, we need protective tariffs for our producers.

Others have been sold the free-trade bill of goods on the false impression that the United States is a high-tariff country and that we are the obstacle to greater exchange between nations. This is a completely falacious ideal.

We are now a low-tariff nation. Thirty-five of the forty-three principal trading nations have higher tariffs than we. Not only do other nations of the world have higher tariffs, they have a great variety of impediments to trade ranging from internal currency manipulations to outright embargoes against American products. I include herewith a list of the products which are almost completely banned by the 17 most important trading countries. It should be a revelation to some who feel that Uncle Sam is the evil genie of trade obstructions.

IMPORTANT UNITED STATES PRODUCTS, IMPORTS OF WHICH ARE EXCLUDED OR SEVERELY RESTRICTED BY THE OPERATION OF IMPORT RESTRICTIONS IN CERTAIN FOREIGN COUNTRIES

Recent experience has been that while their importation from the United States is not specifically prohibited on a priority basis,

the operation of day to day import and exchange quotas and/or other licensing policies has resulted in no more than small or infrequent licensing of the following:

COUNTRY AND COMMODITY

Brazil: Assembled automobiles, textile fabrics, shoes, hosiery, steel files, and rasps.

Colombia: Grains; certain dairy products; fruits and vegetables; certain meat products; certain vegetable fats and oils; sugar; certain tobacco products; hides and skins, certain leather products; assembled automobiles over 1,240 kilograms in weight, except those of 4-wheel drive and except those for public transportation; rubber tires for vehicles, casing, except specified sizes; coal, except anthracite; certain textiles and textile manufactures; certain paper products; certain soaps.

Cuba: None.

Mexico: Cellophane, powdered eggs, powdered milk, sulfonated oils.

Venezuela: Leather footwear.

Canada: None.

Belgium-Luxembourg: Assembled automobiles, nylon stockings, coal, automotive replacement parts, dressed leather, certain machine tools, certain pharmaceuticals, manufactured tobacco products, coated abrasives.

France: Certain fresh fruits; prunes (dried) and raisins; typewriters; radio receiving sets, household; vacuum cleaners; amateur box-type and folding cameras; motion-picture projectors; motion-picture films (not exposed); dental metals, precious; mechanical pencils; fountain pens; office machine ribbons.

Germany, Federal Republic: Coarse grains; flour and milling products; fruits, other than citrus and tropical fruits; fish and fish preparations; oil cake; leather; furs; wax and paraffine; assembled automobiles; certain rubber articles; certain iron and steel products.

Italy: Tires (inner tubes and casings).

Netherlands: Electrical and mechanical refrigerators, washing and wringing machines, cash registers, assembled automobiles, used bags (jute), compressors, automobile tires and tubes, walnuts, dried apples, salmon, soaps and soap powder.

Switzerland: Trucks, nylon hosiery, parts for watches.

United Kingdom: Assembled automobiles, typewriters, canned fruit, canned fish, fresh citrus fruits, small tractors, dictating machines.

India: Assembled automobiles; motors and generators of certain types; certain textile machinery; industrial sewing machines; certain precision and measuring tools; dairy, poultry, and farming appliances, optical and other lenses; sheet and plate glass; electric bulbs and fluorescent tubes; powdered milk in bulk; canned fruits, vegetables and fish; cigars, cigarettes, and unmanufactured tobacco; belt dressing, belt preservatives, and leather belting; coal-tar dyes, soaps.

Japan: Luxury-type consumer goods, luxury-type food products.

Philippines: Edible oils and fats; beer, soap, fresh vegetables, rubber-soled canvas shoes, cotton weaving yarns, certain cotton manufactures, certain paper products, incandescent and fluorescent bulbs, nails.

Union of South Africa: Canned foodstuffs, fruit juices, beverages, tobacco products, certain textile manufactures, certain electrical manufactures, assembled automobiles, certain glass products, rubber tires, certain paper products, furniture, certain leather manufactures.

(NOTE.—The foregoing list covers the 17 most important trading partners of the United States which cumulatively account for about 75 percent of our exports and imports alike.)

Mr. Chairman, other arguments are used. For example, it is said we must assist Japan by finding markets for her products. But, does this mean that we must find those markets in America, at the expense of our own industry? Are there not many regions of the world where the products of Japanese industry could be used, and more satisfactorily, than here?

If we have a duty to Japan, let us find means of developing her trade in the Far East, in South America, in Africa—but let us give a measure of protection to our own industry—and indeed to our own consumers who will never really be satisfied with the inferior imitative products of the Japanese.

I am privileged to represent the 16th Congressional District of Ohio, the same district represented by our late president, William McKinley. Looking back, I find that many of his ideas on the subject of tariff protection are just as valid today as they were in his time. The issue has changed but little.

If anything, the increasing trend toward a higher standard of living in America as contrasted to the standards abroad has accentuated the need for protection since McKinley made the following speech on the floor of this Chamber on May 18, 1888:

What is a protective tariff? It is a tariff upon foreign imports so adjusted as to secure the necessary revenue, and judiciously imposed upon those foreign products the like of which are produced at home, or the like of which we are capable of producing at home. It imposes the duty upon the competing foreign product; it makes it bear the burden or duty, and—as far as possible—luxuries only excepted, permits the noncompeting foreign product to come in free of duty. Articles of common use, comfort, and necessity—which we cannot produce here—it sends to the people untaxed and free from customhouse exactions.

Tea, coffee, spices and drugs are such articles, and under our system are upon the free list. It says to our foreign competitor: If you want to bring your merchandise here, your farm products here, your coal and iron ore, your wool, your salt, your pottery, your glass, your cottons and woolens—and sell alongside of our producers in our markets, we will make your product bear a duty; in effect, pay for the privilege of doing it. Our kind of tariff makes the competing foreign article carry the burden, draw the load, supply the revenue; and in performing this essential office it encourages at the same time our own industries and protects our own people in their chosen employments. That is the mission and purpose of a protective tariff. That is what we mean to maintain, and any measure which will destroy it we shall firmly resist; and if beaten on this floor, we will appeal from your decision to the people, before whom parties and policies must at least be tried.

We have free trade among ourselves throughout 38 States and the Territories, and among 60 millions of people. Absolute freedom of exchange within our own borders and among our own citizens is the law of the Republic. Reasonable taxation and restraint upon those without is the dictate of enlightened patriotism and the doctrine of the Republican Party.

Free trade in the United States is founded upon a community of equalities and reciprocities. It is like the unrestrained freedom and reciprocal relations and obligations of a family. Here we are one country, one language, one allegiance, one standard of citizenship, one flag, one Constitution, one Nation, one destiny.

It is otherwise with foreign nations, each a separate organism, a distinct and independent political society, organized for its own, to protect its own, and work out its own destiny.

We deny to those foreign nations free trade with us upon equal terms with our own producers. The foreign producer has no right or claim to equality with our own. He is not amenable to our laws. There are resulting upon him none of the obligations of citizenship. He pays no taxes. He performs no civil duties—he is subject to no demands for military service. He is exempt from State, county and municipal obligations. He contributes nothing to the support, the progress and glory of the Nation.

Why should he enjoy unrestrained equal privileges and profits in our markets with our producers, our labor and our taxpayers? Let the gentleman who follows me answer.

We put a burden upon his productions—we discriminate against his merchandise because he is alien to us and our interests, and we do it to protect our own, defend our own, preserve our own, who are always with us in adversity and prosperity, in sympathy and purpose, and, if necessary, in sacrifice.

That is the principle which governs us. I submit it is a patriotic and righteous one. In our country each citizen competes with the other in free and unresentful rivalry—while with the rest of the world all are united and together in resisting outside competition as we would foreign interference.

Free foreign trade admits the foreigner to equal privileges with our own citizens. It invites the product of foreign cheap labor to this market in competition with the domestic product, representing higher and better paid labor. It results in giving our money, our manufacturers and our markets to other nations, to the injury of our labor, our trades people and our farmers.

Protection keeps money, markets and manufacturers at home for the benefit of our own people. It is scarcely worth while to more than state the proposition that taxation upon a foreign competing product is more easily paid and less burdensome than taxation upon the noncompeting product.

In the latter it is always added to the foreign cost and, therefore, paid by the consumer; while in the former, where the duty is upon the competing product, it is largely paid in the form of diminished profits to the foreign producer. It would be burdensome beyond endurance to collect our taxes from the products, professions, and labor of our own people.

When McKinley made that speech, the Congress still retained its constitutional authority over tariffs. Constituents whose industries were threatened could come to Congress and could get assistance and relief. This is no longer the case.

We have given away our authority. We have deprived our constituents of the avenue through which they could get assistance. We have given our authority to the President and hedged him around with diplomatic advisers upon whom our American producers can exert little, if any, influence.

What should be a matter of business and commerce has been turned into a matter of international politics and diplomacy. Who can be surprised that business suffers.

I believe that Congress should defeat H. R. 1. We should regain our ancient and rightful authority in these matters. I can see plainly that if this program continues the day will soon come when so many American industries are facing destruction—when the devastation is so

widespread—that the majority here will have no choice but to embrace again the theory of protective tariffs.

I feel that the situation today is so serious that the division in this House may be very close, indeed, between those who can still theorize about the advantages of friendly intercourse and those who are face to face with the facts of ruinous foreign competition. Why wait? Why increase and prolong the damage to our economy?

We are under no obligation to perpetuate the errors of 1934. Indeed, we have a mandate to correct them. This is our opportunity. The defeat of H. R. 1 would be a great accomplishment for the future welfare of America.

The European industrial production chart follows:

European industrial production, 1938–53 [1]

[Index: 1950=100]

	1938	1948	1949	1950	1951	1952	1953
Product:							
Crude steel	88	79	92	100	111	121	119
Coal	108	90	98	100	105	107	106
Chemicals	71	72	84	100	117	113	130
Electric power	57	82	88	100	112	119	125
Textiles	90	80	89	100	194	93	102
Automobiles	63	41	74	100	108	112	127
Country:							
United Kingdom	76	87	93	100	104	101	106
France	83	90	98	100	111	114	112
Italy	79	79	87	100	113	116	127
Germany	107	55	79	100	120	128	139
Netherlands	72	81	91	100	104	106	117
Belgium	81	97	98	100	115	112	112

[1] Complete 1954 figures not yet available. 1st 9 months indicate 1954 totals exceed 1953.

Mr. REED of New York. Mr. Chairman, I yield 5 minutes to the gentleman, from Ohio [Mr. VORYS].

Mr. VORYS. Mr. Chairman, I was a member of the Randall Commission and joined in the recommendations which are the basis for H. R. 1.

My particular interest was the foreign-aid phase of our foreign economic policy. There are still a number of countries that cannot maintain the military forces they are willing to raise and we think they should have, without military and economic aid. Korea and Formosa are examples. I want to reduce our aid as soon as possible without weakening those countries. One way is by increasing their trade with us and other countries in ways that will not hurt any of us.

The Randall Commission met for 28 days and made 55 specific recommendations. A number of them are being put into effect without congressional action.

Our tariff recommendations are the most moderate ever made by such a Commission. Certain groups in this country, and many foreign countries, wanted us to recommend elimination of the peril point and escape clause, saying these subjected would-be importers to uncertainties about their future trade. We recommended retention of both, to reduce uncertainties for American businesses about their future trade.

We recognized that, as long as we have protective laws for wages, agriculture and commerce, we must retain proportionate tariff protection. We therefore put limits on tariff reductions such as have never before been included in a trade agreements extension. These suggested limits were accepted by the President and are contained in H. R. 1. In general, 85 percent of the present rate must be retained; only 3 annual reductions, of 5 percent each, are permitted.

The President has promised, as we recommended, that any reductions will be moderate, gradual, selective, and reciprocal. Now some of you may not believe President Eisenhower when he says that. I believe him. I do not believe that he wants to wreck our industries. I think he wants the power to negotiate for better trade practices among the free nations of the world, for the mutual benefit of all. We are not a high-tariff country, net. We do not use barriers to trade, such as quotas, embargoes, blocked currencies and other devices, in the way many other countries do. However, our foreign trade is so gigantic, compared with other countries, that small adjustments in our trade can be very influential on the rest. Above all, our position of world power and leadership gives us tremendous leverage, if the general direction of our policy for a period of years is made clear. That is what H. R. 1 does.

We have some industries that are being hurt by foreign competition now. They are losing some exports, and imports are cutting into their domestic business. I do not think we will help them by defeating this bill. I doubt if there is any special trade law we can pass that will help them without doing more harm than good. Higher tariffs, quotas, or embargoes might bring prompt retaliation on their products, on other United States products, by other countries.

I think we need to leave such cases to the Tariff Commission and the President, as provided by H. R. 1. The peril point and escape clause will help, but a country that believes in competition cannot eliminate all competition, foreign or domestic, by passing a law.

It has been said that we have a constitutional question here. Congress has the power to levy taxes and tariff imposts, and has exercised that power. I have long ago decided that the Trade Agreements Act, authorizing adjustments in tariff rates by the President and Tariff Commission, is constitutional. There are many fields of Government activity which have become too complex and complicated for Congress to regulate directly in detail, so Congress sets up statutory standards, and delegates administration of details to executive agencies. I have heard Senators and Congressmen who participated in the last tariff act say, regardless of how they feel on reciprocal trade, that never again should Congress attempt a general tariff revision such as Congress made in 1930, because the subject has become too complicated.

In the Randall report, Senator BUSH and I filed a statement—page 63—as follows:

> We believe that in negotiating trade agreements, our negotiators should consider not only substandard and depressed wage levels, as described in the Commission's report, but also wage differentials, in order to protect American labor.

We have got to think about our workers. But in this complex problem, we have got to think, not only about imports, but about our exports. Four and one-third million workers are involved in our foreign trade, mostly on exports.

Ohio industries export about a billion dollars of products per year. About 300,000 Ohio workers make their living, directly or indirectly, from foreign trade. About 70 percent are in industries whose export sales exceed similar imports by 4 to 1 up to 20 to 1. About 6 percent are in industries, like glassware, in which imports exceed exports. In Franklin County, Ohio, my own district, workers in businesses and industries that profit from exports and imports far exceed those in businesses and industries hurt by imports. Of course, we are all part of the same community, the same economy, and whatever affects one segment affects another. We have to think about our consumers. There are 164 million of them in the United States. Every tariff rate which is effective, which holds prices up, is a price support we pay to American producers.

On balance, I feel H. R. 1 will furnish as much protection as Congress can give to all the people of our country.

The CHAIRMAN. The time of the gentleman from Ohio [Mr. VORYS] has expired.

Mr. REED of New York. Mr. Chairman, I yield 20 minutes to the gentleman from Missouri [Mr. CURTIS].

Mr. CURTIS of Missouri. Mr. Chairman, I take the floor primarily to discuss a basic amendment I proposed in committee to H. R. 1, the extension of the Reciprocal Trades Act. Unfortunately with the closed rule under which the House in its wisdom, or lack thereof, saw fit to consider this far-reaching and important legislation, I will not be able to offer this amendment for consideration of the Committee of the Whole House. However, I am hopeful that by the time this bill reaches the other body my amendment will be well understood by the Congress and the people of the country, and that the other body will adopt this amendment. I am hopeful by this time the executive branch of the Government will begin to understand this amendment and adopt its principle and help instead of hinder its passage. If this happens, then it is important that the Members of the House know what the amendment is, so that if it is part of the conference report, they will be aware of what they will be called to vote upon.

Before I proceed to the amendment itself I want to discuss briefly some of the procedures that have been used in considering H. R. 1 in the House Ways and Means Committee and here on the floor of the House. I dislike the task of criticizing my own committee for the procedures it has followed, but if such procedure is improper and not conducive to good legislation, as I believe is the case, it will be only corrected in the future if it is pointed up in the present.

The House Ways and Means Committee finished lengthy and rather exhaustive hearings on H. R. 1 at 7:30 p. m., Monday, February 7, 1955. On Tuesday, the chairman of the committee called an executive session of the committee and, without explaining his program, proceeded to start reading the bill for explanation. On Tuesday, February 8, 1955, the House had on the floor for

passage one of the most important bills of this session, the extension of the Selective Service Act. I was deeply interested in this piece of legislation and felt as a Member of Congress I should be on the floor to follow it. In spite of the suggestion that the committee suspend its executive session during the House session the chairman announced that not only was it his intention to not suspend but that he fully expected to have the bill passed out of committee by Wednesday evening. As most Members will recall, the House and Senate were to be in a period of agreed recess from Wednesday, February 9, to February 16, so that the Republican Members could fulfill their commitments to speak around the country at Lincoln Day observances in accordance with custom and tradition. The bill was rushed through and passed out on Thursday.

There was no reason for rushing the passage of H. R. 1 without full consideration by the committee. The Reciprocal Trade Act has several months left before expiration and even an interim period between extensions has no actual effect. There could not possibly be proper consideration without the Members having the opportunity of reviewing the hearings and in particular reviewing the statements that were to be supplied for the hearing by various members of the administration as requested by members of the committee at the time these administration spokesmen testified. I had requested considerable additional data from the various Cabinet officers and other high administrative officials about important details of the administration of the Reciprocal Trade Act and how it had operated over a period of time. The hearings will show the type of information I requested and the value of the information that was so supplied. Yet this information was of no possible value to the commitee in its executive session because of this undue haste.

Furthermore, without proper notification to the members of the committee of what the procedure was to be in marking up the bill, many members, myself included, were not ready with amendments they had in mind. I had intended discussing the amendment I did offer and the one which I will discuss here today with the proper officials in the executive department, but due to the shortage of time I had no opportunity to do so.

I want to call the Members' attention to the data contained in the committee's report from pages 36 to 86 under the heading "Appendixes." This data is important data which should have been available to the committee before we began questioning the administration witnesses so that we could ask questions concerning it. The first I, and I believe any member of the committee, saw of this data was when we read the committee report along with the other Members of the Congress. However, this data placed in the report carries the implication that it was matter considered by the committee and about which the committee asked questions of the administration witnesses. As a matter of fact, it was just this type of information I asked to be provided by the administration witnesses because their statements before the committee were couched in the most general terms with little or no specific information. Having to ask the witnesses to supply the information later, of course, prevented the members from interrogating the witnesses about the accuracy or meaning of the information. Certainly the data in the appendix was never subjected to scrutiny nor questioning by the committee.

There have been considered statements made to the effect that the Randall Commission study and report was not so much a study as it was a procedure to bring together such evidence as might be available to support the preconceived notions of the majority of the Commission. Having read the Randall Commission report carefully and what testimony was available, I regretfully come to the conclusion that these charges are well founded. I say regretfully because I have the highest regard for the individual members of this Commission and I am convinced of their sincerity and their profound belief that they are acting in the best interests of our country. However, I am convinced that the best interests of our country are only served by fairly and honestly studying the issues of the day and by not reaching conclusions before studies are made. Certainly the best interests are not served by a commission directed to make a study and report when it fails to do so.

I mention the Randall Commission study and report because the identical pattern has been followed by the Ways and Means Committee in its hearings and executive sessions on H. R. 1. It is important that the Members of this Congress, to whom we as a committee are responsible, know that we as a committee did not make a real study of these problems. The approach was one of preconceived notions and the hearings, as nearly as I can judge, were mere window dressing so that the majority of the committee could state that everyone who wanted to be heard was heard. But, my colleagues, it is no hearing if the ears are deaf, it is no executive session writing up the bill if you have to spend your efforts trying to persuade 13 proxies instead of 13 colleagues present and paying attention to the language of the bill.

There is a deadening and dangerous attitude in the Government here in Washington which has us go through the motions of the constitutional legislative process when what truly has occurred is that a very small group of persons in the Executive Department have already made the decisions and written the legislation. We are then just going through the formalities or the ritual, if you please, of a Republican society.

What, indeed, was the purpose of the closed rule? Was it indeed as the gentleman from Texas [Mr. RAYBURN] said, when he stepped down from the Speaker's chair to exercise his prerogative as a Member to discuss the issue, because it was traditional and necessary to have a closed rule on a piece of legislation like H. R. 1? I respectfully disagree with the gentleman from Texas. It is true that tax legislation and tariff legislation have come out under closed rules and, much as I dislike closed rules, there is reason and understanding behind this tradition. The gentleman from Texas gave the reasoning—it is to prevent logrolling. Bitter experiences in the long ago past when taxes or tariffs came out under open rules were called to our attention. But, my colleagues, the Reciprocal Trade Act is not tariff legislation in the true sense of the word. It is procedural legislation setting up the manner in which tariffs are to be written. It is legislation delegating power to the executive branch of the Government and to the Tariff Commission—an arm, I might state, primarily of the Congress. Now in writing procedural legislation there is no reason for a closed rule. Certainly the reasons applicable to tax and tariff legislation have no bearing on procedural legislation. There is every reason why procedural legislation indeed should always come out under a very open rule. Now it is no argument to say that specific tariff or quota amendments could be offered to H. R. 1, because it would have been quite easy for the Rules Committee to have given a rule with that specific restrictive feature in it. No, my colleagues, the reason for the closed rule, in my opinion, is the same as the reason for the closed minds of the majority of the Randall Commission and the closed minds of the acting majority of the Ways and Means Committee. The reason is that these people whose directions are being followed, whoever they are, think that they know what is best for our beloved country, and, I say, perhaps they do. But I say if what they think is best for our country is so surely right why are they unwilling to submit their reasons and their facts to honest study and public scrutiny and true debate?

I personally think that this group, whoever they are, are tragically wrong and in their willfulness truly dangerous to the welfare of our country. Sooner or later the people of this country must rise up and ask that honest forthright studies be made and true debate be had on this matter or else I fear we will end up in disaster.

I think I can bring out these thoughts in discussing the amendment I had proposed to the bill and which the administration spokesmen stated was right in objective, as had the Randall Commission, but so delicate to handle that nothing could be done about it. I hope you will consider it and make up your own mind upon its practicality.

You will notice that the plea for my amendment is largely based upon the same premises professed by those who want H. R. 1, as is, unchanged, that is, to increase world trade, to build the economies of the nations outside the Iron Curtain, to make friends of the people of these nations and to check Communist infiltration into those countries. I charge that the policies we have followed in the immediate past have not increased world trade as it could be increased, have not built the economies of these nations as they should have been built and, indeed, have not generated the real friendship of the peoples of these countries, nor have they stemmed Communist infiltration into these countries.

I had the Legislative Reference Service of the Library of Congress collect some data for me about the countries abroad from which I derive the following conclusions. There are 71 countries outside the iron curtain which we erroneously refer to as the "free" world. Of these 71 nations 49 of them are outwardly or actually dictatorships or close oligarchies and the majority of them cannot even pass under the term benevolent dictatorships. Of the remaining 22 nations, most of them truly have some claim to the adjective "free" as far as their political governments are concerned, but, certainly as far as the economic control of several of them is concerned, it is oligarchic and a small percentage of the nation is living off the backs of the other 99 percent. Fifteen of the dictatorships of the 49 have a per capita gross national product of less than $100. Eleven less than $200; 10 less than $300 and only 2 more than $500. Compare this with the United States per capita gross national product of $2,233 and you begin to get the picture. Of the 22 nations which have some real claim to freedom, eliminating those which are tied up in an economic oligarchy, there is not 1 with a per capita gross national product below $500. And many of them are above $1,000. The highest is Canada with $1,625.

Now I wish we had the studies available of the internal economies of these allegedly free countries just to see what the spread of wealth actually is as far as the bulk of the people of each country is concerned. This is the data we must know if we are truly going to do something to raise the economy of these countries. This is the kind of data the Ways and Means Committee should have been getting and studying.

Surely we should know by now that merely increasing trade with country X which goes into the pockets of dictator Y and his henchmen does not make friends of the people of country X for us. Quite the contrary, the people could say, and with some truth, that we help keep dictator Y on their backs and the Communists you may rest assured play this theme for all it is worth. And a look at the world today should surely tell us that this line has met with some success. "Yank go home" has a basic meaning which we are foolish to ignore and not try to understand.

My amendment proposes reciprocal trade in the purest meaning of that phrase. For, in this plan, reciprocity means that all participants in trade agreements—the nations, the industries and the workers—share the benefits.

It is a simple plan. The exact language of the amendment is as follows:

On page 1 at line 5 after section 2 insert "A"; at line 9 after the period insert the following:

"(B) No reduction in any rate of duty or binding of any customs or excise treatment or other concessions hereafter proclaimed under section 350 of the Tariff Act of 1930, as amended, or under section 5 of this act shall apply to any import within the product class on which the concession has been granted, in the production of which any employee was employed at wages at an hourly rate less than the minimum rate in effect in the United States under section 6 of the Fair Labor Standards Act of 1938, as amended (29 sec. 206), at the time of the production of said import provided, that the President may provide by Executive order with respect to a trade agreement that during the first 36 months after such agreement becomes effective it may apply to imports in the production of which employees were employed at less than such minimum rate by the rates prescribed therein which shall be not less than 60 percent of such minimum rate for an initial period of 12 months, not less than 70 percent of such minimum rate for an immediately ensuing period of not more than 12 months, and not less than 80 percent of such minimum rate for the remainder of such 36 months or such part thereof as the President may prescribe.

"(C) The President is hereby authorized to delegate to such Federal official or officials, or agency or agencies, as he deems appropriate all functions incidental to carrying out subsection (B) of this act, and to promulgate such rules and regulations as he deems necessary for its administration. The determination of the United States equivalent of wages paid in foreign currencies shall be calculated on the basis of the paying rate on New York as proclaimed by the Federal Reserve Bank of New York.

"(D) With respect to foreign trade agreements entered into prior to the effective date of this act under section 350 of the Tariff Act of 1930, as amended, any reduction in a rate of duty, or binding of any customs or excise treatment or other concession shall be made only in conformity with the policy established in subsection (B) of this act, unless authorized by the provisions of section 350 of the Tariff Act of 1930 as such provisions existed on January 1, 1955."

But let us translate that a little differently.

In effect, the amendment states that foreign producers who want to reap the lush benefits of the United States markets must qualify by passing on a part of those benefits to their workers by paying wages pegged to the legal minimum wage scale of American workers—the workers with whom they are competing.

It is that simple. It requires no charts or graphs for complete understanding. No high-domed economists are required to explain its operation. It is a 2+2=4 equation.

A CHAIN REACTION OF BENEFITS

The idea embodied in the amendment is simple, but it has the ability of setting off chain reactions that could affect the economic and political welfare of the world. One needs to dwell only briefly upon the far-reaching implications of the amendment to understand the contributions it could make toward perpetuating the American way of life at home, and to disseminating its advantages abroad.

Let us take a look at what happens when you raise the wages of foreign workers so they are more in line with the legal American minimum scale. The chain reaction is something like this:

First. American business and labor get protection from the unfair competition which stems from foreign manufacturers' Dark Ages policy of paying sweatshop wages.

Second. Foreign workers, with their wages increased, have greater buying power, can enjoy a standard of living more like our own.

Third. Foreign manufacturers feel the effects of the increased buying power, find an overexpanding market among the workers who now must spend most of their wages for bare necessities of life.

Fourth. United States manufacturers also benefit from the increased income of foreign workers, finding broader markets for exported goods.

Fifth. Communism, which feeds on the unrest caused by the unfulfilled desires of the have-nots, finds its economic doctrine has little appeal in nations where workers are well paid and share more of the fruits of their own labor.

WILL THE PLAN CHANGE THE FOREIGN PICTURE?

You may ask: "Why do you think the plan would work in foreign countries just because the capitalistic system has proved so successful in raising the living standard in the United States?"

Why not? America's high living standard today is based entirely upon the basic principle provided in the amendment: The principle that only by providing the vast majority means of buying products it produces can a society experience a high level of prosperity.

It might be said that Americans learned this the hard way. Today our workers ride to their jobs in automobiles, while those of foreign lands either walk or ride bicycles. Per capita, our ownership of telephones, radios, televisions is the greatest in the world; Americans enjoy better housing, more food, a greater variety of clothing and other goods than our foreign friends.

But this has not always been so. The system that now spells prosperity has not always existed, nor did it flower overnight. A century ago the disparity between great wealth and miserable poverty was as great here as anywhere. Men were exploited and the fruit of their labor was scant. But gradually, in response to the efforts of far-sighted labor leaders and with the aid of constructive legislation, there emerged a new day when workers began to share more equitably in the goods they produced. There evolved a new way of life. It should be safeguarded; it should be shared.

WHAT KIND OF PROTECTION?

Americans have no monopoly on productive brains and inventive genius. Those who believe that efficient and highly mechanized production techniques are unknown anywhere else should stop deceiving themselves. The truth is that dozens of blue-chip American manufacturers are adopting foreign-developed processes and methods because of their efficiency.

Since foreigners employ the same production techniques and machinery that our manufacturers do, they suffer no disadvantage on a competitive basis—nor do they have any great advantage in production costs, except in the wages paid the people who produce the goods.

"But," you may ask, "can foreign manufacturers afford to meet the United States legal minimum wage?"

The amendment would work no hardship. It does not even insist that foreign manufacturers pay the current United States legal minimum of 75 cents an hour—the amount now held fair in this country for the unskilled services of a messenger boy—much less the much higher wages voluntarily paid by most

American industries. The amendment provides that the first year the plan goes into effect, foreign manufacturers could qualify for trade concessions by paying only 60 percent of the American minimum, and that the scale would rise to 70 percent of the legal minimum wage the second year and to 80 percent the third year.

Does not that seem fair? Is there any reason why a foreign manufacturer, selling in the American market, should not pay at least 60 percent of the American legal minimum wage when he is making products on the same machinery and using the same methods employed by our industries?

America's belief in a high standard of wages is written into law. The Fair Labor Standards Act prescribes that all concerns doing business in interstate commerce must pay a minimum wage of 75 cents an hour. The law does not state that only companies located in a high-rent area must pay such a wage. A company located in Mississippi must meet that minimum wage just the same as a company located in New York. The law does not say that only companies who can afford to pay workers 75 cents an hour need pay it. If a concern cannot afford to pay the minimum, it must close its doors, or restrict its business within boundaries of the State.

HOW FOREIGN WORKERS WOULD BENEFIT

Trade agreements based on conventional provisions—those of raising or lowering the rate of tariff—invariably work a hardship on at least one of the participants. Under a protective tariff imposed by the United States, foreign exporters are frustrated in their efforts to expand into our markets; under a low tariff scheme, United States industry suffers.

Under neither plan, however, do any of the benefits go to labor.

Under the plan proposed in this amendment, labor would reap all the benefits. Wages would be increased in industries which make products to sell in the United States. As the income of workers rose and buying power increased, the benefits would be passed on to management.

It took a great American industrialist, Henry Ford, to drive home the logic of that truism—that higher wages created more buyers for his own products. One day he announced he would pay his workers the unheard of minimum wage of $5 a day. The whole idea was denounced as impractical and ruinous. It was prophesied freely that Ford would go broke. In answer to all the criticism, Mr. Ford simply said:

> If I pay my men at least $5 a day, they can buy my Fords.

Perhaps he would have gone broke if it had not been for the labor shortage brought about by World War I. Certainly it is risky business for one manufacturer to be far out of line in his costs with others. But the plan worked, and it gave other manufacturers a new idea. And sales managers suddenly discovered millions of prospects who had more money than that required for subsistence.

Today our supersalesmen of television and radio do not air their pitch at the few who live in high-price neighborhoods, but to the millions who earn their living in factories and offices and live on medium-bracket streets.

One of the greatest fallacies of our day is held by those who advocate giving foreign businessmen even freer access to our markets by yet more reductions in our tariffs. For some unsupported reason they seem to believe the profits will somehow filter down as higher wages and better living standards to foreign workers. Business history has not borne this out. The truth is that the employers, themselves, reap the benefits. Profits of 30 percent and even more are not uncommon. But the workers—the producers—are compelled to subsist on sweat-shop wages, the prey to any arguments made by Communist agitators who hold out hope of improved living conditions.

To conclude, it appears that the solution to many of our problems is simple:

Let any further concessions in United States tariffs be made contingent upon a foreign producers willingness to pay the prescribed percentage of the legal minimum wage which American manufacturers must pay under the Fair Labor Standards Act.

The Randall Commission Report said it was too difficult and too delicate a matter to handle. The administration's approach as expressed by its spokesmen before our committee was the same. The Assistant Secretary of State in charge of trade treaty negotiations, statements in executive session before our committee clearly revealed that the State Department does not put the question of labor differential on the agenda for discussion in negotiating our trade agreements.

The Assistant Secretary of State said in answer to my questioning of whether they consider the wage differential in their negotiations: "Oh, yes; we consider it."

I said: "Well, do you discuss it with them?"

He said: "No; we do not discuss it but we consider it."

I said: "How can you consider something if you do not discuss it?"

He had some reply which, frankly, made no sense to me then nor, on reflection, now.

My answer to the State Department is, The only difficulty is that apparently they have done no thinking on the subject and no attempt has been made to find a solution. I think the amendment I propose is practical, sensible, and will produce results. Let them spell out why it is not. I think this amendment, if passed, would be hailed worldwide, even behind the Iron Curtain countries, as the first real indication in some time that the United States is really concerned about exporting liberty and the freedom to pursue happiness beyond her borders. If this is interference with foreign countries' affairs, as the State Department suggests, I say let's have more of this kind of interference and less of the kind of interference we have been indulging in in the past few decades.

Mr. MILLS. Mr. Chairman, I yield 5 minutes to the gentleman from West Virginia [Mr. BYRD].

Mr. BYRD. Mr. Chairman, I seldom take the time of this House but, upon a few occasions, I have tried to call to the attention of the membership the conditions which are prevalent in my district, the largest coal-producing district in the United States, and which exist throughout West Virginia and, likewise, in the other coal-producing States. There is a written law, however, in the book of Ecclesiastes which says:

> To everything there is a season, and a time to every purpose under the heaven; a time to be born, and a time to die * * * a time to keep silence, and a time to speak.

If there were ever a time to speak, it is upon an occasion such as this when we are considering legislation so vital to the interests and the welfare of our country and its people.

I am sorry that H. R. 1 has been brought before the House under a closed rule, depriving the membership of the opportunity to work its will and its way upon what might very well be the most important piece of legislation we shall consider during this session. During the hearings on this bill, I appeared before the House Committee on Ways and Means and urged that amendments be adopted so as to provide protection for our industries and the people who work in them. I also appeared before the House Committee on Rules and asked that H. R. 1 be brought to the House under an open rule. It is here before us under a gag rule.

Today we shall make a decision, and it will be a decision from which we cannot retreat. It is one with which we shall have to live for a long, long time.

Brutus in the great tragedy, Julius Caesar, said:

> There is a tide in the affairs of men,
> Which, taken at the flood, leads on to fortune;
> Omitted, all the voyage of their life
> Is bound in shallows, and in miseries.
> On such a full sea are we now afloat;
> And we must take the current when it serves,
> Or lose our ventures.

Today we are upon that very sea, and either we shall pass this legislation which will continue to deny protection to our own people and our industries, or we shall stand with the courage we should have as men and vote to send this nefarious piece of legislation back to the committee, where there can be written into it provisions which will adequately protect our industries and which will terminate, once and for all time, the present setup under which the President is making a joke out of the escape clause.

I have listened to the arguments of those who are in favor of passing this bill in a hurry. I say there is no hurry. The present act does not expire until June. There is plenty of time. Other less important bills have come before this House under an open rule. Why can we not have an open rule upon this most important piece of legislation? We Members of this House should assume the responsibility that is ours under the Constitution and take the time, because so very much is in the balance.

Someone said yesterday that the great John C. Calhoun would turn over in his grave if he could know the arguments

of those Members who were pleading for an open rule, and if he could hear those who were opposed to passing this legislation in its present form.

Now, if we are going to invoke the spirit of those great statesmen who have joined "the innumerable caravan which moves to that mysterious realm," we might detect some uneasy stirrings "in the silent halls of death" and across the years Webster's words which appear upon the wall of this Chamber might fall upon our ears in thunderous tones;

Let us develop the resources of our land, call forth its powers, build up its institutions, promote all its great interests and see whether we also in our day and generation may not perform something worthy to be remembered.

But let us not dwell in the dying embers of the past. "No man, having put his hand to the plow, and looking back, is fit for the kingdom of God." Jesus said, "Let the dead bury their dead." I exhort you to "choose you this day whom ye will serve; whether the gods which your fathers served that were on the other side of the flood," or the America and the people of today and the days to come.

Those who maintain that H. R. 1 should not be amended make the argument that to amend the bill would endanger the economies of our allies. I agree that our allies must be strong economically if they are to be strong militarily, but I am not in favor of strengthening their economies if by so doing we weaken the economy and the military potential of this Nation.

Who is there in this Chamber today who can assure me that in the event of atomic war, our allies will not proclaim themselves neutral in order to avoid total destruction? I believe that in the event of another war, America will have to, in the final analysis, defend its own shores with its own guns and its own blood. I, for one, am in favor of looking after America's defenses and the economy of this country first, last, and all the time. But I am persuaded to believe that our country's military might is being imperiled as a result of the threat posed to our industrial mechanism by excessive imports of cheap foreign gas.

Our production techniques have been the envy of the world, and in less than 200 years this Republic has become the brightest star in the galaxy of nations. This ascendancy to supreme greatness did not come about by chance. It was the result of God-given resources which could be developed through the wisdom of men and women who placed the welfare of their country above all else. Their vision, their talents, their fortunes, and their patriotism have all blended to give this generation the most wonderful country in any age. But, my fellow countrymen, America's sun may be swept from its zenith to set forever beyond the hills of time if we act carelessly and unwisely during one of destiny's golden moments.

I saw them tearing a building down.
A group of men in a busy town.
With a hey, hi, ho, and a lusty yell,
They swung a boom and the side wall fell.
I said to the foreman, "Are these men skilled,
The type you would hire if you had to build?"
He laughed and then he said, "No, indeed,
just common labor is all I need.
I can easily wreck in a day or two
That which takes builders years to do."
I said to myself, as I walked away,
Which of those roles am I going to play?
Am I a builder who works with care,
Building my life with the rule and square?
Am I shaping my deeds by a well laid plan,
Patiently building the best I can?
Or am I a worker who walks the town,
Content with the labor of tearing down?

Through the long years, the American people have built the greatest Nation on the face of the earth, the greatest in any age, and it takes only a day to ruin that magnificent edifice. I sincerely believe that the building is being threatened today by legislation such as the bill before us. Shakespeare, in that eminent work of genius, MacBeth, placed upon the lips of Malcolm these words:

I think my country sinks beneath the yoke. It weeps, it bleeds, and each new day a gash is added to her wounds.

As I think about my great State of West Virginia and the other industrial States of this Nation, I hope that we today will not add to their wounds a mortal blow.

Throughout the coalfields of my State, and of Pennsylvania, Kentucky, and all the other great producers, are idle tipples, idle railroad cars, deserted shafts, and mine after mine closed down. During the past 3 years at least 150 commercial mines have closed in the State of West Virginia, idling thousands of miners. Add to these the thousands who depend on coal for a livelihood—railroad workers, storekeepers, service-station owners, and a host of others, and we begin to get some picture of a real depression in coal-producing areas.

I live in the Beckley area of West Virginia, and in that area alone, the percentage of total employment as represented by mining has declined 43 percent from that of 1 year ago. Practically all of the unemployed are men who are over 45 years of age, with none other than mining experience, a fact which in many instances precludes them from finding employment elsewhere. A recent report shows 3,500 persons a month exhausting their unemployment benefit payments in my State, and many individuals passed this point of exhausted benefits months ago.

On January 1 of this year, 223,847 people in West Virginia were depending upon the Government surplus food commodities for survival, and the figure is increasing at the rate of 10,000 each 2 weeks, I have been informed. School lunch programs have been seriously affected in these mining areas, as more and more children of unemployed workers are forced to depend upon free school lunches. Many requests are being received by teachers for clothing to keep children warm. The situation, in many instances, is desperate, to say the least.

Mr. Chairman, throughout many months, I and other Members of Congress have offered evidence of rising unemployment, hunger, and destitution in coal-producing States. Our arguments have gone for naught. If the attitude we have met continues to prevail, I assume that to offer further evidence would be "love's labor lost." Some may say that the difficulties confronting these people are so provincial as to be excluded from consideration in a program devoted to international trade policies, but there are other aspects of the damaging impact of foreign residual which cannot be looked upon sectional problems. Coal mining and railroading are as essential to the conduct of a mobilization program as are aircraft industries, munitions works, and shipbuilding. Coal mines and railroads cannot survive under a system which demands that they operate like a stop-and-go traffic light—on again, off again, on again, gone again. The caution light is now burning and, unless the rail and coal industries are given consideration in the immediate future, the red light may be on when this Nation's security is in jeopardy and these great basic industries are called upon once more to deliver the goods.

My friends, the time has come when we must think uppermost of the welfare of our native land, and the well-being of its people, the men and women who with their sweat and blood and tears and fortunes have made this country the land of the free and the home of the brave. If we must be our brother's keeper, let us think of our brothers here before we think of our brothers abroad who may or may not be counted upon to help us in our hour of need.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BYRD. Mr. Chairman, will the gentleman on my left, in charge of the time, permit me to have 3 additional minutes?

Mr. REED of New York. Mr. Chairman, I yield 3 additional minutes to the gentleman from West Virginia [Mr. BYRD].

Mr. BYRD. Mr. Chairman, perhaps my thoughts can best be illustrated by Edwin Markham's Parable of the Builder in which he told the story of a certain rich man who had it in his heart to do good. One day he was walking over his broad estate and he came upon a little hut in the valley in which lived a poor carpenter with a large family. The rich man out of compassion summoned the carpenter to his home the following morning and laid before him the plans for a beautiful building. The rich man said, "I want you to build me a house just like this one, over on the mountain, overlooking the sea. I want you to put into it the finest of materials and the best of workmanship, because I want it to be a good house."

With that he went away and left it all to the builder. After he had gone, the builder thought it over, and he said to himself, "This is my chance." So he put into the building the cheapest of materials and the poorest of workmanship, in order that he might have more money for himself. At length the rich man returned. The carpenter walked up to him and offered him the keys, and as he did so, he said, "That is a fine house I built for you over on the hill."

"Good," said the rich man. "I am glad that it is a good house, because I have intended all along to give it to you when it was finished. The house is yours."

The carpenter walked away broken-hearted. How industriously he had been cheating himself. As he walked away, he said over and over again to himself, "Oh, if I had only known that I was building for myself."

Each of us is working on a building. It is the building of America. Shall we build wisely or foolishly? Let us build carefully lest in the end we find, like Edwin Markham's carpenter, when it is all too late, that we have been cheating ourselves.

Mr. Chairman, I offer the following poem in no vein of lightness, but, rather, in a spirit of sincerity and deep purpose.

May it leave an indelible impression upon the minds and hearts of all as we prepare to make our decision:

When you get all you want in your struggle for pelf,
And the world makes you king for a day,
Then go to the mirror and look at yourself
And see what that has to say.

For it isn't your father, your mother, or wife
Who judgment upon you must pass,
But the fellow whose verdict counts most in your life
Is the old boy looking back from the glass.

He's the fellow to please, never mind all the rest
For he's with you clear down to the end,
And you've passed your most difficult, most dangerous test
If the man in the glass is your friend.

You may be a Jack Horner and chisel a plum
And think you're a wonderful guy,
But the man in the glass will just say you're a bum
If you can't look him straight in the eye.

You may fool the whole world down the pathway of years
And get pats on the back as you pass.
But your final reward will be heartaches and tears
If you've cheated the man in the glass.

Mr. Chairman, let us not cheat the man in the glass. I urge the Members of this House to support the motion to recommit. If we can recommit H. R. 1, it will be brought out of the committee with adequate safeguards included for the protection of the coal, chemical, glass, and other industries, after which we can conscientiously support the bill.

The CHAIRMAN. The time of the gentleman from West Virginia [Mr. BYRD] has again expired.

Mr. REED of New York. Mr. Chairman, I yield such time as she may desire to the gentlewoman from Ohio [Mrs. FRANCES P. BOLTON].

Mrs. FRANCES P. BOLTON. Mr. Chairman, during my 15 years in the Congress as a Representative of the 22d District of Ohio, I have supported extension of the Reciprocal Trade Agreements Act each of the eight times that it has come before the Congress. I am supporting it again.

President Eisenhower, in his message to the Congress on January 10, 1955, gratified many of us concerned with this Nation's trade when he described his program as "moderate, gradual, and reciprocal." I have often said that I believe in tariff reductions if they are truly reciprocal—if they prove equally beneficial to both signatory parties. Both buyer and seller must gain.

All too few people realize that while the principles of the trade-agreements program are basically international, the application of those principles—as far as my constituency is concerned—is entirely a local matter. In the greater Cleveland area there are hundreds of large and small businesses which manufacture upwards of 1,000 products, a large proportion of which has long been marketed at home and abroad. Thousands of persons find gainful employment in the production of that merchandise and on the periphery of Cleveland we have hundreds of farms. These farmers engage not alone in dairying, and stock feeding, they cultivate their lands and orchards in the production of wheat, corn, apples, grapes, pork, and other crops, of which we in America are at this very hour producing exportable surpluses. To keep our local industries in production, our farms prosperous, it is imperative that we find foreign markets in which to dispose of these products economically and profitably.

This can best be accomplished by trade that is truly reciprocal, where we dispose of our surplus products and accept in payment thereof those products not native to our soil—coffee, tea, bananas, crude rubber, and silk, to name but a few. We need also those products so vital to our defense industries which are in short supply in our country—strategic products such as nickel, tungsten, cobalt, manganese, mica, and many others.

At another point in this statement, Mr. Chairman, I make particular reference to other phases of our national security.

MY STUDY OF THE TRADE ISSUE

It is because the trade issue is so vital to our domestic and foreign economy and to our national security that year after year I have made a separate study of the subject before casting my vote.

Last year, in anticipation of this legislation, I decided to go further in my analysis of world-trade problems. I began a very extensive correspondence with persons throughout the country who are conversant with the problems of trading in foreign countries. My letters read:

MY DEAR MR. ———: For 15 years, as Congressman of the 22d District of Ohio, I have tried to support sound legislation in the Congress that would aid in furthering the economic welfare of the American people. The needs and desires of my constituents in greater Cleveland and my membership on the House Foreign Affairs Committee have made me particularly aware of the need for an intelligent trade policy for the United States.

In preparation for the 84th Congress, I am giving serious consideration to the kind of action the Congress might take in the area of foreign trade. Discussions in the 83d Congress on the extension of the Reciprocal Trade Agreements Act made it apparent that the question of trade and tariffs will come in for some very serious deliberations in the coming 84th Congress.

President Eisenhower will probably renew his request for a 3-year extension of that act and the Committee on Ways and Means is expected to delve into all aspects of our tariff policy. In addition, many reputable national organizations have urged the Government to take forthright action on foreign trade.

For that reason, I am writing to you and a few other experts in the fields of business and international trade to secure your own best thought as to the specific area in your field which might profit most from Federal legislation. I should be delighted to have your opinions and I will give them the most serious consideration, although you know that it is impossible to make any specific commitments as to just what I can do, or what the Congress may do.

It is my feeling that only by intimate and close consultation of this kind can we legislators effectively serve the national interests. I hope I may hear from you soon.

Sincerely yours,

FRANCES P. BOLTON,
Member of Congress.

The 135 replies I received contained the considered opinions of some of the best minds in this country, both pro and con of this vital issue. They were invaluable to my fuller understanding of our foreign economic policy, and in the body of this statement I have drawn freely from these opinions to illustrate my position.

NEED FOR OTHER TRADE METHODS

Mr. Chairman, whereas I offer support of H. R. 1, I feel we should not stop there. H. R. 1 would extend for 3 years the Presidential authority to negotiate reciprocal trade agreements and—subject to present peril point and escape clause provisions—it gives the President authority to—

First. Reduce selected tariff rates by not more than 5 percent per year for 3 years.

Second. Reduce, by not more than half over the 3 years, the January 1, 1945, rates on articles not now imported or imported in negligible amounts.

Third. Reduce to 50 percent any rates in excess of that level.

However, among those with whom I corresponded an impressive number emphasized the fact that reduction of American tariffs alone would not remove the many serious obstructions which now exist—within and without our borders—to a healthy two-way trade.

Therefore, I respectfully suggest to the distinguished members of the committee that they consider also the many other methods by which we can stimulate international trade to the general advantage of the citizens of the United States.

Let me cite a few:

CUSTOMS SIMPLIFICATION NEEDED

Among the biggest stumbling blocks to our buying from abroad are the customs procedures of our own country. Some of those with whom I corresponded would attack that situation before all others, as Mr. John J. McCloy, chairman of the board, Chase National Bank, wrote:

I also feel very strongly that constructive legislation should be adopted which would have the result of cleaning up the rabbit warren of regulations which importers now have to go through and that more certainly be introduced in the administration of our tariff policies. I think at this stage it is considerably more important than reduction in tariff.

There is a good example of this problem in my own area. Mr. R. W.

Gresham, secretary-treasurer, the A. W. Fenton Co., Inc., points out:

For instance, in our Cleveland customhouse they are presently handling 100 percent more business than they handled in 1946, with 10 percent more people than they had at that time. We have a customs warehouse which is crowded, and in busy seasons merchandise must be held back at freight terminals because it cannot be readily processed. * * * Quarters are so cramped and old-fashioned in the basement of our Federal building that modern mobile equipment is unable to drive up to the customs loading platform to pick up freight and deliver it over the road to importers.

FOREIGN IMPORT QUOTAS NULLIFY TARIFF CONCESSIONS

American exports are frequently more limited by other countries' import quotas than by their tariff rates. As Mr. Arthur S. Armstrong, president of the Cleveland Twist Drill Co., said:

The reason the value of duties levied on manufactured goods is so small is the fact that there is 100 percent embargo on the importation into the United Kingdom of any goods which are manufactured in sufficient quantities within the Commonwealth. This is accomplished by the denial of import licenses for any such goods—a trade weapon not used by our country.

The Committee on Economic Development and others have urged that the President be authorized to exchange reductions in our tariffs for other kinds of benefits to the United States than merely tariff reductions abroad.

DOUBLE TAXATION DISCOURAGES INVESTMENT ABROAD

Then there is the question of American profits made in foreign countries being taxed both in the country in which they are earned and again in the United States. Mr. John W. Houser, executive vice president, Hilton Hotels International, said:

We know from experience that working abroad involves unbelievable problems and a real capital risk. * * * I believe that a great incentive can be created through reduction or elimination of taxes upon possible earning abroad which would offset the hazards and difficulties of engaging in such work.

ANTITRUST LAWS NEED STUDY

There are also the complications of legal requirements. Mr. Leo D. Welch, treasurer of the Standard Oil Company of New Jersey, writing for himself and for Mr. P. T. Lamont, a director of that firm, pointed out:

The United States investors operating abroad should be protected from undue extension of the United States legal requirements. Where the United States-owned enterprise in a foreign country complies with the requirements of local law, it is hard to see that any additional requirements should be imposed, and it is extremely confusing when these requirements differ from those imposed by the Government in whose area the business is conducted.

Many other businessmen are asking for our reciprocal trade treaties to include provisions which would protect them from the threat of expropriation and other factors which discourage investment.

EFFECTS ON 22D DISTRICT OF OHIO

In my own 22d Congressional District, it is difficult to gather figures which indicate the great extent to which we are dependent upon export business. We produce paint, enamels, automobile parts, and many other items which go into making a complete machine, and this machine is ultimately exported but is never registered as an export from Cleveland.

True, some of our industries are adversely affected by foreign competition, especially those manufacturing bicycles, sewing machines, and—to a degree—steel. But many more companies are buying and selling abroad in large quantities and several businessmen have told me that they depend on foreign trade for their margin of profit. One president of a large Cleveland corporation perhaps oversimplified the problem when he said:

We feel that low tariffs stimulate international trade which, although hurting some specific businesses, is nevertheless in the best interests of the world at large.

A good indication of our dependence upon foreign trade is shown in a recent Ohio industrial study by the United States Department of Commerce. It showed that about 30 percent of Ohio workers are in industries whose export sales on a national basis are more than 20 times as large as the corresponding United States imports; and another 40 percent of Ohio's workers hold jobs in industries which sell to foreign markets from 4 to 20 times as much as imported to this country in comparable goods.

But the maximum effects on Ohio will be in years to come when the great St. Lawrence Seaway will be bringing new markets to our doors and new products for our people. The seaway may transform the whole Great Lakes area into another coastline, and those of us who look toward the future see that our best interests lie in an enlightened world trade policy.

VITAL INDUSTRIES AND NATIONAL SECURITY

But above all else, Mr. Chairman—and apart from considerations of economics and diplomacy—we must safeguard those domestic industries essential to our national security. There is concentrated in the State of Ohio almost one-third of the entire machine-tool industry of the United States—the backbone of any peacetime industrial or wartime armament program. The capacity of this industry has been seriously damaged by gradual reduction in tariff protection and because contractors and industries generally went to Europe to import machine tools during the Korean war.

But representatives of the machine-tool industry tell me they are not opposed to H. R. 1, nor are they requesting tariff protection.

This dire situation can be alleviated through the use of carefully planned Government purchases. The past Congress authorized the Secretary of Defense to grant $100 million in contracts for "long lead time" machine tools which would be required in a national emergency. This equipment—periodically modernized to meet current weapons design—will be held in storage. Having received such contracts the factories will be kept in production. The Secretary of Defense is expected to ask for another $100 million authorization for this year. I urge that he be granted that authority.

But the machine-tool builders are deeply concerned by the implications of President Eisenhower's recent Executive Order 10582 on administration of the Buy-American Act. It would be appalling if the Defense Department felt constrained to buy machine tools from foreign producers solely because their price is about 6 percent lower. Not only would foreign machine-tools plants be in close proximity to the probable enemy, but they would not be able to offer the engineering service which is just as important as the original machine. Machine-tool users must be in constant contact with their builders, for attachments, tooling, and repair parts. We do not go 3,000 miles away to build our fighter planes and neither should we go such a distance for the machine tools which are the seeds from which these planes grow.

CONCLUSION

Mr. Chairman, the world of today—the world to which the United States must give courage and leadership—is a world of confusion, of turmoil, and dissension. It is a world of insecurity in which there is very real danger, not only for ourselves but for all mankind. It is for us—free citizens of a free land—to open up the way of hope, of high morality, and of unselfish action.

Were there no other reason for broad reciprocal policies in international trade, this alone would be reason enough to go forward in the development of such policies as will give greater opportunity not only to ourselves but to freemen everywhere. This alone gives meaning to our action at this time. The extension of these reciprocal trade agreements is one step along the way.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, the bill now under consideration—H. R. 1—to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930 will probably be the most important legislation to come before Congress this session.

The act now before us not only extends existing law but expands it. The language used in this latter aspect is technical in the extreme. There has been no satisfactory clarification of the meaning of the language given to the Committee. This can therefore mean much or little according to the interpretation that is subsequently given to it in its administration. It can be readily realized that it will be given the broadest possible interpretation as the bill was drawn by those who are interested in having the reciprocal-trade policy given the widest possible use. Therefore the interpretation to be given will be broad rather than restricted.

The language to which I refer reads as follows:

To enter into foreign-trade agreements with foreign governments or instrumentalities thereof containing provisions with respect to international trade, including provisions relating to tariffs, to most-favored-nation standards and other standards of nondiscriminatory treatment affecting such trade, to quantitative import and export restrictions, to customs formalities, and to other matters relating to such trade designed to promote the purpose of this section similar to any of the foregoing: *Provided*, That no such provision shall be given effect in the United States in a manner inconsistent with existing legislation of the United States.

A reading of this new language, inserted into this bill, is sufficient to cause inquiry as to, first, what does it mean; and, second, if it is not intended to change the meaning of the present law, and, which does not contain this particular language, then, why was it inserted in the present act?

The uncertainty created by the language to which I have referred, plus the additional power given to the President to reduce tariffs has created a genuine fear upon the part of some thoughtful persons who see the possibility of expanding the present policy and thereby resulting in harm to some of our industries and the thousands of workers they employ.

The fundamental purpose of this legislation is to make it easier for foreign-produced goods to enter this country. The philosophy that has heretofore prevailed in this country and supported our giveaway program to foreign nations now finds expression in legislation such as this, that would give away our American market to the nations of the world. For several years we have taxed our people and given billions of dollars collected from them to foreign nations. Now we seek to take our consumers market away from our own workers and give it to workers abroad by giving foreign-produced goods easy entrance into our country in competition with our own products.

The result of such a policy is not hard to predict when we consider that foreign wage scales are only one-tenth to one-third of the wages paid in this country for similar work. Our workers should not be expected to compete with the low wages and low living standards that prevail abroad. Our workers cannot succeed in such an unequal struggle without surrendering their higher standard of living, based upon the higher wage scales now enjoyed in this country.

In the very near future in addition to other negotiations, we are to enter into negotiations with Japan for a trade treaty. Upon the list of possible concessions to Japan are such items as textiles, organic chemicals, cameras, chinaware, pottery, glassware, porcelain, optical instruments, fish products, and a great variety of other articles. Any concessions to Japan will, of course, be extended automatically to other countries under the most-favored-nation clause in these reciprocal trade agreements. This latter principle is one of the most unjust principles ever written into law because it gives advantages to others without anything in return. But, as if this is not enough, the bill adds insult to injury by providing a most unique provision, namely, a provision specifically authorizing the United States to grant concessions to third countries in return for their granting concessions to Japan. What logic or reason is there in such a provision? How can such a provision be justified? There is no sound basis to sustain it, and, yet, with the rule that has been adopted in the House by a majority of 1 vote, a member of the House cannot offer an amendment to strike out such a ridiculous provision. What are we coming to in this giveaway program? How long before we awaken to the danger that will confront us if it is not restricted?

The support that is given to this bill would seem at times to be based upon the theory that the United States is blocking the cause of good will in the world by maintaining unreasonably high tariff rates, and therefore we owe it to the world to open our markets to them. It is not true that the United States is guilty of any such practice. An examination of the record will show that since the passage of the original reciprocal trade agreements legislation in 1934, average tariff rates of the United States have been reduced by 70 percent. Already, the United States stands 7th from the bottom of a list of 45 nations with respect to the average level of their tariff structure. Cetrainly in view of this it cannot be said that the United States has not done its fair share already in reducing trade barriers.

Furthermore, an examination of the economies of the European nations will show that they have reached a highly satisfactory condition. Great Britain is reported to have had its best year in history, in 1954, and anticipates even a better year in 1955. West Germany has far exceeded anticipations. Other European countries show similar improvement. The time has come when we should call a halt in the give-away program of America. The giving away of our market to the nations of the world can only result in disaster to the standard of living of our own workers.

It is highly important that we stop and give careful consideration to the adverse effect that legislation such as this now before us can have on our own economy. The time for sentimental considerations, alone, in formulating our foreign policy is fast passing. The time for practical and hard-headed consideration is upon us. Do not let us overlook the necessity of keeping American industry alive if our workers are to be kept at work.

Whatever may be said as to some of the good features of a reciprocal policy, nevertheless, the fact remains crystal clear that there are provisions in this bill that should be changed to protect American industry and our workers. To accomplish this the bill should be recommitted to the Committee on Ways and Means for further study, clarification, and amendment.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Kansas [Mr. REES].

Mr. REES of Kansas. Mr. Chairman, yesterday I voted against the rule that would not permit amendments to this proposed legislation. It is my opinion that Members of the House should have a right to propose amendments to this measure whether they are for or against the legislation. If they do not see fit to support such amendments, they can vote them down. I think the House of Representatives should have a right to work its will in dealing with this far-reaching proposed legislation.

When it goes to the other end of the Capitol it will be open for full and complete discussion and debate. Members of this body are just as reasonable and just as fair as the Members of the other body. Suppose it would take a day or two longer. We have no pressing program ahead of us. I think more Members will feel a whole lot better about this situation if they, at least, had a chance to give consideration to amendments that many of us think should be considered.

I would not be misunderstood; I am not one who believes in so-called high tariff walls. I am in favor, however, of protecting the American producer and the American workingman against importations of materials at such cheap prices as to injure their economy and earning power. I had hoped to have a chance to submit an amendment that would provide against excessive imports of crude oil from foreign countries. I know consumption of crude oil is growing in the United States, but not nearly in proportion to the amount of imports from foreign countries.

At the end of World War II, the United States was supplying all but 377,000 barrels per day of the oil which it consumed. It was also exporting oil. Today it imports about 1,200,000 barrels of oil daily.

On the surface this increase in the importation of oil would seem to indicate that the United States is running out of oil, and that it has no choice but to use oil from foreign sources. This is not the case, however. This Nation is today capable of producing at least 1,750,000 barrels of oil each day more than it is producing. This excess capacity to produce, however, comes at a time when the use of foreign oil is at an all-time high.

Much of this increased importation can be explained by the fact that the same firms that are importing the oil, are producing it overseas at much lower costs than are prevalent in this country. Five American firms own or control most of the oil that is brought into this country. Taken together, these firms form a huge international oil-trading group. About 9 out of 10 barrels of their proved reserves are located overseas. Nearly 2 out of 3 barrels of their production lies outside this country. Much of these companies' reserves lie in the Middle East. This oil is within the shadow of Russia.

If this Nation uses more of this imported oil it will at the same time encourage further concentration of control in the hands of a few companies. It will also stimulate increased oil production capability in the Russian orbit. The most disheartening aspect of in-

creased foreign-oil use, however, is that it impairs the capability of the domestic oil-producing industry. Imports have already made serious inroads on markets for domestic oil. Further increases in imports could cause serious and permanent injury to domestic oil exploration activity, and could cause a reversal in the Nation's traditional ability to be self-sufficient in oil.

Independent producers of oil, and incidentally 75 percent of oil explorations are by small independent producers, are not asking that importation of crude oil be entirely suspended. They do ask for a fair chance at the American market. They ask only for reasonable restrictions to protect them in that market.

It hardly seems right that foreign imports be permitted to increase every week and every day. They run at the rate of approximately a million and a half barrels a day. While that is going on oil wells in the great Midwest are throttled to where they are allowed to produce at about 15 percent of their capacity. That cannot be right. It is unfair to thousands of American citizens engaged in discovery and production of oil.

Congress should act to restrain oil imports. It should be done by legislative means. Other methods have been tried and found wanting. Congress, in this matter, is the court of last resort. This Congress should act before it is too late.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Connecticut [Mr. MORANO].

Mr. MORANO. Mr. Chairman, I support H. R. 1, and I ask unanimous consent to revise and extend my remarks.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MORANO. Mr. Chairman, the question of foreign trade is inexorably intertwined with our foreign policy. In this critical period of history, the United States must be strong, and it is imperative that we be supported in our aims and ideals by nations whose economic structure is sound and whose military power is strong.

The fall of France in World War II allegorically illustrates the futility of the theory of attempting to build strength by the erection of a protective wall.

Behind the wall must be a stable economy. A nation militarily mighty must be buttressed by similarly economically stable and mighty nations who share an affinity for freedom and the dignity of man.

International trade provides the most effective way to improve our relations with other nations on a long-range basis. Military alliances are worthless unless they are augmented by realistic trade agreements benefiting both ourselves and our allies.

Expanded foreign trade is vital to the perpetuation of international peace, and to the peace and security of our own Nation. It cannot be a one-way street. We cannot woo allies on the one hand and erect barriers to their legitimate trade interests on the other. Naturally, they will turn to the nations who are more receptive to their trade problems, and that is handing over to the Communists a victory which they could gain by no other means.

By expanding our foreign trade in a selective and moderate and reciprocal manner, we can actually increase employment in this country while mantaining the friendship and support of our allies.

As the Representative of a manufacturing district, the problem of liberalizing our trade laws has long been of great concern to me. I have searched my conscience thoroughly. I have decided that there are situations which arise in the course of a Congressman's career wherein he must weigh the influences of his immediate constituency against the broader problem of the best, self-enlightened interests of the Nation as a whole.

Although I may be the only member of the Connecticut congressional delegation to have voted yea on H. R. 1, I am convinced that by so doing I am acting in the best interests of my constituency and my State, for in the long run, what we believe to be the welfare of our Nation is our utmost concern, and what most benefits our country, benefits every district, every State, and every citizen in the final analysis.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Indiana [Mr. HARVEY].

Mr. HARVEY. Mr. Chairman, I expect to vote for the motion to recommit.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Connecticut [Mr. SADLAK].

Mr. SADLAK. Mr. Chairman, the hearings on H. R. 1 among other sources reveal to me great concern by representatives of industry and their workers that the faith and confidence which appellants had in the Tariff Commission has greatly been shaken.

Time and money are required in the preparation of a case to be presented to the Commission and when the matter, after having been presented and studied by the Tariff Commission, is turned down by a majority, then naturally there is disappointment but there is not resentment. It is following the determination by the Tariff Commission when their decision concludes that there is an injury to the industry and the workers in that industry, that the difficulty ensues. Appellants feel that intervening information, which is submitted to the President by the various Government departments after the findings of the Tariff Commission, not only influences the ultimate decision of the President but tends to deny that actual injury does exist as was decided by the Tariff Commission. It would seem that if the findings of fact by the Tariff Commission as to the existence of injury are made conclusive, the faith and confidence which industry should have in presenting cases to the Tariff Commission, will be encouraged.

In 15 cases of the 59 applications for relief since the escape clause procedure was provided, the Tariff Commission found injury or the threat of injury and so reported to the President. There was not, however, the acknowledgment of this injury accepting the factfinding of the Commission that there actually was injury. To me, this acceptance can have a very helpful effect on those who appeal to the Commission, will bolster the morale of the many industries that feel that the provisions of H. R. 1, if enacted and carried out, will definitely cause injury and loss of work before the expiration of the 3-year period provided in this bill even though this may not be the case at present.

In this group are included the employees and manufacturers of bicycles, carpets, chemicals, clocks, fiber fabrics, hats, lace, machine tools, electrical equipment, lead pencils, pins, needles, shears, scissors, toys, optical and surgical instruments, and textiles. Outstanding among these are so-called one-industry communities: for instance, Norwich, where the manufacture of vacuum bottles is the prime industry; Thompsonville, where the manfacture of carpets is the prime industry; and Stafford Springs, where the manufacture of textiles is the prime industry. In these industries are found special skills and I for one want very much to provide for a reservoir of jobs to protect these skills in the event of immediate need in emergency. Continued concessions to manufacturers outside of the United States of like products can eventually lead to the closing of these industries and the loss of the skilled employees who, because they will not be keeping up with their learned trade, would not be available on short notice.

Incidentally, I had proposed an amendment in committee, the purpose of which was to keep these skills and to set up standards which would guide those entrusted with our defense and selection accordingly. Very favorable comments on my idea were made by Secretary Weeks of the Commerce Department who revealed during questioning that the Department is endeavoring to work out a plan along these very lines which I had suggested but because the plan is still being discussed and has not as yet been finalized, it was recommended that my amendment would more properly be attached to the Defense Production Act when the Congress again takes action on that legislation. I proposed the amendment in committee because I was of the belief that protection to these skilled employees, to these industries affected by our national security, really tied in with the trade agreements and an excellent backing was given to me by those who would handle these provisions. Again it was thought more appropriate to have the amendment attached to the Defense Production Act where it would be most effective. I am determined to follow this through and continue to urge as expeditious action as possible, realizing full well that a very short time ago, we had voted for a resolution in connection with the protection of Formosa and the very serious and highly explosive situation that confronts us there.

Let me at this point stress to you, my colleagues, that though my constituents are worried about the effect of present Japanese manufactures on our economy,

they are much more concerned about the products the Japanese will be manufacturing 2 or 3 years hence. I mention this because many of you may have had letters from your constituents informing you that teams of Japanese visited American plants a year ago under the auspices of the Foreign Operations Administration and most carefully examined the machinery in the visited plants. The industrious Japanese are very capable imitators and duplicators and most assuredly they are now making plans and designs of the identical machinery used in our domestic plants and will soon be flooding the market with like products produced at a much lower cost.

Another amendment which I was very happy to support in committee was suggested by my colleague, Mr. CURTIS of Missouri. The gentleman's amendment which he undoubtedly will explain in detail when he speaks on this legislation proposes that any concessions in United States tariffs be made contingent upon foreign producers' voluntary observance of minimum wage laws comparable to those of this country. The increase of pay for foreign workers will give them a better standard of living, will provide moneys to purchase essential goods, and will affect the vast differential between our wages and will help combat communism.

The motion to recommit which has been printed and made available to us provides one outstanding safeguard and assurance which I find is very desirous and imperative and I shall, therefore, mindful of all of those in my State of Connecticut, vote for it.

Mr. COOPER. Mr. Chairman, I ask unanimous consent that all Members who desire to do so may have permission to extend their remarks in the RECORD at the close of the debate on the pending bill today.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from West Virginia [Mr. STAGGERS].

Mr. STAGGERS. Mr. Chairman, first I would like to congratulate my colleague from West Virginia on his talk before the House a while ago. I thought it was very good and I hope that everyone here listened attentively to it.

May I say in starting my few brief remarks that when I first came to Congress and had the opportunity to vote for reciprocal trade I did vote for the Reciprocal Trade Act. I agree to a great extent with the principles of reciprocal trade as laid down by President Roosevelt and Secretary Hull.

There are lots of Members in this House who would have you believe today that this bill agrees with the principles of Roosevelt and Secretary Hull. But it does not and let me quote from President Roosevelt in 1934 when he was advocating the Reciprocal Trade Act, when this Nation was in dire circumstances and something had to be done to help the distressed areas of the United States:

> The authority must be carefully weighed in the light of the latest information so as to give assurance that no sound and important American interest will be injuriously disturbed. The adjustment of our foreign trade relations must rest on the premise of undertaking to benefit and not to injure such interests.

I would like to ask the Members who are advocating this bill today: Is this hurting any of the industries in America today? If it does, it does not then coincide with the statement of President Roosevelt in 1934.

President Roosevelt at that time indicated that it was only an emergency program, stating, "It is part of an emergency program necessitated by the economic crisis," and that the request was, "an essential step in the program of national economic recovery."

I will agree with a lot of the statements made here that we do have some surpluses and that we need to deal with other nations—I agree with that—but I believe if our leaders and the administration would sit down and try to work out a program that would be equally distributed among our industries instead of letting certain industries take all the rap for the benefit of a few, it would be the wise thing to do. And, I believe, if we get the true facts, it will not be denied that 2 or 3 of our great industries are benefiting principally and almost wholly by our reciprocal trade program as we now have it.

Now, we have a Tariff Commission that is supposed to protect our industries. Let me tell you the latest report they have, that we brought in handmade glassware from back of the Iron Curtain in Czechoslovakia, Hungary and Poland, and we did it this past month. Why are we dealing with Communist nations? Because they are outsmarting America. They have to have American dollars to pay their agents who operate in the United States, and when we are dealing with them and buying their products, they are getting those dollars which enables them to send their men in here to help undermine the American Government. I believe this administration should say now, once and for all, that no American dollars shall go behind the Iron Curtain.

Now, our coal industry has been hurt to a great degree. The textile industry has been hurt, and the handmade glass industry has been hurt. We are in an international crisis today. If tomorrow we had to go to war—and who knows, we might because of the Formosan situation—God help us, because we do not have time and distance on our side today. I hope my words will never become prophetic, because if they do, history will record that the Members of the 84th Congress were alerted to some of the dangers that might happen to this Nation, and the administration, with the help of this Congress, has ignored some of those warnings. They have not made one proposal; not one have I seen in the newspapers or heard in the well of this House to help alleviate this situation.

Yes, we have a Tariff Commission, as I said before. Do you realize what some of the articles are on which they invoked the escape clause? Let me give you the instances, and they are only five: the dried fish industry; fur felt hats; hatters fur; filberts or soft-shelled almonds, and, as all of you know, this past year the watch industry. I am not saying that all of them did not need help; no; but we have some basic industries in this Nation today that need help badly. I have yet to see one concrete proposal to help them.

Mr. Chairman, I believe the bill should be recommitted.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from New Jersey [Mr. KEAN].

Mr. KEAN. Mr. Chairman, this is the program of our Republican President. I am supporting his program. I regret that the ranking Republican of the Committee on Ways and Means, in charge of the time, suggested to me that I should get time to speak from the Democrats. As a Republican, I do not like to accept favors from the Democrats. However, in the face of the incomprehensible attitude of the gentleman from New York, I have no other alternative.

Mr. Chairman, in the last session of Congress, it was my honor to introduce H. R. 8860, a bill to implement the President's foreign trade policy. I stated on the floor of this House then that our primary thought in this, as in all other legislation, must be to serve the best interests of the American people. I am pleased to see H. R. 1 now being considered for passage by this body. As the Members know, I introduced a companion bill to H. R. 1 myself, H. R. 536, on the first day of this session.

Both bills are similar to the original Kean bill, H. R. 8860, of the 83d Congress, second session. They, too, recognize that we must maintain and strengthen our country's industrial might, and that we must maintain the fullest possible employment. They, too, recognize that to do both, we must also do all we can to strengthen our friends in the free world, so that they may enjoy a sufficient measure of economic stability to be able to take rational measures to maintain their freedom and independence, without which they could benefit neither themselves nor us.

I would not want to give anyone the false impression, however, that H. R. 1, because it serves our foreign policy primarily for the benefit of the United States interests, it not a hard-headed business measure. Nothing makes better business sense than to let other nations pay for what they buy by selling their products here. Since 1918 we have been selling much more abroad than we have been buying, over $80 billion more in all. If we do not import the goods of other countries, they cannot continue to buy from us the products of our farms, of our machinery and implement factories, of our chemical, automobile and electrical industries.

Countless industrial, farming, and mining activities depend to a major degree on exports. It can be said accurately that exports are keeping many plants and many farms from closing. Let me quote some facts.

They are based upon 1953 statistics, since the figures for 1954 are not yet available. In that year, our rice growers shipped over half their total harvest abroad. In that year our wheat, cotton,

and tobacco farmers shipped one-fourth of their production overseas. Over one-third of the 1953 raisin and prune crop was exported. These are but a few of many examples that could be cited.

Similarly, American industry has a big stake in export markets. In 1953 we exported nearly 25 percent of our lubricating oil, nearly half of our track-laying tractors, and 1 out of each 10 motor-trucks and machine tools produced. In addition, 9 percent of our anthracite coal, 11 percent of our tinplate, 10 percent of our steel rails, 12 percent of our refrigerators, and 31 percent of our construction and mining equipment found overseas markets last year.

Even small local businesses share in the benefits of a high level of foreign trade, because of the extra purchasing power placed in the hands of workers in export industries.

Of course, import competition does create problems, just as does domestic competition. Yet our industry has grown strong under competitive conditions, and the tremendous and still growing productivity of United States labor has usually been more than sufficient to offset lower wage standards in other countries. In any event, industries threatened with serious injury from imports have powerful machinery in existence to protect their interests. I refer to the peril-point and to the escape-clause provisions.

Many of you have asked why I feel so strongly about this bill. I do feel strongly about it. I feel strongly about it because of my deep conviction that all of us stand to gain from increased international trade. As I stated in the summary of my speech introducing H. R. 8860 in the last session, our gains from that increased trade can be counted under five different headings:

First, as taxpayers, because more imports help reduce the need of other countries for our aid;

Second, as consumers, because we can then purchase foreign-made goods that we need;

Third, as producers, because imports help foreigners earn the dollars they need to buy more American goods which they need and want but cannot afford;

Fourth, as investors, because increased dollar earnings by foreigners selling to the United States means more chance for profitable American investments abroad;

Fifth, as American citizens, because increased international trade creates a stronger free world, and so contributes to the possibilities for maintaining world peace.

Often I find myself wondering just what opponents of this measure fear. My constituency is in a portion of New Jersey that serves as home for many thousands of workers. I would not think of sponsoring a measure such as H. R. 1 if I felt it would react to their disadvantage.

In this connection I have fully satisfied myself that the administration will seek a tariff reduction formula that will have little impact on industries now faced with heavy foreign competition.

The administration intends to proceed cautiously, always keeping in mind the best interests of the country in using any of the discretionary powers that this bill might give to the President. The President himself has characterized the program as moderate, gradual, and reciprocal. The authority of the President would still be subject to the present peril-point and escape-clause provisions. We have been assured by the Secretaries of State, Treasury, and Commerce that, in Secretary Dulles' words:

> It is the administration's intention to exercise powers contemplated by the bill in such a manner that the legitimate concerns of United States business will be fully taken into account.

In view of these assurances, I am completely satisfied that the administration will not attempt to breach peril points. As a matter of fact, no President since the enactment of the Trade Agreements Act of 1934 has breached a peril point. The one time that there was some question about a possible breaching of peril points, President Truman sent a special message to the Congress to inform it of the action taken with respect to petroleum products in the signing of a trade agreement with Venezuela, and justifying such action in the light of the situation prevailing.

Now for those of us who fear the discretionary powers given the President on this point, I want to underscore the fact that Congress was fully informed in that one case where a peril point might conceivably have been pierced, even though the Tariff Commission was evenly divided in its finding, and therefore the President may reasonably have considered himself not bound by the provisions of the act to inform the Congress. In other words, the President leaned over backward at that time to fulfill not only the letter but the spirit of the peril-point provision. We have the solemn word of this administration that it will do the same.

I am opposed to the proposed motion to recommit this bill which was outlined by the gentleman from New York [Mr. REED] on yesterday.

Members are being asked to support this recommittal on grounds that only minor changes will be involved. The changes proposed are not minor.

The proposal is to make the Tariff Commission's findings binding on the President, not only their findings of fact but their evaluation of these facts and their judgment as to whether an industry has been seriously injured by increased imports due to a tariff concession.

Of course the Tariff Commission's findings of the facts as to the amount of imports, their percentage as compared with the American production of such a product, and so forth, should be final.

But what the recommittal motion seeks to do is very different. It seeks to make final the evaluation of these facts by the members of the Tariff Commission. This is a question of judgment by that body, not merely factfinding. Such judgment is a question of opinion, which is quite a different matter.

We must also note that if the recommittal motion becomes law, the President must increase duties under the escape clause unless the national security is at stake. He canot give consideration to his judgment as to the national welfare.

Evaluation as to the facts of such an increase should be done from the widest viewpoint. Only the President is charged with responsibility for the national welfare. Only he is responsible for the balancing of all interests at issue in a controversy, including the wider interest of the Nation in achieving foreign policy objectives and expanded foreign markets for farm products, minerals, and manufactures—without doing serious injury through import competition to established American business interests.

The responsibilities of the Tariff Commission in evaluating the facts are much more restricted, being limited almost entirely to a judgment as to the injury that could be done by imports.

The Tariff Commission, even if charged by law with wider responsibilities, could not and should not be expected to do the job now done by all the other executive agencies in advising the President of the effects of any proposed measure. The Secretary of the Treasury, for example, may submit an evaluation to him concerning the costs and revenue effects of a proposed change in the tariff law, in the light of budgetary plans; the Secretary of Agriculture would describe its effects upon our plans for disposing of agricultural surpluses abroad; the Secretary of State may advise the President of its effects upon our international commitments and our foreign policy objectives; the Secretary of Commerce, on the other hand, may comment on the relative and long-run effects of the proposal on all domestic producers and upon United States business activity as a whole. Often the many aspects of a problem thus presented call for difficult and soul-searching decisions as to which considerations must be given greater weight in arriving at a solution which is best for the people as a whole. Only the Chief Executive is responsible for, and should be expected to make such decisions under our form of governmental organization.

We cannot afford to recommit this bill now. All the nations of the free world are following these debates tensely to see whether the President is speaking for our country or only for himself when he speaks of the vital need for expanded international trade, and of the reciprocal tariff reductions that the United States is ready to enter into with other like-minded nations. We should pass this bill as it stands for, in President Eisenhower's words, it "can add immeasurably to the security and well-being of the United States and the rest of the free world."

This is the program of our Republican President. I am supporting his program. I regret that the ranking Republican of the Ways and Means Committee, in charge of the time, suggested to me that I should get time to speak from the Democrats. As a Republican I do not like to accept favors from the Democrats. However, in the face of the incomprehensible attitude of the gentleman from New York I have no other alternative.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. COOPER. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield.

Mr. SIMPSON of Pennsylvania. The gentleman in his remarks used the words "national welfare, national security" and I will add national interest. Does he distinguish between those words?

Mr. KEAN. Yes, I would. I would think national security had chiefly to do with our national defense.

Mr. SIMPSON of Pennsylvania. Would you say that national security includes national interest?

Mr. KEAN. Well, that is something for the lawyers to decide.

Mr. SIMPSON of Pennsylvania. Would you say that national security includes national welfare?

Mr. KEAN. Not necessarily, but again that is something for the lawyers to decide.

Mr. SIMPSON of Pennsylvania. I thank the gentleman.

Mr. DAWSON of Utah. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield.

Mr. DAWSON of Utah. The gentleman referred to the fact that the various departments of the Government including Agriculture, Commerce, and so on passed on their comments regarding the rulings of the Tariff Commission. I call the gentleman's attention to the fact that in the lead-zinc hearings, which were held before the Tariff Commission, there was a finding that the industry was in a distressed condition, and that relief should be granted.

Mr. KEAN. Which industry was that?

Mr. DAWSON of Utah. The lead-zinc hearings. I am informed when the matter went before the various executive branches of the Government, each branch of the Government backed up the finding of the Tariff Commission with the execption of the Department of State, and yet the President followed the advice of the State Department alone and refused to follow the Tariff Commission.

Mr. KEAN. Because he believed it was for the national welfare.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. SCUDDER].

Mr. SCUDDER. Mr. Chairman, in statements on the floor of the House and before the Ways and Means and Rules Committees, I have argued that tariff rate negotiations should not be made a pawn or a bargaining point in international politics.

Rather, they should be based solely upon economic conditions existing in the countries involved and should be equitable from the standpoint of the importing country and our American economy.

The bill before us today does not provide for an equitable approach to the tariff problem from the standpoint of American industry, labor, and agriculture.

I cannot go along with the idea of making further American tariff reductions, even indicating to the rest of the world that we can absorb their surplus production.

Year after year we have been a world leader in reducing tariff rates to a point where, at the present time, United States tariff rates are among the very lowest in the world—5.1 percent on the average.

By contract, 37 other countries maintain higher tariff rates than the United States.

But that is only half the story. On top of higher tariff rates, many other countries maintain import license systems, quotas, currency restrictions, monopolies—and various other devices which decrease or actually prohibit sale of American products on their markets, despite the existence of so-called reciprocal trade agreements.

For example, the United Kingdom imposes a tariff rate amounting to 25.6 percent on the average, including revenue duties. In addition, imports of most goods are limited under quotas; licenses are required on imports; dollars are controlled and special low tariffs are allowed Empire goods.

A perfect example of how these embargoes work is the case of motorcycles. A few years ago the British duty was reduced under a reciprocal-trade agreement with this country. It sounded good. But, under their import license system, no American-made motorcycle may be sold on the British market—even though their motorcycles are flooding the American market under the low-rate tariff agreement.

Similar restrictions are imposed in varying degree on lumber products, TV sets, home appliances, bicycles, dresses, cosmetics, and numerous other items.

France, with an average tariff rate of 10.6 percent, maintains strict quota and import license regulations.

Mexico, on top of a 20.6 percent tariff rate maintains quotas, permit regulations, and recently has levied heavier tariffs on things like handbags, wines, sewing machines, and tobacco.

In Japan trade restrictions make trouble for United States merchants. Tariff rates are high in many cases: 50 percent on watches, 40 percent on toys and phonographs, 40 percent plus a 30 percent tax on United States automobiles.

It is very apparent that United States tariffs are much less than the world average. Maybe we are overselling some of our products. Perhaps thought should be given to the curtailment of excess exports with a view of encouraging foreign countries to produce for themselves which would help to balance trade.

Very few American producers enjoy import quotas or restrictions. Cotton is one, imports of which are limited to 1 percent of domestic production under section 22 of the Agricultural Readjustment Act. This bill continues the protection to cotton in relation to trade agreement negotiations.

The answer to the trade problem does not lie in the relatively simple approach of reducing American tariff rates which, in many instances, are already dangerously low. While the request for further reductions may seem slight, it may mean a shutdown of some of our industries and a further expansion of unemployment.

As Americans, we are justifiably proud of our standard of living. American industrial workers receive an average of $1.83 an hour, based on December 1954 figures.

In Japan, the hourly wage is 19 cents; in France, it is 46 cents; in the United Kingdom, 47 cents; in West Germany, 44 cents; and so on.

Domestic producers cannot compete with products from cheap labor areas because, largely due to United States aid and assistance programs, other industrial nations now have machines as modern and efficient as any we have and for the most part their workers are just as skilled as ours.

Without protective tariffs, the end result will be the tearing down of our hard-earned wage standards.

Unfortunately, that condition is existing right now in many sections of our country. Our domestic economy cannot stand the loss of jobs in industries such as lumbering, fishing, viticulture, horticulture, bicycles, crockery, glassware, textiles—and many others.

In my own district—the First Congressional District of California—the price of domestic crabmeat has been driven to such a low point by imports that it is almost financially impossible for fishermen to operate. Several plants have already closed down, and others are threatened.

Many of those people, losing their jobs because of low tariffs, will have to be supported by the Government in the form of unemployment insurance or relief. Meanwhile the Government will lose the income tax which these workers would normally produce, and the investments in plants and equipment will become a total loss. Just how unrealistic can we get?

The obvious answer is that no reduction should be made, or even contemplated, in the crabmeat tariff, especially in view of the fact that 60 percent of the crabmeat consumed in this country is imported from Japan.

Certainly, 60 percent from a given country is a very liberal concession.

Workers in the wine industry are similarly threatened. They do not oppose importation of high-grade, quality wine with which they are in a more competitive position on the domestic market. It is the low-grade surplus wines flooding local markets under low-tariff rates which are creating havoc in the industry.

We have the same condition in plywood. In 1951, despite protests and facts presented by myself and others before the Tariff Commission, the State Department entered into trade negotiations with 17 foreign countries and brought about a 50 percent reduction in the tariff on imported plywood.

Another inequitable instance concerns hardboard. One of the largest hardboard plants in the country is located at Ukiah, Calif. It provides the main payroll of this community—a payroll which is now threatened by imports. Hardboard has been erroneously classified under the Tariff Act as a paper prod-

uct. We are attempting to have it reclassified as a wood product which it actually is. Canadian producers have been fighting this change because they export hardboard under the paper products classification and thus benefit from 7½ to 15 percent tariff rate. If reclassified, hardboard would come under the 16⅔ percent wood tariff schedule—still considerably below the Canadian tariff of 22½ percent on American-produced hardboard.

I most certainly am not against trade between friendly nations of the world. I believe it to be a healthy thing. However, I do firmly believe that too much emphasis is being placed on international politics in respect to trade agreements and that American industries and job opportunities are being needlessly sacrificed.

Tariff rates should be based wholly on the findings of a bipartisan Tariff Commission. After receiving testimony from representatives of industry, labor, and agriculture, the Commission should announce peril-point findings—based on economic conditions as they exist. Those findings should be final and if they are to be varied in any manner it should not be done without prior congressional approval.

In this way the constitutional responsibility of Congress in determining trade policies would be maintained, and adequate protection should thereby be accorded our economy.

Certain American industries have established manufacturing plants in many countries of the world. When they get into full production, employing people living under an economy substandard to ours, then the impact is inevitable and will spell ruin to our American standard of living.

We had better take a new look, and establish a policy in international trade of live-and-let-live. America, with 7 percent of the world's population, cannot absorb the surplus from 93 percent of the world producers. It would be better if we would be more realistic and curtail some of our exports. As long as we send high pressure salesmen throughout the world preaching the philosophy that all people should have the same standards which we enjoy, without their having earned those standards, we shall be adding to the chaos and continue to expand the jealousy of the other nations toward the United States—thereby encouraging international turmoil.

Congress cannot ignore its constitutional responsibility. It is our duty to regulate trade. The Tariff Commission should be responsible to the Congress, and trade agreements made should be based on economics and not placed in the hands of the State Department to be used in the field of international politics.

I trust that the recommittal motion strengthening the peril point and escape clause is adopted by this body.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Missouri [Mr. CARNAHAN].

Mr. CARNAHAN. Mr. Chairman, the arguments brought forward in defense of free trade are admirable. We all realize that in the past, economic barriers have, in many cases, lead to a difficult situation. Unreasonably high and unfair tariffs have fostered illwill and created tensions throughout the entire world. These tariff walls have prevented the flow of goods and services to many areas that were in dire need of them. Unnecessary tariffs have created islands of prosperity surrounded by a sea of poverty and abject want. And the moralist often shouts that many tariffs are the products of selfishness and greed. But these are all arguments against high tariffs. The cold facts are that the United States is no longer, by any stretch of the imagination, a high-tariff country. On the contrary we are among the lowest of tariff countries. In fact, we rank 7th from the bottom on tariff rates.

My concern of H. R. 1 is not on the grounds that there should be a general increase in tariff rates. We all recognize that in selective areas further reduction in existing tariffs might be to the advantage of our entire economy. To permit such adjustments is of course the overall objective of H. R. 1.

My concern is that any tariff policy of the United States should at least place foreign producers, having lower costs, in a reasonably comparable competitive position with efficient domestic producers. Such a policy certainly should not discriminate in favor of foreign products.

My concern is in connection with the effectiveness of the provisions of H. R. 1 for safe-guarding domestic industry and local workers from injury during expansion of world trade. Such protection from serious injury is supposed to be provided through the peril-point and the escape-clause provision of the bill. These provisions in H. R. 1 are the same as were carried in former legislation.

The peril-point and escape-clause provisions are rather technical and cumbersome, but I will try to state simply what they are and how they are supposed to work.

The peril point provides that before any reduction in a tariff rate on a specific product can be made, the President must obtain the advice of the Tariff Commission as to the point below which it believes a reduction could not be made without causing or threatening serious injury to the domestic industries producing the product. Such a point, designated by the Commission, is the peril point.

Should a tariff concession in any trade agreement made by the President under this legislation result in serious or threatened injury to a domestic industry, the concession may be withdrawn or modified in accordance with a provision known as the escape clause, which must be included in every agreement.

To use the escape clause, any interested party, by petition, may request the United States Tariff Commission to make an investigation and report to the President whether or not a concession has caused or threatened serious injury to a domestic industry.

To date, the use of the peril point, and the escape clause, has not provided the mechanism whereby domestic industries and workers have been sufficiently protected.

Since the institution of the escape clause in 1948, there have been 59 applications for relief to the Tariff Commission. In 15 of these cases the Commission found injury, or the threat of injury, and so reported to the President. In just five of these cases has the President taken action. These were: Women's fur felt hats and hat bodies, October 30, 1950; hatters' fur, January 5, 1952; dried figs, August 16, 1952; alsike cloverseed, June 30, 1954; watches, movements, and parts, July 27, 1954.

Among serious criticisms of the present "escape clause" provisions are the fact that proceedings before the Tariff Commission are lengthy, involving exhaustive hearings, and are often too expensive, especially for smaller industries. And further, the Commission may reach a decision on other evidence which was not presented in the hearings, thus not giving the interested industries an opportunity of rebuttal. And further, the domestic industries have no appeal from the findings-of-fact of the Commission, nor are such findings conclusive or binding on the President.

Yesterday, during consideration of the rule, I supported the attempt to amend the rule to permit amendments to H. R. 1, in a hope of strengthening the necessary protective mechanism of this legislation. I sincerely hope that under the rule permitting amendment only by the Ways and Means Committee, that action will be taken to correct these deficiencies. I will support any such amendment.

Over 3,000 American workers at Pittsburgh Plate Glass Co., Crystal City, Mo., have the specter of unemployment hovering over their families because plate glass importations have risen alarmingly in the past few years. The plate glass industry, which is so vital to the economy of Jefferson County, gets a greater adverse impact from foreign imports than do many other industries.

According to a report prepared by the Department of Commerce, the importation of plate glass in 1937 was 2,060,000 square feet. This figure has risen to 26,876,000 square feet by 1953. Yet, exports of this product, which totaled 3,281,000 square feet in 1937, has increased to only 15,961,000 square feet as compared with 26,876,000 square feet of plate glass imports in 1953.

If this trend persists, what is to become of the American plate glass industry? What is to become of the tens of thousands of glass workers and their families throughout the country? Will they, in the words of a high Government employee, "have to go South in the winter"? These are questions that are a burning issue with these affected workers.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Minnesota [Mr. MCCARTHY].

Mr. MCCARTHY. Mr. Chairman, in my opinion the consideration of this bill has suffered because of extreme statements made by both those who support it and by those who are opposed to it. The problem of trade arrangements, we must acknowledge, is an extremely complicated one. Those who oppose this measure and those who seek to modify

the trade program are, I am sure, as sincere in their intentions and as concerned about the general welfare of our nation as those who support the program. I do not believe that we should approach it by distinguishing its supporters as men concerned with the national interest and its opponents as men from groups worried about some particular product or some particular segment of their industry in the manner of Mr. Charles Taft before our committee.

The extremist opponents of reciprocal trade state that it will ruin the American economy. On the other hand, supporters of the bill in some cases have made statements which, in my opinion, attribute greater power and significance to the trade program than it deserves. President Eisenhower, for example, has said that "if we fail in our trade policy, we may fail in all. Our domestic employment, our standard of living, our security, and the solidarity of the free world— all are involved." Other members of the administration spoke in a similar vein. The same tone prevailed in statements by the Administration's Committee on Foreign Economic Policy and the Committee for a National Trade Policy. The passage of H. R. 1 is neither a great threat to American industry, nor is it a final answer to international economic problems.

"Trade not aid" was a widely used slogan in the campaign of 1952 and has been continued in use since the election of that year. Through the use of this slogan and accompanying statements, the impression was given that the mutual assistance and aid programs previously carried out under the Democratic administrations were somehow unjustifiable, if not unnecessary, and implied also that a trade program was a possible alternative. As a matter of fact this was not the case. The economic conditions of the nations of Europe in the immediate postwar years were not such as to permit the exchange of commodities of equal value. The labor forces of these countries were severely reduced. Much of their livestock had been destroyed and their whole agriculture set back. Their capital goods, machines, and factories were in many cases destroyed and generally worn out. These nations could not engage in international trade by exporting surpluses since, except for a few commodities, they had no surpluses. What they needed was not trade opportunities, but an aid program such as was provided. The economies in most of these countries has improved to a point where the aid program can be reduced. This is not true in every case. A slogan "Trade and aid" would better describe what is needed in international economic policy today. Countries such as India, for example, do not need foreign markets for their goods in any absolute sense, for India's present production is wholly inadequate to meet the potential needs of its own people. India does not need technical advice—there are Indian engineers and technicians—so much as it needs capital goods to make a reality of the plans of these engineers and technicians.

Certainly, to the extent possible, it is desirable that we receive a fair return for what we export to other peoples. I think it is true to say also that the people of foreign countries and their governments prefer such an arrangement to one in which we give to them direct aid.

In these past 20 years in which we have had a reciprocal trade program, particularly in the period since World War II, there has occurred what has been described as a revolution in world trade. There has been a reshuffling of the commodities being imported and exported by the different nations and areas of the world. The days when the United States and Europe were mutually interdependent are gone. The fact is that the European nations, as well as the Japanese, now export goods which we no longer want to buy and which in fact compete with our own products. The advantages for the most part are relative ones resulting from the fact that one nation or the other may be able to produce particular articles more economically than the other. This duplication of products by the United States and the countries of Europe existed even before World War II. Commerce in that period was principally through the medium of third countries: the United States selling in Europe; the Europeans selling in Latin America or Asia; and the United States in turn receiving such things as rubber, tin, coffee, and similar commodities from these countries.

In recent years even the so-called backward countries have pursued the path of economic independence and have made great strides toward achieving such independence. The development of industries in other parts of the world has altered trade patterns and to some extent has driven us economically apart from our allies, particularly in Western Europe. Yet while we have been separated from our allies economically, we have become increasingly involved with them strategically in view of the threat of Soviet aggression.

The Secretary of Defense, Mr. Wilson, appearing before our committee, pointed out that it was a part of the administration's policy to establish abroad plants which would produce materials which are important in war and which are difficult to transport. The particular example he cited was that of munitions. As this principle is applied to other needs either by our own policy or by the policy pursued by allied nations, economic interdependence will be even further reduced. We cannot expect a trade policy to carry the whole burden of responsibility for carrying out the strategic demands of the day. Not all of our allies are able to bear in every respect a proportionate share of military preparedness. In some cases the most strategically located country may be the least able by virtue of the weakness of its economy to support defense facilities. In these cases, obviously trade will not solve the problem. On the other hand, an economically strong nation may not be so located as to be of particularly strategic value. In this case other arrangements and agreements are called for. The theme is mutual defense.

Trade policy must be a part of our over-all policy. In practice there have been indications that the Administration realizes this. However in public utterances and in declaration of program and policy, this fact has not been clearly admitted. There has been a tendency to publicly over-simplify the problem as well as the solution. The simple proposition of "Trade not aid" is not adequate in the complexity of international economic and political relations today.

The tariff as an instrument of international trade control is not as effective today as it was 20 years ago. One writer has described the tariff as an economic "tank or artillery piece in the day of atomic warfare." The reduction of tariffs is not expected by economists to stimulate trade to any great extent. The English economist Julian Amery said that it is not at all "certain that Europe would greatly increase her dollar earnings even if the American tariff would be drastically reduced and simplified." Since the present bill contains no provision for any drastic reduction, it seems we must anticipate the limitations of its effects on international trade.

If the trade changes likely to result from putting into effect the program permitted by the passage of this legislation are not likely to have any significant effect on international trade, neither are they likely to greatly injure American industry as has been suggested by some of the opponents of this bill. The overall effect is likely to be slightly advantageous to American industry. In their testimony the representatives of segments of certain industries generally did not take into account the overall position of their industry in international trade. For example, the chemical industry is producing goods at an annual rate of $20 billion. For the first 9 months of 1954, exports were running at an annual rate of $894 million excluding special military items. For the first 9 months of 1954, imports of chemicals were running at an annual rate of $242 million. This import figure is just a little over one-fourth of chemical exports, and it is a very small fraction, as you can see, of the total production of the chemical industry. This total picture indicates that the United States chemical industry has fared well in international trade. Spokesmen from the electrical industry also opposed this bill. Again the record shows that the production of this industry reached seventeen billion in 1953; its exports were eight hundred million, and its imports slightly over $50 million—approximately one-third of 1 percent of the total production and less than one-tenth of the exports of electrical goods and equipment. Similarly the cotton industry in 1953 produced 10 billion square yards of cotton goods, exported over 600 million square yards, while only 45 million square yards were imported.

If trade relations were so changed as to seriously interfere with the export of these goods, it is quite possible that former exporters as efficient producers would concentrate more intensely on the domestic market and that the position of some of the firms, especially those asking for tariff protection, would be

even more seriously endangered by the intensified competition from other American producers.

The fact that the general evidence indicates support for this program does not excuse us from attention to the difficulties of industries which may be particularly hard hit. We must not subordinate considerations of social welfare and of the measure of stability in society to a purely economic question and consideration. Efficiency is not the only standard for the conduct of human affairs or of political affairs. When decisions with regard to international trade are made principally on the basis of national policy or international policy, a particular industry and the employees of that industry should not be called upon to bear the whole cost and to suffer all the consequences. But, rather, this cost should be borne by the whole of the American political community. It was not within the jurisdiction of our committee to consider all of the actions that might be necessary in order to provide an adequate program to take care of this difficulty. In my opinion, however, the administration should give attention to this problem and should propose a comprehensive program involving legislation in addition to the trade program. Such a program should include proposals for a more adequate unemployment compensation, reeducation of workingmen, relocation and rehabilitation of industrial areas, and encouragement of reinvestment in areas which have been particularly affected by international trade policy or by drastic changes within our own domestic economy. The need is for a comprehensive program which is adjusted to the needs of our own time. We have come to realize that we cannot conduct our international affairs according to the methods of the last generation. I think that we should also realize that perhaps the reciprocal trade program which was good 20 years ago may be somewhat outdated today.

The greatest fear of Europe in recent years has not been over our trade policy, but rather over the state of our own economy. Statistics on international trade for the United States show that our foreign trade comprises about 7 percent of our gross national product. This percentage has held fairly stable despite the condition of recession, readjustment, depression, improvement, prosperity, or stability in our economy. Economists and business people alike are generally agreed that the best hope for an increase of imports and exports depends on the continuously expanding economy in the United States itself. Imports and increase of international trade would likely to be encouraged more from full employment and a nearly 100 percent operation of our American economy than from the passage of H. R. 1.

If we proceed from the best year to the second best year, and from that to the third best year or worse, international trade is likely to suffer despite any action to liberalize trade policy. The successful conduct of foreign policy generally and the American effect upon international economic affairs depends upon the health and vitality of our own economy. There is a danger that through progressive moderation we may get back normalcy. I will say that normalcy is synonymous with mediocrity. In times such as these our response must be, I think, somewhat above the level of the mediocre.

Mr. SMITH of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. McCARTHY. I yield to the gentleman from Mississippi.

Mr. SMITH of Mississippi. In respect to what the gentleman says about the possible effect of the bill on international trade, is it not possible that as a result of the action of the Congress this bill is changed so as to make it possible to more sharply limit the trade by increasing certain tariffs, there will be some check upon international trade as it existed without the possibility of increases in amount?

Mr. McCARTHY. I believe that the bill provides adequate controls and adequate checks to give the protection which is justified and demanded by American industry. There is no reason to believe, either on the basis of the language of the bill or the actual international trade situation that any great increase in trade will result.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. CANFIELD].

Mr. CANFIELD. Mr. Chairman, thousands of my constituents engaged in the textile industry are terribly concerned about what we do here today. Inasmuch as we cannot amend the bill under the closed rule, I am hoping that the recommittal motion will offer to that great industry, an essential industry, and its workers, some measure of hope and comfort.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield 7 minutes to the gentleman from Illinois [Mr. VURSELL].

Mr. VURSELL. Mr. Chairman, I want to congratulate the gentleman from New York [Mr. REED] for providing a recommittal amendment that will come up later. I had hoped that we might go farther, but it appears that that is about the best solution and probably offers the best opportunity to bring some aid to distressed industries throughout this country.

I should like to take the very few minutes I have to discuss very briefly the effect on the independent oil industry that has come under our present program with respect to reciprocal trade. It is well known that we have not been able to get any relief, though we have tried for the last number of years. I should like to bring to the attention of this Congress the fact that about 90 percent of foreign oil is controlled outside of Russia by 5 or 6 of our big, major companies here in the United States; that they are devoting more attention to foreign oil now, with greater reserves, than they are to the domestic trade. So, we must rely more heavily on the independent oil industry of the Nation.

I should like also to point out that we have been trying to get a limitation of oil imports for a number of years. It might surprise the Members of the Congress to know that at the close of World War II we were importing only about 300,000 barrels of oil a day. The figure has gone up precipitately until we are importing 1,065,000 barrels a day and the major companies, all with their headquarters in the United States, have projected their figures for imports for the coming 6 months of this year to about 1,250,000 barrels of oil a day, an increase of over 400 percent. They have failed to cut back imports even though they have at times indicated they would do so. They will not cut back imports voluntarily in the future.

The result has been a compelled cutback of local production monthly and yearly, for lack of consumer demand, and we shall have to continue to cut back and to cut back and to lay off hundreds of thousands of men, and at the same time taking away from the Federal Treasury many millions of dollars which otherwise would be brought in taxes into the Federal Treasury, if the independent oil industry of this country were permitted to produce and expand in a normal way.

I think the question of national defense has a very important place in our consideration. We know that at the beginning of World War II our reserves were greater, of oil above the ground and oil known to be ready for production, than they are today. We know that the submarines then cut off much of the importation of foreign oil. We know that had we not been strong and virile in this country in production by independents, as well as by the majors, we would have been in very dire circumstances at that time. We are in a worse position today than we were then. The world is uneasy. We might be driven quickly into another world war. Then we would find that in the last few years we have been placing too great a dependence on foreign oil. We would find great swarms of submarines developed by Russia and other countries in cooperation with her sinking oil tankers greatly reducing, and perhaps almost cutting off from our country, the necessary oil and oil products that we must have. We know that the trucks and tanks of the Army, and the planes of the Air Force that will girdle the earth, and the ships of the Navy that will prowl the seas, if we get into another war, all necessary if we are to succeed, are powered by oil and gasoline. We know, in addition, that we have suffered a serious economic impact. For instance, in my own district—and I am speaking today for three States, known as the tri-State area—the situation is this. At the close of the war we were producing over 500,000 barrels of oil a day. Now, with an extended reserve, we are only producing about 250,000 barrels of oil a day. The rigs are being stacked. The men are being laid off. All over the United States, wherever we find a great oil-producing area, they are suffering from the same economic impact. And we are suffering from the same danger to our national defense if we should have the bad luck of finding ourselves someday thrust into another war.

We cannot say that this is a trade-instead-of-aid proposition, because two-thirds of the oil that is coming into this country is coming in large part from Saudi-Arabia, one of the richest nations per capita in the world; from Venezuela, which is a very rich nation per capita compared with ours. We cannot say that this comes under the trade-not-aid proposal. It is just as simple as that.

There are many other industries throughout the United States that need protection. We have found by experience that the escape clause has not worked sufficiently to give relief to those various industries that are in distress, when we have given away something like $50 billion to help rehabilitate those countries and now they are in competition with us.

I think it is time that this Congress go as far as it can by adopting this recommittal motion and give some aid to our own people, rather than, after giving away $50 billion, continue to give away our markets to foreign countries. I hope this body will approve the recommittal motion that will give some additional aid to domestic industries that are in distress.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield 12 minutes to the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Chairman, the opposition expressed by a great many members of this House to the gag rule now in effect on H. R. 1 reveals the feeling on the part of a great percentage of the American people that this legislation should be open for amendments.

I opposed the gag rule yesterday, and shall vote to recommit the bill. If the motion to recommit the bill fails, I shall vote againt H. R. 1 on final passage because the interests of American wage-earners are not protected.

After all, it is only through appropriate amendments that the jobs of American wage earners can be protected.

As the printed hearings on H. R. 1 will show, a long list of Members of Congress as well as spokesmen for numerous industries appeared before the House Ways and Means Committee pleading that H. R. 1 be amended in order that relief might be provided to many of our basic industries which have suffered because of the unfair competition resulting from a flood of cheaply manufactured foreign goods.

Many Members of Congress who appeared before the House Ways and Means Committee in protest against the damaging effects on the jobs of American wage earners resulting from reciprocal trade agreements have supported the principle of reciprocal trade in previous Congresses but to use their own words—they could not continue to do so any longer unless appropriate amendments were adopted.

When I first came to Congress in 1939 I opposed reciprocal trade agreements on the grounds that they were destroying the jobs of coal miners in my congressional district in Pennsylvania. At that time, imported Russian coal had captured some of the eastern seaboard coal markets from coal producers in my congressional district.

During the early part of World War II and before resigning my seat in Congress to return to military service, I supported the extension of reciprocal trade agreements in the 78th Congress because we were at war and the demand for coal revived our coal industry.

When I was elected to the 80th Congress I voted in favor of extending reciprocal trade agreements with the understanding that American industries would be protected from unfair competition resulting from a flood of cheaply manufactured foreign goods.

For example, in Pennsylvania residual oil from Venezuela was beginning to flood the eastern seaboard, thus destroying the market for Pennsylvania-mined coal.

During the 82d Congress I voted to extend reciprocal trade agreements because there was contained therein the so-called peril-point amendment which was designed to provide a checkrein on imports that could destroy the jobs of American wage earners.

During the 83d Congress I joined many of my colleagues in an effort to stop the uncontrolled flow of foreign goods. Many of you will recall that we were supporting the Simpson bill. My special interest was in regulating the flood of foreign residual oil by placing a quota limitation on the importation of such oil. As many of you will recall, the Simpson bill was returned to the committee.

During the early part of 1954 the so-called Randall committee was created and took testimony from spokesmen for industries adversely affected by the importation of cheaply manufactured foreign goods. I regret to state that the coal industry was denied the opportunity to present its side of the case. Consequently the Randall report ignored the increasingly serious situation existing in the coal-producing States of our Nation.

Mr. Chairman, by my votes as a Member of Congress there is ample proof that I believe in the principles of reciprocal trade agreements and that I supported them until I found a wholesale disregard for protecting the jobs of American workmen.

It became evident that the so-called peril-point amendment was meaningless and that the Randall committee merely performed a window-dressing job and actually by their recommendations threw American wage earners to the wolves.

Mr. Chairman, I voted against the extension of reciprocal trade agreements last year and I intend to continue to do so until the interest of the American working man is protected.

As a means of attaining the objective of protecting the jobs of American workmen, I have 3 bills pending before the House Ways and Means Committee, namely: H. R. 345, H. R. 864, and H. R. 3019.

H. R. 345 is designed to provide a 5-percent quota limitation on imports of foreign residual oil; while H. R. 3019 would increase the limitation to 10 percent.

H. R. 864 provides a permanent procedure for the adjustment of tariff rates on a selective basis and regulates the flow of imported articles on a basis of fair competition with domestic articles. H. R. 864 also contains a 5-percent quota limitation on imports of foreign residual oil.

Mr. Chairman, I am opposed to H. R. 1 because it will continue the disastrous effects on our economy by the reckless importation of foreign goods manufactured at a fraction of the wages paid American workmen.

For several weeks the House Ways and Means Committee has heard expert testimony from spokesmen for various industries regarding the adverse effects reciprocal trade agreements are having on our industrial economy. These experts produced facts showing that the employees of the industry affected not only lost their jobs but many of the manufacturing plants have been driven to financial distress, and in some instances were forced to close their doors.

Spokesmen for the coal industry told how the flood of foreign residual oil from Venezuela has destroyed the domestic coal markets of the miners in Pennsylvania, Maryland, and West Virginia.

Back in 1939 when I first voiced my opposition to the importation of slave-mined Russian coal and other cheaply manufactured foreign products, I predicted that such a reckless policy would create ghost towns out of many communities in my congressional district and throughout the Nation.

Mr. Chairman, my prediction in 1939 has become a reality. Practically all of our deep mines in central Pennsylvania are closed and thousands of miners have been out of work for several years. In fact, many mining towns have been abandoned and their empty and dilapidated rows of houses stand as a monument to the destructive effects of the importation of foreign residual oil. Because they have nowhere to go, there are only a few of the unemployed in the coal fields of central Pennsylvania that have left the area. The result is that today, according to the United States Department of Labor, my congressional district is classified as a critical area because of the fact that nearly 18 percent of the civilian labor force is unemployed.

This unemployment is not confined to coal-miners but includes those employed in affected related industries such as the railroads.

Mr. Chairman, in my home city of Altoona, Pa., nearly 10,000 people are unemployed, 6,000 of whom are railroad employees with 4,100 of this number having exhausted their rights on January 10, 1955 to railroad unemployment insurance benefits. A similar condition exists among coal miners and others who have lost their right to unemployment compensation benefits from the State of Pennsylvania.

Mr. Chairman, every community in my congressional district has an active committee engaged in trying to attract new industries and millions of dollars have been raised by voluntary subscription to finance this long-range program of rehabilitating the industrial economy of the area.

While this united community effort goes on, thousands of my constituents—all good Americans and victims of this reckless foreign-trade policy—are today dependent for their existence upon public assistance and surplus food commodities.

I regret that every member of this Committee is unable to talk to these unemployed Americans as they stand in line to pick up their food coupons. If it were possible for you to talk to them, you would hear the pitiful story of their plight as citizens of a nation that boasts of its high standard of living.

As I mentioned a moment ago, communities affected by unemployment in cooperation with the State and Federal Government are endeavoring to rehabilitate their economy by attracting new industries. The unemployment situation, however, is getting worse as mines continue to close and more miners and railroaders are losing their jobs.

While this unfortunate situation prevails in the United States, residents of Venezuela, which is the chief exporter of residual oil, are enjoying unbridled prosperity.

Let me read you excerpts from Hal Boyle's syndicated column of January 24, 1955, titled "Venezuela Seen as the Texas of South America":

So much money is being made here (Venezuela) that visiting Texans actually get an inferiority complex and the United States dollar feels like 50 cents. * * * The visitor has a dazed sensation he is caught in a mid-century Klondike gold rush. The atmosphere of quick money is overwhelming, and tales of riches made overnight are a Bolivar a dozen. * * * Venezuela is bigger than Texas and Oklahoma combined and larger than any European country except Germany. * * * Its chief income is from oil—no land except the United States produces more. * * *

Although the nation has a population of only 5½ million, the Government spent half a billion dollars in 1954 on vast public-works projects and still ended up with $80 million left in the till. * * * Foreign investors from the United States and Europe are pouring untold millions into the industrialization of the country. It has taken in more than 100,000 immigrants from Europe the last 10 years. * * *

Caracas, the 388-year-old capital, is now one of the world's greatest boom cities. Fifty years ago milkmen herded cows through its ancient streets. Today they are jammed by thousands of new high-priced motorcars. * * * Nearly a million people live in the metropolitan area, and so many new buildings are going up construction workers have no time to even take Sundays off to go to the bullfights.

But the city has abysmal poverty as well as tremendous wealth. The shanties of the poor still crowd many of the raw red hills that stud Caracas. The Government has torn down thousands of these eyesores and replaced them with forty 15-story apartment buildings at a cost of $24 million. Workmen can rent the apartments for $6 to $30 a month, own them after a period of 20 years.

In 1955 the Government plans to tear down 6,500 more shacks and spend $25 million more on apartment projects for low-income workers.

Mr. Chairman, what a contrast it is to compare living conditions in Venezuela with the coal fields of Pennsylvania.

May I add that the prosperity enjoyed in Venezuela is to a great extent at the expense of the misery and suffering of residents of the coal-producing States of our Nation and especially of my congressional district.

At this very minute a quarter of a million ton tanker ship is tied up at an east coast dock carrying disaster to the coal, railroad and related industries of this Nation, in much the same manner as rat-infested vessels brought disease into our port cities in years gone by.

This foreign tanker with its bunker space filled with residual oil is dumping it in violation of every American concept of fair competition. As a matter of fact, even if the miners of our Nation would work for nothing and the railroads transported the coal for practically nothing, the coal industry could not compete with this unfair competition from foreign residual oil because its price is continually manipulated downward to capture the eastern seaboard coal market.

Mr. Chairman, it is being said in defense of residual oil that the oil companies have been requested to restrict voluntarily the amount of residual oil imported quarterly.

It has also been said that if any restrictions are placed on the importation of foreign residual oil that we will offend Venezuela.

Let me state, Mr. Chairman, that every time a coal miner loses his job because of the unfair competition from foreign residual oil a railroader has also been added to the list of the unemployed.

Mr. Chairman, those of us who represent coal-producing States recognize foreign residual oil as the arch-enemy of our industrial economy.

Therefore, I plead with you that H. R. 1 be returned to committee so that appropriate amendments can be adopted.

As far as I am concerned, it is about time we start adopting some of the policies foreign nations apply against us in protecting the jobs of their industrial workers.

Mr. Chairman, H. R. 1 without appropriate amendments will not correct the unemployment situation and afford the necessary relief to distressed industries and therefore I cannot conscientiously vote for it.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee [Mr. EVINS].

Mr. EVINS. Mr. Chairman, during the last session of the Congress—the 2d session of the 83d Congress—when we were then debating and giving consideration to the bill to renew the Reciprocal Trade Agreements Act, I felt the occasion was ripe to quote an old saying which was this: "O, defend me from my friends; I can defend myself from my enemies."

The occasion for this remark, we may recall, Mr. Chairman, was the weak, inadequate and watered-down measure which the Congress was called to act upon in this regard—a so-called extension of the Cordell Hull Trade Agreements Act.

The bill which the Congress then reluctantly passed called for a 1-year extension of this great program for peace and international amity and prosperity. That measure was placed before the Congress by the President's own party leaders in the Congress and was in direct conflict with the President's own expressed wishes with regard to what was needed in a trade act. The compromise which was accepted by the President was forced on him. His friends, as we know, knew what was best—they did it their way.

It is a strange thing, in the political life of our Nation, that the President should only now be getting out of the committee the kind of trade bill he has always favored and advocated as necessary to the furtherance of our international relations and foreign policy. In this instance, his political adversaries have proved to be his friends—he has been put in the position of depending upon the Democratic Party to do what his own party would not do for his administration.

I may say to the President that the Democratic Party is glad to do it—inasmuch as the trade policy on which he has wisely set store is a keystone in the philosophy of the Democratic Party.

I am grateful for the opportunity to vote upon a measure which calls for extending this great act for a proper period of 3 years.

I will not go so far as to say that those who oppose this bill have taken a lesson from the Dark Ages—but some of the arguments which we have heard both on and off the floor and by the blizzard of propaganda leaflets which have almost flooded our offices remind us that some would turn the clock back to the days of McKinley.

History records that the Smoot-Hawley high-tariff act was passed in the 1920's—in the midst of world economic exhaustion following World War I. We then erected a Wall of China around our Nation to carry out the McKinley philosophy that we "sell everything and buy nothing."

This was assuredly a lapse into the ox-cart age—a tragic lapse we now know in viewing the havoc and wreckage of World War II into which the world was plunged from the depths of a world-wide depression and economic suffocation.

As a matter of practical fact, we know today, any businessman knows that it is not possible to achieve such a state of economic bliss as some would propose, namely, "sell everything and buy nothing." Trade is a two-way street—from the corner drug store to the largest corporation.

It cannot be all "gimme" and no give and take.

It is this philosophy, this belief, Mr. Chairman, in the necessity and importance of reducing tariff barriers and making trade a two-way street which served as the guilding principle in the life of Judge Cordell Hull, of Tennessee—the author of the reciprocal trade agreements program.

This great act is an immortal, living monument to my distinguished predecessor in Congress and the inspiration of many who strive for service in the Congress. No monument which Judge Hull erected for himself through his brilliant, tireless, and far-visioned efforts—including even his historic service to the Nation as Secretary of State during the Roosevelt administration during

World War II—stands as a greater tribute to this statesman than the measure which we are called upon to extend today.

Judge Hull had the vision to foresee the modern concept of a world growing progressively smaller—a more closely allied and interrelated—and that in such a world it was essential to break down the protective walls of high tariff that our Nation had erected. This wall was built up—high and unsurmountable, at first—to protect an infant American industry. It has taken many years to bring our Nation to the realization that trade, low tariff commercial intercourse between nations, is in our Nation's best interest economically—and, more important for America to realize, one of the greatest deterrents to war and one of the greatest promoters of peace that could be possible.

Judge Hull's vision foresaw peace without vast armaments—but through the means of friendly relations and friendly and peaceful and profitable trade between nations.

Some advocates, forgetting what we have already built in international amity through the means of friendly trade, argue that such a trade policy cripples American industry. Certainly, I cannot and would not support any measure that would do that—and I do not believe that there are any crippling features harmful to American industry and agriculture and our way of life in this act. I think the opposite is true.

I have the greatest confidence that American industry which turns out and produces the greatest products in the world can meet the competition from any source in the world and be stronger for it. Our Nation was not built on handouts and monopolies—but on competition which brought forth the best in the man and in our chosen way of life.

I believe that the quality of American products, the desirability of American products, the durability of American products—the ingenuity of the American producer—can not only keep our own domestic markets vigorous but create greater, more extensive markets in other countries.

Mr. Chairman, to clamp down restrictions of trade at this time of prevailing crisis and uncertainty and tension would be to slam the door in the face of a good neighbor—a neighbor who might one day be in a position to help one put out a fire in one's house.

We cannot deal in any such unfriendly, hostile, and provocative manner with our friends, or those whom we wish and need to have as our friends.

Trade barriers must be reduced and kept down. Let us sell our products abroad and make it possible for other nations to sell their products abroad. Herein is the answer to those nations who have not full assurance in their own minds of our backing and support in the dismal prospect presented by Communist propaganda. Full cooperation, economically, and militarily, is the answer to the problem presented by Communist imperialism.

This, Mr. Chairman, is the path to eventual peace. Herein lies our hope for lasting peace. Herein lies the hope of other nations—that they may engage in commerce with our great Nation and with other nations without unreasonable and insurmountable barriers—that they may have hope for their own industrial and agricultural development and progress.

Mr. Chairman, we must do nothing as a nation which deprives ourselves and other nations of our innate right to hope.

We must take those courses of action which promote peace, prosperity, and better understanding.

Trade is the international language. It speaks the words of peace and prosperity throughout the world. Let us extend this act and serve notice to the world that America's aim is still and always will be peace.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Utah [Mr. DAWSON].

Mr. DAWSON of Utah. Mr. Chairman, during my two previous terms as a Member of this House, I have always voted for the extension of the Reciprocal Trade Act. I was convinced then—and I still am convinced—that we must have a healthy foreign trade program not only for the prosperity of this Nation but for the prosperity of friendly nations overseas.

In voting for these extensions previously, I did so with some reservation, perhaps a "minimum of enthusiasm" would describe my feelings. But I always felt confident that if a trade agreement turned out to be in error, there was always the escape-clause proceedings to protect our domestic industries from serious injury.

My confidence in the efficacy of the escape clause, however, has been shattered by events of the past. Fifteen times the Tariff Commission has found that a trade concession was causing injury to a domestic industry. Yet, only in five of those cases has the President taken the corrective action recommended by the Commision.

Let me review the record of the past 2 years in regard to one of our vital domestic defense industries—the mining of lead and zinc.

Approximately 2 years ago, the House Ways and Means Committee opened hearings on a measure introduced by Mr. SIMPSON of Pennsylvania. His bill proposed a sliding tariff to protect our domestic lead-zinc mines which were in serious difficulty due to the dumping of foreign metals on the United States market.

This measure, moderate as it was, ran into heavy opposition from the Department of State.

Secretary of State John Foster Dulles told the committee that the Simpson bill was, first, contrary to our trade policies; and, second, unnecessary.

There is of course machinery provided by the present act which permits of relief in special situations of the kind you refer to. I see no reason why the industry that you have in mind should not have recourse to the provisions of the present act—

Secretary Dulles testified.

He was referring to the lead-zinc industry and the provision he recommended they take advantage of was the escape clause provision.

Thus encouraged by the administration, the industry sought relief under the escape clause provision. An application was filed and hundreds of pages of expert testimony were taken in hearings before the Tariff Commission. In April 1954, after nearly 9 months of study, the Commission rendered a unanimous decision to the President to the effect that the domestic industry was being damaged and relief was necessary.

From the reports I get, apparently the decision of the Tariff Commission was approved by all but one of the executive departments—the Department of State. Nevertheless, the State Department's views prevailed and the President chose the alternative of stockpiling. This alternative has not worked and the mines that are continuing to operate in this Nation are struggling for their existence.

Metal can be stockpiled. Mines cannot. They fill with water. Their roofs cave in. The miners reluctantly drift away. Exploration for new sources of metal ceases. This is happening with ever increasing frequency throughout the rich metal producing States today.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. DAWSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Pennsylvania. With respect to the matter of stockpiling of the products of the mines to which the gentleman refers, do I understand that imports of those materials increased in this time during which we have been stockpiling the metals?

Mr. DAWSON of Utah. That is correct, imports have increased, and I think I can explain to the gentleman why they have increased. The result of the stockpiling has been this: The Government took the newly mined domestic ores and put them into the stockpile, and that left a vacuum in the market which permitted the foreigners to move in and take advantage of the increased price that was made possible by the stockpiling.

Mr. SIMPSON of Pennsylvania. Then, in reality, our stockpiling, which many thought was for the purpose of helping the American producer, for the purpose of increasing the consumption domestically, and the keeping up of the American mines, redounded to the benefit of the foreign producer to an equal extent to which it helped the American producer.

Mr. DAWSON of Utah. The gentleman is correct. That has been the effect of it.

Mr. SIMPSON of Pennsylvania. Is it the gentleman's conclusion that stockpiling has been a solution for the lead-zinc situation in the West?

Mr. DAWSON of Utah. My opinion is that the stockpiling is merely a palliative which offered some temporary relief. At the time the announcement was made, lead went up 1¼ cents a pound and zinc went up 1¼ cents a pound, but zinc has never gone up one penny since that time, and the stockpiling program is just simply a stopgap move-

ment. It offers no permanent relief for a sick industry.

Mr. SIMPSON of Pennsylvania. I thank the gentleman.

Mr. DAWSON of Utah. The net result has been to completely reverse the relative share of the domestic lead and zinc market supplied by American workers in American mines.

In 1949 the domestic lead-zinc miners had 62.2 percent of the total domestic market. By 1954 the foreign producer was supplying 61 percent of the metal used in the United States.

In H. R. 1, as reported from committee, we have a bill that not only continues the President's broad power to negotiate trade agreements but expands it. No provision is made in the bill to strengthen the Tariff Commission's hand in escape-clause proceedings.

The amendment to be proposed by the gentleman from New York [Mr. REED], in his motion to recommit should not be an onerous requirement. It appears to me that it is at most a minimum strengthening of the escape-clause provision. The President still will have the right to overrule the Commission's findings if he believes such action is necessary for the national security.

I had hoped that this amendment would be stronger and I proposed that the Congress, not the President, be given final authority to decide what action if any should be taken after the Tariff Commission finds that a trade agreement entered into by the President is putting a domestic industry out of business. Instead of reporting its findings under the escape clause to the President, under my proposal the Tariff Commission would report to Congress and in the absence of a majority overriding vote by either House the findings would become effective at the expiration of 60 days.

It is not good government to have a man sit in judgment of himself.

If an industry can convince the Tariff Commission that it is being injured by an agreement negotiated by the President, the recommendation of the Commission should carry all the weight we can give it legislatively within the framework of our Nation's security.

I will support H. R. 1 with the inclusion of the Reed amendment. But I cannot vote to expand the power of reducing tariffs—and by extension of the power to export jobs of affected industries—without providing for the concurrent strengthening of the Commission's decisions in escape-clause proceedings.

Without this minimum protection for the Nation's working people and businesses, I cannot support this broadening of the already broad powers of the executive branch of the Government.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. SMITH].

Mr. SMITH of Mississippi. Mr. Chairman, it is unfortunate that the full debate upon this important measure cannot be heard by all the Members of the House who will be called upon to vote on this issue in a few minutes. I realize that about half the Members of the House are out in the corridors being buttonholed by the various lobbyists who are working for the recommittal motion.

Mr. REED of New York. Mr. Chairman, would the gentleman yield?

Mr. SMITH of Mississippi. I yield.

Mr. REED of New York. In answer to that I will say to the gentleman that he can go right out here and find his registered superlobbyist, Mr. Taft, working on his people.

Mr. SMITH of Mississippi. I think any comparison of the number of lobbyists involved in this fight will show, if it is made by any fair-minded group, that the lobbyists on the protectionist side outnumber the people on the other side by about 1,000 to 1; and the funds involved would be about 100,000 to 1.

As to the amount of pressure put upon one individual Member of Congress who has only one vote, I can only say as to my own personal experience that it has been something like this and on those people where there has been an opportunity to influence a vote one way or another, the number has been even greater.

TEXTILE INDUSTRY

As to my colleagues in the Congress from the Southern States and from some of the New England and Atlantic Seaboard States, there has been great pressure on behalf of the textile industry to provide some type of protection in this bill. I thought, after hearing these stories about the textile industry's hardship, that practically every textile establishment in the country was on the verge of bankruptcy and that their situation must be desperate. So I picked up the current issue of the U. S. News & World Report a couple of days ago and I found there a list of American industries showing how they will prosper in 1955. And what did I find heading the list of industries that will prosper in 1955, in this very conservative publication of business, but the textile industry; a statement that textile profits will be higher than that of any other business in the country in 1955. I submit that the textile industry is working a fraud upon the Congress of the United States and upon the people of the United States in the exorbitant claims that have been made in this regard.

I think this matter should be brought to the attention of the House, because a lot of us have been so gullible as to accept the statement that the textile industry is in dire straits. Something is wrong. Who is telling the truth about this situation? I do not believe that the U. S. News & World Report is an unreliable magazine on business matters. It has been proven correct year in and year out. It now states that the textile industry of the United States is not merely prosperous, but that it will be the most prosperous industry in the United States for the coming year. Does that industry need protection?

I have been especially interested in the attitude of some of my good friends in the debate on this matter, and I have been sorely disappointed in the attitude of some of my friends from the South who have taken the position that they are going to defend the poor, starving textile industry which, according to this report, for the coming year, will be the most prosperous industry in the United States.

CONSUMER INTEREST

I have also been interested in the viewpoint of some of my friends who, 3 or 4 years ago, when we were fighting the battles of the OPS and OPA, from California and Pennsylvania and Rhode Island and some of the New England States, fought, bled, and died to protect the consumer, to save the consumer from an increase in the price of any product even one penny.

Yet when we come down to this great issue where the consumer has the greatest stake, where the decision will decide the price levels of the products involved, we find that the consumers are being deserted by those friends they had a few years ago in the fight between the producers and the consumers.

The gentlemen who have been protesting the provisions of the bill today as it stands have, every one of them, made the protest because they say the bill will enable people to buy cheaper goods than what they are able to buy now. In other words, if you vote to weaken this bill in any respect you are going to increase the price of goods that some consumer has to pay. Do not forget that.

HARDSHIPS

We have had a lot of questions here today and a lot of talk from everybody about the dire hardship that exists in certain districts. I know dire hardship exists from unemployment in the various parts of the country, in Pennsylvania, West Virginia, the lead and zinc mining areas, and various other parts of the country. I know what that hardship is, because I think that in the district I have the honor to represent today we have the greatest percentage of unemployment in the labor force of any congressional district in the United States. In my congressional district today a very conservative estimate has been made that there are perhaps 60,000 unemployed. That is a greater percentage of unemployment, I am sure, than has been mentioned by any person making a hardship complaint here today.

Why are these people unemployed? They are not industrial laborers, who have a chance to draw unemployment compensation. They do not have any type of thing to draw on except a surplus commodity ration distributed by the United States Government, due to the fact that we are in a drought condition and also due to a lack of markets for the products we produce.

MORE TRADE NEEDED

These people are unemployed because there is no market for the commodities from which they make their living, and from which those people have been making their living in that manner over a hundred years. Ours is a far longer established industry than any of the others that are making claims of hardship today.

They are unemployed because their export market has been diminished. That export market is not there because the countries we would normally want to trade with are not able to have enough trade with us in other lines of business to pay for the commodities we produce.

We have hardship not because of any liberal trade policy but because our trade policy is by no means liberal enough.

RECOMMITTAL NO ANSWER

We have had a lot of talk today about the motion to recommit to be offered by the gentleman from New York [Mr. REED] which I am sure was designed with the idea that it will offer the most to everybody here. If you will look about a litle bit, I am sure any one of these lobbyists we have been discussing can offer any one of us assurance of all sorts of help in whatever we are interested in in connection with that motion.

Let us look again at the situation in 1951, when a similar motion was offered. At that time everybody promised that it would solve everybody's problem. It did not solve the problems. The motion here today is not going to solve those problems. It is going to make it harder for us to solve the problem of carrying on a trade policy, but that is as far as it will go. It is not going to give any benefit to any industry that has a basic interest in prospering through the overall prosperity of the United States.

We have had criticism after criticism in the discussion on this bill of action taken in regard to Tariff Commission recommendations.

AFRAID TO CRITICIZE THE PRESIDENT

But I notice all of my friends here when they criticize this action, they blame it on the State Department or somebody like that. Why not blame it on the man who takes the action—the President of the United States—President Eisenhower. I think he did perform his duty properly in making the rulings that he did, but I think in the interest of fair politics when a Democratic President is involved, you said it was President Truman who did something or President Roosevelt or whoever it was who was involved. I think in your criticisms of the action being taken on the findings of the Tariff Commission, it is only fair that you should criticize the President of the United States and not these various executive departments. The action is taken by the President of the United States, signing a piece of paper, and it is his individual responsibility. I do not question whether he should be criticized for something else, but do not try to shift blame to the State Department.

This overall issue is important beyond this matter of individual hardship in each congressional district. It is important, and I believe part of the importance is reflected in the suggested recommittal motion that is going to be made. We are asked to make mandatory that a finding shall be put into effect if there is a finding of hardship with regard to any industry. We are asked to overlook the national interests, and I think our duty and our responsibility as Members of the Congress, when we take the oath of office, is to act in the national interest. If we here today put into effect legislation which says that the interest of one particular industry is more important than the national interest then we will be failing in our duty. We would be violating our oath of office if we changed the present escape clause or peril point provisions of the bill with only the thought of some special interest. The bill provides that any such decision can be overriden in the national interest, and not that such a decision has to stand merely because it in some way makes competition a little bit tougher for one particular industry.

FREE ENTERPRISE?

You gentlemen on my left pride yourselves as the representatives of the political philosophy of free enterprise. I think I pride myself too in that respect, but why are you not standing up today for fair competition—for competition? This is what we are asking for—we are asking for any competition. If free enterprise means anything, it means competition. What you are asking for is not competition, but for a subsidy which is taken right out of the pockets of the people even more so than under a so-called Brannan plan or under socialized medicine or anything else. Competition is something that is the basis of the good, old historic American tradition. But you are saying here that it is all right to subsidize business and to subsidize the profits of industries that today have the greatest profit potential of any other industry in the country, but you do not want to do anything to help the American consumer in this regard.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Georgia [Mr. LANHAM].

Mr. LANHAM. Mr. Chairman, I am somewhat surprised at my rotund and usually jolly friend and colleague from the South, Mr. SMITH from Mississippi. I cannot quite understand what has gotten him so wrought up and excited unless he is afraid we are going to recommit this bill and provide some protection in it for our industries which are really threatened and get it in shape so that we can vote for it. I think I know the trouble with him. You know he is an author. He has just written a book called the Yazoo. Was it the psalmist or somebody in the Old Testament who said, Oh, that my enemy would write a book? Well, our friend has written a book, and I understand it is a fine book. But you know he is one of these cloud riders, these idealists. You know he would ride in the clouds if he did not weigh quite so much.

Mr. SMITH of Mississippi. Mr. Chairman, if the gentleman will yield, would he allow me to point out that the book which is published by Rhinehart and Company may be obtained at any book store for $4.

Mr. LANHAM. I am glad to give the gentleman's book a boost. You know our good friend, the gentleman from South Carolina, DICK RICHARDS, at one time accused our lovable friend, BROOKS HAYS of being a cloud rider. He said he rode down to his office every morning on a cloud. I defended Brooks on that charge, and I think I was right. I said, "BROOKS did have his head in the clouds where the winds of God's truth could blow upon him, but had his feet firmly planted upon the ground." Because of the vote of my good friend, the gentleman from South Carolina [Mr. RICHARDS] I am almost convinced that his long and distinguished service on the House Committee on Foreign Affairs has made him into a cloud rider and stargazer.

Now my friend from Mississippi [Mr. SMITH] is one of those idealists who can write a book, but he is an idealist, and he has no idea of the practical matters involved in this idea of free trade. He does not have his feet on the ground.

I have always been a free trader. When I first came out of school I had been reading Adam Smith and some of those economists who believed in free trade and a free market. I still believe we have got to work toward that end; but, my friends, we just cannot get ourselves into it suddenly and without regard to the realities involved.

Now, so much for my friend from Mississippi. I am glad that all of his delegation are not cloud riders, and they have their feet firmly on the ground, and I am sure they are going along with us in trying to make this bill one that will protect our threatened industries.

Mr. Chairman, at the very outset, I want to make it clear that I do not oppose the principle of expanded foreign trade as involved in H. R. 1, though I do oppose its present form. I want also to pay tribute to that great Tennessean, Cordell Hull, for his vision and farsightedness in first suggesting the reciprocal trade agreements principle and bringing it into successful operation. Now another great Tennessean is carrying forward the work begun by his illustrious predecessor. The gentleman from Tennessee, Mr. JERE COOPER, is my warm personal friend, and I am proud of him as a southerner and one who is obsessed with an idea and an ideal that in itself is sound. Furthermore, I have no criticism of the Rules Committee for sending this bill to the floor of the House under a closed rule though I tried on yesterday, unsuccessfully, to get the rule amended.

It is well and good to have ideals and to pursue them for, as the Scripture says, Without a vision my people perish. Vision and idealism we must have and I am sure that the idea of expanded trade with other nations is a sound one if properly applied and administered.

Keeping one's head in the clouds as one follows an ideal is splendid but at the same time the cloud rider and stargazer ought to keep his feet on the ground and come down from the mountaintop and out of the clouds on occasion to get again the vision of those who must plod along life's weary way. As I recall the story of the Transfiguration, the three apostles who went up to the mountaintop with the Great Teacher were so enthralled and entranced with the vision they had seen that they wanted to build a tabernacle and dwell forever with the Master on the mountaintop. In all the history of mankind there has, of course, been no greater idealist or follower after the gleam than the Christ, yet he was too wise to accede to the wishes of His apostles and leave them to dwell forever in the rarefied atmosphere of the mountaintop. He brought them down from their exalted position to get their feet on solid ground again for He knew that they

must live among men and develop their vision and test it by the realities of human existence.

Today I implore all of you who are obsessed by the magnificent vision of free and untrammeled trade to come down from the mountaintop and modify your vision by present-day realities.

What I am trying to say is that I have always supported the principle embodied in the reciprocal trade agreements program although I have realized that many problems arise in connection with its administration. It has, in the past, been my belief that the peril point and escape clause provisions in the act protected our American industries and their employees from a reduction of the tariff below a point at which the industry could continue to operate profitably.

There is no doubt but that in the past, tariff rates have been so high that the American consumer was plundered for the benefit of a few great corporations who, protected by such tariffs, made inordinate profits. It must be remembered, however, that our reciprocal trade program has been in effect now since 1934 and that our tariffs have been gradually reduced over the years so that there is no longer the question of the plundering and exploitation of the consumer for the benefit of the producers in America.

Mr. DAVIS of Georgia. Mr. Chairman, will the gentleman yield?

Mr. LANHAM. Gladly.

Mr. DAVIS of Georgia. I wish to compliment the gentleman on the splendid talk he is making and I want to join him in stating that we do need further protection insofar as the peril point provision and escape clause are concerned. We just heard the gentleman from Utah [Mr. DAWSON] point out that out of 15 times when the Tariff Commission recommended action in only 5 instances was action taken. The gentleman from Georgia is certainly correct in his conclusions on this subject. I want to concur in those conclusions, and thank the gentleman for the splendid talk which he is making.

Mr. LANHAM. I thank the gentleman very much and appreciate his contribution.

I was just about to say that my friend from Mississippi is living in the past. I do not know whether he writes history or not—he probably taught history and he is probably living it again, living back in the days I have just been talking about when tariff rates were far too high and protected industry so it could make inordinate profits. But we have left those days; we have come a long way since those days and our tariff rates have been reduced to the point where our industries have now grown—the big industries—so that they do not need protection, and they do not want it.

The truth is that our huge corporations who used to profit by the tariff are now exporters and need world markets in order to dispose of the products they manufacture. For this reason, we see now the huge industries such as the automobile, iron, and steel companies supporting the lowering of our tariffs; for they are so efficiently operated and need foreign markets so badly that they do not fear competition from abroad. So that now it is the small manufacturers of America who are being adversely affected by the reciprocal trade agreements policy. It is now a struggle between the huge mass production industries of America and the smaller producers.

I am deeply concerned about the textile industry which, while in the aggregate is a massive industry with investments involving over $8 billion, is nonetheless made up of small individual components. This industry is now threatened by the negotiation of a trade agreement with Japan which would further reduce the tariffs on textiles. Previous trade agreements have already imposed tariff reductions on about 91 percent of the industry's production. The cuts have averaged about 37 percent. On many individual items they have amounted to as much as 50 percent.

The proposal to further lower the tariff on textiles includes such a comprehensive list that it leaves one with the conclusion that the entire cotton textile industry of the United States is regarded as potentially expendable.

Tariff concessions on synthetic yarns are also proposed and constitute another danger. The competitive effect would be to compel the cotton mills of the United States to switch from cotton to rayon. This would sound the doom of the American cotton farmer as well as of the cotton manufacturing industry.

I want to point out right here that no other major industry is to such an important degree exposed to the potential sacrifice considered for the cotton manufacturing industry.

The argument is made that the great mass-production industries of the United States are so much more efficient than foreign industries as to be able to compete without difficulty with foreign producers. Consequently, we should expect that the articles proposed to be considered for tariff reduction would include the products of the huge mass-production industries. Such is not the case, however. For instance, the great iron and steel industry comes under "Schedule 3—Metals and Manufactures of." Here we find listed thumbtacks, needles, nail files, surgical and dental instruments, shotguns and pistols. Also included are bicycle bells which is all that is left of the bicycle industry in America.

And so it goes. An examination of the various schedules will show that in the huge mass-production industries few reductions in the tariff are proposed, whereas, among the products of the smaller industries a long list of items is included.

It is significant that the labor unions representing the huge industries of America, who are now exporters and to a large extent dependent upon the export trade, favor the further reduction of our tariff, whereas, the unions representing the employees of the small corporations are opposing this reduction which would result in the extinction of those smaller industries.

As I say, I appear before you not in opposition to H. R. 1, so much as to express to you the concern I feel about the textile and other small industries of America. As I have already told you, the tariffs on cotton textiles have already been drastically reduced so that the average tariff rate is now, I believe, approximately 22 percent. Any further reduction in the tariff rates, I am convinced, would mean the extinction of the textile industry. Wages in Japan and in other Asian countries that would flood our country with textiles are notoriously low. In Japan the average wage is 13.6 cents an hour, just about one-tenth the wage scale in our American industries. At this point it is worth noting that at the very time we are proposing to enter into a trade agreement with Japan to lower the tariff on practically the entire range of cotton products as well as synthetic yarns, the proposal is made to increase the minimum wage from 75 cents to 90 cents or $1. This I favor and am told by leaders in the textile industry that even marginal producers can pay the 90 cents minimum wage and manage to survive provided the tariffs are not further lowered. But to raise the minimum wage and at the same time to lower the tariff schedules with the resulting flooding of the American market with goods made by low-paid foreign labor would destroy the textile industry.

It is a well-known economic fact that the textile industry has for the last few years been in a highly depressed state and is only now beginning to recover. To further reduce tariffs at this time would be a shock to the industry which I believe it could not survive.

Statistics have been brought to you to try to make it appear that imports of textiles from Japan and other favored nations are insignificant. I warn you that these figures which in the aggregate may be accurate are nonetheless deceptive. It illustrates the old saying that figures do not lie but you had best watch the figurer. I know those who have quoted them on the floor believe them to be true and to support their contentions. It is those who have supplied them who are responsible for their misleading nature.

In the first place, the imports that have been coming from Japan are in the staple goods including the countable cloth goods which compete with only a segment of the entire textile industry. Moreover, the figures quoted to try to show that imports are insignificant are for the year 1953, whereas, during the year 1954, especially the last quarter, these imports increased in geometrical proportion and indications are that the same increase will take place during the present quarter of 1955. The result is that instead of being 1 or 2 percent of the competable American production of textiles, they really amount to from 10 to 20 percent of such competable American-made goods.

I warn you that if this bill is adopted without amendments that will strengthen the peril point and escape-clause provisions, the State Department is all set to expend the American textile industry when it meets in Geneva during the spring of this year with the other members of GATT to negotiate a new treaty of trade with Japan. My recollection is that we have never won anything at the

conference table at Geneva. Our memories must be very short if we do not have in mind what occurred there only last year when our representatives at a conference there took a back seat and washed their hands of the whole matter of Indochina while "Sonny Boy" Anthony Eden and Mendes-France surrendered Indochina to the Communists. Now Mr. Dulles and the bright-eyed boys of the State Department go back to Geneva to enter into an agreement with Japan with proposals to permit that country to increase its exports of cotton goods and other textiles to the United States in return for some imaginary benefits that we may get from keeping Japan from trading with the Communists. Of course, Japan is going to trade with the Communists in spite of all we can do. It is just a natural trade area and market for the cheaply made goods of Japan.

And lo and behold, we are told the President must have the power which would be given him in this bill to further lower tariffs at the rate of 5 percent a year for the period of 3 years. This, in addition to the power he already has and which he proposes to exercise or which Mr. Dulles and his boys propose to exercise for him at Geneva this spring.

But it is said the President has exhausted his authority to give away our American markets. He seems to be in the position of a man playing strip poker who has lost everything but his undershirt and must have a pair of shorts and possibly a pair of socks that he may gamble some more with the welfare of the small manufacturing enterprises of our country. If Mr. Eisenhower, himself, were doing the trading, possibly he might save our undershirts and shorts and socks but can we expect that much of the kibitzers from the State Department who are playing the game for him?

To come down to cases, let me say plainly that the trouble with our present law which is to be greatly expanded by H. R. 1, is that the peril point and escape clauses as now embodied in the law are wholly inadequate to protect American industries threatened with extinction by too drastic tariff reductions.

Of course, I do not believe that the Congress should again undertake the tremendous task of writing tariff laws. Yet, I do find it difficult to explain to the textile workers of my district why I cannot be of much help to them in their fight for their jobs. Very wisely, I think, we have set up a Tarriff Commission supposed to be composed of men skilled in the problems that must come before the Commission and learned in the matters with which they must deal.

Yet, we are no longer willing to trust the Tariff Commission to perform the duties imposed upon it by our tariff laws and by the Reciprocal Trade Agreements Act and have permitted the President and his advisers in the State Department not only to disregard the recommendations of the Tariff Commission but actually to deny the truth of the findings of the Tariff Commission on the peril point and escape clause cases. It is inconceivable, but the fact remains that the boys in the State Department have set up a committee called the Joint Committee on Reciprocity Information whose purpose and authority is to furnish facts to the President to contradict those found by the Tariff Commission to exist so as to enable the State Department to ignore the recommendations of the Tariff Commission.

Naively I supported the Trade Agreements Act in the past because I believed the peril-point and escape-clause provisions were adequate and thought that their administration would be such as to protect industries threatened with extinction but the record does not bear out my belief in the adequacy of these provisions or rather that their administration would be effective.

Consequently, I cannot vote for the extensive powers granted the President in H. R. 1 unless these peril-point and escape-clause provisions are made really effective to protect threatened industries. A motion to recommit will be made, I believe, with instructions which will contain a provision that will make the recommendation of the Tariff Commission controlling in the administration of the peril-point and escape-clause provisions. Apparently this is the only chance we will have to get this bill in shape so that some of us who favor the reciprocal-trade program in principle can vote for it. Surely even the most visionary and idealistic among you would not want to pursue the ideal of free trade if you realized that such a course meant the destruction of many of the small industries of America that are so vital to our continued prosperity. These industries just cannot compete with the low-paid labor of Japan and other Asiatic countries. Here is your chance to make certain that the provisions in the present law intended to protect such industries are made really effective. How can you afford to vote against the motion to recommit, the real purpose of which is to make sure that these industries are protected from a flood of cheaply made goods that will flow into this country to compete with our highly paid American workers?

I ask your serious and thoughtful consideration of this entire problem which is truly a dire threat to the textile industry, the plywood industry, and the barites industry of my district as well as many similar small industries located throughout America and probably in your very own district.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Tennessee [Mr. Bass].

Mr. BASS of Tennessee. Mr. Chairman, I have listened with a great deal of interest to the debate on this subject by Members on both sides of the aisle. It was not my intention to come to the floor to make a political speech; but after listening to the remarks of my colleague the gentleman from New Jersey [Mr. KEAN], a Member on the other side of the aisle, I am prompted to express an opinion that was conceived after the 83d Congress and the recent campaign, then again after observing the action taken on this floor yesterday and listening to the tirade of some of the opponents of this bill. I must say that I am firmly convinced that the Republican Party is making a "political sucker" of the President of the United States. Yes; they took a heroic war record, a winning personality, and a pleasing smile and parlayed it into a position in the White House. Yet in the Congress of the United States, when the President comes here and recommends his first domestic issue, the very men who were out campaigning less than 6 months ago and having the big billboards spread about that "Ike Needs Joe Bloak" come on the floor of the House, take his first recommendation, and try to not only wreck it but the welfare of our country as a whole.

Mr. Chairman, it gives me a great deal of personal pleasure to come on the floor of the House and indorse this bill which extends the Reciprocal Trade Act. Being a Tennessean, I am proud of the reciprocal trade program. It was conceived by a fellow Tennessean, a great statesman, Mr. Cordell Hull, a man who served this Nation of ours longer as Secretary of State than any other individual. Then, again, on the floor of the House today this bill is being sponsored by another great Tennessean, my distinguished colleague, the chairman of the great Ways and Means Committee [Mr. COOPER]. Therefore, as a Tennessean, it gives me a personal pride to have the opportunity of speaking on behalf of this great piece of legislation.

Mr. Chairman, I have heard on several occasions today that this bill destroys the interests of the working people; that it destroys the free-enterprise system of industry. Well, nothing would displease me more than to have to come on this floor and do anything to injure the welfare of the working people of America. Yes; I have industry in my district. Through misapprehension and being misinformed about the intent of H. R. 1, they oppose it strenuously. But I do not believe that it will hurt any industry in America today. It merely gives us the opportunity to trade with other nations. We cannot ask for the privilege of sitting down and negotiating an act or peaceful treaty with any nation in this world of ours if we do not extend to them the opportunity of trade. That is nothing more than an extension into the other parts of the world the good-neighbor policy that my distinguished fellow Tennessean, Cordell Hull, extended to the Western Hemisphere when he was Secretary of State.

I have heard here today the American workingman being made the whipping boy on this floor by opponents of this bill. I have been surprised to see some of my colleagues on the other side of the aisle come down and raise their voices in behalf of the workingman of America when we all know that some of these very people, when legislation is introduced on the floor of the House in the interest and for the advancement of the cause of the working people of America, are the ones that work against and shout the loudest against legislation which is for the interest of the working people.

I have also heard much talk about the escape clause today. Well, I, as a freshman Member of this great body, wish that it would be possible for us to have an escape clause in every piece of legis-

lation that has some political significance. Yes; nothing would please me more, but there is no escape clause today. This bill is in the interest of the free economy of our Nation. Therefore, we must stand up and be counted and on this day show the world that the wisdom of this House will be upheld and that we will extend to the other nations of the world the privilege of trading with America.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Chairman, I, as most of you know, have spent most of my time that I have been in this House since 1945 trying to point out to you members of this committee that there still remains in the United States a coal industry. Now, the only time that the House has seen fit in the last 10 years to say a kind word to me about the coal industry of America is when war breaks out, and as soon as the shooting starts, then every man in this House wants to open the door for me to be sure that I am well fed, to be sure that I am in good health, and that I will come up here and do all I can to tell them about the coal industry of America, because, as you know—and I have been here through two shooting wars with you—within 24 hours after the first shot is fired you are going to be on a coal fuel potential. Now, you know that. I am not down here trying to be impertinent or presumptous or to lecture my colleagues on this committee. Every word that I say you know well. You have been through it with me. And yet, you are laboring under the impression that if, God forbid, war breaks out, as it well might, before I sit down, everything will be perfect with the coal industry—now, I have only got 5 minutes and it could happen this afternoon; the President of the United States has on his desk an Executive order, prepared at the direction of the Congress, made a number of years ago, all ready for some clerk to hand to him to sign, which will restrict and in most cases eliminate the gas and oil fuel potential in this Nation. And that could happen 10 minutes from now.

I should like to say this. Nobody in this committee is more reluctant than I to say what I am going to say, but when I first came here, I served on the Committee on Foreign Affairs; I went from the Committee on Foreign Affairs to the Appropriations Committee and served on their subcommittee for the Department of State. All of my experience here has been in the field of foreign relations, foreign affairs. I have never cast a vote against any legislation which in any way dealt with the matter of establishing more favorable foreign relations—not one vote. My vote today will be my first of that kind. I cannot take any more. This House has treated the coal industry like a stepchild.

There has not been an agricultural bill, a bill before this House since 1945, when I became a Member of the House, to subsidize or support the agricultural economy of this Nation, that I have not voted for. I voted for everyone without exception, and yet when I come here and ask this committee to do something, not on a question of tariff, but on a question of an import quota on Venezuelan fuel oil, this committee turns its deaf ear. I should like to see a little reciprocal trade in this committee and in this House. All of the reciprocal trade that I have seen has been one way as far as the coal industry of this Nation is concerned.

Many of my colleagues, especially my Pennsylvania friends—and I see several of them here—have always supported the reciprocal trade bill starting in the old days. I stand here reluctantly to say that we feel we have been discriminated against badly. We feel we have been treated improperly. We feel we have been ignored. And within 200 miles of where I stand today, on the threshold of this Capitol, under their feet back home and at your doorstep is the greatest fuel potential remaining in America—coal.

So, Mr. Chairman, I find myself unhappy in this failure to hear from you, and I must record myself now, as I shall when the roll is called for the motion to recommit and, I am sorry to say, I shall vote against this bill.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Chairman, it is interesting and pleasing to note that some of the mist has been cleared from the eyes of many of the Members of this House and especially some of those from along the eastern seaboard. I only hope that it will continue to clear away, and when we get to the foreign giveaway bill, and especially the offshore procurement features of the foreign giveaway bill, all the mist will have by then evaporated and they will support some of the rest of us in cutting that proposition down to size.

Mr. Chairman, first of all, I want to compliment the four members of the House Ways and Means Committee who signed the minority report accompanying H. R. 1. They are to be highly commended for the clarity of their dissenting views and I support the position they have taken.

I am sure everyone in this House would say that he or she is opposed to importing a depression into this country but that is the hand-engraved invitation that will be extended if this legislation is approved.

Imports right now are at the highest level in history, and have already caused great injury in several areas of our domestic economy. Countries in all parts of the world are becoming industrialized for the first time. Business is booming in almost every country in Western Europe. Many have passed prewar levels.

These nations will demand greater and greater trade concessions from the United States, and from past performance, will be able to convince our State Department that we must accept more and more of their products. By reason of this, the potential of further harm to additional segments of our economy is enormous.

I, for one, am fed up with the propaganda emanating from the free traders in the State Department that it is the duty of the United States, allegedly the richest nation, to give more and get less in return than any other country; to give and give until our standard of living is reduced to the level of the rest of the world.

This Nation did not grow strong and did not become the greatest constitutional republic in the world on this premise. We built our standard of living on reasonable tariff protection.

I am equally fed up with the State Department propaganda which portrays the United States as the culprit primarily responsible for world restrictions on trade. This is ridiculous. United States tariffs actually are lower now than during any other period in our history, and we have made sharper reductions in our tariffs than have most other industrial nations. They average only 5.1 percent of the value of imports. We have had a 68-percent reduction of the 1937 average.

Compare that with Great Britain, which has bitterly attacked United States tariffs, low as they are, British tariffs average 25.6 percent of imports, which is 20 percent above the 1937 average. In other words, the British scream for us to reduce tariffs, and yet increase their own.

And the British admit there will be no reductions. R. A. Butler, British Chancellor of the Exchequer, has been quoted as saying:

> We expect some improvement in their (the United States) trade practices before there is any question of lowering our barriers any further or indulging in any further nondiscrimination.

The only way we could make the British happy would be to remove all tariffs. That is their idea of a reciprocal trade program.

Actually, there is nothing reciprocal about our trade program. Instead, it has been a program of give, give, and give some more to appease our so-called free world friends, and we have received little or nothing in return.

In addition, these nations have used many devices to restrict our exports—by the use of import quotas, currency restrictions, state trading, monopolies, barter deals, and cartels. And the record shows that the use of these devices by other countries has increased during the so-called reciprocal trade period.

As an example, Great Britain has agreed to admit, on a trial basis only, the grand total of 650 automobiles from the United States. However, duties and taxes bring the price of an American-made Chevrolet on the British market to about $6,000. What a great concession our British friends have made in our direction to the cause of expanded world trade.

The truth of the matter is, no nation has been prevented from selling to the United States because of our tariffs. American tariffs have been reduced in some instances as much as 75 percent. Today, the United States is among the lower seven countries in average tariff rates. In what position does this place us when attempting to gain concessions from other countries? We don't have much bargaining power left.

If other nations feel they cannot compete for sales in the American market, when our tariffs have already been drastically cut, and after we have handed

them billions of dollars, then something else is wrong.

In attempting to sell the American people on the merits of free trade, the advocates of such a scheme have come up with any number of sweet-scented slogans.

Back in 1937, it was "world peace through world trade." Then along came World War II. In 1943, they told us our trade program was an "acid test of our future intentions respecting the peace." In 1951, they told the American people that we must "reduce worldwide barriers to international trade." By then plenty of American blood was being spilled in Korea and the peace slogan was out of the window. In 1954, they employed the slogan, "Trade, not aid." This year, they tell us the program is necessary for the "containment of communism."

That is a good one, "Containment of communism." The free traders in the State Department tell us it is the duty of the United States to allow more and more products from slave-labor nations to enter this country, even at the expense of American industry, labor, and agriculture, because it is an effective way to win friends and influence people.

We all believe in containing communism, but how is this to be reconciled with the fact that we are allowing millions of pounds of pork to be imported into this country from Communist Poland, and at a time when our own farmers are receiving less and less for their hogs.

I call attention to the fact that the average price for barrows and gilts at Chicago on February 4 of this year was the lowest since April 1950. The average price for all swine at Chicago on February 4 was $9.11 per hundredweight below that paid a year ago.

And when we look at the import figures for pork products, we see that in 1952, the United States imported $6,888,000 in hams, shoulders, and bacon from Poland. In 1953, the total had shot up to $10,546,000. During the first 9 months of 1954 only, imports of these products from this Kremlin-controlled nation amounted to $11,366,000 or more than the total figure for the entire year of 1953. But in that same first 9 months of last year, we permitted to come into this country from Communist Poland a total of $14½ million worth of various products, $11,366,000 being pork products. In the same 9 months, we shipped to Poland $1,286,000 of our products. In other words, we shipped these Communists $10 million of our money. And that is called reciprocity.

We shipped these Communists American dollars in return—almost nothing in the form of American products.

Is this the State Department's idea of containing communism through expanded world trade? I wish someone would step forward and explain to me how you contain communism by pouring millions of American dollars into the coffers of a Communist nation—dollars to be used to purchase war materials from some of our so-called free-world friends.

The majority report accompanying H. R. 1 says on page 7:

> The main economic impediment to an expanded foreign market for our own production is the shortage of dollars on the part of friendly foreign nations.

What evidence does the committee have on which it based this statement? To the contrary, the Department of Commerce reports foreign countries received so much material help from various types of American business and foreign aid, in the period 1950–53, that these countries had a surplus, over and above what they purchased from us of $7,800,000,000 which has been added to gold and dollar assets of the foreign countries.

And according to a report in the New York Times, the Secretariat of the General Agreement on Tariffs and Trade has under lock and key a study showing that foreign countries, far from being short of dollars, are actually pouring their own investment funds into what they believe is the politically secure United States capital market. In a recent Geneva dispatch, the Times says that the report contains so much dynamite that it is highly unlikely the study will be published as an official paper.

There is no question that the State Department is aware of the contents of this secret report. Why has not the information been released to the general public? It could have an important bearing on our discussions here today.

Of course the reason is obvious why the State Department would not want such a report made public. It would no doubt serve to explode the myth that a huge dollar gap exists, and would reveal how ineffectual United States tariff cutting is as an approach to world trade problems.

I am one Member of this House who is convinced that Congress must repossess its constitutional responsibility to regulate the foreign trade of this country.

We have had 20 years of the trade-agreements program as shaped by the State Department hierarchy which is guided by considerations of international politics rather than by a concern for our domestic economy. In that 20-year period we have suffered almost every ailment the program was ballyhooed to prevent.

Cordell Hull, to whom belongs the dubious honor of being the father of the program, asserted it was an emergency measure to deal with a dangerous and threatening emergency condition. That was back in 1934. The time is long overdue for this emergency measure to be given a quiet burial. And let the free-traders mourn its passing.

Mr. Chairman, in closing I want to call attention to one of the planks in the platform adopted by the Republican Party at its 1952 convention. I'm not consulted on the size and shape of these planks but a few of my Republican colleagues are and I want to remind them of the pledge they planked down to the public. I quote:

> Our reciprocal trade agreements will be entered into and maintained on the basis of true reciprocity, and to safeguard our domestic enterprise and the payrolls of our workers against unfair import competition.

The bill before us today contains no assurance that trade agreements will be entered into and maintained on a basis of true reciprocity. In fact, the word "reciprocal" is mentioned only once in the entire bill. Neither does it contain any provision to safeguard our domestic enterprise and the payrolls of our workers against unfair import competition.

The only decent and effective answer to this most vital problem is legislation providing for tariffs, that represent cost of production differentials on all imported products which are in adequate or surplus supply in this country.

Mr. Chairman, the bill before us today is a dangerous piece of legislation. It is not in the best interests of American industry, labor, or agriculture, and I have no choice but to vote against it.

Mr. BOGGS. Mr. Chairman, I yield 5 minutes to the gentleman from South Carolina [Mr. DORN].

Mr. DORN of South Carolina. Quite a few references were made yesterday to John C. Calhoun. I hope the gentleman from Mississippi [Mr. SMITH] is on the floor, because he said something about John C. Calhoun turning over in his grave, finding all this opposition to these reciprocal trade agreements. It is my honor to represent in this House John C. Calhoun's old congressional district, and I would like to commend to the gentleman from Mississippi [Mr. SMITH] a book by Clarence M. Wiltse, in which he characterizes John C. Calhoun as a great nationalist. In fact, the title of the book is "John C. Calhoun, the Nationalist, 1782–1828." During this period of American history John C. Calhoun was Secretary of War and a Member of this House, and during that time he advocated a high protective tariff. Why? To protect the infant industries of this country, so in case of war America would not be dependent upon some foreign ally for its utensils of war.

I rise here today not as a member of the legal profession, although I have a very high regard for that profession. I am not a lawyer-farmer. I stand before you today as an active farmer, living at Route 1, Greenwood, S. C. My father, my grandfather, and my great grandfather grew cotton in that section of South Carolina. Who buys most of the cotton produced on the cotton farms of South Carolina, Georgia, Mississippi, and the other States of this Union? I tell you today, the men who buy most of that cotton are the textile manufacturers of the United States of America. They buy 70 percent of the cotton grown in California, Texas, and throughout the length and breadth of this country. I say to the gentleman from Mississippi, which he probably does not know, that it is the Cannons of North Carolina, the Haynes of North Carolina, the Springs, Abneys, and Selfs of South Carolina, the Fall River men in Massachusetts who buy this cotton on the Delta in Mississippi, and not the textile people of Japan, India, or some other foreign manufacturer of cotton. I defy him or anyone else to repudiate the facts in this case. Let me say again, 70 percent, or more, of the cotton grown in the United States is purchased by our own textile manufacturers.

In the interest of the American cotton farmer, who is it that we should protect first? The manufacturer in Japan, in Germany, Italy, or England, or should we protect the men who really buy the cotton grown on the farms in

this country? Of course, our first obligation should be to protect that man who buys our cotton. Last year Japan imported 2,400,000 bales of cotton, 800,000 bales of which were imported from the United States. Less than one-third of the raw cotton imported by Japan was imported from America.

So under any reduction of the tariff on textiles, finished cotton goods coming back into the United States from Japan will not be made from cotton grown by the cotton farmers of the United States but by the cotton farmers of Mexico, Egypt, Brazil, or somewhere else in the world. Therefore the American cotton farmer is being misled when he is told that our importation of Japanese textile goods is greatly benefiting him.

I want to call to the attention of these gentlemen who have argued so eloquently yesterday and today for the reciprocal trade agreements that in 1933, the year just prior to the adoption of the Reciprocal Trade Act the cotton farmers of America exported—listen to this—exported 8,300,000 bales. Remember, gentlemen, that is the year immediately prior to the adoption of the reciprocal trade agreements.

Since reciprocal trade went into effect in 1934, did our cotton exports increase? No my friends we exported less cotton and have had to resort to acreage controls. After 19 years of reciprocal trade what was the true picture?

In 1952 how much cotton did we export from the United States? 2,800,000 bales. Mind you this was the year America was giving foreign countries the money to buy our cotton. There is the story for the farmers of America, not just cotton farmers only—that is the real true story for us all to see. I rise here today as a farmer pleading for the farmers of this country who have been misled by this high-sounding phrase, "reciprocal trade," just as they were fooled by the phrase, "a war to end all wars," and by the phrase, "a war for democracy." This is just another one of those one-world star-gazing phrases. The real effect of the reciprocal trade agreements policy, as has been demonstrated, has been to hurt many of the farmers of the Nation, and is threatening the textile worker, the coal miner, the fishermen, the glass worker, and many others with unemployment and distress.

The great textile industry of America is operating today on a very narrow margin of profit. After taxes on each sale dollar there was a profit in the third quarter of 1954 of only 1 percent. In the average American industry the profit was 4.4. Any reduction whatever in the tariff on Japanese textile goods will result in curtailment and unemployment among textile workers in this country. The textile worker has worked and struggled hard for his standard of living. He must not be thrown in direct competition with skilled labor in Japan being paid 13 cents per hour. Our textile industry should not be placed at the mercy of textile labor in India receiving 9 cents per hour for its labor. The textile worker, the farmer and all related business will be seriously threatened if the State Department succeeds in camouflaging its plans in the form of this bill.

Mr. Chairman, I want to address myself for a moment now to the argument we have heard time and again that American industry has the know-how, the technology, and the skill to outproduce Japan. Let me tell you something: The average textile worker in Japan can tend to more looms in a textile plant and do it just as efficiently as our textile workers in the United States. Japan is a nation that with a little more strategic materials might have conquered the world. Remember, that the greatest battleship ever built was one built by the Japanese during World War II. The Zero was a pretty good airplane too, I might say to the gentleman from New York.

We talk about Japan. They have the greatest pool of skilled labor outside of the United States itself. With her industry destroyed during World War II, she had to rebuild. Her textile plants today are the most modern in the world, and they can and are producing as efficiently as any textile mills in the United States; in fact, the effect of this kind of legislation will be to give the Japanese textile industry a shot in the arm. Within 3 years they will come back to this country and say, "We need a still further reduction of the tariff. If we do not get it we will go communistic."

I came here today to tell you the truth, and not mislead you with phony optimism about our ability to cope with a growing streamlined Japanese textile empire. I saw 16,000 Japanese skilled workers at the Tachitawa Airbase, and the American general in command told me they were among the most skilled workers in the world. All you had to do was to show them a blueprint of a machine they had never seen before and they could fix the machine to perfection.

We talk about outproducing a nation like that with 13 cents an hour labor. Why, Mr. Chairman, these one-world proponents are willing to destroy the industry of this country in the false hope of buying foreign friends.

One other thing that may astonish you. A man came to my office week before last. He was forced by circumstances aggravated by reciprocal trade to close a plant in this country built with RFC money, a brandnew plant built indirectly with your money to make cotton bagging. He closed it 6 months ago. Two hundred and twenty-five employees are idle. He built a plant in India, which he told me is already in operation. There he probably gets labor for 9 cents an hour. He is importing the cotton bagging right back to America and is selling it through the same distribution points as he did the bagging formerly made in America. That, Mr. Chairman, is the story.

He said, "I did not want to do this. I would rather run my plant in the United States and give employment to Americans, but I will have to go where I can make a reasonable profit."

This and similar conditions are resulting from the fantastic dreams of the one-worlders, and the do-gooders. They want one world currency, and no tariff; they want world trade regulated by the United Nations. The earnest desire of these textbook idealists is to whittle away the constitutional power of the American Congress. If and when our sacred Constitution is destroyed and the unemployed and bankrupt American people finally stand before the despotic commissars of the United Nations we might well look back upon this day as the beginning of the end. Let us stand up today and recommit this bill back to the Ways and Means Committee. Let us retain our power under the Constitution to regulate foreign trade and levy a tariff to protect our people. This House should resolve today to surrender no more of its power to the President, the Supreme Court, or any agency of the evermore centralized Federal Government.

Mr. COOPER. Mr. Chairman, I yield 15 minutes to the gentleman from Louisiana [Mr. BOGGS].

Mr. BOGGS. Mr. Chairman, the gentleman from South Carolina and some of the others who have spoken in opposition to the President's program have used the terms "do-gooders," "one-worlders," and they have left the implication and the impression that this is a program unanimously opposed by American business and American agriculture, one destined to wreck our shops and our farms, and having the support of no one except people who are interested in the development of other areas of the world.

Let us take a look at the record. In the first place, this program was recommended by the President of the United States. Testifying in support of the program were practically all of the members of his Cabinet, the Secretary of State, the Secretary of Agriculture, the Secretary of Labor, the Secretary of Commerce, and the Secretary of Defense. Those are just a few.

Who speaks for business, agriculture, and labor in the United States? Who generally does? Well, normally, the United States Chamber of Commerce, the American Farm Bureau Federation, the National Grange, the National Farmers Union, the American Federation of Labor, the Railroad Brotherhoods, and the CIO. What position do they take?

Let us take a look at the American Farm Bureau Federation. The gentleman from South Carolina would have you believe that all the farmers are opposed to this program.

Mr. DORN of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from South Carolina.

Mr. DORN of South Carolina. I am a member of the Farm Bureau, I am a member of the Grange, I am a member of practically every farm organization the gentleman has mentioned. I know of my own personal knowledge that this issue has not been voted on at the grassroots level down in South Carolina. These national leaders do not always represent the little fellow back home.

Mr. BOGGS. Is the gentleman saying he speaks for the American Farm Bureau Federation and the National Grange and the National Farmers Union, or does he represent them?

The president of the American Farm Bureau Federation said:

> Our wheat, cotton, tobacco, soybeans, feed grains, rice, and animal byproducts and certain fruits and other products are among the most efficiently produced in the world.

Our exports of farm products have run as high as $4 billion in 1951–52. They accounted for roughly one-third of our production of wheat, cotton, rice, and soybeans. This provided a market for the produce of more than 1 out of each 10 acres of cropland. This amount was equal to $1,000 for each commercial farm.

Does that sound like do-goodism?

Now, the National Grange. Maybe it is a do-good organization. I do not know. You know, it is a funny thing about this word "do-good." I hear people using that phrase "do-good" all the time. Well, I do not see why that is such a bad thing to call a man. Suppose you call him a do-badder. I just wonder what a do-gooder is. Some say when you want to say something real bad about somebody you call him a do-good.

Mr. DORN of South Carolina. All I am trying to do is to do good by the farmers and the textile workers of the district that I represent.

Mr. BOGGS. I am certain the gentleman is, and he does a splendid job.

Now, the National Grange. What do they say?

There is no single segment of American economy that has greater stake in achieving the objective of a sound United States economic position and policy, which would provide the basis for a constantly expanded level of trade in the world on a profitable basis, than has American agriculture.

The National Farmers Union in effect says the same thing.

Now, let us take a look at the American worker. I do not claim to speak for any of these groups, but I am citing people who do claim to speak for them. Well, certainly they would not occupy the position they occupy if they did not speak for them.

What does the CIO say about it?

The United States cannot pick and choose and deal only in the items that we need to import and export. Instead, the United States must engage in gradual, continual, and, in many instances, reciprocal reduction of the barriers to international trade. Reciprocal trade is essential for the maintenance of production in many of our own basic industries and equally essential for the preservation of sound international relations with our allies.

I do not know whether that is a do-gooder talking.

Take the American Federation of Labor. Maybe it is a one-worlder. I do not know, but here is what they say:

We are mindful of the fact that a significant number of American workers are employed in industries facing foreign competition. We are definitely concerned lest the trade-agreements program operate to deprive these workers of employment opportunities at their present trade or occupation.

At the same time, we are equally mindful that many American workers are dependent for their employment on American exports or on the handling, transportation, or storage of imports. In 1952, the Bureau of Labor Statistics estimated that the employment of 4,376,000 American workers depended on foreign trade.

Let us take business for a moment.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. BOGGS. I yield to the gentleman from Pennsylvania.

Mr. GAVIN. Well, the gentleman should bring out the fact that we pumped about $100 billion into Europe in the last 10 or 15 years, and the question is now, if we discontinue these foreign-aid programs or these giveaway programs, whether or not they are going to continue to buy American merchandise.

That is a question, too, that will not be determined until the foreign-aid programs cease. But it has been American money pumped into the economic and industrial life of Europe that has been responsible for these heavy export programs that have been going on.

Mr. BOGGS. I would say to the gentleman that within the last several years the number of dollars coming from various mutual programs used in foreign trade with this country has been steadily reduced so that as of today it is about 15 percent as compared with as much as 70 percent at one time.

One of the main objectives of this program is to make it possible for the other nations of the world to trade without any additional foreign-aid appropriation. That is one reason I stand here in support of this program now.

Mr. GROSS. Mr. Chairman, will the gentleman yield at that point?

Mr. BOGGS. I yield to the gentleman from Iowa.

Mr. GROSS. I wonder how much the CIO packinghouse workers got out of the $11½ million worth of canned ham and bacon that was shipped into this country in the first 9 months of the last year.

Mr. BOGGS. I do not know the answer to that question. But if the statements made by the gentleman are correct, I say that it demonstrates the position of an organization taking the national point of view rather than looking at one specific situation and using that in order to completely wreck a program vital to the national security. As a matter of fact, in all of these matters you must expect some sacrifice in behalf of the national interest. Nobody will deny that there must be some sacrifice somewhere down the line in all of these matters.

Now, what did business say about this? Let us take the United States Chamber of Commerce. I do not believe that is a one-world or a do-gooder bunch. Here is what they said:

Through increased trade, the Nation's economy benefits. That is true just as much in world trade as in domestic trade. More goods at lower prices has been the very heart of the American competitive-enterprise system. The trade-agreements program can contribute to the health of that system.

I think it is pretty generally established that this program has sound, substantial support from sound, substantial people all over the United States.

The issue before us today is whether or not we are going to adopt a motion to recommit which will be offered by my distinguished friend from New York and which is printed in the CONGRESSIONAL RECORD out today. Let us analyze that motion to recommit, for a moment, before we each make up our minds and decide whether or not we are going to vote for it.

Let us first analyze it from the point of view of coal. It has been the contention of the spokesmen for coal that the only relief or benefit to it will be by an imposition of import quotas. This motion to recommit does not permit the imposition of import quotas. It has no bearing upon that situation whatsoever. From the point of view of the representations which have been made in respect to coal this motion will be of no benefit whatsoever to those gentlemen.

Looking at it from the other point of view—that is, what it does do, what its implications are—they are very far-reaching indeed, and do not let anybody tell you otherwise. This motion, if adopted, will change the entire concept of the power of the President of the United States with respect to negotiating these agreements. I am not a bit sure that it will not cut across existing agreements. It will establish the Tariff Commission in a role in which it has never been established before. It will make the decisions of the Tariff Commission absolute and final except in a case involving national defense. National policy, national interest, economic policy, effect upon other segments of the economy, upon other sections of the country, all of those are eliminated.

What we are saying is this, that we will no longer trust the President of the United States to administer this program. Someone said, and I believe it is in the report, that a few weeks ago we passed a resolution in which we trusted the President of the United States to determine when and if and under what conditions he would send the young men of this Nation to war involving Formosa, but today we are saying that in a matter involving a tariff concession or in the negotiation of a tariff treaty we will not trust the President of the United States.

As I said on yesterday, I find myself in the role of defending the President's program, and I do so because I think the President is eminently correct. I have done it under Democratic Presidents and I am very happy to do it with a Republican President.

If you adopt this motion to recommit, and somebody writes to you and says, "Are you for reciprocal trade?" please be honest enough to write back and tell him, no, that you felt that it had gone too far, it had lasted too long, and that on February 18, 1955, you voted to end the program, because that is what you are going to do if you adopt this motion to recommit.

Mr. REED of New York. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. MASON].

Mr. MASON. Mr. Chairman, I made my speech on this floor 3 or 4 weeks ago on this matter, and I did not expect to speak today, but I feel impelled to clear up some of the things and some of the misrepresentations that have been made on this floor today.

Charlie Shuman, president of the Farm Bureau, comes from my State. I know him well. He did say that there were $4 billion worth of exports of farm products in 1952, but his attention was called to the fact that $5 billion of farm

imports were made in 1952, giving the foreign farmer a billion-dollar advantage over the American farmer.

Charlie Shuman also said in 4 or 5 different statements in his appearance before us that he wanted the escape clause strengthened. He said, "This has been too much of a one-way street." That has not been brought out. In the motion to recommit that is what we expect to do, strengthen the escape clause, say that when a majority of the Tariff Board says, after due examination, that injury has been done, the President must do something to correct and alleviate that injury unless the national defense is impaired; and Charlie Shuman would be for that. There is nothing wrong with that, and that does permit the 100 or 120 Members of this House whose industries have been affected to go back home and say, "Well, we did change the rules. We have made it sure now that if you can make your case before the Tariff Commission you can expect to have your injuries corrected." Then, there is another thing about this matter of trusting the President. Let me ask you this. Would any of you farmers in this audience, would any of you people who run an industrial plant hire the best doctor in Washington to go out and run your farm or to run your industry? Why, of course not. You would hire him to take care of your medical needs or surgical needs, but not for something else. When we hire the greatest military expert in the world, of course we trust him in military affairs. Of course, we trust him on the matter of Formosa. Of course, we believe he knows what he is doing there. We have faith in him in that field. But on this matter of dealing with foreign nations and trade restrictions, that is a different question. He does not do that. We give him the power to do it, but he delegates it to the State Department. When we do not trust the State Department, we cannot give the President the power to do this. For that reason, I say I trust the President of the United States in military matters but not in these other matters, in which he never has had 1 minute of actual experience in handling, and, as a result, he must depend upon outside advice.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER. Mr. Chairman, I yield 5 minutes to the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. Mr. Chairman, for the first time in the 6 years that I have had the honor and privilege of serving in this body, I find myself in agreement with the gentleman who preceded me when he said that he had no intention of speaking because I, too, had no intention of speaking on this bill. After that agreement, that is where our agreement ends.

I am moved to take this time to answer a few of the charges or allegations made during debate that those of us who are for the continuation of the reciprocal trade agreements are less patriotic and less considerate of their districts than those who are opposed because of certain interests in their districts are fearful that there may be foreign competition.

The legislation before us, providing for a 3-year extension and modification of our reciprocal trade agreements program, is one of the most vital measures that will be considered by this Congress. This legislation is of utmost importance to our own Nation and, in a larger sense, to the entire Western community. In my sincere judgment, the passage of this bill would serve our interests. It is my hope, therefore, that the bill will receive prompt and overwhelming support from the membership of this body.

The entire issue of our foreign economic policy has often been obscured and beclouded by arguments steeped in emotional prejudices, and in fear of injury. Many of our businessmen, under fire from foreign competition and urged by proponents of liberal trade to leave their tariff-protected shelters, have feared hardships and found it difficult to believe that, in the long run, they too, would benefit from freer world trade. Some of them have held steadfastly unto the doctrine of protectionism not out of any stubbornness, but simply because they were genuinely afraid that the reduction of import barriers would bring hardship to their firms, and to the people employed by them.

The fact is that tariff reductions are bound to adversely affect certain numbers of American firms and their employees. This is the entire point, the basis of the argument that international exchange of goods and services benefits all participants. Tariff reductions are worth striving for simply because we assume that there are some products that other countries can make better and cheaper than we can. By reducing our tariff barriers, we make it possible for those goods to enter our country and thereby we help to stretch the purchasing power of our consumers' dollars.

On the other hand, there are many products which we can make better and cheaper than the industries of other countries. If this were not the case, we could not have exported over $16 billion worth of goods and services in 1953, and a similar amount last year. These exports produce income for our workers, and income for our industries and for our agriculture.

If we, therefore, look at the overall picture, we must come to the conclusion that foreign trade is beneficial both to our Nation and to our friends abroad. If this were not true, there would be no foreign trade: each country would merely try to become self-sufficient and trade as little as possible with its neighbors.

The question that remains to be answered, then, is how many American firms and workers would be hurt by tariff reductions, and how much. Secondly, we must evaluate those potential hardships in terms of the overall benefit of freer trade to our economy and to our national security. Thirdly, we must try to find some ways of assisting those American firms and workers who may be subjected to hardship because of tariff reductions.

Let us briefly examine these three questions, and see if there are any answers to them.

In the first instance, let us turn to the issue of how many United States firms and workers would be hurt by a reduction in our tariff barriers, and how much.

In his excellent and informative study of the probable impact of free trade on our domestic industries, entitled "Aid, Trade, and the Tariff," Dr. Howard Piquet, of the Library of Congress, estimated that the suspension of all United States import duties would have increased imports in 1951 by a maximum of $1.8 billion—which amount was equivalent to less than 1 percent of our gross national product.

Using some of Dr. Piquet's figures, the Randall Commission, appointed by President Eisenhower to study our foreign trade policy, came to the conclusion that a 50-percent cut in our present tariffs might displace the total of 100,000 United States workers.

More than twice that number of our workers are laid off every month in the United States, even in periods of rising employment, and most of them find other work without any prolonged delays.

While the above-cited estimates do not purport to be more than informed guesses, and while this particular subject requires further attention and study, it would appear that a moderate reduction in our tariff rates—such as that envisioned in the bill before us—could not be expected to produce the drastic results forecast by some ardent protectionists.

Now let us turn to examine the potential effect of the extension of the reciprocal agreements program, and of moderate reduction of our import tariff rates, on the overall economy and security of our Nation.

Fortunately, much has been written on this subject, and the issues involved have received thorough study over a number of years. The Draper report, the Harriman report, the Paley report, the Bell report, the Randall report—these are but a few recent documents which state clearly that the liberalization of our foreign trade would be in the best interests of our national economy, and of our security.

In addition, there is a wealth of information and evidence in support of this conclusion that has been gathered by the League of Women Voters of the United States, the National Farmers Union, the National Federation of Business and Professional Women's Clubs, the National Foreign Trade Council, the National Grange, the United States Junior Chamber of Commerce, the United States Council of the International Chamber of Commerce, and many other civic, professional, business, and labor organizations.

All these reports and studies lead to this conclusion: the growth and expansion of our economy, and the well-being of our people, can be greatly furthered by our continued efforts to promote the liberalization of trade within the Western World. They also point out that the economic strength and unity of the free world may well depend on the way in which we shall face this issue: if we choose to maintain trade barriers between the free countries, and if we exclude the products of our allies from our markets, we shall be driving them to trade with the Communist bloc. We

shall be thereby undermining the very foundations of western unity which we have been trying to build up with so much effort and sacrifice.

Mr. Chairman, this brings us to the third point of this discussion: since the overall interests of our Nation demand that we continue to work for the liberalization of foreign trade, what can be done to assist those particular firms and workers who may be seriously affected by tariff reductions?

There are several firms in my district, and in the entire metropolitan area of Milwaukee, which are confronted with serious foreign competition. There are other firms throughout the country which find themselves in a similar predicament.

Some suggestions have already been made that the Government extend interim assistance to firms and workers adversely affected by foreign competition, in order to aid them in the rechanneling of their productive facilities and energies into different fields of production. I earnestly hope that these proposals receive thorough consideration from this body, and that the most feasible and practical of them receives favorable action. I shall continue to work for early action on such legislation.

Before closing, I should like to bring up one more point:

Last year, acting on my request and with the full cooperation of my office, the Library of Congress conducted an important survey of the impact of foreign trade on the city of Milwaukee. The study was conducted under the general supervision of Dr. Howard Piquet, and the final report was written by Mr. Harold Lamar, both members of the Legislative Reference Division of the Library of Congress.

In the belief that this report would prove of great interest to Members of this body and to people throughout the Nation, I had inserted it in the CONGRESSIONAL RECORD of January 14, 1955. For that reason, I shall not at this point go into the details of that document, since it is readily accessible to all of us.

I believe, however, that it is proper to point out that the Foreign Trade and Milwaukee study revealed that the majority of our manufacturing industries in Milwaukee, and of the workers employed by them, are greatly interested in foreign trade, and largely benefit from it. This is a very revealing point. The study further showed that only approximately 3½ percent of the manufacturing workers of industries answering the Library of Congress questionnaire were being adversely affected by foreign competition.

Similar local studies have been and are being made in other parts of our country. They should be of great help to us by showing how foreign trade affects our communities, and by indicating the industries and the specific firms which suffer from foreign competition.

Mr. Chairman, in the few minutes allotted to me, I have endeavored to show why the legislation before us warrants speedy and favorable action. It is my hope that the extension of the reciprocal trade agreements program will be approved without delay.

Mr. COOPER. Mr. Chairman, I desire to announce that we have only one further speaker on this side, so the gentleman from New York may finish up on his side.

Mr. REED of New York. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey [Mr. FRELINGHUYSEN].

Mr. FRELINGHUYSEN. Mr. Chairman, at this point in debate, probably none of us is helping anyone make up his mind how to vote. Perhaps some of us are saying things which we do not really mean or which should not be said. At the same time, I intend to vote in favor of this bill because I believe it will strengthen the economy of the United States. I believe also that it will strengthen the economies of our allies, which will be of direct benefit to us. Passage of this bill, furthermore, will help the American consumer. Such foreign competition as this bill envisages should foster greater efficiency within our own industries. Competition, we can all agree, is a vital part of a healthy free enterprise system. I have faith that America's engineering and merchandising genius will enable us to compete effectively without the subsidy of high tariffs.

Each Member of Congress, I am sure, has received material from his district regarding certain industries which feel they would be injured by any further reduction in tariffs. In some cases they claim injury under present rates. If my office is typical, Congressmen may have received more material from industries opposed to this bill than they have from those favoring it. As so frequently happens, it is the opponents of a measure who make the most noise.

For this reason the easy course for many Members may be to oppose the bill before us. Such action, at least, would satisfy the vociferous and articulate opponents of trade liberalization. The Member could claim to be fighting to protect his district's interests and no one would question his sincerity.

Unfortunately, the more difficult course for each of us is to rise above the purely parochial interests of our constituency. On a major piece of legislation such as that before us—a bill which has tremendously wide potential ramifications both nationally and internationally—I believe our votes should be determined by a broader consideration than our own immediate constituencies. The test should be the test which President Eisenhower so frequently refers to, "Is it in the enlightened self-interest of the United States? Will this strengthen America?"

In his special message to Congress last month, the President said:

> The Nation's enlightened self-interest and sense of responsibility as a leader among the free nations require a foreign economic program that will stimulate economic growth in the free world through enlarging opportunities for the fuller operation of the forces of free enterprise and competitive markets. Our own self-interest requires such a program because (1) economic strength among our allies is essential to our security; (2) economic growth in underdeveloped areas is necessary to lessen international instability growing out of the vulnerability of such areas to Communist penetration and subversion; and (3) an increasing volume of world production and trade will help assure our own economic growth and a rising standard of living among our own people.

The bill before us will strengthen the United States both at home and abroad. The United States must take the leadership in encouraging high levels of trade. I hope that my colleagues will cast their votes on the basis of the national interest rather than any special or local interests.

I wish, in closing, Mr. Chairman, to make a special point: Regardless of the outcome of the vote on this particular bill, we should recognize that the reciprocal trade program is only one part of the complex field of foreign economic policy. Despite the importance of this program we must bear in mind that the real problems in the field of world trade lie far deeper than the tariff question.

The problems stem largely from the basic disruptions and dislocations in trade patterns which first came about following World War II and which have continued up to the present time. A number of specific factors could be listed:

First. The center of world trade has shifted from Britain to the United States. This has created definite economic adjustment problems for Great Britain and other Western European nations.

Second. The drive of former colonial people for economic independence has considerably altered traditional trade patterns between Western industrial nations and so-called third countries of the underdeveloped areas.

Third. Scientific and technological change have tempted more nations to pursue a policy of economic independence and self-sufficiency. The result has been an undercutting of the traditional advantages of international specialization, and an increase in international trade competition.

A revolution in world trade patterns has resulted from these and many other factors. Solutions to the dislocations which have taken place cannot be found in tariff adjustments alone. In many cases the economic problems of our allies have nothing to do with the United States tariff. For one thing, our European friends must further increase their production and improve their merchandising techniques.

Along with our efforts in the field of reciprocal trade, the Government of the United States will continue, I hope, to work closely with its allies in an effort to attack the more basic causes which have led to the problems facing us in the field of international trade.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. FRELINGHUYSEN. I yield to the gentleman from New York.

Mr. WAINWRIGHT. I would like to associate myself with the gentleman's remarks. And, Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD immediately following the gentleman's remarks.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. WAINWRIGHT. Mr. Chairman, I rise to make my position crystal clear on the action which took place yesterday. Due to the fact that I was confined to my

bed with the flu, I was unable to vote on rollcall No. 8. Had I been able to vote I would have supported the closed rule and voted "yea." On rollcall No. 9, I would have voted against an open rule, against the Brown amendment, I would have voted "nay." And on rollcall No. 10, the previous question, I would have voted for the original rule, I would have voted "yea." It is thus apparent that I intend to support the President of the United States today and vote against recommittal, and in favor of the bill. Enough has been said on both sides, but I would like to add that the motivating, driving force in my vote is this: "Trade, not aid."

For example, it is a ridiculous thing to build up West Germany as a nation, to revitalize her industrial capacity, to put her on her feet as a free-enterprise nation, and then to set trade barriers in the path of German enterprises. Similar situations exist in free, friendly countries all over the world. I believe that H. R. 1 will further revitalize these nations by the "trade, not aid" principle.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. OSTERTAG].

Mr. OSTERTAG. Mr. Chairman, I wish to speak with special reference to that part of the trade-agreements program dealing with protection of commodities and skills vital to our security and national defense. In my judgment, this is the program's weakest link. It should be substantially strengthened, if we are to give this program our full approval. To do otherwise is to deliberately strike at the jobs of skilled American craftsmen, and to jeopardize the safety of our country, if and when the time comes that their skills are vitally needed. I cannot believe that our international relations or the international economic climate requires any such sacrifice from an important segment of American industry, and, indeed, from the American people themselves, upon whom the burden of this unwise step would eventually fall.

Let me make it clear, Mr. Chairman, that, in voicing this plea for strengthened protection of defense-supporting industries, I am not opposing the objectives of the President's program. I believe the American people generally are in accord with its objectives. I believe most of the industrialists of my district share the view that a prudent extension of the reciprocal trade program would be good for the world economy and good for world understanding and amity.

But the bill does not, in my judgment, make adequate provision to protect certain classes of skilled workers, whose skills are vital to our own safety, and in that respect I believe it should be revised.

Let me illustrate, Mr. Chairman, by citing what is already happening to the optical workers in my district.

The optical industry is, of course, essential to our defense. We rely on it for optical and photographic equipment, bombsights, gunsights, tanksights, periscopes, telescopes, binoculars, cameras of all types, and many other instruments, without which our entire Defense Establishment would be blindfolded.

But despite so-called safeguards already existing in the trade agreements act, which are supposed to protect such industries, the optical industry is today operating with its back to the wall. The American market has already been opened up to a flood of foreign optical goods, and substantial numbers of American workers have already been laid off as a result. Thus, for example, in 1947 imported laboratory microscopes accounted for slightly more than 1 percent of total sales in the United States. In 1953 they accounted for more than 43 percent of the total sales. In 1948, imported binoculars valued at $25 or more represented 46.2 percent of domestic sales. In 1953 they represented 86.7 percent of our sales.

What does this mean, in concrete terms, to American industry? It means that certain vitally important industries must either go out of business or go into other lines of business in which they can remain solvent. They find themselves between the upper and nether millstone, with their own Government grinding them into oblivion.

Let me illustrate my point more specifically from the experience of a fine optical and instrument company in my district, one of whose specialties has been camera shutters.

Here is the case history of that company, under our present trade agreements program, as described to me by one of its officers:

> During the past year our shutter business has dropped 75 percent, forcing us to lay off 76 of our 110 skilled shutter makers, and another 390 of our 1,000 regular factory employees from our various other departments, which layoffs have been entirely due to the present low tariffs. In some departments we have reached the point where we are employing only 1 person. These layoffs are continuing at the present time.
>
> Between 1949 and 1953 our shutter production averaged well over 100,000 units per year. In 1954, due to the imports of photographic shutters, this production dropped to 34,000 per year, and is still continuing to decrease. The amount of labor necessary to manufacture a shutter represents 85 percent of the unit cost per shutter, and at our average rate of $2.25 per hour, it is quite impossible to compete with $.35 to $.50 per hour labor which exists for skilled shuttermakers in Germany and approximately $.15 to $.20 per hour labor which exists for skilled shuttermakers in Japan.
>
> In 1939 and 1940 when Germany was cut off as a source of supply for photographic shutters, we were very urgently requested by the United States Army Signal Corps to develop a shutter for their military requirements, which we did in a very short period of time. However, if it were not for the fact that we had been able to maintain reasonable shutter production and as a result of this production of our own engineering and experimental departments, we could not have developed this urgently required military shutter.
>
> Our shuttermakers are highly skilled people with many years of experience. It takes 2 to 3 years to train one, and only a small percentage of people to whom we give training succeeded in becoming shuttermakers. Shutters are not items that can be mass-produced. Each is built individually. Our Repax shutter has 186 parts, many of them so small they must be handled with pincers.
>
> * * * * *
>
> To sum it up, the impact of imports on our company is disastrous. Naturally, we are considering steps to keep this company in business, but we do not see any way of keeping skilled help on the payroll.
>
> * * * * *
>
> Our industry is an imported industry. It was built up by imported skilled craftsmen who came from Germany. They brought the skill and taught it to others. When World War I came along, it was only a small industry, but suddenly German imports stopped, and efforts had to be made to substitute American-made products for German imports. There was lots of time, however—3 years, 1914 to 1917—before we got into the scrap, and even then we weren't ready. It took another year to equip an army. The optical industry was one of those that was not ready, but it grew fast during and after World War I, when photography became of such tremendous importance in peace and war. We were ready in World War II and in Korea. Optical and photographic equipment, bombsights, gunsights, tanksights, periscopes, telescopes, binoculars, cameras of all types, all needing lenses and instruments that only the optical industry with its skilled help could supply, all these and many others too numerous to mention, flowed in a never-ending stream to the Armed Forces. Again, however, we had time to do training, to enlarge our facilities, to plan, to produce, but even then we could not do it without exempting from military service those who had the skill to do the work.
>
> What is the situation today? The industry is losing a large part of skilled help, and those that remain are the older workers. They have never done anything else, and many of them are expert craftsmen, but they are not getting any younger. Within a few years, these skills will be gone. They tell us that in the next war we will not have time to prepare. How, then, can we produce precision equipment without trained help? How good is a camera without a lens or shutter, how good a pair of binoculars without prisms, how good an atomic submarine without a periscope, how good a bombsight without an optical system? Are we going to fight the next war blindfolded? That is exactly what we are going to do, unless something is done to keep optical plants going.

Mr. Chairman, I have received similar information from virtually every optical instruments manufacturer in my district, and we all know it is a situation which prevails throughout the country. I will take the time of the House to cite one more illustration, however. There is in my district one large manufacturer of optical goods who specializes in binoculars. In 1946, the company manufactured 41.5 percent of the quality binoculars sold on the American market. Only 1 percent were of Japanese origin. In 1949, this company's share of the domestic market had dropped to 9.3 percent, and by 1952 its share was only 2.8 percent. This, of course, amounts to ruinous competition, and ruinous economic war, waged against American manufacturers and American workmen by their own Government. In my judgment, there are no considerations of international relations sufficiently important to justify an international trade program maintained at so critical a cost to our own manufacturers and workers.

I should like to add one additional ironic fact to this statement: in more than one case in my district, the manufacturing plants which are being so critically hurt by our present foreign trade program are, in more than one sense, the victims of their own Government. When World War II and the

Korean war broke out, the Defense Department went rushing to these manufacturers, pleading for urgently needed optical goods of many kinds. The manufacturers embarked on the necessary expansion programs, tooling up their plants, enlisting and training the craftsmen necessary to do the job, and turning out the goods which were vital to our security.

Mr. Chairman, there is a heartening note in connection with this problem and I refer to plans to amend the Defense Production Act to provide the necessary authority for the protection of commodities and skills vital to our national defense. In a conversation earlier today with Dr. Arthur S. Flemming, Director, Office of Defense Mobilization, I was assured that the administration will recommend an appropriate amendment to the Defense Production Act in connection with the proposed extension of this law. Although the details of the proposal have not been determined, it is expected that an interagency task force within the ODM will soon submit a report and recommendations on the subject for the consideration of the Director who in turn will report to the President. This approach appears to be a practical solution to this knotty problem and I am glad to have the assurance of the Director that this matter will be brought to a head within the near future. Such an amendment to the Defense Production Act should give the President appropriate authority to protect the industries and skills essential to our national security and defense.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. FENTON].

Mr. FENTON. Mr. Chairman, after yesterday's demonstration as to the temper of the House regarding H. R. 1, it would seem to me that it is very clear that any extension of time made should not exceed 1 year.

For years the frightful conditions existing in the anthracite and bituminous coal industry of the United States has been pretty generally known. To we who live with the problem it is disheartening to say the least.

It therefore becomes necessary for me to oppose H. R. 1 because of the insistence of our administrations, present and past, to permit the importation of millions of barrels of dump, residual oil into our eastern seaboard.

This importation of residual oil—136 million barrels last year—is the equivalent of 35 million tons of coal—means that the loss of production and sales fall on the mines which normally serve the eastern seaboard.

Unemployment in the anthracite area of Pennsylvania has been persistent over a number of years. We have tried to cope with this situation locally and through the State.

We realize that there are a number of factors which go to make up our trials and tribulations and which I will not discuss at this time.

However, one of the greatest factors, such as the importation of cheap residual oil, displaces so much of our coal production that it becomes necessary to protest the passage of H. R. 1 in its present form.

I was one of a great many Members of this body who brought attention of this problem to the committee with the introduction of H. R. 428 which would have limited such importation to some degree.

Since we have no other recourse to cut down on this dumping of residual oil into our country, I shall vote against H. R. 1.

Mr. REED of New York. Mr. Chairman, I yield such time as she may desire to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Chairman, I cannot possibly vote for the bill as now written. I hope to be able to vote for recommittal.

Believing very earnestly as I do that H. R. 1, the Trade Agreements Extension Act of 1955, represents extremely far-reaching and important legislation for our country, I appealed to the Members of the House yesterday to think very accurately about all of the facts involved before committing themselves to a decision on this bill this afternoon.

After a careful examination and exhaustive study of the facts involved and the far-reaching powers granted in this legislation, I have reached a conclusion to oppose and vote against H. R. 1.

In reaching this conclusion, I want to make my position perfectly clear. I am not opposed to international trade, and I am not opposed to international trade by negotiation or agreement. A great nation such as ours must, of course, do business with the rest of the world, and the American people certainly receive many benefits from the fact that the rest of the world is anxious to do business with us. The principles and objectives, as well as the operation of international trade are not involved in the consideration of this legislation at this time. That which is involved in this legislation and which has a significant influence upon our trade relations with other countries, as well as a serious effect upon our domestic economic life, is the important factor of method.

In the course of the debate here this afternoon, the very able and distinguished members of the Ways and Means Committee have presented arguments for and arguments against this legislation in the course of their excellent analysis of so much that is involved. As a result, it is not my purpose to duplicate arguments already made or that will be made. Instead of presenting, on the contrary, an exhaustive analysis of this legislation, it is my purpose to address my attention to one very important element involved in this bill. In doing this, I hope to emphasize a consideration involved here which surely must command the attention and thought of every Member of this House.

On many occasions down through the years during times of great crises, I have come here to the tribune in this great House of Representatives in Congress to express my views for whatever they may be worth. I believe firmly that although this legislation is not of a crisis nature, it is equal in importance to the people of America, to those great decisions made here in the past which have hewed the path of our destiny.

Among other things, this legislation extends the power and authority of the Executive over the entire economic life of America. It is my view that this power should not be delegated away from the Congress of the United States. The representatives of the people in the Congress assembled should always have this responsibility if our constitutional system of government is to continue to have its full meaning. It is my view that the Constitution of the United States should be the law of the land at all times and not only when it is convenient.

One of the principal features of H. R. 1, involving this question of power, is that in addition to the extension of the trade-agreements authority, the Chief Executive is authorized to negotiate tariff reductions, and I emphasize, I say tariff reductions, by any 1 of 3 alternative methods.

Under this legislation, the President is authorized first to reduce tariff rates that exist on July 1 of 1955 by a total of 15 percent, a reduction of 5 percent per year for each of the 3 years covered in this extension of authority.

The other two methods of tariff-rate reduction authorized in this legislation are alternative in nature and provide the power to reduce rates by 50 percent of the rate prevailing on January 1, 1945, in the case of those products normally not imported, or imported in negligible amounts. The third alternative involved in the power granted here in this legislation gives the President the authority to negotiate reductions in tariff rates which are higher than 50 percent of the value of a particular product imported to a rate equivalent to 50 percent.

Now it is my contention this grant of power to the executive department of the Government transfers from the Congress or the legislative branch of the Government the control over the economic life of America. This I consider to be bad legislation and bad law, for under our system of government the Congress does not have the authority to delegate this power which is obviously a legislative function. Article 1, section 8, of the Constitution specifically places the power to regulate commerce with foreign nations in the Congress and only the Congress.

My opposition to the granting of this authority in this legislation is not based upon any desire on my part to build and maintain a high tariff wall around the United States for the purpose of preventing trade with foreign nations. I believe I am more realistic and sensible to the necessity for the flow of goods between nations than to even suggest such a policy. I believe in a flow of trade between nations for their mutual advantage. My opposition, on the contrary, is based on the principle that in view of the fact the United States of America is already among the very lowest tariff nations of the world, and already has some of the lowest tariff rates on particular products of any nation in the world, that any new tariff policy, and this is the important point, that any new tariff policy of the United States should at least place for-

eign producers, having lower manufacturing costs in a national economy of a much lower standard than America, in a comparable competitive position with our own domestic producers for the United States market. In other words, I am completely opposed to any trade policy or to a granting of the power to formulate any trade policy which, upon establishment, would discriminate in favor of foreign producers against American manufacturers, and American labor. I am opposed to any trade policy which could result in a drastic lowering of the fine and great standard of living enjoyed in America.

In this respect, I agree completely with President Eisenhower, with his statement in his first state of the Union message, which is:

> This objective must not ignore legitimate safeguarding of domestic industries, agriculture, and labor standards.

Also, I agree with the statement issued by the Commission on Foreign Economic Policy, which declares:

> American labor should not be subjected to unfair competition as a part of any program to expand our foreign trade.

In this legislation, however, I fail to find any evidence of safeguards which would guarantee the observance of these expressed views.

It is argued by the proponents of this legislation that this granting of power to the executive department of the Government to negotiate this drastic lowering of tariff rates over the next 3 years is absolutely necessary, in order to construct and build up the economic position of our allies and friendly nations.

It is argued this is absolutely necessary for the preservation of peace and for the protection of the free world.

If these arguments are valid, surely in the building of the economic strength of our foreign friends, it is not necessary for America to sacrifice complete industries and particular labor skills long the backbone of our economic and industrial life. If we must make such a sacrifice, obviously we are defeating the very objective we are trying to achieve. Surely, you will agree with me that a sound, prosperous economy in the United States, based upon our American standard of living, constitutes the most important single factor in the building of a sound economy everywhere in the world.

The tremendous rate of consumption of world products as a result of the high standard of living in America cannot be sacrificed for the building of economies elsewhere, for in doing so, the building of these economies would terminate and they would collapse to the extent the American market was destroyed.

In addition to this very important fact, is the fact that if peace is to be maintained throughout the world it can only be assured if the United States of America remains industrially strong.

It is my contention that this legislation we are considering here at this time discloses no evidence whatsoever for the need to sacrifice particular American industries upon which the American people are dependent in order to produce economic well-being and economic strength for our foreign friends. To be specific, is there any Member in this House who here and now would stand up and vote to abolish the American textile industry in order to increase the economic strength of any of our foreign friends? I do not believe there is a single Member here today in this House that would favor any such action. Yet, I say to you, the possibility of this eventuality is contained in this legislation and in this grant of power.

Let us look at the facts in regard to the economic strength of some of our foreign friends. A study of foreign economic conditions discloses that business conditions are improving, that national income has increased, and that the national economy has materially progressed during 1954 in Italy. If the basic economic factors continue to show progress in 1955, Italy reports that conditions there will be far above average. In England, production, profits, wages, are at higher levels than at any time since the war. The Ministry of Economics for Western Germany reports that 1955 will disclose an increase in the gross national product of approximately 10 percent. In spite of its domestic political difficulties, the Ministry of Economics in France reports that France is headed for a very good year. Japan reports, production increasing at a rapid rate. Similar reports of expansion and gains in the national economy are reported in Sweden, Norway, Denmark, Holland, Portugal, Spain, Canada, and South Africa.

In view of these facts, why is it necessary to grant this overwhelming power today authorizing drastic, detrimental reductions of our tariff rates in order to strengthen the economic well-being of the nations of the free world? These nations today, already have experienced a marked increase in their national economic life. At this very moment, we must recognize factual conditions and keep in mind that imports are already flowing into the United States in some cases of sufficient quantity to actually threaten our domestic economy and to threaten the economic life of certain communities within the country. Encouraged by American gifts and grants of capital, the industrial capacity of our friendly foreign nations has tremendously increased. It has not yet reached its full capacity. When it does, we can expect a larger and larger flow of products to the great American market which will more and more compete with our American industries.

In conclusion, again it is my purpose to emphasize the fact that the economic structure of many foreign countries is so dissimilar to that in the United States that increased flow of goods to the American market would not alter the standard of living in those respective countries and would not change the economic structure or increase the standard of living. All such an additional flow of goods would accomplish would be to make manufacturers in those particular countries more wealthy. It would make rich men richer and have no effect whatsoever upon raising the hourly wage rates for labor or the standard of life and living in those countries. Labor in those countries would continue, regardless of the expansion of trade, to exist in practical slavery with a very low standard of living based on slave wages and long hours of toil.

Now my time is up, so I want to leave this thought with you. Make sure that in the action you take today in regard to this legislation, you are thinking of the welfare of the American people and of the greatness and fineness that is America. Make your decision beneficial and helpful to your country. As is recognized everywhere, America has many times over, done her part to help other nations. We will continue to help other nations to the best of our ability, but it is high time that we begin to think of the welfare of our own country and our own American people. I know in your hearts you agree with me and that you will not here today favor action which might prove detrimental to the strength and well-being that is America.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. SAYLOR].

Mr. SAYLOR. Mr. Chairman, I think that the time has come when every Member of Congress should resolve the question of whether he is to vote in the exclusively selfish interest of his own district or whether he is to vote in the general interest of the United States. I have always contended that the national interest should at all times take precedence when a conflict of conscience is involved.

We are about to vote on a bill that perennially emphasizes the tendency for some of those among us to expect special treatment for their own constituencies while denying the same consideration to other areas of our Nation. Yes, the annual showdown is here again. We are about to go on record with our vote on the bill to extend the Reciprocal Trade Agreements Act.

A large number of our Members have already declared in favor of this bill. We must have world trade, you say, and the only way we can do it is to liberalize further our tariff barriers. But how many of the proponents of this bill are willing to have their own districts subjected to the type of foreign competition that is existent and would be intensified under this bill?

Industry and labor in my district have long suffered as a consequence of the influx into this country of such products as residual oil, plate and window glass, and clay and ceramics products. Speaking for this district and other districts confronted with a similar situation, I have proposed that H. R. 1 be amended so that it will provide a safeguard for the American coal industry and for the glass and clay and ceramics industries.

In the past we have made little headway in this crusade for equitable treatment. Too many Members of Congress are too willing to continue the illicit application of tariff principles responsible in the double standard for the various regions of our country.

I would appreciate some frank explanation by proponents of this measure as to why my district is not entitled to enjoy the same protective measures as those provided for other districts. Can

anyone explain the moral reasoning that impels a Member of Congress to demand a quota limitation and/or tariff on agricultural products while rejecting parallel safeguards for mining industries? I realize that it is easy to speak reverently and impassionately of the necessity for free trade when your own little kingdoms are safely sheltered under an umbrella of quotas and insured with price supports, but I do not understand how anyone who is guilty of this incongruous practice can sleep at night knowing that there is widespread hunger and destitution among American people as a consequence. If anyone in this House is not aware that those conditions exist in this land of ours, then let me assure you that at this very moment there are thousands of coal miners and railroaders who are without work because foreign oil imports have taken their jobs from them. Their families are undernourished and are not properly clothed, and there is little hope for a better life unless this Congress forgets sectionalism and selfishness and join together as an American legislative body.

Last evening I went back through some CONGRESSIONAL RECORDS of the past several years, and I was distressed to find so many statements appealing for price supports, quotas, and tariffs by many of the same Members who yesterday voted against giving citizens outside their own counties and parishes even an opportunity to be heard in respect to the tariff issue. How can this attitude be defended?

Fortunately, there is a chance to make amends for this unfair treatment of our people. I ask only that the do-unto-others precept be given a place in this legislative Chamber when succeeding votes on foreign trade are undertaken.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Indiana [Mr. BEAMER].

Mr. BEAMER. Mr. Chairman, I am vitally concerned with this measure because I think we should look at it from the point of view of the people of our district. This is not a rubber-stamp Congress.

Mr. Chairman, habits often get deep rooted—even in the Congress. Great concern was expressed that certain authority will be taken away from the President in tariff matters if H. R. 1 is recommitted with certain instructions. This is no rubber-stamp Congress and I feel that each Member is obligated to represent his district and the varied interests in the State that has sent him to represent them in the United States Congress.

I voted against concentration of too much authority in the Federal Executive when a Democrat was President, and I see no reason to change my vote when a Republican is President. In fact, the consideration of the reciprocal trade agreement has no political implication.

In the 83d Congress I submitted H. R. 9682 and in this 84th Congress I have submitted the same bill, H. R. 2095, in behalf of the glass industry. In this specific industry, the workers in the factories have appealed to me. The same is true of the tile and ceramics manufacturers and for those who are interested in the bicycle industry. These workers and their employers are entitled to be heard by the United States Tariff Commission in the hope that relief will be afforded them if injury is inflicted by unfair foreign competition.

May I make it clear that neither I nor these people in Indiana ask for high protection. They ask for equalization. Reciprocity is a satisfactory program but reciprocity must work both ways. That is all that our people ask and it certainly seems to be a fair request.

Free trade is a magnificent concept. It is a beautiful thought, and when the millennium comes, when all men and all nations are of good will, then a free trade concept may become a reality. We are living in two worlds. We are engaged in a cold war. To strengthen our economy is the greatest factor in our all-over defense program. This concept will encourage trade with friendly nations. They, too, are protecting their industries and we certainly will be following their and our good-neighbor policy by enacting legislation that will provide equalization in tariffs.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Massachusetts [Mr. BATES].

Mr. BATES. Mr. Chairman, there is no problem, outside of those associated with my legislative committee, that has consumed more of my time or interest than the matter currently before us. I have appeared before many committees of the Congress in this regard, as well as before the Committee on Reciprocity Information and the Tariff Commission.

While I have repeatedly supported the Reciprocal Trade Agreements Act, I am convinced that some of its machinery should be strengthened and clarified.

Like many Members of Congress I have been approached by representatives of industries claiming injury as a consequence of concessions. Certain of these claims are legitimate and others are not. When I have been satisfied that the appeals could be substantiated, I have pressed for relief on these concessions.

The first case I presented to the Tariff Commission was in 1950 on the question of imports of women's fur felt hats and hat bodies. The Commission held that the hat industry was injured and recommended withdrawal of concessions. This position was sustained by the President.

Two years ago, I again appeared before the Tariff Commission concerning the imports of frozen groundfish fillets. While I was completely satisfied that the hat industry, in the previous case, had been injured, it appeared to me that the import of fillets were having an even more disastrous effect upon the fishing industry. In 1941, imports of this type amounted to only 9 percent of domestic production but increased to 81 percent in 1952. In actual figures this represented an increase from 9 million pounds in 1941 to 107 million pounds in 1952. The Tariff Commission recommended relief but this decision was not sustained. It is a frustrating experience to lose such a battle when the facts seem so evident. I predicted at that time that there was nothing to prevent the imports from absorbing all but a negligible amount of the groundfish industry. Here is the situation today. During 1954, imports amounted to 135 million pounds, an increase of 48 percent over 1953 and 26 percent or 28 million more pounds than at the time the Commission made its decision.

The case indicated above is an example of what can happen unless in some way the escape clause can be strengthened. In my judgment, the position of the President would then be made much easier. While I recognize some inadequacies in the motion to commit which is directed toward this end, I do hope that appropriate language can be found to convey these purposes before this measure becomes law.

The feelings expressed here on the floor during the last 2 days should not go unnoticed. It may seem strange that these feelings should develop during a record period of economic prosperity. Envision, if you will, what the situation would be if we were in bad times. While we have cut our tariffs 70 percent since 1934, and inflation has reduced them further, many countries have raised tariffs or prevented goods from being imported into their own countries by devious means and at the same time subsidized exports.

We are currently proceeding through a transitional period in world trade and it is quite impossible to know what the future pattern of relationships may be. We must be careful not to do something today that we must undue tomorrow. In the meantime, we must establish a policy of relationships that blend together not only the economic aspects but all problems relative to this relationship.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. RIEHLMAN].

Mr. RIEHLMAN. Mr. Chairman, during my entire period of service in Congress I have supported reciprocal trade legislation. I believe in the fundamental soundness of the reciproal trade concept. However, I have long felt that the administration of the reciprocal trade programs, particularly with respect to proceedings under the peril-point and escape-clause provisions, has been seriously deficient.

Therefore, I believe some changes in H. R. 1 are necessary to protect adequately American labor and industry.

Mr. Chairman, President Eisenhower has urged enactment of comprehensive legislation that would make possible the further development of our country's foreign economic policy.

The President has pointed out most clearly that—

> The Nation's enlightened self-interest and sense of responsibility as a leader among the free nations require a foreign economic program that will stimulate economic growth in the free world through enlarging opportunities for the fuller operation of the forces of free enterprise and competitive markets.

However, the President also has endeavored to make it equally clear that

the program which he recommends is moderate, gradual, and reciprocal.

I believe that H. R. 1—the Trade Agreements Extension Act of 1955—substantially fulfills the President's request for authority to make possible the further development of a comprehensive and effective reciprocal trade program.

But the real test of the wisdom and effectiveness of this legislation will come only in the years ahead when the gradual lowering of selected tariffs and the selective granting of other trade concessions pose problems for many segments of American industry which must compete with foreign producers.

Already, many industries, some in my own congressional district, such as the chemical industry; makers of china, pottery, cutlery, and candles; the electrical machinery and electrical apparatus industry; the machine-tool industry; makers of precision and optical instruments; and domestic producers of some essential raw materials; and countless other industries can present graphic examples of ruthless foreign competition from producers in countries with labor wage standards far below those of the United States.

All of these industries employ substantial numbers of American workmen at American wage levels, and many of these industries would be undeniably essential to our national defense should foreign sources of supply be cut off during wartime.

This is no mere plea by inefficient domestic industries for protection from fair competition by more efficient foreign producers. In such cases, genuinely more efficient foreign competitors will eventually capture world markets in spite of any efforts at protection by our Government.

No, this is a very justified complaint by many segments of American industry and labor against unfair competition from foreign producers who are able to compete in American markets only because of wage levels which would be regarded as substandard in the United States.

I do not believe that it is possible or practical for the Congress to continually investigate each such instance and legislate specific tariff rates for the many thousands of product classifications. Furthermore, it would be questionable wisdom for the Congress to try to dictate so specifically the detailed administration of our country's foreign economic policy.

However, past experience convinces me that our administrative machinery in the executive branch of the Government has not operated so responsively as to guarantee for the future that the foreign economic policy program will, in fact, be developed and administered moderately, gradually, and selectively.

One of the most notable criticisms of the reciprocal trade program in the past has been the relative ineffectiveness of the peril-point and escape-clause provisions of the act as administered by the executive branch of the Government. Industries complain, with much merit, that such relief provisions can be effective only if rapidly and decisively employed. Unfortunately, such has not been the administrative history.

The peril-point provision requires that the Tariff Commission survey all commodities on which the President proposes to negotiate agreements with other countries, and to specify rates of duty below which tariffs cannot be lowered without injury to United States industry. The President is permitted to reduce tariffs below the peril point, but is required to communicate to the Congress his reasons for doing so.

A further check on the President's power is found in the escape clause which appears at the present time in almost all United States trade agreements. It allows the United States to withdraw a concession given to a foreign government if that concession has led to an increase in the quantities of imports which causes or threatens to cause serious injury to United States industry. Complaints concerning increased imports are directed to the Tariff Commission which, after investigation, reports its findings within 9 months. If three or more members of the six-man Tariff Commission find that serious injury threatens or has occurred, the President must either reject or accept their recommendations. If he rejects the recommendations, he must report his reasons to the Congress within 60 days.

An industry can suffer severe damage from unfair foreign competition resulting from unwise trade concessions allowed to continue in operation during the prolonged initiation and pursual of such escape-clause proceedings.

I would recommend most strongly that the present bill be amended to make mandatory the more rapid and more decisive administration of these provisions.

The time allowed the Tariff Commission for consideration of complaints from parties under the escape-clause provision should be considerably shortened. And the Tariff Commission should be enjoined by the Congress to solicit even more vigorously the views of all interested parties before reaching their decisions, in both the peril-point and escape-clause procedures.

Likewise, the time allotted for Presidential consideration should be considerably shortened since such appeals to the President have already been extensively studied by the Tariff Commission.

Furthermore, I support the principles of the Reed amendment which would provide that the findings of a majority of the Tariff Commission, to the effect that a concession on any product is causing or threatening serious injury to an otherwise efficient and productive American industry, should be final and conclusive. The President would then take action to prevent or remedy such injury unless he determines that the national security dictates otherwise, and, failing to take such action, the President would report to the Congress the reasons for his decision.

Certainly, our long-range foreign economic policy could not be permanently harmed by more rapid, decisive action in such questions, with any reasonable and substantial doubts resolved in favor of domestic producers. Even though, thereby, some inefficient domestic industries might possibly be unnecessarily protected at temporary expense to our economy, appropriate trade concessions could later be extended in such instances with relatively little interim harm to the long-range foreign policy objectives of the Government's reciprocal trade program. On the other hand, belated rescission of harmful trade concessions will never repair the damage unjustifiably caused essential American industries.

Such amendment would not destroy the essential validity of the act's declared objectives—and would do much to minimize the possibilities of injustices to healthy, legitimate, and freely competitive American industries that contribute immeasurably to our national economic and defense potential.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. KNOX].

Mr. KNOX. Mr. Chairman, I am greatly disturbed over the maneuvers originating in the House of Representatives yesterday, being on the question of the closed rule.

I fully realize that questions concerning taxation must have careful consideration as far as the closed rule is concerned. However, this very important piece of legislation dealing directly with the trade agreements is one of so great importance to the entire Nation. Many Members of the House of Representatives represent districts that are directly affected by the provisions of this bill.

It is difficult for one to understand why a body here in a great Republic such as the United States of America, should decline to give the right to the duly elected Members of Congress, the American privilege of being free and the right to speak and offer amendments to any bill dealing with issues of such major importance as H. R. 1.

I represent a district in northern Michigan that formerly was one of the greatest lumber sections of our Nation. Naturally many woodworking plants followed the cutting of the virgin timber. These woodworking plants had provided a medium of work for the people who live there.

In my district of Michigan, in the little town of Munising, there used to be a clothespin plant. It was one of the principal mainstays of the town, employing approximately 60 workers in the production of clothespins. This plant was operated by the Munising Wood Products Co., which is also engaged in the production of a number of other wood products, including salad bowls and other wood turnings. The company made a real contribution to the town—paid a goodly share of the property taxes and paid them every year without the necessity of tax foreclosure proceedings—paid a good living wage to a large number of workers who otherwise would have been unable to find employment in the area—made it possible for retail merchants to keep their heads above water by selling their wares to the workers in the clothespin plant.

All of this was before we hung that sign on the Statue of Liberty saying: "Imports Welcome." This sign and

the competition of low-priced spring clothespins which it encouraged, forced the Munising Wood Products Co., about 3 years ago, to discontinue the production of spring clothespins and to discharge 60 of its employees.

We are faced with the undisputed importance of assisting foreign countries in finding a market for the goods which they produce—in acquiring the dollars which they need to buy merchandise from this country—and in helping them improve their standards of living. These things this country should do. At the same time, we know that several million workers in this country are unemployed—trying desperately to find jobs which will enable them to provide for their families. We know that many of these workers are out of work solely because the companies for which they worked have had to close their doors due to their inability to compete with foreign imports.

We listen to innumerable advocates of free trade and recognize the merit in the theories which they present. At the same time, we listen to representatives of domestic industries, and of labor, who present conclusive evidence that they cannot exist under free trade.

We are told that there are millions unemployed in foreign countries and that we could help them by providing a market for merchandise which could be produced in such countries. At the same time we are reminded of the millions unemployed in this country. We are told that there are some 800,000 young men and women graduating from high schools and colleges every year, who are entitled to employment opportunities; that some 200,000 immigrants arrive on our shores annually in the hope that they can find employment. We are told that we must take care of these unemployed—of these high school and college graduates, of these immigrants—that we are responsible for them and must absorb them into our industries and provide them with jobs so that they may live the kind of lives we consider the right of every American.

We are told that we must help foreign countries so that they may become strong and be in a position to bolster our fight against communism. At the same time we are told that we must keep our own industries in a sound financial condition so that they may pay the taxes necessary to build up our Army, Navy, and Air Force, and keep America strong.

These are only a few of the tasks which are dumped in the laps of the Congress. But we are denied the right to offer amendments to this important bill, H. R. 1.

Our first and primary obligation is to the American people. I believe that as long as we expect and require the American businessman to live up to certain standards, such as the minimum wage, we must protect him against unfair competition from any source whatsoever—particularly from low prices charged for foreign goods produced by poorly paid labor.

It is against the law to go out and take a man's home away from him without compensating him for it—even under the right of eminent domain, and even though there may be an imperative public need for that home. How then, can we justify taking a man's job—or his business—away from him without compensating him for it—even though there may be an urgent need in the public interest to give that job—or that business—to a worker or a businessman in some other country.

It seems to me that we have a moral, if not a legal, obligation to the American businessman who has provided employment, abided by the rules which we have laid down, and has paid his fair share of the cost of keeping this country strong and to the American workman who has paid his fair share of the taxes and who has produced the goods which have made country what it is today.

I am cognizant of my obligations to the American working man, the farmer and the businessman.

Mr. REED of New York. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania [Mr. KEARNS].

Mr. KEARNS. Mr. Chairman, I have just returned from my congressional district where I have some 7,000 men out of work because of this great influx of foreign materials into the markets of the United States. I want to say to the committee and to my distinguished fellow Members of the House that I am not against reciprocal trade, however, I feel most keenly, Mr. Chairman, that it is about time in these United States of America that we go back to the old McKinley form of tariffs, whereby we protect American industry and the American payday in the United States of America and the man that we must protect is the man who has his home and who has reared his children, and has the great privilege of living in free America.

Mr. Chairman, let us recommit this bill, let us do the job that we should do as good Americans here and protect the people of the United States so that they can have a payday and prosperity in this great country of ours.

There is a song in America, Fred Waring and his Pennsylvanians play it. "Where in the World but America." If we are not careful it will be: "Anywhere else but in America."

Mr. REED. Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. GUBSER], may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GUBSER. Mr. Chairman, when the rule on H. R. 1 was submitted to the House yesterday, I voted three times in a manner which indicated my opposition to an open rule.

I voted for a closed rule because I am convinced that an open rule would have resulted in log-rolling and emasculation of the bill and in effect the killing of reciprocal trade. I acted in support of the administration, and in support of an idea that far transcends party-political considerations. I voted for what I believed to be the cause of peace.

My action in voting as I did has been greatly misunderstood. A number of my constituents, many of them growers of specialty crops such as cherries, wines, and walnuts, have been led to believe that my vote would deny the right to insert safeguards against the ruination of their industries into the bill. I knew yesterday that this just is not so, and that the real issue went much deeper than that. What was at stake was whether reciprocal trade should be emasculated by amendments and killed off on the floor of this House.

Some time ago, I had been reliably informed of the likelihood that a motion to recommit would be submitted to strengthen the escape-clause provisions of the bill. The gentleman from New York [Mr. REED], a colleague in whom I have the greatest confidence, caused the text of such an amendment to be printed in the RECORD of yesterday. As recently as the day before yesterday, I told the growers of my district that I would lend every support I could to the strengthening of the escape-clause provisions if the motion was offered. The Reed motion will soon be a reality and I will support it.

Nevertheless, in spite of my previously announced position, a professional lobbyist has seen fit to convey to my constituents the erroneous impression that I voted against their best interest. I had asked this same lobbyist a few days previously whether the position of the industry he represented would be improved if the escape-clause feature were strengthened in the amendment to recommit. He agreed and conceded that this was true.

Mr. Chairman, I do not consider strengthening of the escape clause the slightest deviation from my support of the President in this matter of Reciprocal Trade. The Tariff Commission is a respected body, appointed by our President and evenly divided among members of our two great parties. I am sure that this Commission is acting in the very best interest of our Nation. We have constituted it to give advice. We have decreed that each distressed business should make its case for relief before that body. And yet, we allow other departments of Government to oppose the case of these businesses without appearing before the Commission.

Where the national security is involved, the amendment clearly states that the President may overrule the Commission. The cause of peace will not be endangered by the amendment—in fact, all it will do is cause all parties to the case to present their evidence in the open, except where national security is involved. I can think of nothing fairer than the motion which Mr. REED will present.

We have lacked an effective escape clause to prevent disaster to any domestic business. Distressed businesses are not allowed time to convert to other fields and liquidate their investments. The Reed amendment will cure this defect.

I endorse reciprocal trade because I am convinced that without stimulated international trade, peace is illusory. In supporting the amendment which will be before us, I feel that I uphold the spirit of the President's program for

reciprocal trade, that I detract nothing from the cause of peace, and add a needed help for our own people. I urge the passage of the amendment to be presented by the gentleman from New York.

Mr. REED of New York. Mr. Chairman, I yield 9 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Chairman, since I have been a Member of the House I voted on the matter of extending the Reciprocal Trade Agreements Act in some form or other on six separate occasions. In looking through the record of those occasions I find that on four of them I voted in favor of the legislation. On two occasions I voted against.

When this matter was before us in the 79th Congress, it contained no provision to safeguard the American producer and workman against unwise reductions of duties. There was no provision for escape clauses and no provision providing for a finding by the Tariff Commission as to the limit to which a modification or binding of duties and other import restrictions may be made without causing or threatening serious injury to domestic producers. I voted against this legislation.

In the 80th Congress, with a Republican majority, we were successful in writing into the law a provision requiring escape clauses in trade agreements and also the provision providing for a finding by the Tariff Commission of the points below which it would be perilous to our domestic economy to go in reducing tariffs. With these provisions in the bill, I voted for the extension of the Trade Agreements Act.

Then came the 81st Congress. The control of the Congress had shifted to the Democrats and one of their first acts was to repeal the provisions adopted by the 80th Congress. The escape-clause and the peril-point provisions were completely eliminated. I voted against this bill.

In providing for the extension of the Trade Agreements Act in the 82d Congress, the Congress reinserted the escape-clause and peril-point provisions over the vehement objections of the then Secretary of State, Dean Acheson, and President Truman. With these protective provisions in the bill, I voted for the legislation.

The matter of extending the Trade Agreements Act was before us on two occasions during the 83d Congress. It must be said to the credit of the present administration that they did not then, as they do not now, request the elimination of the escape-clause and peril-point provisions. I voted for both extensions.

Mr. Chairman, this brief history of the recent actions of Congress in connection with the Trade Agreements Act shows that the question at issue has not been so much the matter of authorizing the President to enter into agreements with foreign countries, but rather the extent to which the position of our domestic producers would be recognized and the extent to which they would be protected against unfair competition in international trade.

We all agree, I believe, that our prosperity is tied up with the exchange of goods and services. The greater the velocity and volume of this exchange, the greater is our prosperity. That is true whether applied to domestic trade or to international trade. The more goods you can move back and forth between people, the more prosperous everybody is going to be. We must, therefore, have some machinery, some mechanism, some authority, to make possible the elimination of unnecessary restrictions and burdens on that exchange of goods. The President must have the authority to enter into agreements with other countries which will eliminate unnecessary restrictions. The basic purpose of the Trade Agreements Act is to provide this authority. I support this basic purpose.

Please note that I used the word "unnecessary" in referring to the restrictions and burdens which we should attempt to eliminate. I use the word "unnecessary" because I think we must recognize that circumstances can and do exist which require a nation to place certain restrictions on the goods or services entering into that country. I think we are most unrealistic and make a serious mistake when we criticize either our Government or a foreign government for imposing a restriction on the flow of goods into that country in order to meet some conditions then existing in that country.

The proponents of free trade speak loud and eloquently about the virtues of open unfettered competition. We have heard some of their speeches today. Given their way, we would completely repeal the Tariff Act of 1930, and any of our other laws which regulate the flow of goods into this country.

I, too, believe in competition. I would remind my colleagues, however, that what we in this country have always strived for is fair competition. We have many laws written on our statute books to assure that our domestic commerce will be based on fair competition. With respect to our domestic economy, we recognize that Government has an obligation to assure an environment which encourages fair competition. In 1914 we established the Federal Trade Commission. Look at its basic objectives. Let me quote briefly from the United States Government Manual of 1954–55 concerning the duties and purpose of this Commission:

> Although the duties of the Commission are many and varied under the statutes, the foundation of public policy underlying all these duties is essentially the same: to prevent the free-enterprise system from being stifled or fettered by monopoly or corrupted by unfair or deceptive trade practices. In brief, the Commission is charged with keeping competition both free and fair.

Yes, that is our governmental policy in the field of domestic commerce—to keep competition both free and fair. The question I would ask my friends who advocate free trade is, "Should we have any less concern about assuring fair competition in the area of foreign commerce and foreign trade, particularly when that competition arises from foreign producers who are outside of the scope and application or our other domestic laws?" In my judgment, Mr. Chairman, we should be more alert to assure fair competition when the threat is from foreign producers outside of the jurisdiction of our basic laws.

Let it always be remembered that we, as a Government, impose burdens on our domestic producers which we do not and cannot make applicable to foreign producers. Let me call your attention to just a few of them. I have already mentioned the Federal Trade Commission Act. In addition, there is the Clayton Act, the Sherman Act, the Fair Labor Standards Act, the Federal Food, Drug, and Cosmetic Act, the Labor-Management Relations Act, and, of course, the various States' fair-trade laws. In addition, there are the various Federal and State taxes imposed on domestic producers. There is also the social-security law, the Unemployment Compensation Act, and the various States' workmen's compensation acts. Those are just some of the burdens which we have placed on our domestic producers by law which do not apply to foreign producers of similar commodities.

I am certainly not suggesting that these laws should be repealed. I do say that we must, however, be fair to our domestic producers and recognize that these laws can place them at a distinct disadvantage in competing with foreign producers.

There is no question but what we would all be horrified if anyone were to suggest that the minimum-wage provisions of the Fair Labor Standards Act should apply to only a small section of the country, such as New England, and that the rest of the country would not be subject to this law. There is no one who would not recognize that this would place the New England producers at a decided disadvantage in any effort to compete with producers in other sections of the country. We would hurl all of the derogatory adjectives in the book at such a proposal. Yet, if it would be unfair and unreasonable to discriminate between domestic producers, is it not just as unfair and unreasonable when we require a domestic producer to comply with such laws and at the same time require him to compete in our domestic market with foreign producers whom our laws do not reach. Certainly the answer must be "Yes," unless we provide some other compensating device to protect against the unfairness. Our tariff laws and import regulations must perform that function.

I have emphasized the need to protect our domestic producers from unfair competition because I am very fearful that there have been times when this fact has not been recognized in negotiations and agreements entered into under the authority of the Trade Agreements Act. I share the concern of many in this House that those who administer the act under Presidential directive are sometimes overly anxious and overly enthusiastic about befriending some foreign country and, in their enthusiasm, lose sight of their fundamental obligation to be fair and honest with our own people. That is why I have long been an advocate of the escape-clause and peril-point provisions of the act. That is why I also feel that there is a need for strengthening the present escape-clause provisions.

Mr. Chairman, I am supporting this extension. I voted to report this bill out of the Committee on Ways and Means and I will vote for its passage today. If I could vote to give the authority referred by this bill to a Democrat administration, as I did in 1948 and in 1951, I certainly can vote to give it to the present administration.

Because I believe we must take every precaution to assure protection for our domestic producers against unfair competition from foreign producers, I intend to vote for the motion to recommit, which has as its objective the strengthening of the escape-clause procedure.

Mr. REED of New York. Mr. Chairman, I yield 3 minutes to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Chairman, many of those who have spoken today in favor of this legislation have sought to leave the impression that the issue here is between those who believe in an expanding international trade, and those who would erect a high tariff wall around this country and have us withdraw behind it. That is unfortunate, because it does not correctly state the issue involved and is, therefore, misleading. Those who make that contention are simply erecting strawmen in order to knock them down.

Of course, it is safe to say that every believer in free trade supports H. R. 1, but many support it who do not favor the complete elimination of tariffs. Likewise, I am sure that every protectionist opposes H. R. 1, but there are many of us here who have misgivings about this legislation, but who, nevertheless, are firm supporters of the concept of reciprocal trade.

I find myself in the latter category. I would not favor going back to the old procedure of writing tariff bills on the floor of the House of Representatives. I also believe that we must permit foreign-made goods to be sold here if we expect to export our own surpluses.

The argument to which I have referred ignores three important points:

First. Existing tariff rates are the lowest in our history.

Second. They permit vast quantities of goods to enter our country—currently at a rate of $11 billion worth a year. Approximately two-thirds of all our imports enter this country duty free.

Third. No one is seeking to raise tariff rates.

It would appear from these three points that current tariff rates are not unreasonably restrictive of imports, and within the framework of existing rates ample opportunity exists for the executive department to negotiate trade agreements with other nations. All that should be necessary to extend this authority, and thereby continue the reciprocal trade program, would be to extend the termination date of the existing authority for 1, 2, or 3 years.

However, H. R. 1 is more than an extension of the Reciprocal Trade Agreements Act. It contains authority to further reduce existing tariff rates which are already, as I have stated, at the lowest point in history, and so low that they do not present any serious obstacle to the expansion of trade.

In the case of textiles and other articles on the agenda for consideration at Geneva, the provisions of H. R. 1 would give the executive department authority to reduce tariff rates 65 percent under 1945 levels. So, with respect to the articles which will be the subject of the approaching Geneva Conference, which will include approximately 90 percent of all cotton countable cloth, we face the possibility not of a tariff reduction of 15 percent over a 3-year period, but a substantially higher reduction below existing rates.

As a matter of fact, the starting point for proposed reductions in tariff rates on textiles is unknown at the moment and will not be known until after the Geneva Conference, and that conference is not even scheduled to end until June or July of this year.

Although some of those who will vote against H. R. 1 will do so because they are generally opposed to reciprocal-trade agreements negotiated by the Executive, my own misgivings about the wisdom of the legislation as it now stands stems from the broad extension of additional authority to the Executive over and beyond the authority now provided in existing law, and from the uncertainties I have just mentioned.

The great textile industry of this country is too important a part of our economy to be liquidated. I do not believe the people who are engaged in this field will permit it to be liquidated. The units which will be hardest hit by further drastic tariff reductions are the small, independent textile plants scattered up and down the Atlantic seaboard. Many of them now are in a life-and-death struggle for survival. They are barely able to keep operating now, because they have to compete with giants in the domestic textile industry and also with foreign-manufactured goods which are entering domestic markets today over the lowest tariff rates in history. To increase that competition will either do 1 of 3 things: First, force many of them to liquidate; second, force a reduction in wages to employees; or, third, force them to merge with others similarly situated and form additional giant textile organiztaions.

Already the trend toward concentration is alarming. I would certainly hate to see the textile industry, which has meant so much to the people of my State, follow the pattern set by the automobile industry. I would hate to see the great textile industry dominated by a few giant organizations as the automobile industry is today.

I cannot vote for H. R. 1 in its present form. I have supported every effort to modify it so that at least some of these objectionable features might be eliminated. I would like to vote for an extension of the present act, just as I did a year ago when it was extended, and would do so if it were not for the uncertainties I have mentioned which, in my view, constitute the gravest sort of situation for the great textile industry which means so much to my part of the country.

Mr. CEDERBERG. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CEDERBERG. Mr. Chairman, I feel that we have arrived at the point in attempting to purchase foreign good will with tariff concessions, where we had better turn around and look inside the boundaries of our own country and determine how much more whittling we can do and yet keep our own mills, mines, and shops running as they should operate.

We have heard the argument advanced that we should have "Trade, not aid" and that by lowering tariff rates the products of foreign labor will come into this country and with the dollars received the foreign countries will be able to buy more American products.

That all sounds well and good up to a point.

If the products of foreign labor flow into the channels of American trade and displace the products of American mills, mines, and shops, and wipe out the jobs of the workers producing those American products, then who is going to buy the foreign imports?

For many years now we have had this reciprocal-trade program in operation. We had reductions during the war years to help our friends of the free world, then in the postwar years we had reductions in the interest of economic recovery in friendly foreign nations.

WE HAVE OUT-HORSETRADED OURSELVES

We have just about come to the point where we find we are scraping the bottom of the barrel for concessions to use. In other words we have just about outhorsetraded ourselves.

I say it is about time we take a look right here at home and see what has been happening with respect to foreign competition and then ask ourselves how much more whittling we want to do.

At this very minute, while we are debating this bill, the leaders of the wool growers' group, including a group from my own district, are meeting at the Department of Agriculture concerning their plight.

The wool growers of this country are confronted with increased production costs on the one hand and competition from wool imports from low cost areas of the world on the other.

Consideration was given to raising the duty on wool but that brought screams to the effect such action would be contrary to the aims for an expanding foreign trade and so the tariff was not raised. It is true that the National Wool Act of 1954 was designed to help wool growers by continuing the little remaining protection and by using the import duties to compensate wool growers for the higher tariff needed to protect the industry.

IMPORTS AFFECT WOOL GROWERS

There is no question but that the imports of wool from low-cost areas has been a determining factor in discouraging our own growers to the point where our own production of wool has fallen off more than 40 percent since the beginning of World War II.

Mr. R. N. McLachlan, of Evart, Mich., in my own district is here today repre-

senting the Michigan Co-op Wool Marketing Association at these meetings with officials of the Department of Agriculture. He has pointed out that the benefits of the 1955 program to aid and encourage producers will not reach them until mid-1956 and as the result the incentive value for more production will be lost. They are seeking other forms of relief. That is only one example of our low tariff problem.

CHICORY INDUSTRY THREATENED

I have here a postal card which chicory farmers of my district are receiving from the E. B. Muller & Co., of Bay City, Mich. The company is a chicory processor.

These postal cards read as follows:

FEBRUARY 9, 1955.

To Our Chicory Growers:

Due to the low-priced chicory coming from behind the Iron Curtain and lowering of tariffs by our Government, we will be unable to contract for the growing of chicory in the United States for the current year.

E. B. MULLER & Co.

I am taking this matter up with the Department of Agriculture and the Tariff Commission but here again we run into this stumbling block of a liberal trade policy for our friends abroad.

I might also say that within recent months one of the small manufacturing plants of my district was consumed on this same altar of liberal-trade policy. This factory, one of the lively industries such as keep our small towns humming, made wooden salad bowls and kindred products. That factory advised me it had to close because of the products of cheap foreign labor flooding our American market under our ultraliberal trade program.

Now I ask you when we put our chicory farmers out of business, when we wipe out sheep growing, when we close up dozens of small-town plants in your districts and mine, and otherwise displace American workers with products of cheap labor then who is going to buy the imports we are encouraging by this trade program we are constantly liberalizing?

Mr. Chairman, the people of the 10th Congressional District of Michigan, whom I represent, are genuinely disturbed at this latest attempt to further liberalize our trade policies.

DISTRICT 50, UMW UNION, CITES THREAT

I have here a letter from one of the large labor unions in my district—local 12,075, district 50, United Mine Workers of America:

DISTRICT 50,
UNITED MINE WORKERS OF AMERICA,
LOCAL NO. 12075,
Midland, Mich., January 24, 1955.

Congressman ELFORD CEDERBERG,
10th Congressional District,
House of Representatives,
Washington, D. C.

DEAR CONGRESSMAN CEDERBERG: Local 12075, district 50, United Mine Workers of America comprised of the employees of the Dow Chemical Co., in Midland, Mich., are protesting any reenactment or extension of the reciprocal-trade agreement now being considered.

The importation from Europe and other countries of manufactured chemical products produced by cheap labor and sold in competition with chemical manufacturers in the United States seriously threatens both the job security and living standards of the workers employed in the industry in this country.

We respectfully request that you give serious consideration to this protest and refrain from recommending for legislative enactment any agreement that would tend to stimulate the importation of foreign chemical products which due to low labor costs can be offered for sale at prices completely unfair in light of the existing competitive price structure of American products.

Any act in furtherance of the unfair competition referred to herein must ultimately adversely affect the welfare of the employees of this country's chemical industry.

Sincerely yours,

H. J. BOWERS,
President, Local 12075, District 50,
United Mine Workers of America.

These instances which I have cited are only a few of the back home problems involving reciprocal trade which concern me.

During these discussions I have failed to be shown in a convincing manner that there is any trade involved, let alone reciprocity.

When we look at the record and see some of the high tariffs charged by foreign countries on our Michigan-made automobiles—tariffs running from 15 percent to 65 percent on a car and when we see the high rate of duty charges on machinery, textiles, grains, and other products, I am wondering wherein we find ground to call it reciprocal trade.

I am informed that the average hourly earnings for industrial workers in Switzerland is 57 cents; United Kingdom, 47 cents; France, 46 cents; West Germany, 44 cents; Italy, 35 cents; and Japan, 19 cents.

Furthermore, as the result of American bigheartedness many industries in some of these countries are now utilizing efficient American methods and American know-how to further speed up production of low labor cost imports.

Mr. Chairman, I again say that before we further imperil our economy by further reducing tariff rates that are already among the lowest in the world we should turn from looking beyond the horizons to foreign countries and survey the situation at home.

Mr. McDONOUGH. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. McDONOUGH. Mr. Chairman, in the interest of fairness and protection to industry, labor, and agriculture and without any feeling or desire to oppose the best intentions of President Eisenhower in his foreign trade policy I will support the motion to recommit H. R. 1, because I believe the peril point should be strengthened and made clearer and that we should assure labor that we will not permit the flood of foreign goods to seriously affect their jobs nor will we permit foreign goods to seriously affect the economy or the industrial production in the United States.

I fully realize that we need reciprocal trade with our foreign allies. I know that foreign trade without restrictions could wreck our economy, lower our standard of living and create widespread unemployment. It has already had very serious effect on certain industries in many parts of the Nation. I also realize that without foreign trade we would bring about unemployment seriously affecting a great deal of our industry and create serious unfriendly relations with many of our foreign allies.

I agree with President Eisenhower when he said in his state of the Union message on foreign trade and trade agreements:

This objective must not ignore legitimate safeguarding of domestic industry, agriculture and labor standards.

I have great confidence in President Eisenhower and believe that he would do his utmost to do what he says, but this bill extends reciprocal trade agreements for 3 years and he may not be President for part of that time. I want to be sure that the industry, agriculture, and labor has the full protection of the peril-point clause and for this and other reasons I shall vote to recommit this bill and I urge all other Members to vote likewise.

Mr. REED of New York. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, I rise in support of H. R. 1 and against the motion which will be made to recommit. I believe the bill should be passed. I believe it is in the interest of the national security and the national welfare that it be passed because we in this country need a real reciprocal-trade program.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield to the gentleman from Tennessee.

Mr. COOPER. I should like to ask the distinguished gentleman from Pennsylvania whether he represents a coal area.

Mr. FULTON. I represent one of the large soft coal and industrial districts in this country. There are in it about 20 or 22 mining towns and thousands of miners, as well as part of the city of Pittsburgh and the entire city of Clairton. The people in our great industrial area know that our prosperity depends not only on the products we make in Pittsburgh for consumption within Pittsburgh and that area, but that we depend for a good many of our jobs on what we sell abroad. Our coal miners, in our district, are smart enough to know that we just cannot Balkanize our United States and that we cannot Balkanize our free world into small self-sufficient and antagonistic economic units. We have to give and take. We know that if we can sell some things abroad, we can buy other goods that come into the United States cheaper and save money, which will mean money in our pockets to buy other American goods, instead of having to pay high prices. We know that a broad market is the making and strength of America and each community in America.

I am one of those who yesterday voted for an open rule because I wanted to give these complaining industries a chance, those who felt that they were hurt, to

speak on this floor and have full opportunity to state their case to this House, the President, and the country. I voted against the motion to order the previous question to permit amendments, and then I voted for the Brown amendment which I felt was fair. But when it came to the point of defeating this legislation finally and sending it back to the Committee on Ways and Means by voting against the rule, I changed my vote and voted for the closed rule because I must put principle and policy above method. I am sorry that the gentleman from Ohio in charge of his amendment would not compromise to get an agreement along the lines recommended by Mr. KELLEY of Pennsylvania, Mr. CORBETT, and myself.

May I say further, if the motion to recommit is passed, it will have no further effect than we have now because it leaves whatever action is to be taken to the discretion of the President.

May I ask the gentleman from New York [Mr. REED] if he would look at his proposed motion to recommit, because it says that the President "shall take action," without saying, first, what kind of action the President shall take; second, it does not limit the President from delegating the action to the Department of State, the National Security Council, or any other board or agency in this Government.

The gentleman from Illinois brought up the fact that the President has delegated some of his powers on foreign policy to members of his Cabinet, particularly the Secretary of State and the State Department. What is wrong with that? It has been customary with every President to do the same. Under the motion to recommit the same thing can be done because the motion leaves it in the discretion of the President without limitation to take whatever action the President shall see fit. If anybody can show me the limiting provision on the President's action under the motion to recommit, I would like to hear it. I do not believe it is there and I hear no response.

Let us go a little bit further. I stand here as one of the minority of two of all the Congressmen—Republican and Democrat—in Pennsylvania because 28 out of the 30 Pennsylvania Congressmen voted against the final and decisive 193-to-192 vote on the rule yesterday, and just the gentleman from Philadelphia [Mr. SCOTT] and I stood with the administration for the reciprocal trade bill. Nevertheless, I stand with the leadership of both Houses of Congress—with the Speaker; with the former Speaker, the gentleman from Massachusetts [Mr. MARTIN]; the gentleman from Indiana [Mr. HALLECK]; the Republican whip, the gentleman from Illinois [Mr. ARENDS]; the minority leader, the gentleman from Massachusetts [Mr. MCCORMACK]; and the gentleman from Tennessee [Mr. COOPER], chairman of the Ways and Means Committee. These are the men that have led the policy of this House. I think it would come with ill grace for any of us to say that they are acting against the best overall interests of the United States or the best interests of our national security, or that we are not standing with this administration for the best policy for all the American workers.

When I stand up and say I am with the United States Chamber of Commerce and our local chambers of commerce, and with the farm organizations and all the major union organizations except one in the United States, by their authorized leaders saying that this is the overall policy for the United States, I believe we from our own districts should rise above these sectional interests. We should say that we have to look at the United States policy as a whole, and not raise high walls and restrictions among industries by log-rolling nor yet go back to the old high-tariff-law days that we had in this country at one time.

We want a friendly Nation. We want a country that lives among friendly nations. If you look back in history you will find the nations such as Rome, Greece, Syria, and the other nations that rose up with a much higher standard of living than other nations, were cut down from the outside. We should continue to be one of the nations who have stood as peoples who are friendly and cooperative, and have helped other free nations defend themselves, such as we have done over the past few years. We now should not turn our backs on these allies and friends in the free world, but should ask them to stand with us in prosperity in the free world as a whole, rather than have a tremendously prosperous America and allies who are on the breadline.

So I ask you today please to consider the point of view of the free world, to consider the point of view of the chambers of commerce, the labor unions, the administration, the President and all the Cabinet officers, and the leadership of both Houses on both sides in this Congress.

Mr. REED of New York. Mr. Chairman, will the gentleman yield?

Mr. FULTON. I yield.

Mr. REED of New York. I would like to call the gentleman's attention to something I called to the attention of the House last night:

Under article I, section 8, subdivision 3 of the Constitution of the United States it is stated that the Congress shall have power "to regulate commerce with foreign nations, and among the several States, and with Indian tribes."

Famous jurists of this country have held that that is the second most important provision of the United States Constitution.

In 1780, 7 years before this Constitution of the United States was drafted, Massachusetts put into its Constitution what became the classic statement of the American theory of the division of governmental power:

> In the government of this commonwealth the legislative department shall never exercise the executive and judicial powers, or either of them; the executive shall never exercise the legislative and judicial powers, or either of them; the judicial shall never exercise the legislative and executive powers, or either of them—to the end that it may be a government of laws and not of men.

There is not the slightest question in my mind that the pending bill is unconstitutional. I can prove that very definitely. The Members on the floor know that that is true because we are eventually going to be in this international GATT organization in which the gentleman has taken such a vital interest, and after the 3 years are up, we will have abrogated that second most important provision of the Constitution of the United States.

Mr. FULTON. May I disagree with the gentleman and say that I, as a lawyer, believe the bill is constitutional.

Mr. REED of New York. I expect you to disagree, my dear friend. I would like to say this for the benefit of the people and the rest of the Congress here because I sincerely believe that the most important thing we can do for the welfare of this country is to adhere strictly under our oath of office to the provisions of the Constitution of the United States.

Mr. FULTON. May I ask the gentleman from New York a question. Why then under your motion to recommit is the power given to the Tariff Commission, which, although set up by Congress, is a branch of the executive or administrative part of the Government, when you say we should feel it should be administered only by the legislative branch—the Congress? There you are likewise giving it to a part of the administrative and executive branch of the Government just as we, who want to give it to the President, are doing that likewise. We are doing just what you are doing except that I disagree with the gentleman from Illinois—I trust the President of the United States on this trade policy, too, as well as the narrow ground of security alone.

Mr. MASON. The Tariff Commission is an arm of the Congress and was so set up; and it never should have been relinquished. It will be the Congress that would be acting when the Tariff Commission sets rates.

Mr. FULTON. But you do give it to the Tariff Commission administratively to be the last word in making a decision, and Congress is not overruling it by any reserved power in this bill.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. REED of New York. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I know that in the heat of debate sometimes a little politics is played. It has been intimated here, of course, that I am against the President. I think the best proof of where I stand with the President was made last year on a program which went through with the opposition on the other side fighting him to death. I do not propose to be pushed into any such position. I am a friend of the President. I want to make it perfectly clear that all you have to do is to look at the record which was made last year by the Committee on Ways and Means, and I also want to say that what I am saying is not criticizing the distinguished chairman on the other side.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. REED of New York. Mr. Chairman, I yield 30 minutes to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN. Mr. Chairman, I rise today in support of the extension of the Reciprocal Trade Agreements Act as it comes out of the Committee on Ways and Means. This subject has given me great concern, as, indeed, I know it has given all of you great concern. I come from a great industrial district. I come from a district that is very strongly in support of the tariff, and, I might add, all my life's savings and earnings are invested in this home community. That community has been good to me. I would be the last one to do anything which I thought would be detrimental to them. I rise in support of the legislation because I believe the national interests require that this bill be extended. I believe, too, that instead of impairing any of our industries it will stimulate trade to the end that we can have what we all seek—a busy America and an American economy based on peace rather than war. All industries must of necessity benefit from a prosperous America and a prosperous world.

Our country is now very closely associated with the other countries of the world. We can eat our lunch in New York and our dinner in London. This shows how closely the world has become knitted together. Therefore, we must recognize the value of trade with each other.

This legislation contains the peril point and the so-called escape clause, which properly enforced will give protection to the American industry.

I have had several talks with the President relative to this legislation. I have expressed to him the deep concern that many of us have for the industries in our districts. I specifically spoke to him about the great textile industry, which employs 2,400,000 people, as well as the jewelry and silverware industry. The result of those conversations convinced me that President Eisenhower has no intention of destroying any industries in this country. He knows that if America is to fulfill the destiny I believe is ahead for America, we must have a prosperous country. He knows that stagnant industries, idle workers, and distressed conditions do not help bring about what he plans, and neither would it help the rest of the world which depends upon our country pushing ahead, a prosperous and a united people.

A little while ago the President sent to me a letter, which, with your indulgence, I shall read to you:

THE WHITE HOUSE,
Washington, February 17, 1955.

The Honorable JOE MARTIN,
House of Representatives,
Washington, D. C.

DEAR JOE: I was concerned to learn from you that there are Members of the Congress who are not wholly familiar with my philosophy respecting H. R. 1 and with my concept of the administration of this program. I send you this letter to eliminate any misunderstanding that may exist.

This point I should like especially to emphasize: Few programs will contribute more fundamentally to the long-term security of our country than the foreign-economic program submitted to the Congress on January 10. This program, built around H. R. 1, will powerfully reinforce the military and economic strength of our own country and is of the greatest importance to the well-being of the free world. The program underlies much of our military effort abroad and promises our people ultimate relief from burdensome foreign-assistance programs now essential to free-world security. It recognizes the creditor status of America in the world and assures leadership of our people in the easing of unjustifiable trade barriers which today weaken all who are joined in opposition to the advance of communism. These considerations underlie my earnest advocacy of H. R. 1. I deeply believe that the national interest calls for enactment of this measure.

I wish also to comment on the administration of this legislation if it is enacted into law. Obviously, it would ill serve our Nation's interest to undermine American industry or to take steps which would lower the high wages received by our working men and women. Repeatedly I have emphasized that our own country's economic strength is a pillar of freedom everywhere in the world. This program, therefore, must be, and will be, administered to the benefit of the Nation's economic strength and not to its detriment. No American industry will be placed in jeopardy by the administration of this measure. Were we to do so, we would undermine the ideal for which we have made so many sacrifices and are doing so much throughout the world to preserve. This plain truth has dictated the retention of existing peril-point and escape-clause safeguards in the legislation.

I want to say further that this same philosophy of administration will govern our actions in the trade negotiations which are to begin next week at Geneva.

You are aware, of course, that by law this program will be gradual in application. A key provision of the bill limits to 5 percent of existing tariff rates the annual reduction in these rates permissible over a 3-year period, and unused authority will not carry forward from year to year. You know, too, that this program will be selective in application, for across-the-board revisions of tariff rates would poorly serve our Nation's interests. The differing circumstances of each industry must be, and will be, carefully considered. The program, moreover, provides for reciprocity, and in the program's administration the principle of true reciprocity will be faithfully applied. Americans cannot alone solve all world trade difficulties; the cooperation of our friends abroad is essential. With such cooperation, this program provides the means for doing our part to help emancipate free-world commerce from the shackles now holding back its full development.

For the reasons I have here outlined, I hope that H. R. 1, which is so important to every American citizen and to the free world, will receive the wholehearted support of the Congress.

Sincerely,

DWIGHT D. EISENHOWER.

In previous years it has been the custom to give authority to the President in the revision of tariffs. I see no reason why that rule should be changed at this time. I have faith in Dwight D. Eisenhower. I think he is a great American; I believe he is honestly and genuinely interested in but one thing; that is, to build up this great country of ours. He is not President for any material or personal gain; he was elected President in order that he could bring this country through safely to better days.

He realizes, as you do, that there are some countries in this world that need trade concessions. I understand, too, if we are to hold Japan in the fold of the free world and prevent the extension of communism, we must give them a chance to live. The only way we can give that nation a chance to live is to trade with her.

I also understand that the price of national security which I believe is contained in that trade should not be borne by any one industry or any one country. Our national security is that of 160 millions of people and we all should contribute as well as the other free nations of the world in keeping that nation on the side of the free world. President Eisenhower knows this. He would not permit a basic industry like the cotton industry with its 2,400,000 workers to suffer. To do so would be for his own administration to suffer.

So, Mr. Chairman, believing as I do in Dwight Eisenhower, and having full faith in his loyalty to American industry, I favor this legislation, and I hope it will be adopted by an emphatic vote.

We can trade with the rest of the world to the mutual advantage of all.

Mr. REED of New York. Mr. Chairman, I yield 10 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, it is certainly not my intention to consume 10 minutes of the committee's time, but I do want to remind you of a few things that happened in the last 24 hours on the floor of this House.

Yesterday, when the leadership, both on the Democratic and Republican sides, was face to face with a defeat in ordering the previous question, their plea to you was: "Do not make your fight here. Wait and vote to recommit the bill." That is what they told you. Today they are telling you a different story. Now they do not want you to recommit the bill. It is an altogether different situation today.

Mr. Chairman, the only time I desire to take is to remind the Members that we lost the fight yesterday and this is our last opportunity to defeat what has been referred to yesterday as a gag rule. This will be a motion to recommit with instructions, and it will cover some of the major items that you wanted to put in the bill in the form of amendments yesterday.

So my plea to you today, as it was yesterday, is to stand firm. It was nice to listen to the very excellent reading by the minority leader of the letter from our President. He cannot be too much concerned about this matter because the ticker just now carried the information that he had gone out to the Burning Tree Club to play golf. While my Democratic friends are pleading and bleeding for him, he is playing golf.

Mr. RABAUT. Mr. Chairman, the partisans of trade restriction and economic isolation are men who have little faith in the true meaning of free enterprise and in the great strength of an energetic and adaptable America. They have filled the press with their impassioned statements and delivered to committees of the Congress their frightened warnings of the collapse that threatens us if we pass the bill H. R. 1 in substantially its present form.

Long hearings have been held to listen to these pleas and to weigh them dispassionately in the light of national interest. All the evidence of experts in the field who did not have some private claim

to expound have agreed that this Nation needs a bold and forward-looking program of international cooperation in economic affairs. This does not represent a giveaway of American strength; rather it is an acceptance of the fact that we do not want to live alone in this world, that in truth we cannot, and our trade policies must take this into account. Our standard of living, our military defense, and our employment depend upon access to foreign sources of supply and foreign market outlets.

The Trade Agreements Act represents a minimum step in the direction of the kind of trade policy that is required. There are few who now are going to change their position on the measure or who have not been heard. Let us move with decision; let us put national welfare above narrow interests; and we shall have done what is within our power to keep America pointed toward prosperity and progress. Of course any change in trade policy creates its problems, and they must be met individually in the interest of justice. But the best service that can be done any community or any industry is to have all America strong, and liberalized trade in keeping with the free-enterprise system is important to that strength.

I urge that the full 3-year extension of this act be approved.

It is unlikely that conditions will change so materially in that span of time that annual review is required. And if it should be required, it would be the privilege of the Congress to undertake a review of our needs. Only a 3-year minimum period will give the stability to business arrangements that is required if useful trade is to develop. Having gone to the trouble to investigate so thoroughly this grave issue, and having prepared a program that offers hope for the future, the least we can do is to determine a firm policy to put before the world and before our own trading and business interests for the period of the next 3 years. America needs a positive program for its foreign trade relations, and the Trade Agreements Act offers the guidance which is required.

PROTECTION FOR THOSE AFFECTED BY NATIONAL TRADE POLICY

Mr. JOHNSON of Wisconsin. Mr. Chairman, I wish to address myself to the need of some followup legislation to protect those who might be adversely affected by economic conditions created by our national trade policy.

Many sectors of American agriculture are dependent upon selling a large part of their output abroad. Between a quarter and a half of our entire production of cotton, corn, and wheat is exported. Farm products representing about 30 percent of the value of farm marketings are highly dependent on export markets.

Other countries are anxious to buy more from us, but they are limited by their dollar earnings. Increasing the demand for United States exports depends upon increasing the supply of dollars abroad. The main way of doing this is by increasing United States imports. Trade is a two-way street. The vast demand for American products abroad assures us that most dollars spent in other countries will come back here in one way or another in the form of increased orders for United States exports.

Most other countries of the free world are a great deal more dependent on foreign trade for their economic health than we are. Because of this, their future economic growth and health depend on whether they have sufficient opportunity to expand their trade with each other and with us. Our tariff policies are a vital part of an intelligent foreign policy.

I do not believe that United States farmers—and this includes all types of farmers from the cotton to the dairy farmer—who produce for export or who produce commodities that must compete with imports should be asked to bear the full cost, in regard to this production, of an intelligent and realistic foreign policy.

Incidentally, other domestic and raw material and industrial producers should have this same consideration. The benefits of better international economic cooperation accrue to all the people; therefore, temporary costs involved should be borne by all the people. This means that in the case of both export and import, programs and policies should be established—as they have in the case of the International Wheat Agreement and the Sugar Act program—to spread the costs to all people instead of putting all of them directly on the small number of producers concerned.

No United States farmer or other producer—whom we expect to remain in production—should be required to produce for export or to meet the competition of imports at any price less than full parity prices. Furthermore, no business enterprise, industry, or laboring man should suffer adverse effects from the enactment of this act.

Therefore, immediate steps should be taken to put into effect not only adequate price-support legislation for the protection of the farmer, but also legislation to provide assistance to communities, industries, enterprises, and individuals in the adjustment of their productive activities to the economic conditions created by the national trade policy.

Mr. FOGARTY. Mr. Chairman, I speak in behalf of industry and labor in the Second Congressional District of Rhode Island—confronted with severe and in many cases unfair import competition.

The industries concerned principally are textiles, lace, costume jewelry and rubber products.

Secretary of Commerce Sinclair Weeks, in his testimony before the Ways and Means Committee on January 18 said:

> Considering that rates on most manufactured products range from 10 to 35 percent ad valorem, a 5-percent reduction in the existing rates means, in the case of an item subject to 20 percent duty, a reduction of only 1 percentage point ad valorem per annum for 3 years. I am sure that a reduction at this rate over a period of 3 years could not work serious harm on efficiently managed United States industries and, if perchance our generalization is ill-founded, the damaged industry has recourse to "escape clause" action.

Secretary Weeks further said:

> And in addition we have the President's words in his first state of the Union message to the effect that this objective "must not ignore legitimate safeguarding of domestic industries, agriculture, and labor standards." I am completely confident that in this respect his views have not changed.

Apparently the President's views have changed, because the record shows that since his first state of the Union message to January 7, 1955, the President only approved 2 cases out of 9 recommended to him by the United States Tariff Commission for remedial action under the escape clause referred to by Mr. Weeks. One was the watch case, and the other, alsike clover seed. In the latter case the Commission's recommendation was accepted only in part by the President.

Secretary Weeks also said:

> I should be the last to suggest that the present level of our tariffs is an important deterrent to imports. As a matter of fact, despite the remaining high tariffs on some products, our tariffs are among the lowest in the world.

Mr. Weeks is right in saying this. Thirty-four out of forty-two countries have higher average tariffs than the United States. This country is therefore the eighth lowest among leading trading nations of the world.

The Secretary of Commerce made another significant statement:

> This is only another way of saying that we should continue the trade agreements legislation for the same reason as it was started in the first place—as an important export promotion measure.

I think this statement needs no explanation—he hit the nail on the head.

There is the argument that is brought out by the proponents for the extension of the Trade Agreements Act that we must lower our tariffs further in order to encourage increased imports so that our foreign friends will obtain the necessary dollar exchange to pay for our exports. This is colloquially known as the dollar-gap hoax.

The following, for what it is worth, is a reproduction of a news item that appeared in the New York Times on October 7, 1954:

> DOLLAR GAP IS LAID TO FUGITIVE CAPITAL
>
> PARIS, October 6.—Prof. Robert Mosse, of the University of Grenoble, in an article published in the October number of the financial magazine Banque, concludes that the dollar gap in Europe has become a problem of fugitive capital from Europe.
>
> The dollar gap, says Professor Mosse, has been the dominant economic question in foreign trade for the last 10 years. It was originally a question of lack of dollars, owing to Europe's deficitary trade, and became the classic explanation for all Europe's ills.
>
> Professor Mosse says his studies show that though the dollar gap still persists, it is mainly because of the fact that European capital continues to take refuge in the United States.
>
> "Statistics show," he says, "that foreign capital in the United States that figures in the balance of payments amounts to $8,100,000,000, and that $4,100,000,000 has been considered not to be regularly noted owing to errors and omissions.
>
> "It can, therefore, be estimated that $12 billion or $13 billion has been invested newly in the United States from sources abroad.

By deducting capital that has been withdrawn, amounting to $6 billion or $7 billion, this would mean that foreign investors have now $6 billion to $7 billion more invested in the United States than they did in 1946.

"The problem," concludes Professor Mosse, "is in reality no longer the lack of dollars abroad, but the abundance of dollars that have sought refuge or are exiled in the United States. European policy should, therefore, be turned toward attracting this capital back to the countries of origin."

This state of affairs appears to be substantiated by a study made by the International Monetary Fund dated August 31, 1954, entitled "The United States Payments Position, 1953–54." The study says that the outflow of gold and short-term dollar assets from the United States to other countries since 1951 through the first half of 1954 has amounted to approximately $6,300,000,000.

In my State, unemployment is mounting every day. Working hours are being reduced in some plants, others are laying off part of their work force, and in other cases plants have had to shut down. The situation is acute in the lace and jewelry industries—and it is caused chiefly by imports that are taking away the United States markets for these domestic products.

More than 60 percent of the Nation's lace industry is located in Rhode Island, giving employment to some 10,000 workers. The lace industry in Rhode Island represents a $35-million-a-year business, with a payroll of approximately $15 million. These figures show how important a role the lace industry plays in the index of prosperity in this comparatively small State.

Today our lace manufacturers and their employees face a struggle for survival against competitive imports. The greatest competitive factor in lace manufacture is wages. The machinery used in the worldwide lace industry is all made in England. Production techniques are generally the same. Consequently, when an American manufacturer pays $3 an hour in wages, the British manufacturer pays 59 cents for similar work, and the French manufacturer pays 39 cents, naturally the British and French have an almost insurmountable advantage.

Foreign producers receive additional subsidies and encouragement for exports from their governments. For example, France rebates to her lace producers the social security taxes paid in behalf of French workers whose products go into export.

The only way to offset such a marked competitive advantage for foreign lace is through an equalizing or compensatory tariff. This would enable American manufacturers to meet this unfair price competition on an equal footing.

In 1938 and 1939 and the early part of 1940 our industry was being exterminated by a tremendous influx of French imports, made possible by tariff reductions in trade agreements with France in 1936 and Great Britain in 1939.

The fall of France in May 1940 ironically saved the industry from certain annihilation.

H. R. 1 would authorize additional reductions under conditions in which the industry already has found itself defenseless.

The only way of meeting this competition would be through wage cuts. Is that what this bill is actually up to? Wage competition is at the very heart of this import trouble.

Pressure on wages is the natural result. Further tariff reductions would increase this pressure.

Ninety percent of the Nation's costume jewelry industry is located in Rhode Island, providing jobs for 25,000 wage earners. Here, too, the workers are troubled and uneasy over the threat that unfair foreign competition holds for their future.

The original 1930 rate on costume jewelry was 110 percent ad valorem. This rate was reduced in 1943 in the Mexican Trade Agreement, since abrogated, to 55 percent ad valorem. The 55 percent rate was bound at Geneva in 1948 under GATT.

This item—paragraph 1527 (a) (2) of the Tariff Act of 1930—is on the proposed list of products to be negotiated next month with Japan within the framework of GATT.

The only reason for having it on the list is for further binding since it has been reduced to the maximum 50 percent under the present trade agreements act. However, if H. R. 1 is passed in its present form, it would give the Executive authority to reduce this rate further by 5 percent a year for 3 years or by 15 percent.

Imports of costume jewelry principally from Japan have increased steadily since 1939. Imports during 1939 amounted to only $100,000, while in 1953 they amounted to $6,629,000. These figures speak for themselves.

Mr. Chairman, for the reasons outlined, I object to the passage of H. R. 1 in its present form.

H. R. 1 would delegate such complete powers to the President that he could enter into any type of trade agreement he should deem expedient.

H. R. 1 is much more than a tariff or trade agreement bill. It contains provisions that would go far to strip Congress of its authority and responsibility to regulate our foreign commerce.

This delegation of power would soon pass, under the manipulation of the Department of State, to an international organization, namely, GATT and thus destroy our autonomy and the responsiveness of Congress to the voters.

Mr. RHODES of Pennsylvania. Mr. Chairman, it is my intention to support H. R. 1, the Trade Agreements Extension Act of 1955, because I am convinced that it will serve the long-range best interests of our people, our Nation, and the entire free world.

As reported, the bill retains safeguards in the present law—the so-called peril-point and escape-clause provisions—which I feel will afford protection to American workers and to American manufacturers from the mass flooding of our markets with foreign goods produced under lower wage levels and corresponding lower standards of living. I am wholly in accord with the objectives of these safeguarding provisions and will oppose any effort to eliminate them from the bill.

We cannot forget, Mr. Chairman, the tragic consequences of worldwide depression which followed the shortsighted protectionist policy of the Republican administrations of the 1920's and the enactment of the high-tariff Smoot-Hawley Act of 1930.

The Reciprocal Trade Agreements program, originally initiated 20 years ago in the Roosevelt administration under guidance of Secretary of State Cordell Hull, has resulted in tariff reductions throughout the world and in unprecedented increase in world trade.

We are now at the crossroads of our national trade policy. In 1953 President Eisenhower requested that an impartial study of our foreign economic policy be undertaken. Distinguished Americans from business, labor, and agriculture, as well as Members of the House and Senate were appointed to serve on the bipartisan Commission.

This so-called Randall Commission issued its report in January 1954. In the area of foreign trade policy, the Commission recommended that the President's powers to negotiate trade treaties under the Reciprocal Trade Agreements Act be extended to 3 years and that he be authorized to reduce existing tariff rates by not more than 5 percent a year. Adequate provisions for public notice and hearings procedures for interested parties were recommended. Retention of the peril-point and escape-clause provisions was also urged. H. R. 1 does much to implement the trade recommendations of the Randall Commission.

There can be no doubt that there are many American workers employed in industries which face competition from foreign-made goods. On the other hand many other Americans are employed in industry equally dependent on our exports to other countries of the world. In a minority statement on one aspect of the Randall Commission report, David J. McDonald, president of the United Steelworkers of America, CIO, proposed a program of Government assistance to communities, workers, and employers in cases of injury due to tariff changes necessary in the public interest. I am in accord with legislation introduced this session by Representative WILLIAMS, Democrat, New Jersey, H. R. 229, to provide such assistance to alleviate hardships caused by trade policy adjustments.

However, Mr. Chairman, it seems to me that the problems created by expanding foreign trade cannot be solved by the reestablishment of high tariff barriers which would ultimately drive our allies into the arms of the Soviet trade bloc; neither is the complete answer to be found in periodic reductions in our own tariffs to reciprocate similar reductions by other free nations with whom we trade.

The only positive solution lies in the expansion of our own economy in order to create enough new job opportunities to absorb the growing labor force and to provide the necessary goods and services for our ever-expanding population. A healthy, full employment economy has little to fear from expanding world trade.

In fact, the overall strengthening of our domestic economy is a necessary corollary to a liberalized trade program.

Under the Employment Act of 1946 the Federal Government is charged with the responsibility of maintaining maximum employment. It was a great disappointment to me that the President, in his economic report to the Congress, failed to recommend policies and action necessary to discharge that responsibility.

Unemployment in many industrial areas of this country continues to be a grim specter which blights the lives of millions of American workers and their families. In addition to the hardships inflicted, the continuing unemployment of well over 3 million of our potentially productive citizens has deprived our Nation of an estimated $30–$40 billion in gross national product in 1954 alone. The Republican big business fear of abundance has been revealed in the ill-fated hard-money policy of the Eisenhower administration in 1953, the 1954 trickledown tax philosophy granting relief for upper income groups, and is now shown again by Old Guard reactionaries opposing the 1955 reciprocal trade bill.

Mr. Chairman, H. R. 1 has received the overwhelming support of a vast number of spokesmen for business, labor, farm, veteran, consumer, and other public-spirited groups. I would like to conclude my remarks by quoting witnesses from a few of these representative American groups who testified in favor of this legislation.

Mr. Charles H. Percy, president of Bell & Howell Co., Chicago:

I believe with the utmost conviction that a gradual liberalization of our foreign trade policy will help to further improve the efficiency of American industry, will increase our productivity, lower our unit costs of production and increase our standard of living. At the same time, it will strengthen our allies, weaken our enemies, and provide a greater measure of security to our country.

Mr. James B. Carey, secretary-treasurer, Congress of Industrial Organizations:

The United States cannot pick and choose and deal only in the items that we need to import and export. Instead, the United States must engage in gradual, continual, and, in many instances, reciprocal reduction of the barriers to international trade. Reciprocal trade is essential for the maintenance of production in many of our own basic industries and equally essential for the preservation of sound international relations with our allies. Improved economic well-being of the countries throughout the world is one means by which Communist aggression can be stopped. Economic well-being and improved international trade relations go hand in hand.

For these reasons we are happy to support H. R. 1, which will extend and continue the Hull reciprocal trade program.

Statement by American Federation of Labor:

The American Federation of Labor does not endorse either the extreme position of free trade or the extreme position of protection. We believe that trade policy can prove a useful tool for reducing the dollar gap, for persuading other countries to lift their trade restrictions, and in general for strengthening the economic basis of the free world. We believe that to achieve these objectives, this country should continue its policy of negotiating tariff adjustments, to use the President's phrase, "on a gradual, selective, and reciprocal basis." The importance of the terms "gradual" and "selective" must be emphasized. * * *

We believe that if the adjustments negotiated under this proposed program are, to use the President's words, "gradual, selective, and reciprocal," they need not operate to curtail employment opportunities for American workers.

Mr. David J. McDonald, president, United Steelworkers of America, CIO:

If I had the slightest feeling that increased trade, particularly imports, would be injurious to the American workingmen, I would not be here today supporting a policy of trade liberalization. It is precisely because I believe that it is in the interest of the American workers and our people generally, that I am happy to continue to support a liberal trade policy at this critical juncture of American history.

Statement by United States Chamber of Commerce:

Through increased trade, the Nation's economy benefits. That is true just as much in world trade as it is in domestic trade. More goods at lower prices has been the very heart of the American competitive enterprise system, the trade-agreements program can contribute to the health of that system.

By continuing the trade-agreements program, the United States can lead from strength—the strength of a growing, dynamic, resilient economy.

Mr. Charles B. Shuman, president, American Farm Bureau Federation:

We are expanding our domestic markets. We must expand our foreign markets.

To maintain a prosperous agriculture, we need export markets of around $4 billion per year at present prices. We have the capacity to supply an even larger foreign demand.

We think our foreign economic policies should be geared to these export needs. Enactment of H. R. 1 is an important step to gear up to this need.

Mr. James S. Patton, president, National Farmers Union:

Many of us produce products which have traditionally entered into export trade, like cotton, wheat, tobacco, hogs, and certain fruits. We know that the export market for these crops is important to us and that it depends on low trade barriers abroad, on prosperity and buying power in foreign countries, and especially on foreigners' supplies of dollars. We know that foreigners can obtain dollars chiefly by selling goods and services to citizens of the United States and that the amount they can sell depends in part on how much we are willing to buy.

Mr. BOLAND. Mr. Chairman, I rise in opposition to H. R. 1 and support the motion of the gentleman from New York to recommit the bill to the Committee on Ways and Means. I want it understood that I am not a protectionist and I believe in a trade policy that stimulates the markets of the world. In the 83d Congress, I voted to extend the Trade Agreements Act for another year. I did this in the belief that a trade program would be developed that would meet the legitimate complaints of those industries that have been unduly injured by the Nation's present trade policy. Those complaints have not been resolved and the Tariff Commission in some instances has ignored the protests of industries that are slowly on the way to certain death.

Mr. Chairman, there is no doubt in my mind as to what my particular responsibility is on this important matter. I have the obligation to speak for my constituents and in their best interests. Where the welfare of my people is vitally concerned, it is incumbent upon me to protect, by adequate and proper legislation, their health and their livelihood. I must do so in this instance.

The industry of my locality is greatly diversified. There are thousands gainfully employed in the textile, chemical, machine tool and electrical goods industries. They are vitally affected by the importation of foreign made goods. The record clearly indicates that it is becoming increasingly difficult for these industries to meet the growing competition of imports. The reports are saturated with the effect that foreign goods, cheaply manufactured, have upon local industries. It takes no imagination to realize for it is already established fact that a domestic company paying an average of $1.79 an hour cannot continue to compete with foreign plants paying hourly wages of 46 cents and lower.

Mr. Chairman, one of the outstanding authorities on the economy of New England is Mr. Seymour E. Harris. Mr. Harris is a professor of economics and a member of the graduate school of business administration faculty at Harvard University, where he has taught for more than 30 years, in which 20 of those years have been in international economics. He was chairman of the New England Textile Committee appointed by the conference of New England governors and was responsible for the report on the New England textile industry. In his appearances before the Ways and Means Committee, he gave an excellent summation of the problems that face New England. A reading of his brief which appears in the committee hearings details the effect that a lowering of tariffs would have on our New England economy. I am indebted to him for many of the facts which have assisted me in resolving my attitude on this proposal.

Mr. Chairman, further relaxation of tariffs in the textile industry could very well be its complete undoing. Continued reduction of tariffs in this field cannot be defended when the facts disclose that, if the decline in the textile industry in New England persists, it would disappear from New England within 8 years. Government policies have increased the higher prices of food and raw materials and in like manner have depressed the prices of manufactured goods through removal of tariff restrictions. In New England, we are further injured by Treasury operations that have taken from our locality over $1 billion net, about 7 percent of its income. Under the accelerated amortization tax relief, the main competitors of New England profited at the expense of New England. Since 1919, we have lost over 200,000 jobs in the textile industry. No wonder we are concerned. The question we ask is, Is it fair to impose additional losses on New England textiles in the light of the problems? It does no good to tell us that we ought to adjust to other industrial fields. That is one of the arguments

used by proponents of legislation leading toward tariff reductions. The geographical location of New England in the northeast corner of the United States, the problem of distribution, the unwillingness of industrialists to establish new industry involving the transportation of bulky raw materials, all of these are factors that place New England in a difficult position to adjust to other industries. And so, it is absolutely necessary to keep and protect what we have. We cannot long do this if we legislate today in a manner that does injury to New England. I trust that this House will vote to recommit this matter to the Committee on Ways and Means.

Mr. DONOHUE. Mr. Chairman, I have never been, nor am I now, opposed to the basic principles underlying our trade agreements program.

Nevertheless I am conscientiously constrained to look upon this measure here today, of vague language and sweeping new grants of Presidential authority, with grave doubt and serious question that has, so far, not been convincingly resolved by any evidence offered by the proponents of the bill.

The attempt to bring this bill before the House under a closed, or gag, rule to prevent the introduction and democratic disposition of remedial and clarifying amendments is to be regretted. The limitation of two days of debate on a subject of such vital importance to the nation and the world is, in my opinion, an unfortunate reflection upon the interest and understanding of the membership, well intentioned as such action might have been. This reflection was vividly revealed, and the resentment manifested, when the closed rule prevailed by the very narrow margin of a single vote. For these reasons alone one would be inclined to vote against the measure in order to obtain the opportunity for the longer and more detailed discussion and consideration the subject merits. However, there appear to be much deeper grounds to question this bill in its present form. Certainly it does not completely conform with the sentiment expressed in the President's own statement on trade policy contained in his state of the Union message February 2, 1953, when he declared:

> This objective must not ignore legitimate safeguarding of domestic industries, agriculture, and labor standards.

Nor does it conform with the statement contained in the report of the Commission on Foreign Economic Policy that—

> American labor should not be subjected to unfair competition as a part of any program to expand our foreign trade.

Even the advocates of this bill admit it will inevitably visit great hardships upon great numbers of employees and many industries in certain sections of the country, such as New England, where textile manufacturing and innumerable other products will be hardest hit. Yet there are no provisions or proposals, nor are we permitted to offer any for adoption, in this measure to prevent the imposition of serious economic suffering upon such American workers and industries.

My main objection therefore, to this bill before us, is that a fair and just trade program should not deliberately discriminate in favor of foreign producers and against American labor and manufacturers.

It is indeed well to help other people and encourage the loyalty of our allies but we are impelled to ask of what lasting benefit will that be if in the process we generate widespread deterioration of morale among our own wage earners in large sections of the country.

Therefore a great many of us here, trying to conscientiously represent our people, very deeply feel that the tariff cutting features of this bill, should be wisely held in abeyance until, with Government assistance, new industries are encouraged and developed for areas that would be so disastrously affected and proper precautions are taken to safeguard the employment opportunities rightfully belonging to so many patriotic American working people. Toward that objective labor, industry and all levels of government should sincerely cooperate.

It is truly not a simple or easy problem to solve but it is just as truly our representative responsibility to work out a fair trade program that will be fair to Americans as well as our foreign friends. I earnestly hope the House will vote to recommit this bill for the sole purpose of writing in new provisions designed to prevent great hardships from falling upon many regional industries and workers, not to mention other provisions to retain and preserve essential defense resources that we can ill afford to dissipate in the face of threatening Communist aggression.

Mr. OLIVER P. BOLTON. Mr. Chairman, although I am unable to be present during floor debate today because of my incarceration in the hospital, I have asked my whip to pair me against further extension of the reciprocal trade agreement program. I have done this only after long and serious consideration and much study, particularly over the past 2 months. I am so voting, not because I do not believe in foreign trade, because I do, but rather because I believe the reciprocal trade program as it is now constituted is not truly reciprocal nor does it tackle the heart of the problem.

I would be the first to admit, even to suggest, that if we are to build a strong, free world, we must build strong trade relations in it. But, I do not believe this bill and this program, based as they are on the multilateral lowering of tariffs, accomplishes this objective. To put it another way, it weakens the hand of our negotiators in dealing with other nations. It does not give them an opportunity to bargain effectively.

The way I understand that the so-called reciprocal trade policy has functioned in the past, both under the present administration and its predecessors, the tariff policy of the United States has been considered far more as an arm of United States foreign policy than as a part of our domestic economic policy. It does not take into account that foreign trade, though perhaps tremendously involved with foreign policy is, nonetheless, a part of our domestic economic policy and that trade decisions should be made first from the standpoint of their impact upon our economy at home. In other words, tariff changes should be made only where they will not substantially affect our domestic economy.

Moreover, this policy does not take into account the limitations other than tariffs placed upon our exports by other nations; nor does it take into account products imported into this country on which there is no tariff control and on which some other type of protection must be evolved.

Were the United States a high-tariff nation and were the dollar gap in international finance large, I might vote to continue the present program. But we are not a high-tariff nation, compared with others, and the dollar gap is narrow.

I voted last year for a 1-year extension of the reciprocal trade program because I hoped that out of it would come a restudy on a broad economic front which would introduce some new answers to the whole trade question. I cast my vote today only after much soul searching for I not only have tremendous admiration and respect for President Eisenhower and his concern for the welfare of our country and of the free world, but I also have equal admiration and regard for the Secretary of the Treasury, the Honorable George M. Humphrey, whose capacity and good judgment I have learned to respect over many years. Nonetheless, I was elected to represent the 11th District of Ohio and to support my own judgment and convictions, and this I must do. Therefore, my vote against this bill is not a vote against reciprocal trade but rather against a program which I am unable to see is either reciprocal or fair to the American businessman or worker.

Mr. TOLLEFSON. Mr. Chairman, the people of my State and of the whole Northwest are gravely concerned with several aspects of tariff legislation. I trust the House will give serious consideration to our problems when it undertakes to vote on the pending measure. I should like to say to the Members the same things I mentioned to them in March of last year. At that time I stated that a great number of our important industries and their employees are dependent on the production of goods and products which are being driven from the domestic market by cheap imports, made possible largely by low wages paid abroad.

Among these are the raising of tulips, iris, and daffodils; the tuna and Pacific groundfish industries; the hardboard and plywood producers; the cherry growers; and the Northwest tree nut growers. And now imports of cheaply produced red raspberries from abroad are beginning to threaten red raspberry growers in my district. Let me read a letter which I have today received from a berry growers association in my district.

PUYALLUP, WASHINGTON,
February 14, 1955.

Hon. CONGRESSMAN THOR C. TOLLEFSON,
House of Representatives,
Washington, D. C.

DEAR SIR: We are appealing to you in behalf of 350 grower members in the Puget Sound area (Washington major raspberry producing

area) and 60 growers in the Snohomish county area.

You may not be aware of the desperate situation in which the raspberry growers find themselves. (Eighty-five percent of the total production of this nutritional fruit is grown in the Pacific Northwest, with approximately sixty percent being grown in the State of Washington.)

The carry-over of red raspberries is exceptionally large. Prices are declining daily to a ridiculously low level—far lower than that at which we can produce them.

The predicament of the raspberry industry is largely due to the foreign imports of processed and frozen raspberries offered to the trade during harvest time at prices lower than Washington growers were receiving at the packers' platforms prior to processing and freezing. (The finished import product sold for less than the raw product in the States.)

You will recall that we appealed to you in June, of 1954, for aid to stop the foreign imports of raspberries. We realize, because of the Reciprocal Trade Agreements Act without a provision for an "escape clause", that nothing can be done at present to increase tariffs on these foreign imports to put them in a competitive market with our own fruit.

To alleviate this condition somewhat, would it not be possible to contact the Armed Services and request their purchasing raspberry products such as jam and fresh frozen whole berries? Although in the past the Armed Services followed this program, in recent years very little has been purchased. Jammers, at present day prices, can buy new Washington and Willamette varieties (which represent the accepted standard for TOP quality) cheaper than strawberries, pears, peaches, or apricots, therefore purchasing raspberries for the Armed Forces would be a good economical move. We have been informed that the Army is letting out a bid for a small quantity of raspberry jam in March. If the quantity could be considerably increased, we are sure it would greatly stimulate the movement of our surplus commodity.

The red raspberry is not only attractive to the eye and taste, but is rich in thiamin and vitamins A, B and C.

We, as growers, through promotion and publicity programs and calling upon our Chambers of Commerce for assistance, are doing all in our power to remedy the situation.

The industry is in a distressed condition. Won't you please do all within your power to help us? We await your reply at your earliest convenience.

Very truly yours,

PUYALLUP VALLEY
BERRY GROWERS ASSN.,
Mrs. Norbert Alexander, Secretary.

The thousands of people directly dependent on these industries for their livelihood face critical times unless this Congress faces up to its responsibilities and realistically revises our foreign trade and tariff structures to afford them needed protection.

Just let me cite a few examples.

The two States of Washington and Oregon are the center of the production of daffodils, iris, and tulips in the United States. In my district, alone, are grown some 30 million King Alfred daffodils annually—more than are grown in all of Holland. But faced with growing imports of foreign flowers, produced at the low-wage rates prevailing there, the growers of the Northwest are facing bankruptcy. An excess of foreign bulbs are being dumped on the United States market at prices below the cost of domestic production.

As a result, in 1952 domestic growers, even after selling most of the crops below cost, were forced to destroy their unsold surplus amounting to about 25 percent of all their iris and 20 percent of their top-quality narcissus.

The reason for this depression is not hard to find. A March 1953 report by the United States Tariff Commission showed that between 1937 and 1952 the import duty on narcissus bulbs from the Netherlands was lowered from $6 per thousand bulbs to $3, and the number of bulbs imported jumped from 6 million to more than 28 million. Likewise, between 1950 and 1952 the ad valorem duty on iris bulbs was reduced from 10 to 7½ percent, and the total of bulbs increased from 50 million to nearly 70 million, or about 40 percent.

Another important industry to the Northwest which is being seriously hurt by cheap imports is the manufacturing of hardboard. Six of the nine domestic producers of this vital national-defense item are located in Washington or Oregon, and of 7 more domestic plants under construction under the target-expansion goal set by the Defense Production Administration, 3 are in Washington and 3 are in Oregon.

Now, at the very time that this tremendous Government-encouraged expansion of domestic hardboard capacity is being completed, and when current domestic markets are shrinking and a buyer market is being encountered, the domestic industry is facing constantly increasing imports of foreign hardboard from Sweden, Finland, and Canada.

Particularly the Scandinavian hardboard has been coming into more and more ports and is being sold at lower and lower prices—far below the prices domestic producers can afford to charge.

As a result of the reciprocal-trade agreements program, the United States duty on foreign hardboard was reduced from 30 percent ad valorem in 1930 to 15 percent in 1936, and since 1947 has been cut to $7.25 per ton, or not less than 7½ percent nor more than 15 percent ad valorem.

Census Bureau figures I have recently seen indicate that through the first 8 months of 1953 imports of hardwood increased 65 percent from Canada over the like period of 1952, that they were 3 times greater from Finland and 8 times greater from Sweden.

These vastly increased imports have already had a serious impact on the domestic industry. One producer has been forced to lay off more than 350 employees; another reports production cutbacks of 50 percent, and others have gone on 2- to 4-day workweeks or have cut down on shifts.

Another industry in the forestry field which is of prime importance to the people of the Northwest is the manufacture of plywood. The industry, likewise, is suffering from a lack of adequate protection, and plywood made in Japan, at wage rates drastically below those of our own workers, is now coming into this country in greater and greater volume.

Another great and vital industry to the Northwest, as well as to the whole west coast, is the taking and processing of fish. This includes the taking and distribution of tuna, salmon, halibut, and otter-trawl and drag fisheries. There are several thousand ships and an estimated 20,000 or more fishermen employed directly in the taking of these fish, plus many thousands more who make a living from the processing and distribution of them.

And, yet, with imports from Japan and South America growing at an alarming rate, these American ships will be driven from the seas and the American factories closed up unless relief is granted soon.

In 1953, more tuna was imported from Japan than was produced domestically. Other import threats are comparable, and will continue to become more dangerous unless protection is granted the domestic producers.

It is simply impossible for American fishermen or processors to compete with the Japanese. The average American fisherman, for example, in order to live must earn at least two times as much as the Japanese fisherman is paid. Cost of boat construction, gear, repairs, and so forth, are all much higher in this country. Foreign competition has already forced a number of our fisheries and processing plants out of business or compelled them to greatly reduce operations. With many of our seacoast towns depending on the fisherman and his earnings, this depression in the fishing industry has a far-reaching and serious effect on entire communities.

The groundfish fleet in the Pacific Northwest has shrunk from some 250 boats a few years ago to only about 40 today, and imports have increased 1,100 percent since 1940, from 9 million pounds in 1941 to 102 million pounds in 1952.

Canadian fishermen and processors earn an average of 98 cents an hour, while their American counterparts make an average of $2.04 per hour.

The industry must have immediate tariff and quota protection if it is to survive, and its thousands of workers continue to earn a living.

There are many other industries, such as the raising of tree nuts, including filbert which are important to the Northwest, where tariff and trade policies are critically hurting Americans.

The nut industry has consistently sought relief from the Tariff Commission under existing provisions of section 22 of the Agricultural Adjustment Act, and under the countervailing duties and antidumping laws from the Treasury Department. But this relief has just as consistently been denied them.

We in the great Northwest believe firmly in trade and commerce among the nations. We will encourage it whenever it is fair trade and in the best interests of America. But we do not believe this Nation should deliberately follow a trade policy that forces American businesses to close and puts American citizens out of work; that opens up our domestic markets to goods produced at substandard wages which would be illegal in the United States.

I respectfully urge my colleagues to bear these facts in mind when they vote on the pending measure, H. R. 1.

Mr. OSTERTAG. Mr. Chairman, in order to determine the impact of foreign

trade on the Rochester, New York, area, much of which lies within my district, I have requested the Legislative Reference Service of the Library of Congress to conduct a survey which will highlight the extent of exports and imports in the area. The survey is being directed by Dr. Howard S. Piquet, senior economic analyst of the Library.

In addition to questions covering the type and volume of business in the area, the questionnaire sent out in connection with the survey was designed to determine the extent to which Rochester industries rely upon raw materials from abroad; the extent of their imports and/or exports; the degree to which their business is affected by imports; the amount of export business which results from United States foreign economic and military aid programs; the effect of a 15-percent reduction in tariffs over the next 3 years; and, finally, the anticipated effect on business in the Rochester area of the St. Lawrence Seaway.

The survey has not yet been completed, but it has gone far enough to indicate certain significant factors and trends.

As of February 16, 130 firms, with a total of 74,306 workers had responded to the survey. Of that total, about one-third of the firms, employing about one-fourth of the workers, have an interest and a stake in exports. One-fifth of the firms are dependent upon imported raw materials. Seven firms, with 2,830 workers have no interest in imports, insofar as dependence on raw materials goes, or in exports, insofar as selling their products abroad is concerned, but foreign imports are making substantial inroads on their markets.

A dozen large firms in the area have mixed interests in the foreign trade program: That is, they have foreign markets, but they are also confronted by competition from imports, and thus, in some measure, there is a dichotomy in their interests.

Finally, and perhaps most significantly, the preponderant number of firms—although they cover only a minority of the workers—expressed no interest in either imports or exports, their businesses being wholly concerned with the domestic market.

Mr. GWINN. Mr. Chairman, I voted against the reciprocal trade bill for two reasons. First, because I believe that America's trade policies abroad should be determined in relation to the cost of manufacture in the United States and, secondly, the decisions must be made by the Congress as required by the specific provisions of the Constitution. Its responsibilities cannot be shifted to a single person, not even to the President. I want as most Congressmen want, reciprocal trade instead of aid with the other nations. But nearly half of Congress voted against the present bill and voted to send it back to committee for correction.

We want free trade among the nations somewhat as we have it between the various States of the Union. Free trade has undoubtedly made a great contribution to the tremendous prosperity and high living standard enjoyed by the American people. The constitutional prohibition of trade barriers between the States has benefited both business and the public.

Our success as free traders amongst ourselves is proof that free trade is the best trade in the conduct of commerce. We all believe that. But before it can be applied to international trade, certain political conditions must be present. These are: First, there must be peace among the trading parties so that none is denied vital raw materials and manufactured products. The United States could well have used a tariff-protected synthetic-rubber industry during the Second World War after the Japanese had gained complete control over most of the world's supply of natural rubber; second, there must be a common currency, unrestricted in flow and not subject to political manipulation that stops much of our world trade today; and third, there must be a reasonably uniform wage and hour scale, which determines the cost level of all goods produced entering into trade. These conditions are met, of course, within the United States. But they are not met as between the nations of the world. Because of the grave danger of war nearly all countries are building up their own defense industries and they are protecting those industries with tariffs and other trade barriers against goods from the United States. Many nations restrict international movement of their currencies so that if we sell goods to them we cannot get paid. The fixed rates of exchange are frequently punitive in effect against us. Trade with them is on a one-way street. There is no uniformity of wage and hour standards throughout the world and that results in a great variety of cost and price levels. As long as the foregoing conditions exist, free trade among the nations like that enjoyed among our States is impossible.

The most objectionable feature of the 1955 tariff legislation is the delegation of arbitrary, unreviewable and absolute authority to the President to fix tariffs. We do not mean President Eisenhower. We mean any President before or after him. This was the original objection in 1934 to the first Reciprocal Trade Act. Prior to that time Congress had always fixed tariffs. Tariffs have been considered more as matters of local concern than of national policy. As a practical matter, the Congress better reflects the attitude of the people than the Presidency does because the Congress is closer to the people. Accordingly, it makes sense that Congress should retain its powers to control the tariff level. Besides all this, the Constitution itself provides that Congress must do so.

Reciprocal trade legislation has been on the books for 20 years. It has not accomplished much as an incentive to lowering trade barriers of foreign countries as pointed out above. On the other hand, considerable injury has been sustained by American industry. Some firms have gone out of business such as the Alexander Smith Carpet Co. has done in Yonkers. Others are operating on a marginal basis, and in some cases, whole industries are threatened with extinction. There were 10,000 skilled watchmakers employed in the United States in 1948. Today there are only 4,000. Whole States, such as West Virginia, where coal mining is the chief industry, are prostrate because of the importation of cheap residual oil. In New York State, the glove industry, the hat industry, and others are practically out of business. The chemical industry has testified that it has been hurt by previous tariff cuts and that any more may finish them off. The necessity for a strong domestic chemical industry was demonstrated in World War I. At that time the United States was completely dependent on Germany for chemical products, and when the war broke out, our only source of supply was gone. The pottery industry in the United States and in New York State is virtually extinct. Since 1948, imports of China tableware has increased 138 percent so that 86 percent of all China tableware purchased in the United States is foreign made. Since 1950 imports of foreign bicycles has increased 1,300 percent and now absorbs more than one-third of the American market.

In theory, the reciprocal trade legislation provides an opportunity for relief to these stricken industries. Under the law a lowered tariff may be raised if it is found the domestic industry is being severely hurt. Upon an application from the aggrieved industry, the Tariff Commission holds public hearings and then may report to the President with recommendations for relief if it finds relief is necessary. The President may or may not act as he sees fit and there is no appeal from his decision. This provision for relief is called the escape-clause procedure. However, relief by this procedure has seldom been realized.

Since 1948 there have been 59 applications by American firms for relief. The Tariff Commission, the agency set up by Congress to act as a court in tariff disputes, took action on 15 of these applications and made recommendations to the President for relief. In only five of these cases did the President take action to protect the domestic industry against injury from foreign competition. In the remaining cases, the President, acting on the advice of some State Department bureaucrat, ignored and overruled the recommendations of the Tariff Commission. This is permitted under the past and present proposed law. The President can make his decision on facts that were never before the Tariff Commission and which the industry involved has had no chance to refute. And, as I have already pointed out, there is no appeal from the Presidential ruling.

Now consider what that means. The jury, which in this case would be the Tariff Commission, hears the pleadings and the evidence and then renders a verdict. The judge, viz the President, can then, on the basis of facts not presented to the jury, reverse the verdict and no appeal is permitted. This is bad law, bad procedure and outrageous politics in dealing with American industry. It is in utter violation of all the basic tenets of Anglo-Saxon jurisprudence and of the concept of constitutional representative government. The American tradition prefers the wisdom and experience of jury verdicts instead of verdicts by a single judge.

There is another danger inherent in this unprecedented procedure. Those who may have access to the President's ear through some State Department bureaucrat, may ignore the proceedings before the Tariff Commission and present their case directly to the President. This amounts to government by personal rule rather than by law. This is not intended to be derogatory of the present Presidential incumbent. My use of the word "President" is entirely impersonal.

When tariffs are subject to congressional control; when tariff disputes are resolved by court procedures; and when American businessmen whose business lives are threatened, may have their day in court, then I shall vote for reciprocal trade legislation. I believe in the principle of it.

Mr. HARVEY. Mr. Chairman, the problem to be discussed herein is simply whether H. R. 1 should be accepted as a sound measure in the national interest or rejected as an unsatisfactory solution to world-trade problems in light of its effect upon the United States economy.

For practical consideration the problem is divided into three basic elements: First, economic: What effect will the United States tariff policy have upon the economies of the free world nations? Second, world political: What effect will the United States tariff policy have upon the political and military unity of the free world nations? Third, domestic: What effect will United States tariff policy have upon the domestic economy and particularly upon industries affected by lower tariffs and international competition.

ECONOMIC

In terms of a long-run solution to the trade and payments problems of the world, the basic difficulty seems to be that of a continuing necessity for nations to adjust the allocation of their resources. This readjustment is necessary in order to keep pace with the constant increase in world production and reshuffling of world trade among the free nations. Three separate factors seem to be affecting the long-run distribution of national resources:

(a) The increasing integration of industries within each nation so as to gain the advantages of manufacturing their own basic raw material. Most important in underdeveloped areas although significant in Europe.

(b) The strong drive of all the free nations for strength and the highest degree of independence possible.

(c) The trading nations of the world have had a great tendency to develop into trading blocs with each bloc having somewhat divergent and competing interests and limited self-sufficiency.

Sterling bloc, European Payments Union, dollar area.

Assuming the above facts to be sound and accurate we present the question of what effect the United States tariff policy will have upon the problems confronting nations with regard to trade and payments. The facts indicate that the current problems have had little connection with the United States tariff policy and therefore any change in this policy will have a negligible effect upon the important problems of international trade and payments. The facts from which this view was formed are as follows:

(a) Import tariffs are only one factor to be considered in judging whether or not the American consumer will buy foreign goods.

(b) The factors of taste, technology, and new inventions, distance and shipping costs, competing price reductions by domestic producers as a result of import threat have been largely omitted in considering the issue.

(c) In actual fact most evidence points to the fact that in the event that United States tariffs were completely removed there would be little change in the trade throughout the world. Dr. Howard S. Piquet, Senior Economic Specialist in the Legislative Reference Service of the Library of Congress, in his book Trade, Aid and Tariffs, expressed a well-founded opinion that in the absence of any tariffs, imports into the United States would rise no more than $2.6 billion annually.

We are left with the conclusion that most of the foreign claims that a lowering of United States tariffs would remedy all the free world's economic and balance of payments difficulty simply are not true and that arguments in favor of freer trade based upon this concept of the international economic effects of such trade increases forthcoming through tariff reductions have been greatly overstated. A much more sound theory explaining the international trade and payments difficulties of the free world can be based on the three factors affecting the long-run distribution of national resources named in this discussion.

WORLD POLICY

The long-range United States foreign policy centers around one basic objective—a strong domestic economy in a peaceful community of nations. In order to fully realize this objective it is assumed that the United States must have strong, economically secure allies. This Nation has taken the dominant role in postwar politics and in the establishment of sound prosperous economies among the free nations. The free nations of the world now look to America as a leader and attach greater importance to United States action than is justified by fact. This exaggerated sensitivity is confirmed by almost every foreign reaction to United States policy. Thus, through the assumption of leadership in international affairs and through the natural internal economic strength of this country, the United States has become the leading actor on the free-world stage.

Coordinating the above statements and consideration of H. R. 1, we present the question of what effect United States tariff policy will have upon the political and military unity of the free world.

It is immediately apparent that the failure to accept the President's tariff proposal, H. R. 1, will cause violent objection among the free nations of the world, particularly the European trading nations who form the bulwark of our Western European defense perimeter. In short, it is obvious that this kind of objection is economically, completely unjustified, but it is nevertheless a political reality. It must be analyzed as a reality.

The basic question then becomes a very broad one involving United States strategic policy. Should this Nation disregard the opinions of other free world nations because we know that the opinions had little basis in fact? The answer to this is "No". Because of the fact that most of our allies are keenly interested in United States tariff policy and regard it as a primary index as to whether or not we intend to practice on the economic front what we preach on the political front, we must attach considerable importance to this phase of the trade problem. We must weigh the political realities alongside economic fact in setting forth the trade policy of the United States.

DOMESTIC

The effect of lower tariffs upon the domestic economy of the United States has formed the battleline for both the proponents and opponents of H. R. 1. Basically, this factor in isolation from other considerations is an insufficient foundation for a final conclusion. However, because of the tremendous publicity given this phase of the problem many misconceptions have been formed and many opinions drawn upon this factor alone. Those proponents of H. R. 1 who believe that low tariffs will act as a veritable panacea to the domestic economy must ultimately face the same disillusionment as those friendly nations who have in the past made the United States tariff policy the whipping boy for all their economic problems. The various pressure groups who by necessity or by choice have selected their belief and are now trying to utilize every conceivable rationale in favor of their original opinion do not come to grips with the basic question of the effect of United States tariff policy upon the prosperity of the domestic economy.

In general it is recognized that some economic gains accrue to a nation from such tariff reductions. This tends to reduce the price to consumers of the products imported in greater quantity and to increase the financial ability of foreign nations to buy United States produce. However, to put the tariff question in proper perspective, it should be made clear that the proposed changes set forth in H. R. 1 will have an insignificant beneficial effect upon the overall national economy.

In recent years exports have averaged approximately $15 billion and imports $11 billion per year which amounts to roughly 4.5 and 3.3 percent of the gross national product during the same years. Approximately $6 billion of the annual import figure enters the country free from duty. This means that a reduction in United States tariffs would affect only the goods presently being imported into this country at an annual rate of $5 billion or less than 2 percent of the gross national product. Reliable estimates of the probable increase in imports in the absence of any duties place the range at $1.2 billion to $2.6 billion. Judging from this estimate, the maximum effect of H. R. 1 upon the economy as a whole

would be less than 1 percent of the gross national product.

The bare fact is that certain domestic industries have a long history of operation under tariff protection while other industries foresee a good possibility of expanding their sales and profits if tariffs are reduced. Just how much either group would be damaged or helped by the passage of H. R. 1 is impossible to determine since both sides constantly overstate their position. Nevertheless, herein lie the two sides of the argument.

Objective tests show that the industries which would be most affected by increased competition from foreign producers are the textile groups—wool and cotton manufacturers as well as textile fibers—and the machine and vehicle group—bicycles, autos, lawn mowers, sewing machines, and many types of other machinery. There would be a substantial rise in imports in the areas of animal fats and oils, vegetable products, and chemicals.

Is it in the national interest to continue tariff protection in industries where such protection now exists in order to prevent dislocation of production? This question must be answered on a case-by-case basis and not by a general policy as set forth in H. R. 1. Congressional action on this bill will merely set the trend for future changes.

There is no doubt that some controls are essential to prevent other nations from pushing the burden of worldwide economic adjustments onto the United States as world productivity capacity increases and changing factors force a reshuffling of resources throughout the world.

CONCLUSION

The tariff question boils down to this: We must weigh the effects of H. R. 1 upon, first, the free world economies; second, the political and military unity of the free nations; and, third, the domestic economy and protected industries.

Absolutely nothing the United States might do in the way of lowering tariffs can solve or even substantially aid the economic problems of the free world. The first step to be taken in solving national and international economic problems is a realistic insight into the actual difficulty by the countries involved. There can be no successful solutions to the problems so long as nations refuse to do this. It must be stressed that the role of this country should not be one of nurturing all the misconceptions which exist among the allied nations who continue to use United States tariff policy as a "scapegoat" for their own unsolved economic problems. We cannot make our laws and justify them on the basis of unsound opinions voiced by friendly nations.

The same basic principle of economic reality must be followed in coping with the strong foreign objections forthcoming from a United States policy to maintain tariffs at their present level. Legislation such as H. R. 1 must be based upon and justified by full considerations of domestic interests.

The full impact of further tariff reductions upon several of our domestic industries has not been stressed here. However, it is generally known that the textile, bicycle, lawnmower, and many other industries will be further depressed by a continuation of tariff reductions. Should we cease to protect these industries because of the good accruing to the consumer and the economy as a whole? The answer to this would be "Yes" if such general economic benefits were a probable result of a lower tariff policy. This is simply not the case. In fact, H. R. 1 will have the effect of helping one small group of producers at the expense of another small group of producers for the general benefit of no one, except the latter group.

Looking once more to the realities of the allover problem, it seems that a low-tariff policy has become the popular symbol of an economic cure-all. People and nations have attached themselves to this symbol in the hope of something better for themselves. The mysterious economic curing power attributed to a lower United States tariff policy is pure mythology. Sooner or later all nations must solve their economic problems through their own efforts and by facing up to the real problems. The time for this action is now and United States tariff policy is not the real problem.

The rational balance in the allocation of traded resources between nations cannot be expected to happen automatically. There must be tariffs and standby measures for the protection of all countries from dislocations in their internal economies. United States tariffs are now the eighth lowest in the world and the facts simply do not justify further reduction.

Mr. REED of New York. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. SIMPSON].

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I have requested this time to express my approval and endorsement of the recommittal motion which will be offered in due course and upon which we will have a chance to vote.

Mr. Chairman, I listened very carefully as our distinguished minority leader read a letter from the President of the United States, a carefully worded letter, a letter written after great thought unquestionably, yet a letter which in no-wise stated opposition, if you please, to the motion to recommit to be offered by the gentleman from New York [Mr. REED]. I suggest that the reason for this is that the recommittal motion, when it passes, will lead to bringing the bill back immediately for passage with the amendment as provided. I suggest, further, that inasmuch as the administration had full and complete knowledge of what the recommittal motion will be, the President, had he been fully determined that the bill should not be amended, would have stated so in the letter which he wrote and sent here.

When this bill came before the Committee on Ways and Means—and I was there for practically every day of the hearings—I repeat, when the bill came before the committee, it contained, among other things since stricken from it, a proviso that the President, this man whom we all honor and respect, the bill then contained a provision that the President might in one of these reciprocal trade agreements trade off and in effect abrogate or cancel the provisions of section 22 of the Agricultural Adjustment Act; that barrier, if you please, that tariff which properly protects the farmers of the United States as we proceed to conduct farming in our country with price supports of which I approve. So I say to you, there is no stigma attached to any proposal which removes from the President one of the most onerous and difficult jobs that a past Congress imposed upon a former President of the United States. Having made a mistake some years ago in empowering another President, forcing upon him the obligation of changing a decision reached by a Tariff Commission—that in itself should be no objection to our subsequently correcting that error. That is what we are trying to do in this recommittal motion.

Think well for a moment of your own congressional district. Perhaps it is a district wherein, as the gentleman from Mississippi who spoke this morning said, the major operation of his district is completely protected by an embargo, or because you produce some goods which cannot be produced elsewhere in the world, or perhaps has a tariff protecting your industry which is not among the thousands that will be cut in these Japanese negotiations starting next week, or perhaps there is some other barrier protecting, generally speaking, as the gentleman from Louisiana said, where there is a quota upon the importation of the highly competitive products from Cuba with a product of that gentleman's district. Oh, it is easy for those gentlemen to come in here in the interest of their own constituency and advocate that the tariffs be cut somewhere else in the world. There are some Members here who have congressional districts where right today little factories in the textile field or oil or coal mines or the manufacture of bicycles or scarves or any one of a dozen different items—you know what they are—where those factories have shut down or are going to shut down in the near future because of what has happened under existing law with respect to tariff cuts. They are afraid of what may happen in the immediate future in further cuts which they anticipate in the tariff.

Mr. Chairman, those industries—and you know what they are in your own congressional district—have come to you repeatedly in past years and have said, "We need relief." And what have you told them? You have told them to go to the Tariff Commission and, in accordance with the law of the United States, under the escape-clause provision—perhaps you said "a clause for which I voted to protect you, my own neighbors in my own congressional district"—to go to the Tariff Commission and make out a case and prove that the injury which caused them to shut their plant down was due to tariff cuts, and they would get relief.

And those people have been coming in here, unless there were some who realized that perhaps no good would come by their coming here, for the decision reached by the Tariff Commission

would be overruled by the action of the President.

Yet, acting in good faith, you advised them to come, and they have come to Washington and they have made out their cases. They have hired attorneys, which has meant $5,000, $10,000, $15,000, $20,000 of expense or more, to present their cases to the Tariff Commission. They did the very best they could.

They make out a case and they persuade the Tariff Commission—yes, unanimously—that the Tariff Act, by reason of changes in reciprocal trade agreements, has caused them injury or threatens to put them out of business. The Tariff Commission makes a recommendation that assistance be given to that industry, and then—and this is the unjust part of this escape clause—some competitor of that man, some importer, some man who makes his money by bringing goods in from abroad, goes around to some other agency, perhaps to the Department of Commerce, or in some way or other he gets word to the President of facts which were not in front of the Tariff Commission and which may be compelling and effective and true and should have been and would have been grounds for the Tariff Commission to make a different decision. But he brings them in, and the President, acting properly at that time, overrules the Tariff Commission's findings. Then the situation is that the constituent of the Member of Congress, having been told that he would have a fair hearing here in Washington, has not had a fair hearing, because he has had no opportunity whatever to reply to the word that came in by the back door, if you please; that word that never went to the Tariff Commission, that word which influenced the President to overrule the Tariff Commission.

We are undertaking to correct that. We are undertaking in this motion to recommit to provide that when your neighbor comes to Washington to appeal to the Tariff Commission for relief from unjust and unreasonable cuts in the tariff which are threatening his existence—we are saying to him, "You are going to get a fair hearing in Washington. No longer will there be a back-door approach by your competitor, because the Tariff Commission will be the sole source of the information upon which the decision whether to help you or not will rest, unless it is a national security matter. And then every one of us bows to the decision of the President, if he is willing to state that irrespective of the finding of the Tariff Commission, the Nation's security requires some action other than that recommended."

That is all we are doing in this. Oh, there will be those who will rise and point out a lot of technicalities and allege that we are doing things that we think we are not doing. But, my friends, if you want to be able to stand up and tell any of your constituents that you have done the least little thing, one minor thing, anything, if you please, to help him, to help that unemployed worker, to help the man who complains about the imports of any product, whatever it may be. If you want to provide him with the proof that you have tried to help him, you have got to vote for this recommittal motion. If you do not, you are telling him in effect, "We want you to continue under the same method of partial relief that has been followed up to date, a method by which your opponent can come in through the back door and make arguments which he should have presented to the Tariff Commission."

That is what we are up against. I urge respectfully that those who want to do right by their friends and neighbors back home support this motion.

I was on the Randall Commission. I did not agree with their findings. While I have the chance, I should like to point to one suggestion they made with which I am not in complete disagreement. That is, that the escape clause and the peril-point provision—and it is printed here in heavy ink in their book of recommendation—should be retained. However, the statute should be amended expressly to spell out the fact that the President is authorized to disregard findings under those provisions whenever he finds that the national interest of the United States requires it; a recommendation, if you please, that we spell out the limits of the authority within which the President should be able to disregard the findings of the Tariff Commission. They use the words "national interest" in this, and I say that "national security," the words used in the recommittal motion to be offered by the gentleman from New York [Mr. REED], are likewise words which include the national interest of the United States.

Mr. DORN of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. DORN of South Carolina. I wish to commend the distinguished gentleman from Pennsylvania for so ably presenting our cause here today.

Mr. SIMPSON of Pennsylvania. I thank the gentleman.

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. Could the distinguished gentleman tell us this: Can we tell our constituents and our industries and the men who work in the plants that they can have the utmost faith in this Commission and the President, that when an industry is threatened in the United States of America they are going to have protection?

Mr. SIMPSON of Pennsylvania. The President of the United States names the members of the Commission. All the witnesses will then come in before the Tariff Commission. Those who presently go around to the back door, who do not even go to the Tariff Commission, when they know they are going to be bound by the findings of the Tariff Commission will present their evidence direct to the Tariff Commission.

Mr. KEARNS. I commend the gentleman.

Mr. KELLEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. KELLEY of Pennsylvania. What benefit would this amendment have for the coal industry?

Mr. SIMPSON of Pennsylvania. I thank the gentleman for bringing that matter to my attention. It is a very vital matter.

In the law, where authority is provided to the Tariff Commission to act under the escape clause, the Tariff Commission is permitted to make recommendations as to the kind of remedy it thinks should be given and which, if given, would give relief to the complainant or the applicant.

Assume that the coal industry makes a case before the Tariff Commission so that the Tariff Commission wants to help. Then it has the authority to say, "We direct that a quota be imposed upon the importation of that product"—namely, residual oil, which is in the gentleman's mind—"which is causing the injury to the coal industry."

Mr. KELLEY of Pennsylvania. It is my impression that the Tariff Commission has taken the position heretofore that the complaint of the coal industry should not be given attention because there is no importation of coal to compete with our own coal, and that oil is another product.

Mr. SIMPSON of Pennsylvania. It is true it is another product, but it is competitive, and the law permits the competitive phase to come into the matter. I am sure that given the finding of facts by the Tariff Commission, namely, the injury to the coal industry as the result of the importation of residual oil, the Tariff Commission could recommend the imposition of a quota.

Mr. KELLEY of Pennsylvania. Does the gentleman think it would, under the amendment?

Mr. SIMPSON of Pennsylvania. I certainly would urge it.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. CURTIS of Missouri. Is it not true that a vote to recommit would in effect be a tightening up of the procedures under this law, while a vote against the bill itself would not in any way affect the treaties that are already in existence? In fact, they go on into perpetuity.

Mr. SIMPSON of Pennsylvania. The reciprocal trade agreements already in effect remain in effect irrespective of what we do here today. Should we approve the recommittal motion, we would be writing into the law a provision which would apply to the tariff cuts already made under existing trade agreements.

Mr. COOPER. Mr. Chairman, may I inquire whether the gentleman from New York has any further requests for time?

Mr. REED of New York. Mr. Chairman, we have no further requests for time.

Mr. COOPER. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. MILLS] to close debate on the pending bill.

Mr. MILLS. Mr. Chairman, I find myself today on the side of some very

illustrious people in support of the bill, H. R. 1, introduced by my distinguished friend, the gentleman from Tennessee [Mr. COOPER], to carry out the trade program recommended to the Congress by President Eisenhower. I find on the floor the Speaker of the House and the former Speaker of the House in support of the program, and I always welcome an opportunity when I can side with those two gentlemen when they are joined together in any undertaking. I think it is worthy of consideration by any Member of the House that these two very outstanding Americans who have served so long and so eminently in the House of Representatives are joined together on this important issue.

Mr. Chairman, I hesitated to trespass upon the time of the House, but after over 3 weeks of hearings in the Committee on Ways and Means on the bill, I came to certain very definite conclusions and impressions about what we ought to do in this very trying time, and I wish my colleagues would permit me the opportunity of taking just enough time to give you some of those impressions.

These hearings, it is universally agreed, offered the committee an opportunity to learn fully the views of both the proponents and the opponents of the legislation. As my colleagues on the committee know, I devoted a considerable amount of time to hearing the testimony offered and I made every effort to understand and appreciate the views of those who appeared before us. I feel that the time was well spent and that the committee and this Congress have benefited from this review; that in a truly constructive sense, it has made a contribution to the legislative process.

It is difficult, if not impossible, to listen to 3 weeks of testimony on a piece of pending legislation that is of such considerable importance to the welfare of the Nation, without coming away with some fairly vivid impressions. I should like to share with you the major impressions that I have gained and that have led me to the conclusion that passage of H. R. 1 without amendment is essential to the national interest.

The importance of this legislation to the national interest was evidenced by the weight of testimony in support of the bill on the part not only of the Cabinet officers of the administration, but also of the major public and civic organizations representing every sector of the economy. There was universal recognition that an expansion of foreign trade has been good and will continue to be good for employment and production, for the consumer and the taxpayer, and for our international relations. And this was not denied by most of the witnesses on the other side. They usually agreed that an expansion of trade was good for the country—provided their own industry was protected.

The wide geographic representations in support of the bill gave evidence that these gains have been spaced across the economy, to the advantage of every State and county. The pervasive nature of the effect of foreign trade on our economy was illustrated by the information we received on the relationship of foreign trade to other component parts of our gross national product. With a gross national product of about $360 billion in 1953, exports of merchandise alone accounted for 4.3 percent of the total and exports of merchandise and services for 5.8 percent. Now 5.8 percent may not by itself bulk very large. But compared with the other expenditure items that go to make up the gross national product and which, therefore, sustain employment and account for our high standard of living, this 5.8 percent is important indeed.

We think of cash receipts from farming as being crucial and they are; yet this element accounted for 8.6 percent. Residential nonfarm construction is often regarded as a bellweather of our economy, yet its percentage share was 3.3 percent, less than the 5.8 percent accounted for by exports. Business purchases of capital equipment, another important and dynamic contributor to the gross national product, made up 6.7 percent. Should there be any proposal to restrict or hamper the growth and development of any of these sectors of the American economy, the hue and cry raised would be very vigorous indeed, and rightly so. Yet to endanger our exports is viewed in certain quarters as not dangerous at all. We are not talking about something infinitesimal.

Five and eight-tenths percent of a gross national product of $360 billion is $20 billion and with a total employment of 65 million, we can conclude that close to four million jobs depend on this export trade. In some instances, for individual firms and enterprises, export trade is far more important than the average of 5.8 percent. One-third of our exports were accounted for by products which rely upon foreign markets for more than 25 percent of their sales. Agricultural products are important of course. For example, in the crop year 1952–53 which was a year of low exports, we exported one-fourth of our wheat and one-fifth of our cotton, and over one-fifth of our tobacco. But export sales are no less important for the industrial sector of the economy. We do not often hear, for example, that 6 percent of our cotton textile production is sold abroad as against imports equal to one-half of 1 percent of production. Exports of synthetic fabrics are 7.1 percent of total production, while imports were only one-fifth of 1 percent. Actually, 70 percent of our total exports consist of manufactured goods, produced with highly paid American labor and with American capital and know-how.

This fact alone bears examination. How can we continue to sell abroad $20 billion worth of goods and services in competition with lower wages abroad? How is it that foreigners are so anxious to buy our goods that they have not as yet been able to earn all the dollars that they want in order to satisfy this demand for our products. The answer came out sharp and clear. It is because of our greater productivity, our ingenuity and the wealth of our resources. These have contributed to the amazing growth of our economy over the past 20 years, just as they have contributed to the expansion and increased competitiveness of our exports. It was surprising to me to learn, as I sat and listened to the testimony of the opponents of this bill, that almost all the industries that appeared in opposition to H. R. 1 had participated in this growth. Not only that, but many of them had a sizable stake in exports; certainly in my judgment more of a stake in exports than they had reason to fear imports. The chemical industry was well represented in opposition to the bill, yet its total sales have grown by 10 percent a year until they reached $20 billion in 1954. It exported $900 million of its products, while imports of chemicals were less than one-third as much. And not more than a fraction of these imports could be regarded as competitive with domestic production. The cotton textile industry exports 6 percent of its production, above the national average, and exports are 10 times the amount of imports. We were told by representatives of the industry that our domestic textile mills are the most efficient in the world and many of their products can compete anywhere and the record proves it.

Our coal producers have not participated in the growth of the economy in recent years. Since 1947, the peak year of bituminous coal production, demand fell off by 155 million tons, of which export demand fell by 35 million tons. Yet the coal industry still sold abroad in 1953, 34 million tons of coal and we were told by representatives of that industry that American coal can outsell European coal in the European market, if only Europeans could earn enough dollars.

The committee heard about a dozen representatives of the domestic petroleum-producing industry. They opposed H. R. 1 and urged the committee to impose a quota on crude-oil imports. Yet this is an industry which has increased its production from $1.3 billion in 1939 to $6.4 billion in 1953. Their proposal would drastically reduce oil imports from the Middle East and Indonesia and create the gravest of problems in our relations with those areas.

And then the committee heard some representatives of the electrical equipment industry express their concern about foreign competition in the field of United States Government purchases of heavy electrical equipment for powerplants. This industry produced in 1954 $17 billion, exported in 1953 $800 million, while imports were $35 million. In heavy electrical equipment, imports amounted to 2 percent of United States production. The most important recent Government contracts for this type of equipment have been awarded to United States manufacturers by virtue of their low bids. This demonstrates to me, taken in the light of their export figures, that they are perfectly able to compete with foreign manufacturers if they have to, but if they can avoid it by opposing this bill they will be happy to do so.

We also heard from the photographic industry. One gentleman, president of a very successful firm, stated he was prepared to accept competition from any quarter because he felt it was in the national interest. Another gentleman, president of another firm, stated that he feared the effects of future competition, yet his firm has had perhaps the

most phenomenal expansion in sales and assets in the last 10 years in the entire industry.

By what distortions of economic logic, we may ask, do the representatives of these great and dynamic industries arrive at their opposition to H. R. 1? How can they reconcile their opposition to imports with their own important economic interest in continued and expanded exports abroad? We can fairly conclude that this defies reason. This is nothing but fear. Time and time again we learned, through inquiry, that it was not the present which troubled them but it was only the future they feared. And in many cases, it was this same fear that prompted their opposition to the trade-agreements program throughout its long and successful history.

Can we assume that these people are better prophets today than they have been over the past 20 years? Can we afford to make legislation of such importance to the Nation on the basis of the unreasoned timidity of a few? Can we safely undercut and circumscribe this modest bill by making exceptions for each and every commodity that alleges fear of future injury?

We cannot. We dare not do that if we seek to serve the interest of the Nation. And I would add that neither would it be serving the real interest of those who oppose the legislation.

Mr. Chairman, I resent as an affront to commonsense the proposition that imports are bad. Aside from the fact that the simple arithmetic of foreign trade tells us that we cannot export if we do not import, we must recognize that imports themselves are employment creating and add to our standard of living. The bulk of our imports, I should say 80 percent, enter this country in raw or semifinished form. A large part of their final value is added by American industry here at home. This sustains production and employment and results in a flow of cheaper goods to the consumer.

What we are concerned with in this legislation are the imports that now enter the United States over the duty. Out of a total of merchandise imports of $11 billion in 1953, there were almost $5 billion of dutiable imports. We are concerned with $5 billion of imports compared to a gross national product of $360 billion. For these imports, it is proposed in H. R. 1 that the authority be given to reduce duties by 15 percent over a 3-year period, that duties be reduced by a maximum of 50 percent where there are no imports or imports are negligible, and that those duties which exceed 50 percent ad valorem can be reduced to 50 percent ad valorem. This is very modest authority.

Compared to the authority of the 1945 act which permitted a maximum reduction of duties by 50 percent, H. R. 1 is indeed moderate. In the case of about one-third of all dutiable imports, the 50-percent authority has been exhausted. In the case of another one-third, it has not been used at all. For the remaining third, something less than the full 50-percent authority has been used.

In this last case, the authority that remains under the 1945 act exceeds in many instances that contained in H. R. 1. We can conclude, therefore, that if the maximum authority contained in H. R. 1 were used, it would represent an increase in authority to reduce tariffs, as compared with the present authority, for perhaps only one-half of all dutiable imports.

By giving up the authority of the present act for H. R. 1, we are substituting, in effect, the ability to make selective reductions in duties on commodities which can bear these reductions. Moreover, we are providing that these reductions take place gradually over a period of 3 years. Retained also in the bill are the peril-point and the escape-clause provisions which, before the fact of a tariff reduction, as well as after, afford a restraint on the extent of that reduction. We must conclude that, by any test, this is minimum legislation which would mark modest progress along a well-tread path.

The fact that this bill contains adequate safeguards needs emphasis. I have given this matter much thought. I am convinced that the peril-point and the escape-clause provisions of law are adequate as they now stand. We have in operation today machinery to implement both these provisions; machinery which provides an opportunity for the careful review of all issues and the interests of all parties. In the crucial area of safeguarding our defense-essential industries, I am satisfied that the so-called Symington amendment to the Trade Agreements Extension Act of 1954 expresses clearly the intent of the Congress in this vital area. We must recognize that the responsibility for administering our national defense programs resides in the Executive, and that, accordingly, the national defense aspects of our foreign-trade policy will be given due consideration. We certainly have no reason to assume that this has not been the case in the past or that it will not be the case in the future.

But there is a larger and broader problem of national security bound up in the passage of H. R. 1. That is the contribution that can be made to the growing strength and solidarity of the free-world community. Not the least important of the considerations that fall under this heading is the need for expanded trade within the free world as an alternative to the expansion of trade with the Soviet bloc. Passage of H. R. 1 would serve an essential need, therefore, of our foreign policy.

By failing to enact this legislation or by seeking to amend it we would be running the risk of undercutting our bipartisan foreign policy. This is the real issue of national security involved in this legislation.

Mr. Chairman, we have made in the postwar period a substantial investment in the economic strength and military security of the free world. The $32 billion of economic aid alone that we have given our friends and allies has been described by Sir Winston Churchill as "the most unsordid act in human history." We can begin to secure, for our benefit, the good returns on that investment by enacting the legislation that is now before us.

Mr. Chairman, a fair question is—has anyone proved a case against enactment of this bill? The record will indicate that none has.

During the hearings I heard testimony from some of the great industries of the country talking about what would happen to them under this program. For 12 years, my friends, I have heard the same argument time and time again by the opponents of the bill. All of those industries, without exception, have enjoyed a growth under this program, almost without exception. They have all enjoyed a part of this export trade.

I heard the textile people say, "We are fearful of what will happen in the future to the textile industry." I heard them say it 12 years ago. I heard the chemical industry, which is enjoying a ratio of 3 to 1, exports as against imports, say to the committee, "We are fearful of what will happen in the future." I heard them make the same statements 12 years ago. Yes. We heard the oil people talk about what is happening to them, an industry that has grown from $1,500,000-000 in 1939 to in excess of $6 billion in 1954. During all these years we have all heard that over and over again. Then we heard the coal people tell us, "If you will put a quota on the importation of residual oil, and deprive the people on the Atlantic Coast of enough residual oil to permit us to produce 11 million more tons of coal, it will go a long way toward a solution of the problems which we have."

I ask my friends from the coal industry who have seen, as I have already pointed out, the consumption of coal drop since 1947 by 155 million tons, 35 million of it in losses on exports, if that is all they have to hold out as a ray of hope to the people involved in this great industry. It is not all the hope that I have in mind for them. The great thing that the coal industry wants today to restore itself is an increase in exportation of coal. That is what you need. Are you going to get it by opposing this legislation? Are you going to get it in this amendment that will be offered in a motion to recommit? I have been told that the coal industry has not found a way to go to the Tariff Commission to make a case under the escape clause. I have been told that by people in the coal industry. The only thing you could put in this bill that would have done one scintilla of good, if even that, would have been an import quota on residual oil, and that is not in the motion to recommit with instructions that will be made by the gentleman from New York [Mr. REED]. What would have happened to the oil industry, according to your own statement? Nothing but a quota on the importation of crude oil, but there is nothing in the amendment that will be offered by the gentleman from New York that would permit the imposition of quotas. The Department of Defense has always said that the importation of crude oil is necessary in the national interest.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield.

Mr. SIMPSON of Pennsylvania. Is it not true that the Tariff Commission could have recommended a quota on the importation of oil, if it saw fit to do so?

Mr. MILLS. Exactly. But you say in your motion that the President does not have to follow the Tariff Commission when the national security is involved.

Mr. KELLEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield.

Mr. KELLEY of Pennsylvania. You spoke about crude oil.

Mr. MILLS. I was talking about both.

Mr. KELLEY of Pennsylvania. Crude oil is dumped on the eastern shores——

Mr. MILLS. The gentleman means residual oil?

Mr. KELLEY of Pennsylvania. I mean residual oil.

Mr. MILLS. I have spoken of residual oil.

Mr. GAVIN. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield.

Mr. GAVIN. Certainly the gentleman knows that in our defense it is necessary to maintain the production that we now have and build up tremendous reserves so that in event we did get into an emergency as we are now, we would have a reserve. You are permitting the importation of 1,200,000 barrels a day and killing the incentive of the independent producers to go out and find new reserves of oil, so that if we get into an emergency where we are cut off from South America and Iran, where would we get the oil to fight a war?

Mr. MILLS. I understand the gentleman's position.

Friends of mine in the oil industry have all in the last several years assured me that our reserves of oil in the United States have grown, that they are not declining.

Let me get down to a specific discussion of this question in our committee if I may. The gentleman from Pennsylvania, I think, left the impression, or tried to, with the membership of the House that the President himself was not opposed to this motion to recommit today. I ask my friend the gentleman from Massachusetts, the minority leader, this question: If in his knowledge the President of the United States is for or against this motion to recommit? Would the gentleman answer my question?

Mr. MARTIN. The letter stated that the President is in favor of H. R. 1 as it came out of the committee. I have no direct knowledge as far as the motion to recommit is concerned, but from all the information I get, he is opposed to the motion to recommit.

Mr. MILLS. The gentleman from Massachusetts read a letter dated yesterday.

Mr. MARTIN. Yes.

Mr. MILLS. That was before the debate reflected that there was a specific motion to recommit and the President could not have known of it at the time he dictated the letter.

Mr. MARTIN. I think in all honesty to the Members of the House it can safely be said that he is opposed to the motion.

Mr. MILLS. I think the gentleman is entitled to speak for the President on any matter, and I take his view that the President is opposed to it.

Let us look now briefly at the argument of the gentleman from Pennsylvania, because he did not believe it was a mistake to give a former President of the United States discretion in removing these concessions under the escape clause provision. He voted for such at the time it was offered here, he voted to allow a Democratic President, mind you, to have discretion. Whether or not he would follow the recommendation of the President of the United States, the gentleman voted for it. Today the gentleman says that I cannot—and if I misquote the substance of the gentleman's statement I apologize—the gentleman in effect said today: "I cannot bring myself to believe that it is safe to turn over to the President of the United States responsibility for deciding whether or not the concession in a trade agreement shall remain in effect or be removed; I want that responsibility turned over completely to some commissioners who are not elected by the people of the United States. I want to turn it over to some people who are appointed to office."

I daresay that there is not a Member of the House who can get on his feet today and give the name and let alone the background of the 6 members of the Tariff Commission, or even 3 or 4 of them, who are now serving. What is so sacrosanct about the Tariff Commission as compared to the man who occupies the highest position not only in the land but the highest responsible office within the gift of man in the world today? I certainly do not mean to imply that we do not have capable men on the Commission.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLS. Yes, I yield to the gentleman. Have I misquoted his position?

Mr. SIMPSON of Pennsylvania. I hope everyone will listen exceedingly carefully as to what I said a bit ago. I said that there was a back-door approach, namely, that complainants would not go and testify before the Commission but would go to other departments of government and get their case in where the complainant had no opportunity to object or to repeat their statement.

I say that every one of those words was used. This amendment was brought to our attention and was made by the gentleman who now objects to it.

Mr. MILLS. Wait a minute. Now, the gentleman knows I did propose an amendment in committee; and the impression has been spread around over the House that my amendment was the same as now being proposed by Mr. REED. I will read my amendment so everybody can hear.

Mr. SIMPSON of Pennsylvania. The amendment to which reference has been made was considered in the committee and the vote was 12 to 12.

Mr. MILLS. I will read it if he has not a copy and ask if it is in any respect like that in the motion of the gentleman from New York.

Mr. SIMPSON of Pennsylvania. I was referring to the gentleman's argument. I did not use the words that were read out.

Mr. MILLS. Let me read the amendment. There has been some doubt expressed about it. This is the sum and substance of it:

> The findings and conclusions of a majority of the Commission respecting injury shall be given the fullest consideration by the President in making his determination.

What are you doing in your motion? You are telling the President that his judgment shall not prevail, you are telling the President only at a time when the national security is involved you will rely upon his judgment. Any other time it has got to be that of the Tariff Commission.

The gentleman from Illinois [Mr. MASON] let the cat out of the bag. He said that you could trust the President of the United States in military affairs. Is that the prevailing thought behind this motion? I hope it is not. I have greater confidence in any man who occupies the White House than to say that in some things I will trust him but in other things I prefer to trust somebody I may not even know, whose background and qualifications I may know nothing about.

Yes, Mr. Chairman, we will make a grievous mistake. We do not just affect this program as it relates to the future if we adopt this motion to recommit. What the gentleman from New York is doing by his motion is to strike the heart and the core out of everything that has been accomplished under present agreements. I say to you advisedly that I would much prefer to have no extension of the Reciprocal Trade Agreements Act at all than to give the authority which they propose in this motion to recommit to hit at everything that has been done to now. This would undo our present agreements. Do not be misled, those of you who have come into the Congress for the first time, this is not a new fight. These fears are not newly expressed. Let me leave this thought with you, whether or not you want to look to the fears of something that might happen or do you want to look to the fears of doing some irreparable injury to our national interest itself at a time when the President has said he can cut down on some phases of our Armed Forces because we intend to emphasize the economic aspects of this fight in the cold war.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. MILLS. I yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Pennsylvania. What would the gentleman do to help the unemployed or the industries which are suffering back in his own State? What will he tell them?

Mr. MILLS. I hope the gentleman is not going to take a position that you can

help somebody who is unemployed by making somebody else unemployed through the elimination of the opportunity of exporting the surplus products that come from the farms and the factories of the United States, and I call your attention to the fact that 70 percent of all that was exported in 1954 came from our factories. It did not all come from the farms.

The CHAIRMAN. All time has expired. Under the rule the bill is considered as having been read for amendment. No amendments are in order to the bill except amendments offered by direction of the Committee on Ways and Means.

Mr. COOPER. Mr. Chairman, I desire to announce that there will be no committee amendments other than those appearing in the bill.

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk read as follows:

Page 3, line 7, after the word *"Provided"*, strike out the balance of the line down to and including the word "paragraph" in line 8 and insert "That."

The committee amendment was agreed to.

The Clerk read as follows:

Page 3, line 11, insert *"Provided further,* That the enactment of the Trade Agreements Extension Act of 1955 shall not be construed to determine or indicate the approval or disapproval by the Congress of organizational provisions of any foreign trade agreement entered into under this section."

The committee amendment was agreed to.

The Clerk read as follows:

Page 4, line 20, strike out "not being" and insert "normally not."

The committee amendment was agreed to.

The Clerk read as follows:

Page 4, line 21, strike out the word "being" and insert: "normally."

The committee amendment was agreed to.

The Clerk read as follows:

Page 4, line 24, after the period insert "This clause shall not apply with respect to any article unless it is identified in the list required by section 3 (a) of the Trade Agreements Extension Act of 1951, as amended (19 U. S. C., sec. 1360 (a)), for possible consideration as an article which is normally not imported into the United States or is normally imported into the United States in negligible quantities."

The committee amendment was agreed to.

The Clerk read as follows:

On page 8, line 23, strike out the word "may" and insert "shall, as soon as practicable."

The committee amendment was agreed to.

The Clerk read as follows:

Page 11, line 3, after the word "intention", insert "to negotiate."

The committee amendment was agreed to.

The Clerk read as follows:

Page 11, strike out all of line 25 down to and including all of line 7 on page 13.

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BOLLING, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, pursuant to House Resolution 142, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en bloc.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. REED of New York. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. REED of New York. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. REED of New York moves to recommit the bill H. R. 1 to the Committee on Ways and Means with instructions to report the same back to the House forthwith with the following amendments:

Page 11, line 21, after "SEC. 4.", insert "(a)."

Page 11, after line 24, insert:

"(b) The second sentence of subsection (c) of section 7 of the Trade Agreements Extension Act of 1951, as amended (19 U. S. C., sec. 1364 (c)), is hereby amended to read as follows: 'If, as a result of investigations and hearings, a majority of the commissioners voting find that a product on which a concession has been granted is (as a result, in whole or in part, of the duty or other customs treatment reflecting such concession) being imported in such increased quantities (either actual or relative) as to cause or threaten serious injury to the domestic industry producing like or competitive products, such finding shall be final and conclusive and the President shall take action to prevent or remedy such injury unless he determines that the national security requires that no such action be taken. If the President does not, within 60 days, take the action referred to in the first sentence of this subsection, he shall immediately submit a report to the Committee on Ways and Means of the House and to the Committee on Finance of the Senate stating why he has not made such adjustments or modifications, or imposed such quotas'."

Mr. COOPER. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

Mr. REED of New York. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 199, nays 206, not voting 30, as follows:

NOT VOTING—29

Bentley	George	Riley
Bolton, Oliver P.	Hébert	Shelley
Clevenger	Hess	Short
Cole	Hoffman, Mich.	Siler
Davis, Tenn.	Jackson	Smith, Wis.
Dawson, Ill.	Johnson, Calif.	Spence
Dempsey	Judd	Steed
Diggs	Kluczynski	Talle
Eberharter	McGregor	Wolcott
	Radwan	Young

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hess for, with Mr. Hébert against.

Mr. Steed for, with Mr. Spence against.

Mr. Dempsey for, with Mr. Shelley against.

Mr. Short for, with Mr. Judd against.

Mr. Cole for, with Mr. Kluczynski against.

Mr. Johnson of California for, with Mr. Bentley against.

Mr. Riley for, with Mr. Dawson of Illinois against.

Mr. Hoffman of Michigan for, with Mr. Diggs against.

Mr. Oliver P. Bolton for, with Mr. Jackson against.

Until further notice:

Mr. Davis of Tennessee with Mr. Siler.

Mr. Eberharter with Mr. Wolcott.

Mrs. ST. GEORGE, MR. VELDE, and Mr. HOLT changed their vote from "yea" to "nay."

Mr. REECE of Tennessee. Mr. Speaker, by misunderstanding, when the name of Mr. PRIEST was called, thinking it was my name I answered "yea." His name was called on the second rollcall. There is a possibility that my response was recorded after Mr. QUIGLEY'S, and I wish just to call the attention of the Clerk to that possibility.

I voted "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. COOPER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 295, nays 110, not voting 29, as follows:

[Roll No. 12]

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Hess against.

Mr. Judd for, with Mr. Short against.

Mr. Prouty for, with Mr. Johnson of California against.

Mr. Jackson for, with Mr. Hoffman of Michigan against.

Mr. Dempsey for, with Mr. Riley against.

Mr. Kluczynski for, with Mr. Cole against.

Mr. Dawson of Illinois for, with Mr. Oliver P. Bolton against.

Mr. Shelley for, with Mr. Siler against.

Until further notice:

Mr. Spence with Mr. Bentley.

Mr. Steed with Mr. Wolcott.

Mr. Eberharter with Mr. McGregor.

Mr. Davis of Tennessee with Mr. George.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO REVISE AND EXTEND REMARKS

Mr. COOPER. Mr. Speaker, I ask unanimous consent that all Members who spoke on the bill just passed may have permission to revise and extend their remarks.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

GENERAL LEAVE TO EXTEND REMARKS

Mr. COOPER. Mr. Speaker, I ask unanimous consent that all Members desiring to do so may have 5 legislative days within which to extend their remarks on the bill H. R. 1.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

ADJOURNMENT OVER TO TUESDAY NEXT AND LEGISLATIVE PROGRAM FOR NEXT WEEK

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet on Tuesday next.

Mr. ARENDS. Mr. Speaker, reserving the right to object, and I will not object, will the gentleman please inform the House as to the legislative program for next week?

Mr. McCORMACK. I will be very happy to do so.

Of course, there will be no session on Monday next if the unanimous-consent request is granted.

On Tuesday, which is George Washington's birthday, the Farewell Address will be read, and there will be no legislative business on that day.

On Wednesday, we will take up the bill, H. R. 3952, the cotton-acreage allotment bill, and H. R. 2581, a bill providing for the construction of aeronautical research facilities. It is understood that if there is a rollcall in connection with either one of those bills, whether on recommittal, which I do not expect, or on the passage, such rollcall will go over until Thursday. The leadership has an agreement to that effect.

On Thursday, we will take up the bill H. R. 4048, the Federal Voting Assistance Act of 1955, and there is the understanding that any rollcall, of course, will be had on Thursday.

There are several committee investigations and resolutions which have been reported out of the Committee on Rules, which will be taken up not before Wednesday, and other resolutions may be reported between now and that time.

Mr. ARENDS. I thank the gentleman and withdraw my reservation of objection.

Mr. COOPER. Mr. Speaker, reserving the right to object, I regret exceedingly having been so busily engaged here on the bill which has just been passed by the House that I have not had time to confer with the Speaker, or with the leadership, but I hope that consideration might be given sometime next week to the bill for the extension of certain existing excise, present corporate tax rates in the event that action can be taken and it can be ready for consideration.

Mr. McCORMACK. Of course with that notice, next week is so scheduled that the bill could be considered if it comes out of committee, but I want it distinctly understood that there will be no legislation before Wednesday and that if there is any rollcall in connection with legislation that is considered on that day it will go over until Thursday.

Mr. ARENDS. Then it is possible that the bill referred to by the gentleman from Tennessee [Mr. COOPER] could be considered on Thursday or Friday of next week.

Mr. JENKINS. Mr. Speaker, I shall object to that unless the gentleman from New York [Mr. REED] is consulted.

Mr. McCORMACK. The gentleman, of course, will recognize that the gentleman from Tennessee is just giving me information.

Mr. COOPER. I am just trying to give notice that something may possibly come along about taxes.

Mr. McCORMACK. The gentleman from Massachusetts is glad to get the information. There is nothing that the gentleman from Massachusetts has announced that will be inconsistent with the bills coming up next week.

Mr. JENKINS. All I am trying to do is to protect our committee and the gentleman from New York [Mr. REED], who has not been consulted.

Mr. McCORMACK. The committee is thoroughly protected.

Mr. REED of New York. Mr. Speaker, will the gentleman yield?

Mr. ARENDS. I yield.

Mr. REED of New York. This bill is a matter of considerable importance. It is essential in extending excise taxes to do it as quickly as possible before people go on a buyers' strike. So I think it is very important.

Mr. McCORMACK. The gentleman's committee has a meeting on Monday.

Mr. REED of New York. That is right.

Mr. McCORMACK. Tuesday is Washington's Birthday. The gentleman would not be ready to bring it up before Thursday anyway.

Mr. REED of New York. Of course, I cannot say what will happen now.

Mr. McCORMACK. I knew, of course, that excise taxes were expiring, but I had no knowledge that there might be such immediate action by the committee. But the situation next week is such that of the committee reports it out the leadership can very easily cooperate with the chairman of the Ways and Means Committee in bringing the bill to the floor, but it would not be before Thursday.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that when the House adjourns today it adjourn to meet on Tuesday next.

Is there objection?

There was no objection.

THE FEDERAL VOTING ASSISTANCE ACT OF 1955

Mr. O'NEILL, from the Committee on Rules, reported the following privileged resolution (H. Res. 149, Rept. No. 62) which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4048) to permit and assist Federal personnel, including members of the Armed Forces, and their families, to exercise their voting franchise, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on House Administration, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

COTTON MARKETING QUOTAS

Mr. COLMER, from the Committee on Rules, reported the following privileged resolution (H. Res. 150, Rept. No. 63) which was referred to the House Calendar and ordered to be printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 3952) to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended. After general debate, which shall be confined to the bill, and shall continue not to exceed 1 hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

CHAIRMAN AND VICE CHAIRMAN, FEDERAL RESERVE BOARD

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, on December 7, 1954, I wrote the President and asked that he consider filling the vacancy on the Federal Reserve Board and also to appoint a vice chairman so that we may have a duly constituted Board of Governors, including a chairman and vice chairman.

This morning I was notified by a spokesman for the President that he was appointing on the Board Charles Noah Shepardson, of College Station, Tex., to be a member of the Board of Governors of the Federal Reserve System. Nothing was said about the appointment of a vice chairman. I sincerely hope that a vice chairman is also appointed by the President.

Section 242 of title 12 of the United States Code under the subject of Selection of the Board of Governors it is stated:

Of the persons thus appointed, 1 shall be designated by the President as chairman

and 1 as vice chairman of the Board to serve as such for a term of 4 years.

I sincerely hope that if the President has not already done so he will appoint a vice chairman of the Board.

A GLORIOUS RECORD

Mr. PHILBIN. Mr. Speaker, I ask unanimous consent to extend my remarks in four instances at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. PHILBIN. Mr. Speaker, I was highly privileged recently to receive an invitation to the exercises at Leominster in my district, celebrating the Jewish tercentenary observance.

It is of course most appropriate that loyal Jews and loyal Americans of Fitchburg and Leominster should set aside a time to hold exercises commemorating this historic and inspiring occasion.

The history of the Jewish people in America is one that cannot be read without profound emotional reactions of unbounded pride and deepest gratitude. Like the history of your people in other parts of the world it is marked by struggle and painstaking, unselfish work, though unlike your experience elsewhere, it has happily never been accompanied by persecution, and that is surely to the glory of America just as your great and unexcelled contributions to our peerless Nation is to the glory of the Jewish people.

I wish that time and space permitted me in this communication to deal extensively with this soul-stirring record of religious loyalty, racial advancement, and public and patriotic contributions. History shows that there were Jews in the originial colonies before 1650. In the year 1654 a company of Jewish refugees arrived from Brazil and settled in New Amsterdam, now New York City, where though they were enjoined by the Dutch authorities from holding public religious assemblies, nevertheless established their own worship upon their arrival in the town which then embraced only 800 persons.

Like people of my own faith and other faiths throughout history, pursued by narrowness and prejudice, the Jews of New Amsterdam gathered among themselves in their homes in accordance with time-honored, age-old customs of your people just as soon as there were enough people to hold public worship. And it can be said to their everlasting credit that they scorned and ignored the threat of oppressive action against the profession of their religious beliefs.

In 1656 this gallant band established the first Jewish congregation in North America, Sheerith Israel—Remnant of Israel. These early beginnings have grown into the proud edifice of Judaism which we behold in America today. Strangely enough its first Rabbi was one Saul Brown who came to the congregation from Newport, R. I., and he officiated regularly at the synagogue. It was not long before other Jewish communities were formed—Rhode Island in 1658; in Savannah, Ga., by the Jews who came to this country with Oglethorpe; in Charlestown, S. C.; Philadelphia; Richmond, Va.—all in colonial times—so that in 1877 there were at least 277 congregations in this country. Of your own knowledge you realize how that number has grown, so that the number of congregations in America today probably embraces in the neighborhood of 5,000 congregations or even more.

It would be pertinent for Americans who treasure liberty and cherish the personal freedom guaranteed by our American institutions to ask the question, Why did these Jews come to America and where did they come from? The answer is one which could as well be given by other races and sects in our country whose members came here principally to escape tyranny and persecution.

While the Jews came to New Amsterdam from Brazil, they had fled from Spain and Portugal and they came so that they could worship the God of their choice in the traditions of their noble ancestors. As we can imagine, this first small company of Jews who came to America were destitute, and their personal belongings were seized by the shipowners to pay their passage and two of their number were taken into custody until all had been paid. As I pointed out, the authorities were hostile, but in time they were won over by the exemplary conduct of the new visitors and finally declared that Jews were legally allowed to reside and trade in New York. How well they have resided and multiplied and how well they have traded and become wealthy and powerful is a matter of record.

Now there was one condition under which the Dutch authorities admitted the Jews to New York and that was that the poor among them should be supported by their own group. Such a provision was not necessary as we know in order that Jewish people would take care of their own, because throughout all history they have lavishly responded to the call of family and loved ones and friends and fellow Jews, as well as human brethren of every faith, every nation. But at once the shining result came in the form of societies to care for the orphan, the sick, the helpless, the poor, and to provide education.

These were some of the early Jewish contributions to the spiritual, economic, and social life of early America. It is gratifying to note that 2 years before the arrival of the first Jew in New York, Rhode Island passed a statute to the effect that "all men whatever nation soever they may be, that they be received inhabitants, not only of the town but receive the same treatment as Englishmen and any laws to the contrary notwithstanding," and of course that was one of the first, if not the first great charters of religious freedom in this country, in fact it was a classic declaration of the political and legal equality of man.

As a result, Newport, R. I., became the favorite refuge of Jews in North America and they honorably busied themselves with the development of the town, and though they had religious liberty, they could not be admitted to citizenship but that right was soon to follow and the steps by which the Jews secured equality of rights and political power in the various colonies is one of the most inspiring chapters of our history. Not long ago I personally attended an historic observance at the original synagogue at Newport, a most impressive experience.

Let it be said to the eternal credit of our early American founders that the Jews appeared nowhere to have been ill-treated. In some parts of the country, they met with prejudice and discrimination, and, Lord knows, such baneful and reprehensible feelings are still expressed, though fortunately in greatly decreasing and negligible measure.

On the whole, the early Jews found early America during the Colonial days a veritable paradise in comparison with European countries with their visitations of confiscation of their property, and ruthless persecution driving them from pillar to post and across the face of the earth as hapless, almost hopeless wanderers who, thank God, never lost hope and courage.

Then came the war for independence or the great American Revolution, and in the great epochmaking event which shook the world and securely established free institutions for the first time in history, the Jews rendered services of inestimable value. They contributed most generously of their means. Though but a small minority, they were found in military contingents from all the colonies and their records as soldiers were brilliant.

In the financing of the war we should hardly expect the Jews to be unheard from, and we can proudly assert that in 1776 when credit for the cause of freedom was greatly lacking, the names of Jews were conspicuous among the subscribers—Benjamin Levy of Philadelphia, Benjamin Jacobs of New York, Samuel Lyon of New York, Isaac Moses, Hyman Levy and others.

One of these early financial bulwarks of the Revolution was a Polish Jew, Haym Salomon, of cultivated people, liberally educated, an accomplished linguist speaking several languages. While he preceded his famous fighting countrymen, Pulaski and Kosciusko, to this country, when the Revolution began he early demonstrated his love of independence and his loyalty to the cause. He was chosen Paymaster General of the Army and Navy of France in America, Financial Adviser to the French Minister and other European governments. He took a foremost part in transferring foreign subsidies to this country when there was a pressing need for money and successfully negotiated advances upon these funds before they actually arrived here.

For these many vital services he would not accept compensation and he died a poor man because of his patriotism and unselfish donations of his own fortune. His monetary gifts to the Government were probably greater than that of any other person, but not one penny of the gigantic debt which the country owed him has ever been paid.

It could well be said, therefore, by the great historian Lecky that "Hebraic mortar cemented the foundations of American democracy," and this not only pertains to Jewish spiritual ideals but also to Jewish contributions in blood and treasure.

Someone has said that "the Jewish faith is predominantly the faith of liberty," and indeed the history of mankind and America eloquently gives testimony to this fact. To do their full part as citizens in building, protecting and sustaining the Nation, zealously to enlist in its defense in every war, energetically to promote its material advancement, boldly and industriously to plan and work for its progress, its betterment, its prosperity—that has been the aim and the lot of the Jew since he first laid foot upon these sacred shores.

Sustainer of patriotic causes, supporter of charity and humane benefaction for his fellowman regardless of race or creed, devoted to his family, his community and the betterment of American life, the Jew has never been found wanting when the call has come for help and assistance for any worthy humanitarian cause.

The gallantry of Jewish fighting men is indelibly inscribed in the annals of every American war. In Flanders Field where lie our heroic dead, the Star of David is mingled with the Cross in beauty and everlasting marble. In remote places of the world, where heroes sleep who gave their all in defense of America, that Star and that Cross are intertwined in a bond of immortal affection and loyalty enshrined in the hearts of Americans forever—a gleaming example of sacrifice and utter devotion for all the world to behold.

It is another historical fact of more than ordinary moment that Jews were financial backers of Columbus, the discoveror of the Western World. Little did they think then that in years to come their contributions to his cause would open the doors of the world's greatest Nation as refuge for the oppressed, the afflicted, the down-trodden and the persecuted of so many lands. Thus the Jews played a significant part in laying the deeper foundations for America and in building the great Nation of which we are so proud to be citizens.

History rolls out its scroll and the Jews now reside in every part of the United States. They embrace every section, every part of the fabric of America. They have penetrated into all realms of American life. They are leaders in business, in manufacturing, in merchandising, in finance, in all phases of our economic life. They are preeminent in law, medicine, pharmacy, teaching, the stage and the theater—and in spiritual callings. They grace the arts, sciences, music, public service. They are inextricably bound up with every human activity in the Nation.

The voices of doctrinaires of hate, prejudice and antagonism have at times been raised against them, but these voices have been only as the beating of a tiny feather upon a giant rock. The corrosive, soul-consuming poison of malice and envy has been neutralized and rendered inert by the tidal sweep of fair-minded, tolerant American public opinion which, true to our Constitution and its noble principles conclusively rejects the ignoble preachments of bias and prejudice and accords to the Jew, as to all other persons living under our flag, that toleration, understanding and feeling of human brotherhood which forms the unalterable precious cornerstone of American liberty.

The storms of passion and hatred may rage. The fury of soulless materialism and communism may sound throughout the world. The forces of evil may conspire and act to undermine and overthrow the blessed freedom we enjoy. But they will all go down to defeat. The Cross and the Star will endure because they are the symbols of strength of the Almighty, and the indomitable purpose of our forebears. If we but persevere in the faith of our Nation, determined to protect it from all danger and at any cost, He will continue to bless our great land and hasten the day of universal peace and amity among men and nations.

It is a special privilege and honor for me as your Congressman to laud and commend you as Jews and as Americans upon the excellence of your citizenship and the magnificence of your contributions to our beloved Nation. For your achievements and accomplishments, your unstinted charity, your public spirit, your devotion to community, State and Nation, I am proud to express my own humble pride and gratitude.

And to those of you in my district, and more especially tonight to those of you in this congregation, whose loyal friendship, unwavering support, and inspiring cooperation have so greatly lightened my burdens, I wish to express my particular and most sincere thanks.

To Solomon Rosenbaum who extended your kind invitation to his brother Felix, both of whom I am greatly indebted to for unceasing interest, stalwart friendship, and invaluable assistance with the duties and tasks with which I am charged in these critical days, I am anxious to make most sincere and heartfelt expression of my appreciation. To all of you I pledge my continued friendship and understanding.

This anniversary is joyous, prideful, and rewarding for all of you. It has been justly earned and richly deserved by you and your illustrious predecessors. May there be many more celebrations in the years to come to mark the tireless vigor of your great and ancient people and its memorable contributions to our glorious country.

And in closing, my greetings, best wishes, and kindest regards to all.

LITHUANIAN INDEPENDENCE

Mr. PHILBIN. Mr. Speaker, I am greatly privileged to join with my distinguished colleagues on the occasion of the 37th anniversary of the declaration of Lithuania's independence to hail and salute the gallant people of that afflicted nation.

Although the Iron Curtain is drawn across this great nation and presently shuts out its people from the rest of the free world, the day will come when the tyranny, oppression, and persecution Lithuania now suffers will be banished. The day of liberation will come and free institutions will again be reestablished.

One who dwells briefly upon the glorious history of this nation realizes full well the struggle and sacrifice it has made throughout the centuries to maintain its freedom. Subjected to cruel and unjust oppression and domination, visited with every species of tyranny, denied by force of arms of the ordinary rights of free men, the Lithuanian people never lost heart. They struggled, they bled, they fought and died to preserve or to regain their independence and free way of life. Their indomitable spirit and will to be free was never suppressed and time and time again they threw off the yoke of the oppressor.

Their present plight is sad and tragic. Oppression again stalks their land and holds them in unspeakable bondage. But the lamp of freedom still burns in their hearts and will not be extinguished. Their will to be free will never be suppressed, their struggles to achieve independence will ever continue until the great goal of liberation is finally won.

In this epochal struggle, in this brave, gallant battle for independence, our own great Nation must continue to give the Lithuanian people encouragement and assistance. We must never fail them. We must let them know and understand that we share their aspirations and that we intend to do everything in our power to speed the day when their nation will again enjoy the fruits and blessings of freedom.

Hail to this great people. May they soon regain their precious liberties.

JUSTICE FOR POLAND

Mr. PHILBIN. Mr. Speaker, February 7 marked the 10th anniversary of the infamous Yalta agreement wherein the rights, liberties and very lives of millions of free peoples were cynically bartered away for the nerve-wracking armistice of today.

This anniversary serves to remind all Americans that most of our current foreign problems stem from the unconscionable concessions made at Yalta—concessions which have resulted in fastening tyranny and dictatorship upon so many struggling, helpless peoples, who desperately seek their freedom.

It was at Yalta that China, North Korea, the Baltic and Balkan nations and the heroic nation of Poland and others were taken into the orbit of communistic oppression.

Let us realize on this 10th anniversary of the Yalta debacle that there can be no lasting peace any where or any time that is based on tyranny, exploitation and injustice. The history of mankind demonstrates that fact. The liberation of oppressed nations behind the Iron Curtain is, therefore, not only imperative on moral grounds. Until freedom is restored in these unhappy lands, there can be no real order and no lasting peace in the world. A peace movement based on oppression, the continuance of insidious Communist infiltration and the appeasement of those working for the destruction of freedom can only end in disaster.

This Nation must stand for its principles, it must protect its rights, its interests, and its liberties. It must defend the cause of freedom. It can never waver or retreat before the forces of Red aggression. Our Nation must stand fearlessly for security and peace predicated upon principles of justice and morality—confident of our great strength—military, economic, and spiritual—united in our determination, come what may, to protect our cherished way of life.

To the great historic Polish people, we send today a very special message of our sympathy, our faith in them, and our intention to work for their early liberation. Victim of a perfidy so base and black that it indelibly stains the escutcheon of world diplomacy, ruthlessly deprived of their blessed birthright, the Polish people fight on.

Their fight is our fight because it is the fight for liberty, democracy, justice, morality, and human decency. It is the fight for every precious value of the free world and the free way of life.

I plead with our great President and his counselors to renew and intensify the work he began some time ago for the liberation of nations like Poland—all nations bereft of body, liberty, and soul by Soviet terror and force. Thus, free Poland will rise again.

SYNTHETIC HYSTERIA AND NATIONAL COURAGE

Mr. PHILBIN. Mr. Speaker, there is belief in many quarters that the diplomatic path has been cleared for the admission of Red China into the United Nations and the abandonment of Nationalist China and the acknowledgment of complete Red domination of the Chinese mainland and adjacent islands, including Formosa.

I hope sincerely that no such commitments have been made by this Government because, if carried out, they would sound the death warrant for democratic institutions and free governments in Asia. They would represent crass appeasement of aggressors and the Soviet bloc.

During the time that I have been privileged to serve in this body, I have witnessed several repetitions of the so-called crisis technique in foreign policy and defense matters. The pattern is always the same, usually based on arousing American public opinion by spreading fear and hysteria among the people concerning the dreadful things that will happen if certain policies are not followed.

We were told not too long ago that the Chinese Communists were merely harmless agrarians seeking land reform, not connected with Moscow in any way. Subsequent events demonstrated the untruths and fallacies embodied in these statements. The harmless agrarians blossomed as full-blown Marxists controled by Russia mounting ruthless aggression in Korea.

First, the atomic bomb, and now the hydrogen bomb, has been used to excite the people and prepare the way for appeasement of Communist nations. We were constantly reminded of the vast destructive power of these atomic and fusion weapons. No well-informed person would deny their awful power. But we are regaled almost ad nauseum with commentary and descriptive maps of areas that purportedly could be destroyed in this country. We are constantly reminded of the terrible fate that awaits us in the event of atomic attack. The press sometimes abounds with lurid accounts of possible atomic catastrophe based on reports by the Atomic Energy Commission, the military or civil defense.

In these reports, so far as I know, there has never been any reference by commentary, maps or otherwise to show the damage that could be inflicted by our tremendous striking force upon the potential enemy. The implication would seem to be that only this Nation could or would suffer from such devastating attacks, although we well know of our large supply of these dread weapons and our ability to deliver them. We also know the importance of proper precautionary civil-defense measures even though they may be only partly effective.

The American people well understand the horrible nature of the atomic and fusion bombs. They are not deluded either about their power or about the prospect that they would be used if the potential enemy believed the time was ripe. But Americans are not given to easy fears or futile hysteria. They appraise international and domestic dangers calmly and with reasoning eyes. Although aware of the dangers, they are not obsessed by irrational fears. They realize that they have to live with this reality regardless of what may come. They will have to live in the world of these dreadful weapons until some way can be found to outlaw them. Only the Soviets can open that door. So long as they refuse to negotiate honestly on universal disarmament and atomic control, we must be adequately prepared.

Americans have always possessed the courage to stand up for their rights and fight for their Nation and this generation of Americans is no exception. This is a God-fearing country and it ill becomes those who are spreading hysteria stories about these new weapons to launch constant horror reports depicting the frightful consequences of modern weapons far beyond the scope or need of legitimate civil defense plans and preparations.

These are facts already known to the American people and while hysteria is promoted by these tactics in some places, the rank and file of the people are far from terrorized into surrender of their judgments, but rather tend in the other direction of developing sharp suspicions concerning the motives of those who are spreading such horror stories in the country. In a word, the people understand the presence and tactics of "crisis" psychology.

If the purpose of these stories is to justify appeasement of world communism, it is destined to frustration and defeat because the American people will never willingly give up their legacy of freedom. They would rather die than to abandon their free institutions. The atomic, the hydrogen bomb, and the terrible new modern weapons all put together can never swerve them from this inflexible purpose because, so far as Americans are concerned, death is preferable to the loss of their liberties and they will never be dragooned by Russia or any other nation into surrendering their precious birthright.

Americans are not afraid of the atomic bomb or of any other force save the living God in whom we place our trust and faith. Their aim is not "peace at any price," but peace through justice, security, and strength.

Let all would-be aggressors note and all subversives realize that America has the means and the indomitable will to protect its sacred soil and way of life against aggressors and conspirators.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks in the RECORD, or to revise and extend remarks, was granted to:

Mr. CELLER.

Mr. VAN PELT the remarks which he expects to make in Committee today and include several letters.

Mr. COON.

Mr. BOW in the remarks he will make today in Committee of the Whole and include extraneous material.

Mr. CHUDOFF.

Mr. DOYLE and accompany the same with appropriate material.

Mr. WILLIAMS of New Jersey and to include extraneous matter.

Mr. FLOOD and include a statement he made before the Committee on the Post Office and Civil Service on postal pay raises.

Mr. PHILBIN and to include extraneous matter.

Mr. MCGREGOR (at the request of Mr. JENKINS) and to include certain tables.

Mr. VAN ZANDT.

Mr. LATHAM (at the request of Mr. BOW) and to include extraneous matter.

Mr. MILLER of Nebraska on the subject Value of Irrigation.

ADJOURNMENT

Mr. ALBERT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 14 minutes p. m.), under its previous order, the House adjourned until Tuesday, February 22, 1955, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

451. Under clause 2 of rule XXIV, a letter from the Director, Legislative Liaison, Department of the Air Force, transmitting the Air Force's semiannual report entitled "Research and Development Procurement Action Report," for the period from July 1, 1954, to December 31, 1954, pursuant to section IV of Public Law 557, 82d Congress was taken from the Speaker's table and referred to the Committee on Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the

Clerk for printing and reference to the proper calendar, as follows:

Mr. THORNBERRY: Committee on Rules. House Resolution 148. Resolution providing for the consideration of H. R. 2581, a bill to promote the national defense by authorizing the construction of aeronautical research facilities and the acquisition of land by the National Advisory Committee for Aeronautics necessary to the effective prosecution of aeronautical research; without amendment (Rept. No. 59). Referred to the House Calendar.

Mr. BURLESON: Committee on House Administration. H. R. 4048. A bill to permit and assist Federal personnel, including members of the Armed Forces, and their families, to exercise their voting franchise, and for other purposes; with amendment (Rept. No. 60). Referred to the Committee of the Whole House on the State of the Union.

Mr. ENGLE: Committee on Interior and Insular Affairs. H. R. 103. A bill to provide for the construction of distribution systems on authorized Federal reclamation projects by irrigation districts and other public agencies; with amendment (Rept. No. 61). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'NEILL: Committee on Rules. House Resolution 149. Resolution for consideration of H. R. 4048, a bill to permit and assist Federal personnel, including members of the Armed Forces, and their families, to exercise their voting franchise, and for other purposes; without amendment (Rept. No. 62). Referred to the House Calendar.

Mr. COLMER: Committee on Rules. House Resolution 150. Resolution for consideration of H. R. 3952, a bill to amend the cotton marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended; without amendment (Rept. No. 63). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BASS of Tennessee:

H. R. 4199. A bill to include the fees for issuing money orders as a part of the gross postal receipts of post offices; to the Committee on Post Office and Civil Service.

By Mr. COOPER:

H. R. 4200. A bill to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates; to the Committee on Ways and Means.

By Mr. REED of New York:

H. R. 4201. A bill to provide a 1-year extension of the existing corporate normal-tax rate and of certain existing excise-tax rates; to the Committee on Ways and Means.

By Mr. CARLYLE:

H. R. 4202. A bill to direct the Secretary of the Interior, in cooperation with the Secretary of the Army, to erect, at Dunn, N. C., a suitable memorial to the late Maj. Gen. William Carey Lee; to the Committee on House Administration.

By Mr. FERNÓS-ISERN:

H. R. 4203. A bill to amend the Federal Employees' Compensation Act to eliminate the provision by which United States citizens born in Puerto Rico are denied certain benefit rights assured under such act to other United States citizens; to the Committee on Education and Labor.

By Mr. GRANAHAN:

H. R. 4204. A bill to amend section 8 of the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mr. GREEN of Pennsylvania:

H. R. 4205. A bill to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes; to the Committee on Post Office and Civil Service.

H. R. 4206. A bill to increase the rates of basic compensation of officers and employees in the field service of the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. KEOGH:

H. R. 4207. A bill to extend benefits under the civil-service retirement system to certain former Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. KARSTEN:

H. R. 4208. A bill to increase from $600 to $700 the personal-income-tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemption for old age or blindness); to the Committee on Ways and Means.

By Mr. PRICE:

H. R. 4209. A bill to increase from $600 to $700 the personal-income-tax exemptions of a taxpayer (including the exemption for a spouse, the exemption for a dependent, and the additional exemption for old age or blindness): to the Committee on Ways and Means.

By Mr. MACK of Illinois:

H. R. 4210. A bill to provide a method whereby wartime service can be established in the case of veterans of the Spanish-American War whose records cannot be found; to the Committee on Veterans' Affairs.

By Mr. MOSS:

H. R. 4211. A bill to amend subsection 12 (f) of the United States Housing Act of 1937, as amended, to provide for relinquishment and disposal of farm labor camps; to the Committee on Banking and Currency.

By Mr. O'KONSKI:

H. R. 4212. A bill to provide for the purchase by the Federal Civil Defense Administrator of certain radiological detection instruments, devices, and equipment, and the leasing to the States for civil defense purposes; to the Committee on Armed Services.

H. R. 4213. A bill to extend wartime rates of compensation to veterans and their dependents for service-connected disabilities incurred during periods when individuals may be inducted for training and service in the military or naval service; to the Committee on Veterans' Affairs.

By Mr. ROGERS of Texas:

H. R. 4214. A bill to amend the Natural Gas Act to require the sale of natural gas for irrigation purposes in certain instances; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMPSON of New Jersey:

H. R. 4215. A bill creating a Federal Commission to formulate plans for the construction in the District of Columbia of a civic auditorium, including an Inaugural Hall of Presidents and a music, drama, fine arts, and mass communications center; to the Committee on the District of Columbia.

By Mr. WHITTEN:

H. R. 4216. A bill to amend the Commodity Credit Corporation Charter Act of 1948 in order to constitute the Administrator of the Foreign Agricultural Service as ex officio member of the Board of Directors of that Corporation; to the Committee on Banking and Currency.

H. R. 4217. A bill to provide that the Secretary of the Army shall return certain mineral interests in land acquired by him for flood-control purposes to the former owners of such lands; to the Committee on Public Works.

By Mr. WIGGLESWORTH:

H. R. 4218. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment, and to provide certain services to the Girl Scouts of the United States of America for use at the Girl Scout Senior Roundup Encampment, and for other purposes; to the Committee on Armed Services.

By Mr. BERRY:

H. R. 4219. A bill to amend the act of August 15, 1953 (Public Law 280, 83d Cong.), so as to require the consent of the Indian tribes to the assumption of jurisdiction by States over civil and criminal actions arising in Indian country; to the Committee on Interior and Insular Affairs.

By Mr. BROOKS of Louisiana:

H. R. 4220. A bill to grant constructive service to members of the Coast Guard Women's Reserve for the period from July 25, 1947, to November 1, 1949; to the Committee on Armed Services.

By Mr. CELLER:

H. R. 4221. A bill to amend section 4004, title 18, United States Code, relating to administering oaths and taking acknowledgments by officials of Federal penal and correctional institutions; to the Committee on the Judiciary.

By Mr. FISHER:

H. R. 4222. A bill to extend the authority for the enlistment of aliens in the Regular Army; to the Committee on Armed Services.

By Mr. HAND (by request):

H. R. 4223. A bill to amend the Army and Air Force Vitalization and Retirement Equalization Act of 1948, approved June 29, 1948; to the Committee on Armed Services.

By Mr. HAYS of Arkansas:

H. R. 4224. A bill to permit the disposal of surplus property to publicly owned water districts; to the Committee on Government Operations.

H. R. 4225. A bill authorizing the Administrator of Veterans' Affairs to convey certain property of the United States to the city of North Little Rock, Ark.; to the Committee on Veterans' Affairs.

By Mr. METCALF:

H. R. 4226. A bill to promote the economic use of Indian lands, alleviate and adjust the heirship problem involved in Indian trust or restricted allotments, and for other purposes; to the Committee on Interior and Insular Affairs.

H. R. 4227. A bill to amend section 512 of the Servicemen's Readjustment Act of 1944 to permit a veteran who has received a direct loan for the construction or improvement of a farmhouse to repay such loan in annual installments; to the Committee on Veterans' Affairs.

By Mr. ROGERS of Colorado:

H. R. 4228. A bill to authorize and direct the Civil Service Commission to make a study of the classification of, and rates of basic compensation payable with respect to, technical, scientific, and engineering positions in the classified civil service; to the Committee on Post Office and Civil Service.

By Mr. VINSON:

H. R. 4229. A bill to provide running mates for certain Staff Corps officers in the naval service, and for other purposes; to the Committee on Armed Services.

By Mr. HARRIS:

H. R. 4230. A bill to encourage the discovery, development, and production of manganese-bearing ores and concentrates in the United States, its Territories, and possessions, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LONG:

H. R. 4231. A bill to amend Veterans Regulation No. 7 (a) to clarify the entitlement of veterans to outpatient dental care; to the Committee on Veterans' Affairs.

By Mr. BROOKS of Louisiana:

H. R. 4232. A bill to increase the normal tax and surtax exemption, and the exemption for dependents, from $600 to $1,000; to the Committee on Ways and Means.

By Mr. FLOOD:

H. R. 4233. A bill to amend title II of the Social Security Act to reduce the age at which individuals may become entitled to benefits thereunder from 65 to 60 in the case of men and from 65 to 55 in the case of women; to the Committee on Ways and Means.

By Mr. KEOGH:

H. R. 4234. A bill to suspend for 1 year certain duties upon the importation of aluminum and aluminum alloys; to the Committee on Ways and Means.

By Mr. RAY (by request):

H. R. 4235. A bill to amend Public Law 2, 73d Congress, to provide care for disabled veterans having neuropsychiatric ailments; to the Committee on Veterans' Affairs.

By Mr. TOLLEFSON:

H. R. 4236. A bill to amend the Social Security Act to provide a direct Federal pension of at least $100 per month to all American citizens 65 years of age and over who have been citizens 10 years or more, to be prorated according to the cost of living as on January 3, 1953; to the Committee on Ways and Means.

By Mr. WHARTON:

H. R. 4237. A bill to amend section 503 of the Veterans' Readjustment Assistance Act of 1952 to allow certain veterans to file claims for mustering-out payment prior to July 16, 1955; to the Committee on Veterans' Affairs.

By Mr. COON:

H. J. Res. 221. Joint resolution to designate the lake to be formed by the McNary lock and dam in the Columbia River, Oreg. and Wash., as Lake Aldrich; to the Committee on Public Works.

By Mr. CRETELLA:

H. J. Res. 222. Joint resolution authorizing the creation of a Federal Memorial Commission to consider and formulate plans for the construction in the city of Washington, D. C., of an appropriate permanent memorial to the memory of the great Italian navigator and discoverer of America, Christopher Columbus; to the Committee on House Administration.

By Mr. WHITTEN:

H. J. Res. 223. Joint resolution to restore to the States certain rights affected by recent Supreme Court decisions; to the Committee on the Judiciary.

By Mr. GENTRY:

H. J. Res. 224. Joint resolution authorizing the President of the United States of America to proclaim the period August 21–27, 1955, as American Law Student Week; to the Committee on the Judiciary.

By Mr. DAVIDSON:

H. J. Res. 225. Joint resolution to provide for a more effective control of narcotic drugs, and for other purposes; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States requesting the appropriation of funds necessary to enable the Corps of Engineers to complete the preliminary investigations and planning for the John Day project, etc.; to the Committee on Appropriations.

Also, memorial of the Legislature of the State of Oregon, memorializing the President and the Congress of the United States requesting that funds be made available to begin the planning and construction of the flood control facilities needed at the Green Peter and Cougar projects, etc.; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CARLYLE:

H. R. 4238. A bill for the relief of Spiros Kaloniktis; to the Committee on the Judiciary.

H. R. 4239. A bill for the relief of Pavlos Michael Campourelis; to the Committee on the Judiciary.

By Mr. COUDERT:

H. R. 4240. A bill for the relief of Miss Susana Clara Magalona; to the Committee on the Judiciary.

By Mr. CRETELLA:

H. R. 4241. A bill for the relief of Domenico Giordano; to the Committee on the Judiciary.

By Mr. DELANEY:

H. R. 4242. A bill for the relief of Dr. George Petkov; to the Committee on the Judiciary.

H. R. 4243. A bill for the relief of Bernard Ellbogen; to the Committee on the Judiciary.

H. R. 4244. A bill for the relief of Vincenzo Micich; to the Committee on the Judiciary.

By Mr. HOLIFIELD:

H. R. 4245. A bill for the relief of Mrs. Esther Rodriguez de Uribe; to the Committee on the Judiciary.

H. R. 4246. A bill for the relief of Morris Plevin; to the Committee on the Judiciary.

By Mr. JARMAN:

H. R. 4247. A bill for the relief of Mrs. Alphonsine Keller; to the Committee on the Judiciary.

By Mr. KILDAY:

H. R. 4248. A bill for the relief of Miguel Angel Guzman Nunez; to the Committee on the Judiciary.

By Mr. McINTIRE:

H. R. 4249. A bill for the relief of Orrin J. Bishop; to the Committee on the Judiciary.

By Mr. MAILLIARD:

H. R. 4250. A bill for the relief of Leong Man Faye; to the Committee on the Judiciary.

H. R. 4251. A bill for the relief of Lt. Col. Arthur J. Laib, Jr.; to the Committee on the Judiciary.

By Mr. O'HARA of Illinois (by request):

H. R. 4252. A bill for the relief of Asher Ezrachi; to the Committee on the Judiciary.

By Mr. POAGE:

H. R. 4253. A bill for the relief of Henry M. Lednicky; to the Committee on the Judiciary.

By Mr. REECE of Tennessee:

H. R. 4254. A bill for the relief of the Warrensburg Foundry, Midway, Tenn.; to the Committee on the Judiciary.

By Mr. RODINO:

H. R. 4255. A bill for the relief of Barnett Warner; to the Committee on the Judiciary.

By Mr. TUMULTY:

H. R. 4256. A bill for the relief of Dragutin Krize Kurich; to the Committee on the Judiciary.

H. R. 4257. A bill for the relief of Sisters Bianca Capasso, Caterina Giudice, Giuseppa Capone; to the Committee on the Judiciary.

By Mr. WHARTON:

H. R. 4258. A bill for the relief of Luigia Pelella; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Report of Foreign Shipyards

EXTENSION OF REMARKS
OF
HON. JOHN W. BRICKER
OF OHIO
IN THE SENATE OF THE UNITED STATES

Friday, February 18, 1955

Mr. BRICKER. Mr. President, there was appointed last year a subcommittee on Interstate and Foreign Commerce for the purpose of making an inspection in many countries of Europe concerning shipping, shipyards, and others matters of concern to the Committee on Interstate and Foreign Commerce. The Senator from Maryland [Mr. BUTLER] and the Senator from Connecticut [Mr. PURTELL] were appointed on the subcommittee, and accompanying them was the subcommittee counsel, Mr. Webster.

They made a report to me as chairman of the committee at that time, which I think contains very valuable information for the Members of the Senate. I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE OF INTERSTATE AND
FOREIGN COMMERCE,
December 30, 1954.

Hon. JOHN W. BRICKER,
Chairman, Committee on Interstate and Foreign Commerce, United States Senate, Washington, D. C.

DEAR SENATOR BRICKER: You will recall that by letter dated July 29, 1954, you authorized Senator WILLIAM A. PURTELL, our subcommittee counsel, Mr. Webster, and me to visit various European countries for the purpose of inspecting certain foreign shipyards and investigating other matters of concern to this committee. Accordingly, I am writing you in behalf of our group to report on our European trip.

On August 20, 1954, we sailed from New York aboard the S. S. *United States*.

We arrived in LeHavre on August 25 and proceeded directly to Paris. As you know, Senator PURTELL had a previous commitment to meet various United States Senators and Congressmen in Vienna on August 27 for the purpose of representing our country at the interparliamentary conference held in that city until September 2. As a result, we parted that evening after a final conference in Paris, Senator PURTELL taking the train to Vienna and Mr. Webster and I taking another train to Bremen.

However, before we parted we mapped out our itinerary. Since I had to be back in the States by no later than September 8, 1954, we decided I should spend my entire time in Germany; at Bremen, Hamburg, and Bonn. We also agreed that when I left Germany on or about September 1, 1954, Mr. Webster would go on to Rome in order to meet Senator PURTELL when he arrived from Vienna on or about September 3, 1954. On leaving Rome they planned to visit Genoa, Italy; Rotterdam, Holland; London, England; Clyde, Scotland; and Dublin, Ireland. If all went well—as in fact it did—they intended to return aboard the *United States* when it sailed from Southampton on September 23, 1954.

Of course, I am very sorry that previous commitments would not permit me to revisit the splendid shipyards in Holland and Italy, or to see for the first time the world-famous yards on the Clyde or in Belfast. However,

in view of the scope and importance of German shipbuilding, I am not sorry that I refrained from trying to visit yards in other countries. To the contrary, my only regret is that I did not have more time to spend in Germany.

It seems to me that it would be burdensome to weigh down the body of this letter with a multitude of statistical information. Therefore, while now and then I will allude to a statistic or two worth noting, I will include most of that type of material in various accompanying enclosures.

This is not to say that I consider the enclosures routine or meaningless. Indeed, I have reason to believe that some of them, especially those dealing with current costs of building ships in various European yards, may prove to be of value to the Maritime Administration, the General Accounting Office, and the Appropriations Committees. While I am not so naive as to believe that Senator PURTELL and I, in the limited time at our disposal, were able to turn up complete answers to any or all of the intensely complex questions involved in the determination of construction differential subsidies, I am sure that some of the material we gathered has not been made available to our Government before.

After you have finished examining the enclosures, with your permission I will invite the Maritime Administrator, the Comptroller General, and the House and Senate Appropriations Committees to review and make appropriate use of them. In view of the fact that much of this information was supplied to us with the understanding that it would not be used in any way which might embarrass the supplier, I will request those who are permitted to use it to do so discreetly.

On August 26, Mr. Webster and I arrived in Bremen, where we were met by Consul General Edward D. McLaughlin. That afternoon we conferred at his home with him and the following people: Mr. Hermann Helms, Jr., director of Hansa Line; Mr. Manfred von Oheimb Hauenschild, director of Norddeutsche Bank A. G.; Dr. Gustav Adolf Theel, head of Bremen Institute for Shipping Research; Mr. Fred Riddle, Lykes Lines representative; Mr. William Amoss, Jr., Lykes Lines representative.

Among the subjects we discussed in addition to Germany's shipping and shipbuilding industries were various experiences which American companies such as Lykes have had in serving Bremen. We also had an opportunity to invite the views of these leading Bremen shipping authorities on the so-called 50–50 or cargo-preference bill (Public Law 604). Dr. Theel, in particular, is a noted authority in such matters and authored the Bremen World Shipping Yearbook 1952–53.

Because Public Law 664 was so new—in fact it was not signed by the President until August 26, 1954—it was to be expected that there would be a certain amount of misunderstanding concerning its provisions. However, I was gratified to note that these gentlemen recognized that the United States as a sovereign Nation cannot afford to rely on foreign shipping to meet its ocean transportation needs; and further, that our country must maintain a healthy, privately owned, and operated merchant marine. It was also gratifying to discover that they recognize that in order for us to maintain an adequate privately owned merchant marine we must to some extent subsidize it directly, or indirectly, in order for us to be somewhere near par with our low-labor-cost foreign competitors. Nor did they take exception to the premise that it is only reasonable for a nation which must subsidize its merchant marine to a substantial extent to require that at least 50 percent of the ocean cargoes owned or financed by the government of that country be carried in merchant vessels flying its flag.

Here, as in certain other places visited by Senator PURTELL and Mr. Webster, we found that the main concern which our foreign competitors have about the cargo-preference bill is based on a misunderstanding, i. e., that the bill requires that at least 50 percent of all United States exports and imports be carried on United States-flag ships. Of course it does not, applying as it does only to cargoes in which our Government has an interest as owner, financier, or guarantor. It affects in no way those transactions which are commercial rather than governmental in nature.

As in other countries, we here observed a certain amount of anxiety that we would extend the cargo preference principle to cover commercial, as well as Government-owned or financed cargoes. We did our best to dispel these fears and I feel that in large measure we succeeded.

We also observed a certain amount of concern lest other countries use our cargo-preference bill to justify them in discriminating against the ships of other nations by giving their own vessels a monopoly of all exports and imports. We pointed out that the fact that other nations might selfishly misinterpret our bill was not sufficient reason for us to repeal it; and on this score we heard no persuasive rebuttal.

That afternoon (August 26) we visited the A. G. Weser yard (Aktiengesellschaft Weser). There we were cordially received by Mr. H. W. Schliephake, vice president, who escorted us on a tour of the yard. Before mentioning a few of our observations I believe it might be helpful if I set forth some general information concerning the A. G. Weser Co. and its yards in Bremen and Bremerhaven:

Prior to 1945, the A. G. Weser Co., with shipyards in Bremen and Bremerhaven, was one of Germany's largest shipbuilding companies. However, it suffered a severe setback as a result of the war. The Bremen yard was almost completely dismantled and delivered to the Soviet Union as reparations. However, buildings and foundations of shipways, which had not been destroyed by bombing, were left intact so that an astoundingly quick reconstruction was possible after the company obtained permission to resume shipbuilding in the Bremen plant in April 1951. The Bremerhaven shipyards were not dismantled and could resume shipbuilding in 1947.

Today the company again is 1 of the 4 largest shipyards in Western Germany. In shipbuilding capacity it probably ranks third or fourth (after Deutsche Werft, Hamburg; Howaldtswerke, Hamburg; and probably also behind Howaldtswerke, Kiel); in number of employees it may rank second or even first. Employment as of June 30, 1954: Bremen yards, total, 6,000, 2,600 thereof in shipbuilding; Bremerhaven yard, total, 3,230, 2,970 thereof in shipbuilding.

The relatively high number of employees as compared with shipbuilding capacity is explained by the fact that a considerable percentage of labor force is engaged in machine construction work (turbines, diesel engines, oil tanks and containers, coupling gear, etc.).

Germany's largest and fastest prewar passenger liner, the SS *Bremen*, was built in A. G. Weser's Bremen shipyards.

The Bremerhaven shipyards, known as A. G. Weser, Werk Seebeck, specialize in fishing and whaling vessels, but they also construct passenger and freight vessels up to 16,000 deadweight tons. There are 2 shipways in Bremerhaven.

Due to the fact that shipyards and machine construction plants in Bremen had to be rebuilt completely after dismantling, the Bremen shipyards today are reportedly equipped with the most up-to-date installations. A large new shipway with travelling cranes has recently been completed. It has a length of 175 meters, width of 35 meters, and a height of 52 meters. The other four shipways in Bremen are equipped with large luffing and slewing cranes. A large hall has been erected for welding sections.

The shipbuilding capacity of the company is reported to be back to the prewar level, although only two-thirds of the former space is occupied due to more efficient production methods and layout. The company owns several floating drydocks for repair work. The largest has a lifting capacity of 16,000 tons; two smaller ones located in the Bremen free-trade zone have lifting capacities of 1,500 to 2,000 tons. The construction of the fourth floating drydock of 12,000 tons lifting capacity is nearing completion. The present equipment enables the company to construct vessels of the largest known size, including tankers, up to 60,000 (d. w. t.). The only limitation will be set by the depth of water at the shipway which is 38 feet in Bremen. The output of the Bremen yard in 1954 was 6 vessels totaling 39,200 (gr. t.), the Bremerhaven yard produced 16 units with a total of 24,800 (gr. t.).

During our visit to the A. G. Weser Bremen yard we found it very busy. In relation to the state of physical condition it must have been in at the end of the war, the yard seems now to be in excellent shape. Many new buildings already exist and others are under construction. These new structures facilitate the building or prefabrication of many ship components which would otherwise have to be constructed in the open, perhaps on board ship and subject to the impediments of weather.

Large tanker construction, for the account of various American owners and others, seemed to be the cause of much construction activity.

I was pleased to see that in spite of all the war damage, and in spite of the intensity of effort to rebuild and improve their yard, the German workers have not lost their sense of humor. For example, all that remains of one building in the yard is a large smokestack. On it is painted the German equivalent of "no smoking."

We also visited the offices of Captain Daehne, Director of the Bremen Port Authority. He showed us a magnificent mechanized model of the port. From our discussions with him and our personal observations of the port itself it was plainly apparent that Bremen has not only reconstructed many of its facilities which were damaged or destroyed during the war, but it is well on its way to making it a better and busier port than ever before. In fact their facilities for loading and unloading grain are as fine as any I have ever seen.

Of course in speaking or thinking of the port of Bremen, it would be improper to leave the impression that Bremen stands separate and apart from Bremerhaven. Indeed the ports of Bremen are a series of 5 ports, running from Bremerhaven (where the Weser River joins the North Sea) up the Weser, past Bremen-Farge, Bremen-Blumenthal, Bremen-Vegesack to Bremen. The sister towns of Bremen and Bremerhaven make up what some refer to as the "Free Hanseatic Town of Bremen."

On August 27, 1954, Mr. Webster and I left Bremen and traveled to Hamburg where we were met by representatives of the United States consulate in that city. Shortly after arrival we conferred with Dr. Roerhrike, local representative of the Germany Shipowners Association. Thus we had an opportunity to discuss with him and members of the consulate staff the cargo-preference bill. Our impressions were very much the same as those we had received from similar discussions in Bremen.

During our altogether too short weekend stay in Hamburg we made an extensive tour of the harbor in the company of Mr. Widenmann, chief of the Harbor Construction Of-

fice. We went into the areas of the port covered by the following shipyards:

1. Deutsche Werft Aktiengesellschaft: This yard has an annual output capacity of about 65,000 (gr. t.). It specializes in the construction of motor and turbine tanker vessels, motor cargo vessels, and refrigerated ships.

2. Howaltdswerke Aktiengesellschaft: This yard has an annual output capacity of approximately 50,000 (gr. t.) and builds all types of vessels. As in Bremen, we noticed a great deal of ocean-going tonnage, mainly of the tanker variety, under construction. Especially memorable was the 47,000 (dw. t.) tanker, *Ibn Saud*, being built by Howaltdswerke Aktiengesellschaft for the Greek shipping magnate, Onassis.

In Hamburg, too, we were shown an excellent model of the port. Dr. Scholvin, of the Federal Ministry of Transportation, shipping section, discussed with us the task of rebuilding the port after the war and how it has progressed.

Here, too, as in Bremen, it seems to me that this port is rapidly becoming better and busier than ever before. In particular, I was impressed with the extensive number of new dockside cargo cranes. Whereas in Bremen the semiportal type of crane has been used for many years, Hamburg, in reconstructing its port, decided to employ the full-portal type. I was informed that because of the traffic handled through Hamburg, the port organization was compelled to extend the rail-track system on the water side of the sheds which line the wharves; and that this modification entailed an alteration to the crane system. If semiportal cranes had been installed they would have had to have much larger spans than the full-portal variety. I concluded that Hamburg seems to be proceeding on the premise that it can expedite turn-around time of ships by installing more lower-priced cranes rather than fewer of the more expensive type.

Of course the strict competitive rivalry between Bremen and Hamburg is as intense as ever. Indeed it is understandable that the German officials, with whom we discussed maritime matters in both ports, radiated pride in their respective cities.

On Monday morning, August 30, 1954, Mr. Webster and I left Hamburg and arrived in Bonn that afternoon. We were met by Mr. Emerson M. Brown (Chief of the Transportation Section of the Office of Economic Affairs, HICOG) and spent the remainder of that day and evening consulting with Mr. Brown, Mr. John W. Tuthill (Acting Director, OEA, HICOG), Mr. Wier Brown (Chief of the Finance and Program Division, OEA, HICOG, and U. S. Treasury representative), and Mrs. Charles H. Breecher (Acting Chief, Industrial Services Division, OEA, HICOG). That evening we also had the honor of dining and conversing with not only these gentlemen but also with Dr. Westrick, State Secretary of the Federal Ministry of Economics; and Dr. Bergmann, State Secretary of the Federal Ministry for Transportation. I was extremely pleased to have this opportunity to talk with Drs. Westrick and Bergmann for, as you probably know, the positions which they hold are similar to positions held by members of our President's Cabinet. I understand that Dr. Westrick plans to be in the United States in the near future and I am looking forward to the honor of a visit from him.

On August 31, Mr. Webster and I conferred with Drs. Hubner and Schmid of the Shipbuilding Office of the Federal Ministry of Economics. Although we had discussed elsewhere in our trip throughout Germany the cost of vessel construction, I was especially gratified by our conference with these eminent German officials.

That afternoon we had the honor of lunching with Ambassador and Mrs. Conant at their home. Indeed, among the most pleasant and profitable experiences I had abroad was the time I spent that afternoon with the Conants. In view of the fact that EDC had just been defeated in the French Assembly, it is understandable, I believe, that our discussion was not limited to maritime matters. Naturally, I was pessimistic and skeptical about the EDC developments. However, after talking with Ambassador Conant, I felt I had a much better understanding of certain key issues and alternatives. I came away from this meeting with immense confidence in the Ambassador's judgment.

That evening Mr. Webster departed for Genoa, Italy, for the purpose of making arrangements for various conferences and meetings to be held in that city by Senator PURTELL and him when they returned from Rome. The next morning I boarded the Ruhr-Paris express for Paris, and after less than a day in that beautiful city, I left for Cherbourg where I boarded the SS. *Queen Mary*. As you know, there were no American-flag vessels whose schedules would have permitted me to stay in Germany as long as I did and still be back in the United States by September 8, 1954.

In reflecting upon our altogether too short visit to Germany, I believe that certain maritime matters are worthy of additional mention. I have not tried to set them forth in any particular order, but just as they come to mind. They are as follows:

1. In 1953 the German shipyards constructed 66 vessels for foreign account. I was informed that this was 41 percent of their total construction and amounted to 299,500 (gr. t.).

2. The German merchant fleet, as of December 31, 1953, was made up of 2,111 vessels with a total tonnage of 1,930,215 (gr. t.), an increase of 95 vessels of 411,815 (gr. t.) over the level at the close of 1952.

3. The German fleet at the close of 1953 was a little less than one-half of its prewar size of 4 million (gr. t.).

4. The *Gripsholm's* sailing on February 2, 1954, from Bremen to New York under the colors of Norddeutscher Lloyd, and the inclusion of that line in the reorganized Continental North Atlantic Westbound Freight Conference are matters of international interest and significance.

5. The total volume of cargo carried by the German fleet (including cargo carried between foreign ports) in 1953 amounted to 34,200,000 tons as compared to 28,100,000 tons in 1952, an increase of about 22 percent.

6. Passenger traffic carried by the German merchant fleet in 1953 was negligible. German freighter-passenger accommodations were limited to between 6 and 12 passengers. However, German shipowners have started to construct a new type of combined passenger/cargo vessel capable of carrying approximately 86 passengers.

7. German shipbuilding costs increased in 1953, due primarily to higher prices for steel plates and higher wages for German shipyard workers.

8. The main form of national subsidy or aid extended by Germany to encourage merchant vessel construction in that country is found in section 7D of the German income-tax law. This section has enabled German shipowners to accelerate the depreciation of their vessels. More than that, it has authorized German taxpayers receiving excess income to deduct from their taxable income, as operational expenses or business promotion costs, sums of money which they have granted or loaned without interest for the promotion of shipbuilding.

Although this income-tax provision has apparently done much to revive and promote German shipbuilding, I was informed that such tax privileges probably would be abolished effective January 1, 1955. A speech to that effect was delivered to the Bundestag on March 11, 1954, by Dr. Fritz Schaeffer, Federal Finance Minister.

After conferring with Counsel General Cloyce K. Huston, and his assistant, Mr. Alfred Dennis in Genoa, and after making arrangements for Senator PURTELL to confer with local shipping authorities, Mr. Webster joined the Senator as the latter came through Florence bound for Rome. Upon arrival in Rome, Senator PURTELL and Mr. Webster were met by representatives from the American Embassy. They were disappointed to learn that Ambassador Luce would not be in Rome during their visit. However, they had the benefit of conferring with her immediate assistant, Minister Counselor Elbridge Durbrow.

In Rome they conferred with Mr. John M. Kennedy (the Embassy's commercial attaché), Mr. Thomas A. Lane (the Embassy's labor attaché and chief of the MSA Labor Division), Captain Ralph S. McDowell (Bureau of Ship's representative in charge of offshore procurement) and Mr. Harry H. Phelan (the Embassy's minerals attaché). Their discussions covered matters such as offshore procurement, the labor situation, unemployment, costs, etc., relative to shipbuilding and ship repair.

On September 9, 1954, Senator PURTELL and Mr. Webster arrived in Genoa. That morning they visited the Ansaldo Shipyards in Genoa, where they conferred with Mr. Fredrico Lombardi, general manager of the entire Ansaldo Co., and Mr. Giuseppe Carnivale, general manager of Ansaldo's Genoa yard. They learned that this yard has 8 shipways, 2 of which are masonry and 6 of which are movable. The yard's construction capacity was reported to be between 8 and 10 merchant ships of 9,000–10,000 d. w. t. While this yard has employed approximately 6,000 workers, it was employing approximately 4,300 on September 1, 1954. Ansaldo is rightfully proud of the fact that it constructed Italy's newest luxury liner, the *Cristoforo Colombo*, in its Genoa yard.

That afternoon Senator PURTELL and Mr. Webster attended a luncheon given by the Genoa Propeller Club. In addition to having an opportunity thus to meet most of the Genoa shipping fraternity—particularly the representatives of American shipping concerns—Senator PURTELL took this occasion to express our committee's most sincere and intense interest in merchant marine matters of all sorts and kinds, wherever they arise or exist. As we had in other places throughout Europe, he invited questions concerning the part our Government plays in merchant marine affairs; and generally held himself open to answer any questions concerning our maritime policies. He emphasized the fact that we as a nation are not interested in having the largest merchant marine in the world. He stressed, however, that we intended to maintain a healthy privately owned merchant fleet of adequate size and strength to prevent a recurrence of the disastrous state of unpreparedness in which we found ourselves at the beginning of World Wars I and II.

After lunch a prearranged meeting was held where he and Mr. Webster conferred at length in the American Consulate with the following people present: Mr. Basil A. McLean, local representative of American Bureau of Shipping; Mr. Harold Vinick, local representative of Stevenson Lines; Mr. Max J. Wolfson, local representative of Lykes Lines; Mr. Alphonse Sasseville, local representative of American Export Lines; Mr. William Sharron, local representative of American President Lines; Vice Consul John H. Barber; Consul General Cloyce K. Huston.

This was a lengthy, rather comprehensive conference during which the representatives of American shipping aired freely many problems which they knew would be of interest

to Senator PURTELL. This meeting was revealing and most worthwhile.

The next morning, Senator PURTELL and Mr. Webster went to the main office of the Ansaldo Co. where they conferred with Dr. Giuseppe Rosini, managing director of the entire Ansaldo Co., and Mr. Federico Lombardi, whom they had met at the shipyard the day before. After their conference, they visited the office of the Industrialists Association of the Province of Genoa. There they conferred with Mr. Alessandro Dufour, prominent Italian industrialist and Mr. Antonio Cerruti, head of OARN, one of Genoa's finest ship repair yards. During these meetings shipbuilding and ship repair problems were discussed.

On Friday, Senator PURTELL and Mr. Webster went to the home of Prof. Antonio Giordano for the purpose of discussing with him his views on our recent cargo-preference bill. He was recuperating from a recent illness. Members of the United States Consulate staff had brought to their attention the fact that Professor Giordano was in charge of the Genoa office of a well-known and influential economic and financial newspaper published in Milan known as "24 Ore." He had recently written for that paper an article critical of our cargo-preference bill. Since "24 Ore" is highly regarded and carefully read by many thousands of Italians, it was Senator PURTELL's desire to obtain a better understanding of the professor's point of view and so afford him an opportunity to better appreciate our point of view.

Because Professor Giordano had not received a copy of the Commerce Department's Maritime Subsidy Report, they left with him 1 of the 2 copies which they then had in their possession. In addition, they assured him that should he at any time desire additional information about our maritime program, we would give him what we had available. They observed, as we had in Germany, that the main concern our foreign competitors have about the cargo-preference bill stems from some misunderstanding of its provisions and a lack of information as to the size merchant fleet which our Government believes we must necessarily maintain. Here, too, they found a certain amount of concern that other nations would use the cargo-preference bill as an excuse to enact discriminatory maritime legislation.

To summarize certain of the more important conclusions reached by Senator PURTELL as a result of his various meetings and discussions in Italy, the following:

1. As of September 1, 1954, generally speaking, the Italian shipyards were facing a serious crisis due to lack of work. They were working at approximately 30 percent of full capacity. The major shipbuilder, Ansaldo, is government-owned and controlled.

It is apparently true that material cost in Italy is higher than in any other European country. Some sources estimate that a Liberty ship could be built in Great Britain for approximately 30 to 35 percent less than in Italy. However, other sources estimate that this difference is less, between 10 to 27 percent, leaving aside subsidies in effect and the new Italian law hereinafter discussed. Some sources estimate that at least one-half of this difference is due to Italy's higher material cost, with the remainder attributable to higher labor cost.

2. One of the most disturbing things brought to the attention of Senator PURTELL and Mr. Webster was the large number of Communist labor leaders employed in Italian shipyards. The Communists apparently had received little discouragement from management. Evidently it was the thought of some segments of Italian management that this hands-off policy would insure labor peace.

Without elaborating in this report, suffice to say that the domination of labor unions by Communists in shipyards where offshore procurement orders have been placed did not pass unnoticed.

3. On July 17, 1954, an Italian subsidy law, known as the Tambroni law became effective. It is designed to encourage the building of oceangoing tonnage in Italian yards. Its benefits are extended to people of other countries, as well as to Italian nationals. Because of its recent enactment, there is considerable doubt as to the details of how it will operate. Nonetheless, it is expected that the Tambroni law will encourage many people who would have built ships in other countries to place their orders in Italy.

The Italian Government seems to believe that in the next 10 years Italy can modernize her merchant fleet, while at the same time raising her gross tonnage from the present figure of 3.7 million tons to 5 million tons. This would be an increase of 1.5 million tons over that which she possessed before World War II. This would require constructing 2.3 million tons of shipbuilding for Italian account in the next 10 years, or approximately 230,000 tons per year. At present the capacity of all Italian shipyards is rated at 300,000 tons per year.

Mr. Tambroni, the present Minister of Merchant Marine, apparently hopes to attract a substantial amount of foreign contracts in order to keep the Italian yards at the necessary level of business activity. In considering his approach to the problem, it should be noted that the Italian Government controls 80 percent of Italy's shipbuilding industry and is saddled with 12 billion lire per annum carrying and other charges. With this background, one can better understand why Italy enacted the Tambroni subsidy law (No. 522 of July 17, 1954). The Government seems to have calculated that at 66 percent of capacity Italian yards can revise their cost factors toward a set of lower unit return figures which will not only make the yards competitive with their foreign counterparts but will also absorb the Government's burden.

The Tambroni law is designed to stimulate orders for ship construction and ship-repair work within a specific period of time. Shipowners will be granted exemptions from custom's duties on imported raw materials and finished and semifinished products used in building and repairing ships. Exemption from the Italian general sales tax on internal business transaction will be granted. As a spur to speedy utilization of this program, the subsidy will be decreased 10 percent each year.

Under the Tambroni law the subsidies will be given directly to the shipyards, not to the shipowners. The law states that there is no limit to the amount of repair or building contracts which will be aided by its provisions. Any unused subsidy funds set aside by the Government in any particular year may be carried forward to succeeding years.

4. The effect of the McCarran Act upon seamen and therefore upon the Italian merchant marine was the subject of frequent discussions held by Senator PURTELL and Mr. Webster while they were in Italy. Generally speaking, there appears to be a great deal of resentment by the Italians concerning this law. I am attaching as enclosure H copies of 2 articles which appeared in Italian publications in July and August 1954 dealing with the McCarran Act's seamen visa provisions.

Senator PURTELL and Mr. Webster left Genoa Friday evening, September 10, for Paris. Sunday morning they boarded the North Star Express and arrived at The Hague late that afternoon. They were met by Mr. Andrea G. Ronhovde (the Embassy's Deputy Chief of Mission), Mr. Howard R. Cottam (the Embassy's Counsel for Economic Affairs), Mr. Thomas McCraine (maritime attaché for the American Embassy in London), and Mr. Peter Abeille (maritime attaché for the American Embassy in London).

That evening during and after dinner at the Cottam residence, they received a general briefing on the Dutch shipbuilding picture from Mr. Elvin Sibert (United States consul general, Amsterdam), and Mr. Paul J. Reveley (United States consul general, Rotterdam).

On September 13, Senator PURTELL and Mr. Webster, accompanied by Consul General Reveley, Mr. McCraine, and Mr. Abeille, visited the Rotterdam Drydock Co. (the Rotterdamsche Droogdock Mij). In 1953, 593 vessels of 2,315,000 gross tons underwent repairs in this yard. The flagship of the Holland-Amerika Lijn, the *Nieuw Amsterdam*, was constructed in this yard, which is hoping to construct a new passenger vessel for the Holland-Amerika Lijn at a cost roughly estimated to be approximately 100 million guilders. This yard is presently operating at close to full employment, 5,000 workers being on the job.

In their tour of the Rotterdam Drydock Co.'s magnificent yard they were accompanied by its director, Mr. Knape. Senator PURTELL'S broad background in American heavy industry and in the allied fields of metallurgy and machine tooling was remarked on several times by Dutch officials. More than once they volunteered their appreciation of his understanding of their production processes and problems.

That afternoon, Senator PURTELL and Mr. Webster visited the C. Van der Giessen & Sons yard near Rotterdam. This yard has 5 building berths capable of handling up to 32,000 deadweight tons. Its activities are limited to new construction, although occasionally it has done some reconditioning work. Since World War II some 30 vessels have been delivered and another 15 are in the course of construction or on order. The bulk of the yard's output consists of medium-sized cargo and passenger vessels. As with many of the other Dutch yards, it has constructed vessels for owners in other countries, including Argentina, Finland, France, Norway, Switzerland, and the United States.

That evening at the home of Ambassador H. Freeman Matthews, Senator Purtell and Mr. Webster met the following people, many of whom hold positions of great influence in Dutch maritime affairs:

Dr. D. G. W. Spitzen (Secretary-General, Ministry of Transport and Waterways).

Dr. J. Q. Bas Backer (Director, Western Hemisphere Department, Ministry of Foreign Affairs).

Mr. W. L. de Vries (Director-General of Shipping, Directorate General of Shipping).

Mr. E. A. Plate (Chief, Directorate Industry and Wholesale Ministry of Economic Affairs).

Mr. Th. van der Graaf (Secretary of Directorate for Shipbuilding and Repairs).

Mr. J. W. Hupkes (director of the Kon. Mij "De Schelde" N. V.).

Comdr. J. W. A. Langenberg (Kon. Mij "De Schelde" N. V.).

Dr. P. van der Toorn (director, Holland-America Line).

Mr. S. van West (managing director, Dock & Shipyard Co., "Wilton-Fijenoord").

Mr. E. A. Vreede (secretary to Netherlands Shipowners' Association).

Mr. F. E. Straatemeier (United States Lines).

Mr. Peter van der Giessen (director N. V. C. v. d. Giessen & Zonen's Shipyards).

Mr. A. Knape (director of the Rotterdam Drydock Co.).

Dr. D. A. Delprat (director Shipping Co. "Nederland").

Mr. J. van Tilburg (deputy to Rotterdam burgomaster).

Mr. Frank C. Grismer (Director FOA Mission).

Mr. Andreas G. Ronhovde (Deputy Chief of Mission).

Mr. Howard R. Cottam (Counselor for Economic Affairs).

Mr. Elvin Sibert (consul general, Amsterdam).

Mr. Paul J. Reveley (consul general, Rotterdam).

Mr. Harold H. Rhodes (first secretary).

Mr. Thomas McCraine (maritime attaché, American Embassy, London).

Mr. Peter Abeille (maritime attaché, American Embassy, London).

Mr. Robert A. Brand (second secretary).

Mr. Robert Donhauser (Public Affairs Office).

Commander M. B. Davis (assistant naval attaché).

Mr. Oliver M. Marcy (second secretary).

This reception provided Senator PURTELL and Mr. Webster an excellent opportunity to discuss with these leaders in Dutch shipping our cargo preference bill, their ship construction costs, their maritime labor situation, and other shipping problems. We understand that this was the first Embassy gathering at which so many major Dutch shipping interests were in attendance.

As a result of their visit to Holland, brief as it was, Senator PURTELL and Mr. Webster concluded:

1. From a competitive point of view, the shipyards of Holland appear to be ready, willing, and able to compete on at least an equal basis with the yards in any other European country. However, it should be noted that Holland has lost some business to Germany and appears to consider that country its strongest European shipbuilding rival. In view of the fact that the Tambroni law is so new, it is conceivable that Italy might well establish itself as a strong competitor for the position of shipbuilding supremacy presently held by Holland.

2. The labor situation in Holland, in relation to that in other European countries, is very good. Labor strife is relatively rare; the labor force apparently is receptive to improved productive processes; and Holland's quantity of skilled and experienced shipbuilding labor is large. In this connection, it should be noted that Dutch shipbuilders are somewhat concerned about the difficulty of obtaining apprentices or trainees. Their labor problem appears to be one of shortage rather than surplus.

The stability of the Dutch labor situation is evidenced by the fact that apparently some yards are willing to enter into fixed-price contracts if they can be completed within 18 months.

3. In addition to vessel construction and repair, most of Holland's shipyards are extensively engaged in performing work for other industries. Thus, these yards which are reported to be the best equipped in Europe, are apparently using their ingenuity and initiative in order to obtain maximum utilization of plant and facilities.

On Tuesday, September 14, Senator PURTELL and Mr. Webster sailed from Holland for England. They arrived in London that evening. The next day they conferred with Rear Adm. A. L. P. Mark-Wardlaw, R. N. (retired), (president of the executive committee, International Cargo Handling Coordination Association), Mr. Rex. B. Shepheard, C. B. E. (director, the Shipbuilding Conference), Mr. Winthrop G. Brown (deputy to the Minister for Economic Affairs, American Embassy) and Mr. Thomas McCraine. Among the matters they discussed were the International Cargo Handling Coordination Association Conference recently held in Naples, Italy; the McCarran Act's seamen visa provisions; the cargo preference bill; and the state of shipbuilding in the United Kingdom. Rear Admiral Mark-Wardlaw gave Senator PURTELL various publications relating to the Naples Conference. * * * I call your attention in particular to the following articles which appear in the attached copy of the Journal of Commerce, International Cargo Handling Conference number, published June 25, 1954:

1. Some Impressions of the Naples Conference, by Charles Birchall.

2. A Stevedore's Point of View, by G. Sirtaine.

3. Some Problems of Administration (of the Ideal Port), by B. Nagorski.

4. New Cargo Cranes at Hamburg, by Dr. Hans Neumann.

That evening, Senator PURTELL and Mr. Webster left London and arrived in Glasgow the next morning. There they visited two of the United Kingdom's finest and best-known shipyards, the Fairfield Shipbuilding & Engineering Co., Ltd., and John Brown & Co., Ltd.

At the Fairfield yard they conferred at some length with the managing director, Vice Adm. A. W. Longley-Cook, C. B., C. B. E., D. S. O., managing director, Fairfield Shipbuilding & Engineering Co., Ltd. At the John Brown yard that afternoon they met and conferred with the following gentlemen: Mr. J. W. Begg, financial director; Mr. John Rannie, shipyard director; Mr. J. H. Johnston, general manager, engine works; Mr. A. N. Benson, secretary; Mr. J. B. Bucher, head of gas turbine department.

Unfortunately, Sir James M. McNeill, K. C. V. O., managing director of the John Brown yard whom they had hoped to meet, was absent.

The Fairfield Shipbuilding & Engineering Co., Ltd., has six berths. It is capable of constructing vessels up to 1,000 feet in length. Over the years, it has excelled in the production of warships, passenger and cargo vessels, tankers and ore carriers. John Brown & Co., Ltd.'s yard has seven berths and is capable of constructing vessels exceeding 1,000 feet in length. Its annual output capacity is approximately 90,000 tons. Some of Britain's finest passenger vessels have been constructed in this yard, as well as high-grade refrigerated cargo vessels, tankers, cross-channel steamers, and train ferries.

On Friday, September 17, Senator PURTELL and Mr. Webster left Glasgow for Dublin. They arrived in the latter city Saturday morning. That afternoon during lunch with Ambassador and Mrs. William Taft they not only discussed various maritime matters, but also many others in which the two countries have mutual interests. The seamen visa provisions of the McCarran Act and our cargo-preference bill were, of course, the subject of extensive discussions between Senator PURTELL, Ambassador Taft, and members of the Ambassador's staff.

While Senator PURTELL was in Dublin he met and conferred with various high-ranking members of the Irish Government, some of whom he had worked with at the Interparliamentary Conference in Vienna.

I am attaching as enclosure K certain material gathered by Senator PURTELL concerning shipping and shipbuilding in Ireland. It is, indeed, worthy of note that the Harland & Wolf yard in Belfast, the largest shipyard in Ireland, has recently constructed the *Southern Cross*, a beautiful 20,000-ton liner. You might recall that this fine vessel was built for the Shaw Savill Line and was launched by the Queen last August. This vessel is somewhat unique among passenger vessels in that her boilers and engines are installed aft. She is designed to carry 1,200 passengers in tourist-class accommodations. She will carry no cargo on her four voyages around the world each year. It is planned that she will link Britain with South Africa, Australia, and New Zealand.

Senator PURTELL and Mr. Webster returned to London on September 21. While there they conferred with Ambassador Aldrich. They also held a brief conference with Mr. J. Hancock, London representative for the South Pacific Steamship Lines.

Later that afternoon, accompanied by Mr. Thomas McCraine, they visited the offices of the Chamber of Shipping of the United Kingdom. There they conferred at length with its president, Mr. J. C. Denholm, C. B. E. president; its vice president, Mr. A. I. Anderson (chairman, Orient Steam Navigation Co.); its general manager, Mr. H. E. Gorick, C. B. E.; and its assistant manager, Mr. R. G. Malloch Brown. These gentlemen were deeply concerned about our cargo-preference bill. Senator PURTELL and Mr. Webster tried to answer all of the questions raised by these gentlemen. However, they were unable to answer to their own satisfaction one or two of the matters raised by the representatives of the Chamber of Shipping and gave assurances that the Department of Commerce would be asked to supply the information desired. Steps have been taken to secure this information and upon its receipt it will be forwarded to Mr. Denholm.

As Senator PURTELL discovered when he was in Genoa discussing the matter with Professor Giordano, the representatives of the Chamber of Shipping had not been furnished copies of the Commerce Department's Maritime Subsidy Policy Report. Copies of this important document have been forwarded to Mr. Denholm.

Senator PURTELL reports that after visiting the British Isles he reached the following conclusions, among others:

1. Shipbuilding costs are now about 4 times as high in 1939 and approximately twice as high as in 1945–46. There are no signs of a reduction or even of stabilization; and increases in shipyard wages and steel prices further aggravate this problem. Britain's budget in 1954 made some concessions to shipowners as to other industrialists by the introduction of the 20-percent investment allowance.

However, as in this country, the accrued tax-free depreciation goes but a little way toward meeting replacement costs, and the balance must come from borrowing or from profits, if any. British shipowners seem agreed that the solution to their problem is to revise the existing system of taxation, and particularly the system of assessing depreciation allowances on the basis of original cost without referring to higher replacement cost.

2. Britain's merchant fleet, while not as obsolete as this country's, is nonetheless composed of many vessels of 20 years of age.

3. In an article appearing in the September 13 issue of the Times, the following statements seem pertinent and authoritative:

"Although British shipowners are having to meet increasing competition from foreign flags, including those of countries with 'artificial fleets' either State-subsidized or financed by foreign nationals, and although British shipbuilders now face severe competition from foreign shipyards—particularly in Germany—some significant comparisons may be made from the figures set forth in Lloyd's Register shipbuilding returns. In respect of the amounts of work under construction in the United Kingdom and abroad at the end of June (the most recent date for which figures are available) it can be seen that the British figure of 2,195,000 tons gross represented 38 percent of the world total—an increase of 3 percent over June last year. Germany was still the leading foreign competitor, with 12 percent of the total, followed by the Netherlands, Sweden, France, the United States, Japan, and Italy, in that order.

"Tonnage under construction overseas showed a substantial fall of 260,000 tons from the previous midsummer, compared with a rise of 72,000 in the United Kingdom during the same period. This divergence may be attributed to the fact that the world-wide decline in the placing of new orders has had a more immediate effect on foreign yards, particularly those in Western Europe, since they have a higher productive tempo—largely due to three-shift working—and a smaller backlog of orders than most British yards * * *

"While foreign shipyards are now bidding more keenly for new orders than at any time since the end of the war, some of them are helped substantially by various economic

devices. In France and Italy there are direct State subsidies, while in Western Germany there are taxation reliefs and low rates of interest on loans. In some of the Scandinavian countries and in the Netherlands there are long-term credit provisions backed by the State or by municipalities. British shipbuilders enjoy no such artificial aids and their existence elsewhere makes competitive pressure all the stronger. The shipbuilding conference has stated on behalf of the industry as a whole that while it has never sought direct State assistance it looks to the Government of the day to create conditions in which private enterprise can flourish.

"Since the war British shipbuilders have spent heavily on the modernization and re-equipment of their yards. Some of them are now as well-armed for the competitive struggle as their foreign rivals. But on the labor side of the industry the situation is somewhat different. On the continent longer hours, lower real wages and piecework rates, shift working round the clock, and an absence of strict demarcation between various jobs are the general rule; and foreign shipbuilding employers can therefore make the fullest possible use of their physical equipment."

In closing, let me express for Senator PURTELL, Mr. Webster, and myself our appreciation of the opportunity afforded us to visit the various countries we did and participate in the many interesting events which I have discussed in this letter. We feel that as a result of our trip we have a much better understanding of the views of our friends in the various European countries we visited. In addition, we believe that those with whom we discussed America's maritime policies have a better and more sympathetic appreciation of the many serious problems we face in this field.

Sincerely yours,

JOHN MARSHALL BUTLER,
Chairman, Senate Water Transportation Subcommittee.

Rinaldo Burrus Page, a Man Devoted to North Carolina

EXTENSION OF REMARKS
OF
HON. SAMUEL J. ERVIN, JR.
OF NORTH CAROLINA
IN THE SENATE OF THE UNITED STATES
Friday, February 18, 1955

Mr. ERVIN. Mr. President, I have prepared a brief statement regarding the late Mr. Rinaldo Burrus Page, of Wilmington, N. C., and his valuable contribution to his adopted State. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

RINALDO BURRUS PAGE, A MAN DEVOTED TO NORTH CAROLINA

On February 2, 1955, death marched into the ranks of North Carolina's most useful citizenry and claimed a distinguished business and civic leader, Mr. Rinaldo Burrus Page, publisher of the Star-News newspapers of Wilmington.

He was the first chairman of the North Carolina State Ports Authority and a Wilmington civic leader for 25 years.

A native of Columbus, Ga., Mr. Page began his newspaper experience on his father's paper, the Columbus Ledger. He attended Emory University and the University of Georgia. After service in France in World War I, he returned to the newspaper business, coming to Wilmington in 1927 as president and publisher of the Wilmington Morning Star, later acquiring the Wilmington News.

Following years of undivided interest in the development of his city and the Cape Fear region, Gov. R. Gregg Cherry named Mr. Page to the chairmanship of the newly created ports commission in 1945. Mr. Page had long been a leading spokesman for the development of better ports in North Carolina, and with the passing of time, my State will realize even more the wisdom and courage that he possessed.

His contribution to his fellowman was not limited to the newspaper and ports fields. He devoted himself to progressive civic duty in many areas.

Once convinced that a cause was just, Mr. Page was never satisfied with anything less than complete success—a clear-cut challenge and priceless heritage for his lineage and associates.

He wrought well and left a lasting impress upon the annals of our generation.

Results of McGregor Poll on National Issues

EXTENSION OF REMARKS
OF
HON. J. HARRY McGREGOR
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Friday, February 18, 1955

Mr. McGREGOR. Mr. Speaker, under permission to extend my remarks, I would like to place in the RECORD the results of a questionnaire I sent to the citizens in the 17th Ohio District. I am proud to represent this district in the Congress of the United States. The questions were concerned with major national and international problems facing Congress today.

I regret I could not send a questionnaire to each of my constituents in the district, but I believe the replies I have received are the opinions of a cross section of those I represent.

Question sheets were sent to almost every occupational group: Republican and Democratic committeemen and women, laborers, attorneys, housewives, public office holders and government employees, salesmen, retired men and women, ministers, college and high-school students, and their instructors. Also included are those working in business and industry, newspaper, radio and professional positions.

Blanks were mailed to individuals and reproductions of the questionnaire were published in nearly all of the 20 daily and weekly newspapers in my district.

A large percent of the completed forms contained comments on the questions which proves to me that the average citizen is interested in the vital issues now before this legislative body and is anxious to express his views on them. I am very pleased so many took the time to write and attach letters and notes to the questionnaire enlarging upon their answers.

The population in my district is composed of about half rural and half urban residents. Nearly all of the labor and farm organizations are represented as well as large and small business. There are also 2 colleges and 2 universities.

It is not often that a Congressman can obtain a true picture of such an evenly divided district, but through the questionnaire method, I feel I have gained the majority opinion of those I represent.

The questionnaire and the results are as follows:

QUESTIONNAIRE IN AN ENDEAVOR TO LEARN THE VIEWS OF THE FOLKS BACK HOME

	Yes	No
	Percent	*Percent*
1. Which is your choice on the farm program relative to price support and crop control?		
(a) 100-percent price support and rigid crop control	8	92
(b) Flexible price support and medium crop control	64	36
(c) No price support and no crop control	30	70
2. Should women qualified for social security be eligible for benefits at age 60?	68	32
3. Realizing the need for a strong national defense, which do you prefer?		
(a) Extension of the present draft law	57	43
(ff) Universal military training	42	58
4. Do you believe that our present foreign policy program is proving effective and promoting world peace?	55	45
(If your answer is negative write your own suggestions on the back of this questionnaire.)		
5. Do you favor continuation of:		
(a) Technical assistance to Europe?	75	25
(b) Economic assistance to Europe?	38	62
(c) Military assistance to Europe?	53	47
6. Do you favor continuation of:		
(a) Technical assistance to Asia?	76	24
(b) Economic assistance to Asia?	46	54
(c) Military assistance to Asia?	49	51

A Memorial to the Late E. B. Aldrich, of Pendleton, Oreg.

EXTENSION OF REMARKS
OF
HON. SAM COON
OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. COON. Mr. Speaker, on April 30, 1953, I introduced a joint resolution entitled, "To Designate the Lake To Be Formed by the McNary Lock and Dam in the Columbia River, Oreg., and Wash., as Lake Umatilla"; however this bill was not acted upon. Today I am introducing a bill asking that this body of water be named Lake Aldrich as a memorial to the late E. B. Aldrich, of Pendleton, Oreg. This action is taken after a great deal of thought on my part. The Umatilla Indians have been immortalized in our State, as well they should be, and it is unnecessary to name anything more for them in order to accomplish this. The Umatilla Indians can never be forgotten in eastern Oregon.

The West is loaded with Indian names, practically every State has counties, lakes, and rivers named after the Indians but very few counties, lakes, or rivers are named after our pioneers. Those men and women who had the fortitude to make this wilderness and sagebrush country into one of the most productive areas in the world. I think it is high time that we publicly recognize these fine men and women who made the West what it is today.

The lake which I am asking be named for Mr. Aldrich came into existence largely because of his efforts. Ed Aldrich was untiring in his work for the civic welfare. He has left in the Northwest, monuments as great as the pyramids. It was he who was head of the organization that made the first survey of the Columbia River for its potential powers. It was Ed Aldrich who went to Washington and lobbied a few hundred thousand dollars for the first Army engineers' survey. As a result of that survey numerous locations were found along the river for damsites. The final result

of that survey is Grand Coulee and Bonneville, and now McNary Dam. Ed was the man who turned the first spade in these gigantic enterprises.

Mr. Aldrich was a stanch, energetic, and active Democrat all of his life. I was born, have lived, and will always be a Republican. Therefore it may appear strange to some people that I would sponsor legislation to immortalize this man's name. Politics has nothing to do with it. Mr. Aldrich loved eastern Oregon just as I do, and no one man has done more for his community than he did during his lifetime. He and I may have differed often as to what we thought was good for our people, but I never doubted his sincerity, his loyalty to country, or his integrity, and I am certain that he never doubted mine. I believe that the vast majority of the people who benefit from this lake, and the project which formed it, will subscribe wholeheartedly to the sentiments which I have expressed today, and will be with me in asking Congress to make into law the bill which I am now introducing.

Postal Salary Increases

EXTENSION OF REMARKS

OF

HON. EARL CHUDOFF

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. CHUDOFF. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the following statement submitted by me to the House Post Office and Civil Service Committee in support of an adequate and realistic salary increase for postal workers:

Mr. Chairman and ladies and gentlemen of the committee, I greatly appreciate this opportunity of presenting my views on pending legislation to provide much-needed and well-merited increases for employees in the field service of the Post Office Department.

I had the pleasure last year of supporting increases which, while admitted small, would have given at least some measure of relief to these employees and I regret that this legislation was given a pocket veto by the President.

I hope that this committee, after consideration of the bills before you, will find it possible to report the bill H. R. 1592, by Congressman MORRISON, of Louisiana, and I hope that action will be taken promptly so that, in the event a further veto results, the Congress may have the opportunity to override such veto.

I am sure I don't have to remind the members of this committee that it has been almost 4 long years since postal employees have received a salary increase. As I recall it, the last increase granted was effective July 1, 1951, and we now lack only 4 months of the complete 4 years during which time postal employees have received no increases whatsoever, while the salaries of those in private industry have been increased twice and in some cases three times during the same period.

I am sure I don't have to remind this committee that postal employees generally have earned an increase at this time. All of us that have had the opportunity to look at the budget for the fiscal year ending June 30, 1956, must have been impressed, as I was, with the story of efficiency which is carried on page 885 of that weighty document. I note that mail volume is expected to increase another 3 percent in 1956 over the current year and this increased volume, like the increases which have preceded it, will be largely absorbed by the employees of the postal service. I don't think it is at all unreasonable that these employees expect to be paid for their increased efficiency. That is a standard operating procedure in private employment and might well be adopted by our Federal Government.

Last year in announcing the withholding of his approval of the postal and Federal employees' salary increase, the President stated in effect that his action was predicated upon the fact that no postal-rate increase was provided to pay for the salary increase and that the bill failed to contain provisions for a reclassification of postal positions. Insofar as a rate increase is concerned, I believe that the question of proper salaries for the employees of the postal service is a matter entirely independent of postal rates and that there is no justification whatever for tying these two questions together.

With respect to the need or desirability of a reclassification of postal positions, postal employees with whom I am familiar and who have an adequate knowledge of the problem have convinced me that the proposal of the Postmaster General as contained in the bill H. R. 2987 is at least as unsatisfactory as the proposal of last year and I cannot help but believe that the only way a solid reclassification of postal positions can be arrived at is to refer this matter to a joint committee composed of Members of both the House and the Senate, with representatives of the Post Office Department and the employee organizations. I am confident that such a committee would arrive at a solution which would do justice to the public, the Post Office Department, and the employees.

For these reasons, Mr. Chairman, I hope the committee will report the bill H. R. 1592 at an early date so that justice for postal employees may no longer be delayed.

Value of Irrigation

EXTENSION OF REMARKS

OF

HON. A. L. MILLER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. MILLER of Nebraska. Mr. Speaker, under leave to revise and extend my remarks, I am calling to your attention the value of irrigation to the future growth of our country.

Last year a drought much worse than that which caused the Dust Bowl in the thirties parched the lands of Colorado and surrounding areas. Soil moisture content had shrunk to approximately 15 percent of normal; precipitation averaged about 50 percent of normal; natural runoff from the usually abundant snowpack in the mountains dwindled to 40 percent of normal, and the streams fed thereby became trickles. Crop failures and financial ruin seemed inevitable, and prayers for rainfall went unanswered.

Northern Colorado is normally a rich, fertile, and productive agriculture basin. Its economy and well-being depend almost entirely upon agricultural crops, which, in turn, depend upon the water supply from natural precipitation and from irrigation. To those farmers in this area who were not equipped to irrigate their croplands, this drought meant the loss of an entire year's work, the hardship and privation of at least a year with no income, the necessity of depleting their investment and retirement savings, and in some cases, complete failure. To those farmers in the 615,000 acre area served by the Colorado-Big Thompson project, the drought of 1954 was a challenge that could be met and beaten. Because this project water was available, nearly normal farm production was attained by these users. Had the project water not been available, less than one-half a crop would have been harvested; and translated into dollars and cents, the value of this project water was $22 million.

Weather Bureau officials predict the record-breaking drought will continue throughout 1955, but the people within the area served by the Colorado-Big Thompson project know they will have over 300,000 acre-feet of water, brought from the other side of the Rocky Mountains, available to meet their needs.

SUCCESS AND FAILURE

The rich agricultural lands served by the Colorado-Big Thompson project, an area half as large as the State of Delaware, slope eastward from the foothills of the Rockies in the northeastern part of Colorado. Intensive irrigation development in this area during the half-century between 1860 and 1910 brought the inevitable over-appropriation of the available natural stream-flow, and growth of these facilities reached a stalemate. The Colorado-Big Thompson project was initiated in 1938 to overcome the problem.

This project is one of the most complex and spectacular the Bureau of Reclamation has ever undertaken. For many years, the 14,000-foot granite barrier of the Continental Divide presented an insurmountable obstacle to the dream of tapping the water-wealthy headwaters region of the Colorado River, which lay only a few miles to the westward. American ingenuity and energy went to work. The Divide was pierced by a tunnel 13.1 miles long, more than 9 feet in diameter, and sloping gradually from west to east in order to carry the diverted water by gravity flow from West Slope to East Slope.

After emerging from the east portal of the tunnel, the diverted waters drop nearly 3,000 feet down the mountain slopes, spinning the turbines of hydroelectric plants on their way into 2 major storage reservoirs to be held until needed on the farmlands below, and sending out 179,000 kilowatts of critically needed electric power to large areas in Colorado, Nebraska, Wyoming, and Kansas.

Although the project was not yet completed in 1954, the major portion of construction had been finished when the irrigation season began. The system was ready to serve some 400,000 of the 615,000 acres which ultimately will be served when construction is completed in 1956. Total cost of the finished project will be $159.8 million.

Unlike flood-control projects of the Corps of Engineers and public works

projects of other departments of the Government, irrigation and reclamation projects pay back the major share of their costs with revenues realized from the sale of water and hydroelectric power. In 1954 alone, sale of power from the Colorado-Big Thompson project brought in a gross revenue of $2.8 million, and it is quite safe to assume that this annual income will increase yearly as the project is completed and the functions expand.

FAILURE AVERTED

This storage water meant the difference between success and failure to these Colorado farmers. What might have been in 1954 without project water at hand can best be appraised by comparing what did happen with the effects of the worst previous drought year in the same area, 1934. In most respects, 1954 presented greater handicaps to successful crop production than did the 1934 season, and estimates based on 1934 losses provide a conservative view of what might have happened in 1954.

In 1934 crop yields totaled approximately $19 million.

In 1954 crop yields from lands irrigated under the project totaled $41 million.

Translating this $22 million differential into terms of buying power, multiplied by the number of similar irrigation projects sprinkled throughout the 17 reclamation States, and the impact upon our national economy is terrific. Practically all manufacturing, trade, and transportation involves agricultural commodities; an irrigation water shortage affects the entire economy.

BENEFITS UNLIMITED

Irrigation has contributed directly to the building of cities, to the development of fertile acres, to the homes of more than 35 million Americans who supply nearly half of the entire Nation's demand for choice vegetables and truck crops; to the development of a $40 billion annual retail market, averaging $1,139 per capita—retail sales for the Nation during the same year averaged $1,023 per person—and to the development of a new outlet for the products manufactured in our bustling industrial areas of the East.

What has this new market, this new development, this growth of our dynamic country cost the American taxpayer?

Money spent by the Department of Defense during the month of January would pay for all reclamation since it was started in 1902.

Money spent to finance our foreign aid program for 6 months would pay for all reclamation since it was started in 1902.

On the other hand, money spent on reclamation during fiscal year 1953 would have financed the Department of Defense less than 3 days, or the foreign assistance program or the Veterans' Administration less than a month.

Actually, the cost to the Federal Government is negligible. Money appropriated for power aspects of the projects is paid back to the Treasury with interest. Money appropriated for irrigation aspects is paid back without interest. The only outlay from the Treasury is for nonreimbursable features, that is, flood control, stream-pollution abatement, recreation, and fish and wildlife propagation.

The cost of these nonreimbursables is more than compensated by the additional Federal tax revenue created by reclamation. Based on a sample study of 15 selected reclamation projects, individual income taxes paid directly by irrigation farmers and by persons directly affected by the project were estimated at $800 million. Corporation and excise-tax revenues collected from the same area total nearly $500 million. Cost of these projects totaled $269 million. In other words, Federal taxes collected have exceeded the Federal investment in irrigation features in these projects by about five times.

Now let us take a look at irrigation and reclamation expenditures from the standpoint of their justification in our budget. Many billions of dollars have been spent for flood control, harbors and docks, and agriculture conservation payments. This money is not returned to the Federal Government. I have no arguments against these projects, for I feel they are an essential part in building a greater America for ourselves and our posterity.

However, the comparison should be drawn so that all will know that the biggest share of money appropriated for irrigation and reclamation projects is returned to the Federal Treasury.

The Corps of Engineers has spent, since its inception, more than $7.245 billion on water-conservation and flood-control projects—nearly 4 times the total spent on irrigation and reclamation. Money spent by the Corps of Engineers is nonreimbursable.

Total Federal investment in irrigation and reclamation projects is about $2.2 billion. It should not be forgotten, however, that local citizens have been active partners—paying partners—in each of the projects, and repayment contracts are negotiated before work on the project is started.

Reclamation is paying its own way.

The crops produced on these projects add very little to our present surpluses. We never seem to have enough vegetables and fresh fruit to meet our diet requirements. These products, together with alfalfa and sugarbeets, essential to the livestock industries, are the principal irrigated farm crops. They are not on the surplus list.

Our investment in irrigation and reclamation has paid special dividends. We should continue to invest in this field as long as there are feasible projects to be developed.

Need for Postal Service Pay Increase

EXTENSION OF REMARKS

OF

HON. DANIEL J. FLOOD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. FLOOD. Mr. Speaker, I am grateful for the opportunity to testify on behalf of the proposed increase in postal service pay. Such an increase is overdue not only in justice to the postal employees but also for the sake of long-range economy in the handling of mail.

Postal employees need a salary increase to give them as much real income as they received prior to World War II. Since 1939 such factors as the increased cost of living, higher income taxes, and larger deductions for retirement have combined to reduce the purchasing power of many classes of postal workers. In spite of a series of pay increases, the most recent of which took effect in July 1951, the average postal worker's take-home pay today buys less than it did 15 years ago. This is especially true for supervisors and other employees in the higher-income brackets.

In the past decade and a half the pay of the largest groups of postal workers has tended to increase less rapidly than the pay of production workers in private industry. A year ago the Postmaster General submitted to the Committee on Post Office and Civil Service information indicating that between 1939 and 1953 the average weekly earnings of all full- and part-time unskilled and skilled workers in manufacturing industries—up to and including lead foremen—rose at a considerably faster rate than the earnings of regular clerks and letter carriers. In addition, it is generally agreed that the salaries of executive-level employees in the postal service have lagged behind the salaries of top-management staffs in private enterprise.

To the extent that differences between postal salaries and pay in private industry result from the fact that Federal Government employees cannot apply certain economic pressures—for example, strikes—available to workers in private industry, Congress has a special obligation to view generously the postal workers' needs.

Adequate postal service pay contributes to long-range economy in the handling of mail through attracting better employees, reducing turnover, and improving the efficiency of people on the job. Little question exists as to the value of increased pay in the recruitment and retention of qualified staff. Although salary constitutes only one of several factors affecting whether or not a person takes a job, the Nation cannot reasonably expect good workers to accept or remain in positions in the Post Office if they can earn more money or have more opportunity for advancement in similar employment outside the Government. When postal salaries fall too low, the Post Office must employ less efficient workers and devote excessive time and energy to the training of replacements.

While we have yet to develop methods for measuring with precision the effects of pay levels on the efficiency of workers who remain on the job, commonsense suggests that services to the public will suffer when postal workers must secure additional part-time employment, put their wives to work, or borrow excessively to meet their normal living expenses. It is worth noting that of 800,000 postal and civil service employees surveyed by the executive council of the American Federation of Labor last year, about half

had outside jobs; and about 40 percent of those who were married had wives who worked.

Last year Congress approved an adjustment in the salaries of postal employees, but the form of the adjustment failed to satisfy the President of the United States. This year no barrier must stand in the way of the needed increase in pay.

Pennsylvania State University, at State College, Pa., Will Observe Its 100th Birthday on February 22, 1955

EXTENSION OF REMARKS
OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Friday, February 18, 1955

Mr. VAN ZANDT. Mr. Speaker, Tuesday, February 22, will be an important day in the history of the Pennsylvania State University when the centennial of the Nation's 11th largest university will be observed.

Established under an act of the General Assembly in 1855, the Pennsylvania State University this year celebrates its centennial with a program emphasizing its services to the Commonwealth during 100 years of educational advancement.

The movement for establishing the institution, first called the Farmers High School of Pennsylvania, was started by farm leaders who realized that progress in agriculture involved the application of scientific methods as well as labor and fertilizer.

Thus they planned a school that would give instruction in the sciences bearing on agriculture and that would operate an experimental farm on which the students would do all the labor.

At the time the project for combining practical and theoretical education was a startlingly new concept. Dr. Evan Pugh, the school's first president, described it in his inaugural address:

> We are here for the avowed purpose of trying an experiment which has never been successfully performed in any country in the world.

Four years after the Governor signed the charter, the school opened its doors to 69 students in an incompleted building rising from the fields of Centre County.

Those 4 years had been marked by discouraging setbacks. The trustees had contracted for a 5-story building costing $55,000 to accommodate 400 students.

In addition to a State appropriation of $25,000, they had in cash $10,000 received from the Pennsylvania State Agricultural Society, $10,000 raised by Centre County residents, and $5,000 willed by a Philadelphia benefactor. The school was located on 200 acres donated by James Irvin of Bellefonte.

The legislature promised an additional $25,000 if the trustees could raise a matching sum by subscription throughout the State.

The building was costing more than expected and crop failures and a money panic prevented the raising of the money needed to get the second $25,000 installment from the State.

The first students who arrived on February 16, 1859, found only one wing of the school building completed. Living conditions at first were crude: lighting was by lard-oil lamps and construction shacks converted into dining halls were cold and drafty.

There were few books in the library and apparatus for instruction in science was negligible. Students worked 3 hours daily on the school farm and at such tasks as clearing stones from the campus and making the main building livable.

Pugh arrived to assume the duties of president 9 months after the school term opened. A native Pennsylvanian, he had conducted a boys' academy before deciding to go to Germany to study. At the time he was chosen to head the school, he was in England where he had spent 2 years in agricultural research.

Wholly dedicated to the idea of education of the founders of the school, Pugh worked without stint to put theory into practice, to win support from over the State, and to get money from the General Assembly.

In spite of the disruptions of the Civil War, Pugh graduated his first class of 11 students in 1861, won an appropriation from the General Assembly and completed the main building in 1863, and secured for the school recognition as the land-grant college of Pennsylvania under provisions of the Morrill Act signed by President Lincoln in 1862.

Pugh and the school's trustees were backers of Representative JUSTIN S. MORRILL in his efforts to get Congress to pass his bill, and in anticipation of success changed the name of the Farmers High School to the Agricultural College of Pennsylvania early in 1862.

Weakened by overwork, worries and an injury suffered in an accident, Pugh died in 1864. The next 20 years were to be a period of drift and disillusionment during which the college had five presidents who put into effect different programs in futile attempts to stabilize the institution so precariously started in 1855.

The problem was developing a program that combined practical and theoretical training. Since this goal of education was almost entirely new, there were no models to go by. Pugh's early description of the school as an experiment was too true. A lot of experimenting had to be done before a successful formula could be evolved.

Pugh was followed as president by William H. Allen, head of Girard College. Allen fought off before the legislature efforts of other State schools to be named land-grant beneficiaries and obtained permission for an $80,000 loan for the college to pay its debts.

Allen left to his faculty the job of working out an instructional program that, to comply with the Morrill Act, should include training in the "mechanic arts." But discouraged by the school's prospects, he resigned in 1866 and returned to Girard College.

His successor was John Fraser, who had headed the faculty committee working on the reorganization of the curriculum. The enrollment decline that had set in after the Civil War continued, dropping to 30 in 1868. Fraser, differing with the trustees on policy, resigned.

Fraser's innovations in starting courses in technical subjects as well as in agricultural science and in abandoning the requirement of student labor on the farm were dropped by his successor, Thomas Henry Burrowes.

Burrowes, making fun of the "parade of the long list of 'ologies,' 'onomies,' and 'ographies' which grace some catalogs," restored the emphasis on agriculture and turned his students out to work the farm as provided for in the college's charter.

A popular State figure and for years a leader in the establishment of the common-school system, Burrowes succeeded in checking the enrollment decline and in winning friends for the college. He talked up the college in speeches over the State and instituted a Harvest Home which in its second year in 1870 attracted more than 2,000 persons to the campus.

After Burrowes' death in 1871, the trustees brought in James Calder, of Hillsdale College in Michigan, as the new president. He remained 9 years.

In his first year Calder secured the permission of the trustees to open the doors of the college to both sexes without distinction as to qualifications or privileges, and six women attended classes in 1872.

Calder's administration also saw a change in name from the Agricultural College of Pennsylvania to the Pennsylvania State College, enlargement of the board of trustees to include representatives of the alumni and of the State's manufacturing industries, and amendment of the charter to drop the student-labor rule.

A growing emphasis on classical studies and neglect of the scientific, agricultural, and mechanical arts studied led to growing criticism that the college had lost sight of the goals of the founders and was not living up to the Morrill Act.

Calder resigned to be succeeded by Joseph Shortlidge, head of a boys' school at Concordville. Shortlidge did not get along with the trustees, his faculty, or students and resigned after 9 months.

Not since the school's beginnings had the fortunes of the school been at such a low ebb, Gov. Robert E. Pattison himself remarking that—

> The past history of the State agricultural college is not such as to induce the belief that any practical good has or ever will come from it.

But though no one realized it at the time the college was at a turning point. The trustees chose as the new president George W. Atherton, head of the political science department at Rutgers University. He was to head the institution for 24 years of steady growth.

Against a proposal of the governor that the college's faculty be cut in half and that the course of study be made exclusively agricultural, Atherton was able to persuade the trustees that the school's future depended upon developing a program in the mechanic arts.

Within a few years the wisdom of his program was seen. The college's enrollment picked up, reaching 244 in 1892. In 1887 Atherton won a $100,000 appropriation from the legislature for new buildings and by 1892 the State had spent $305,500 for new buildings and $102,000 for equipment.

A few years later, in 1896, fulfillment of the goals of the founders and of the Land-Grant Act was seen in the reorganization of the college into 7 schools—School of Agriculture, School of Natural Science, School of Mathematics and Physics, School of Engineering, School of Mines, School of Language and Literature, and School of History, Political Science and Philosophy.

A college spirit was also developing. School colors were chosen in 1887 and a school song in 1901, the first intercollegiate football game was played in 1887, a yearbook was begun in 1889, a student handbook appeared in 1895 and a weekly student newspaper was started in 1904.

Toward the close of Atherton's administration trustee Charles W. Schwab donated money for an auditorium and trustee Andrew Carnegie money for a library building. Other new buildings at this time included a men's dormitory, a dairy building and a main agricultural building.

When Atherton died in 1906, the president of the board of trustees, former Gov. James Addams Beaver was chosen acting president. Beaver saw the enrollment grow within 16 months from 800 to 1,151. Beaver turned over the administration of the college in 1906 to Dr. Edwin Erle Sparks, University of Chicago historian.

No advocate of the ivory-tower theory of education, Sparks embarked on a program of enlarging the college's services to make them statewide. His oft-repeated slogan was: "Let us carry the college to the people."

He fought for funds for setting up an extension division, getting his first appropriation for this purpose in 1913. Though a strong supporter of the college's practical education program in agriculture, engineering, and technology, Sparks urged more courses in the liberal arts. As a result of his efforts, the present School of Liberal Arts was formed in 1909.

The steady progress of the college educationally was disrupted by the entrance of the United States in World War I. It made major contributions to the war effort, training 1,500 Army and Navy trainees in the Students' Army Training Corps, in addition to regular students enrolled in military science and tactics; turning over laboratories and scientific equipment to wartime research; and dedicating other resources of the college to boosting civilian morale.

His health broken by his own war efforts Sparks resigned in 1920. His successor, Dr. John Martin Thomas, of Middlebury College in Vermont, launched an immediate program for more buildings desperately needed because of the cessation of construction during the war.

In a 2-year drive for building funds, the college secured $1,727,272 in pledges by 17,000 alumni and friends of the college.

Besides the building program, the Thomas administration saw the establishment of a graduate school and a school of education, a reorganization of the school of agriculture and the formation of a school of chemistry and physics from the former school of natural science. When Thomas resigned in 1925, the college's enrollment had reached 3,854 students.

The new president, Dr. Ralph Dorn Hetzel of the University of New Hampshire, headed the institution during the boom days of the late 1920's, the depression of the 1930's and the war and postwar readjustments of the 1940's.

Two large-scale building programs took place during the Hetzel administration and a third was planned when he died in 1947. The first received its impetus from President Thomas' drive for funds. When it ended in 1932, the college had spent about $5,500,000 for buildings. The second, from 1937 to 1939, involved the expenditure of about $5 million by the general State authority.

The depression was a difficult period because of cuts in appropriations for maintenance and teaching, and World War II meant a greater tax on Hetzel's administrative and leadership powers.

Adopting a year-round schedule, the college trained thousands of soldiers, sailors, marines and aviators in special programs requested by the military services; put in special courses for training women for work in industry; gave instruction to more than 140,000 civilian workers in extension classes held over the State; and carried on extensive research to meet the needs of the war effort.

At the war's end the college was faced with a stack of 22,853 applications for admission to classes, most of them coming from veterans.

The need was met by utilizing every useful nook and cranny for class and laboratory space, by using war-surplus materials for emergency dormitories and classrooms, and by overloading professors with classes and students.

These devices were those adopted by all colleges and universities to handle swollen enrollments, but Penn State developed another that received nationwide attention.

This device was that of enrolling first- and second-year students at Penn State centers, at the State teachers colleges, and at private schools in order to make space available on the campus for upperclassmen studying professional and technical subjects. Twenty-two schools cooperated with Penn State in this program.

After Hetzel's death in 1947, James Milholland, president of the board of trustees, served as acting head of the college until the election of Dr. Milton S. Eisenhower as president in 1950.

Milholland started the long-range building program that was designed to meet the college's needs for the enrollment increases predicted for the postwar period. This was a $10 million program to be carried on under the general State authority.

Reporting on the campus plant in 1954, Eisenhower said that the buildings were valued at $66 million, and that 58 percent, or $38 million, was new construction since 1946. Seventy percent of the new construction was accomplished without the use of tax money.

For many years there had been a growing sentiment that since the Pennsylvania State College was a university in size and in the broad scope of its work the word "college" in the name should be replaced by the word "university." This was accomplished in the fall of 1953.

Under Dr. Eisenhower, the onetime Farmers' High School of Pennsylvania enters its second century as the Pennsylvania State University—the 11th largest institution of higher learning in the Nation.

In its 100-year span the institution has awarded 53,000 degrees, beginning with 11 granted in 1861. The institution now grants about 3,000 annually. It has seen its student body increase from 119 to 14,000 and its faculty from 4 to 1,400. Its research program has grown from a few dollars spent on nursery stock to one costing about $6 million annually. Through its extension program, its instruction is now given on a campus that may be considered statewide.

The untried experiment of the founders of the institution in 1855 is now acclaimed a resounding success, as evidenced by the following accomplishments of which Penn State is proud:

The first use of the practicum method of instruction on a wide scale, 1866.

The first soil fertility experimental plots in the United States, 1881. The only prior fertility plots were in Rothampstead, England.

The first correspondence instruction in agriculture. Chautauqua home reading courses begun in 1892. Formal correspondence courses begun 1898.

The first organized extension instruction in mining in the United States 1893–94. First mining bulletin published January 1, 1894.

World's first respiration calorimeter for domestic animals, 1902. Prior ones were adapted for use with human beings only.

The first college forestry building in the United States—Fergie's woodshed, 1906.

The first formal training program in industrial engineering, 1908.

The first establishment of student gardens as regular practicum training 1909.

The first mineral industries experiment station, 1910.

The first organized curriculum in fuel technology, 1931.

The first institute of local government in the United States, 1935.

The first organized curriculums in meteorology, mineral economics, mineral preparation engineering, 1946.

The first climatometer for studies in dehumidification, 1948.

The first department of biochemistry accredited by American Chemical Society's committee on professional training, April 26, 1950.

The first establishment of a foreign training center by an American institution for industrial education, Formosa, June 1, 1953.

The first conference of insurance buyers held on a university campus, 1953.

Pioneer work in chemical engineering. A course in industrial chemistry was taught in 1890.

Pioneer work in safe-driving instruction. The first driver-training course for high-school students was taught in the State College High School in 1933. The first training course for teachers of safe driving was offered during the summer session of 1936.

Pioneer conference of dentists and oral surgeons, March 15–17, 1943, which led to the founding of the American Academy of Cleft-Palate Prothesis, April 4, 1943, which in turn became the American Association for Cleft-Palate Rehabilitation.

Only mineral industries art gallery in the world, established 1930.

Only mineral industries museum in Pennsylvania, established 1930.

Only university in the world offering courses in Pennsylvania German language, culture and folklore, 1946.

Only institution in Pennsylvania giving work in home economics leading to the Ph.D. degree.

Only institution in Pennsylvania giving work in hotel administration.

Only home economics research center in Pennsylvania.

Largest enrollment in home economics in the State, at both undergraduate and graduate levels.

Largest enrollment of nonhome economics majors in any land-grant institution in the United States.

World's largest water tunnel—Garfield Thomas Memorial Water Tunnel, test chamber 14 feet long, 4 feet in diameter; dedicated October 7, 1949.

Largest engineering, science, and management defense and war training programs, 1940–45—155,000 enrolled.

One of the largest university film libraries in the East, established 1941.

Largest flower test gardens in the United States; first approved by All-America Selections Committee for testing of new flower varieties before they go on the market, spring 1941.

A low-temperature laboratory second only to that of the United States Bureau of Standards.

Foreign Operations Administration

EXTENSION OF REMARKS
OF

HON. HARRISON A. WILLIAMS, JR.

OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. WILLIAMS of New Jersey. Mr. Speaker, I would like to call the attention of the Congress to a matter which I believe has extremely important ramifications.

Being a firm believer in a bipartisan foreign policy, I regret that the situation I describe below has arisen. The fact that issues in this field can be alleged to have acquired partisan overtones does not contribute to the building of unity in our Nation at this critical time. I have engaged in lengthy correspondence regarding the question of partisanship in FOA without bringing the matter to the attention of the Congress. Only because of the complete failure of the FOA to provide a satisfactory reply, do I now feel compelled to make the situation known.

As a member of the International Operations Subcommittee of the Government Operations Committee last year, numerous allegations of systematic patronage clearances in the Foreign Operations Administration were brought to my attention. As a result, I introduced an amendment to the Mutual Security Act prohibiting the application of political tests or criteria in the filling of nonpolicy positions in FOA. While my amendment barely failed in the House, a similarly worded amendment introduced by Senator HUMPHREY carried in the Senate and through conference and is now a part of Public Law 665, 83d Congress, 2d session.

At about the same time as I introduced my amendment, I wrote to the Director of FOA about a fellow New Jerseyite who had come to me and had called to my attention an example of what he felt was unwise and unjust personnel practice in FOA. I quote my letter to the Director. Incidentally, I have deleted the gentleman's name for obvious reasons:

I am writing you with respect to a fellow New Jerseyite, Mr. W., who was formerly in the employ of the Foreign Operations Administration. Mr. W. has business connections in my district and was in to see me with respect to a private matter. During the course of our conversation he relayed a story to me which sounds fantastic. It is as follows:

On December 12, 1952, Mr. W., left for The Hague, Netherlands, as a $50-a-day consultant for the Foreign Operations Administration. The original arrangement was for 3 weeks' work as marketing consultant to the Dutch Government. At the conclusion of the 3 weeks, Mr. W.'s appointment was extended for a 3-month period, ending April 1, 1953. At the end of this period the appointment was renewed for 2 more months, to June 1, 1953; and then there was a third extension to July 1, 1953. At the conclusion of this time, Mr. W. returned to the United States. I understand that during his stay in the Netherlands Mr. W. worked 6 days a week and many more than 8 hours a day in his efforts to help the Dutch in improving their marketing techniques. I am enclosing mimeographed copies of the letters of commendation received from a few Dutch organizations which would indicate that Mr. W.'s stay in the Netherlands was highly successful.

Mr. W reports that sometime during July he was approached by an official of the Foreign Operations Administration and asked to take a job as marketing consultant to the Italian Government. He was personally interviewed by a staff member of the Rome mission who requested that the appointment be made immediately. During the course of waiting for this appointment, which to Mr. W appeared to be assured, he took the highly responsible step of attending a language school at his own expense to learn Italian. The contract between him and the Italian Government was prepared, salary was agreed upon, and the Italian Government and the American mission accepted his appointment—in fact, eagerly approved it. Mr. W further reports that his loyalty and security check came through. At the final moment when Mr. W was all prepared to leave, had obtained a passport and doctor's certificate, he was not appointed. He was informed that all the clearances necessary could not be obtained but was given no indication of which clearance was withheld.

I have suggested to him that perhaps another candidate with equal or higher qualifications may have been selected for the position and that this might have accounted for the last-minute decision by the Foreign Operations Administration. However, Mr. W insists that he was the only candidate for the job at the time, which was proven by the fact that no one was appointed to fill the position for several months after he was turned down.

Mr. W has submitted to me a statement of all his allegations regarding the facts of this case, and they go much further than I have done in this letter. However, the principal assertion he makes is that the sole reason he was not appointed to the technical assistance project was the fact that he is a member of the Democratic Party.

I am a very firm supporter of the technical cooperation and foreign-aid programs and believe they constitute one of our really positive answers to Communist propaganda. I believe that the technical assistance program is an outstanding example of America's free world leadership. It therefore disturbs me greatly that members of my party are apparently discriminated against in appointments to nonpolitical technical assistance projects. It is my recollection that under the previous Democratic administration, the first two Administrators of ECA were members of the Republican Party. It is my understanding that every Administrator from Mr. Hoffman to Mr. Harriman has conducted the technical assistance program free of partisan considerations in the appointment of personnel. I am absolutely convinced that this is the correct policy, not only because technical assistance should not be a partisan program but also because it seems to me to be the most efficient way to obtain top qualified personnel. If Mr. W's statement that systematic political tests are now conducted as part of personnel practice in the Foreign Operations Administration, I believe we in the Congress should know about this fact. Such a practice would, of course, cut the recruiting potential for technical assistance projects in half and would, therefore, make for less efficient operation of the Administration.

I do not believe Mr. W desires the position mentioned above any longer. This letter, therefore, is not about his personal situation but rather about the general practices of your agency.

You will note that this letter stated that in this case all necessary clearances had been obtained for Mr. W's appointment, but that for unspecified reasons he was not appointed to a technical assistance job which had no political aspects. In response to the letter quoted above I received a letter from the Foreign Operations Administration which indirectly implied that Mr. W. was not appointed because the position for which he had applied had been abolished. I have strong reason to believe that was not the fact and that while the position was not filled, recruitment for it continued for many months after Mr. W. had been turned down. The question I raise is this: If Mr. W's allegation that he

was not appointed because he is a Democrat is not true, why did the Administration find it necessary to deviate from fact in replying to me and to assert a position which has not been and probably cannot be substantiated?

I answered the letter I received from FOA and I quote my reply of August 5 below:

Thank you for your letter of August 3. I must say I was somewhat disturbed by the fact that my letter of July 6 remained unanswered and unacknowledged for almost a month.

Apparently there is some misinterpretation as to the questions I raised in my letter. I specifically said that Mr. W. was no longer interested in the position and, therefore, my question was whether or not his allegations were true. As you recall, he alleged that in technical assistance projects a systematic political patronage arrangement prevailed in FOA. My question was, am I supporting a program which systematically discriminates against people who are identified as Democrats in obtaining positions of nonpolicy levels as well as on purely technical jobs under the technical assistance program?

I did not receive a reply to the above letter. On December 28, 1954, I again wrote to the Foreign Operations Administration on this problem, as follows:

As you undoubtedly recall, Senator HUMPHREY and I sponsored an amendment to the Mutual Security Act of last year which made the provisions of section 1005 of the Foreign Service Act applicable to the overseas personnel practices of the Foreign Operations Administration. This amendment carried and is now part of Public Law 665, section 527, subsection C (1).

Would you please advise me of the administrative action you have taken to assure the implementation of this legal requirement of your personnel practices. I would appreciate copies of any amendments or additions to manual orders which may have ensued or administrative memoranda to operating personnel which assure the implementation of this amendment.

I have discussed this matter with Senator HUBERT HUMPHREY, and he is also vitally interested in the question and would appreciate a copy of your response to me on this matter.

I received the following response from the FOA, under date of January 12, 1955:

In response to your inquiry as to what administrative action this agency has taken as a result of the application of section 1005 of the Foreign Service Act to our overseas personnel practices, we are pleased to inform you that we have not found it necessary to take any specific action by way of amendment or addition to existing manual orders.

Section 1005 of the Foreign Service Act provides in part that in the hiring of personnel for overseas assignments "no political test shall be required and none shall be taken into consideration." Since it is the practice of this agency to select applicants for overseas employment purely on the basis of professional qualifications, subject, of course, to necessary security clearances, it has been felt that specific administrative implementation of the prohibition in section 1005 against political discrimination was not required. Our key employment personnel, on the other hand, are fully conversant with the provisions of this section.

The implications of this exchange of correspondence are that if there were applications of political tests prior to the passage of the amendment I sponsored with Senator HUMPHREY last year, this practice still continues, since no steps have been taken to implement the no-political-tests amendment. I submit that political tests were applied to appointments before the passage of the amendment and that they have continued to be applied. Evidence of this, in addition to the above-cited case of Mr. W.—which, from the material I have at hand, appears to be clear-cut—is the report by the Republican National Committee quoted in the Congressional Quarterly of February 11 on page 132:

The largest number of placements (by the Republican National Committee) have been made in the FOA (79).

In a 6-month period, 79 people have been placed in the FOA by the Republican National Committee. The fact that a program exists to apply political tests to nonpolicy jobs is a violation of the amendment I sponsored. The additional fact that the FOA has been the most lucrative source of patronage positions is further evidence that laws are being violated in spirit, if not in letter.

I intend to present this material to the Committee on Foreign Affairs and have merely submitted the record here, since I feel that the answers I have received from the FOA have, through their deviousness, been insulting not only to me but to the Congress.

During my recent trip abroad I gathered a great deal of information which shows that the continuation of this patronage practice in FOA is having a serious impact not only on the morale of overseas personnel but on the ability to recruit technical experts for service overseas—a job which is very difficult even under the best of circumstances.

In the near future the Congress will be considering the continuation and, according to recent statements, the expansion of vital economic and technical assistance programs. I feel strongly that such programs are imperative to the United States position in the free world and to the preservation of freedom and democracy in the face of the widespread and unabating Soviet imperialist menace.

But to be successful our economic aid and technical assistance programs must be administered with wisdom, courage, imagination, and complete integrity. Congressional action can make success possible but only the best type of administration will make it probable. And yet, as of this very moment there is within the FOA an office whose function it is to place Republican political nominees and to apply political tests and criteria to all proposed appointments and nominations. Such a breach of faith with the Congress certainly fails to ensure the kind of administration which is absolutely essential to the continuing success of our foreign aid programs and should no longer be tolerated.

Lincoln's Philosophy Lives On

EXTENSION OF REMARKS

OF

HON. THOMAS H. KUCHEL

OF CALIFORNIA

IN THE SENATE OF THE UNITED STATES

Friday, February 18, 1955

Mr. KUCHEL. Mr. President, I ask unanimous consent to have printed in the RECORD an address which I delivered at the Lincoln Day luncheon in Los Angeles, Calif., on February 10, 1955.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LINCOLN'S PHILOSOPHY LIVES ON

Across our country this week, people are meeting to commemorate the birthday of Abraham Lincoln, martyred American president who saved our Nation and emancipated a race. His era in history was one of trouble and tribulation. But it was also one which beckoned to him to provide an unselfish and devoted leadership to a high cause, and he provided it to the benefit of his country in full measure. His was a martyrdom of sacrifice to the cause of freedom.

Abraham Lincoln's words come hurtling down the years: "With firmness in the right as God gives us to see the right, let us strive on to finish the work we are in * * * to do all which may achieve and cherish a lasting peace among ourselves and with all nations."

Mr. Chairman, our work remains unfinished, and our goal remains the same: peace among ourselves and peace with all nations. The burden of those labors is being borne today by a patient, devoted Christian leader, dedicated, as Mr. Lincoln was, to peace at home and throughout the world. With deep religious conviction, with humility, and with native commonsense, President Dwight Eisenhower is presently engaged in arming America morally, strengthening her economically and militarily, conducting her foreign policy skillfully and firmly, all in the forward march toward the attainment of the selfsame goal which our Civil War President set for our Nation.

Many significant changes have been wrought in the past 2 years by our Government in the conduct and direction of our national affairs.

I believe, and I have often said, that the people of our country want clean, strong, honest, American Government. Republicans want it. Democrats want it. So do our independent citizens. I can give you the assurance, though I know you do not need it, that that is exactly what President Eisenhower and his administration are giving to all of us.

The record of these last 2 years is studded with examples of bipartisan approval of presidential recommendations. This is true both in the domestic field and in foreign policy. It is a record which, I believe, will continue in the future.

On some legislation of singular interest to California, I am always proud to remember that when the roll of Senators was called on passage, Democrats joined Republicans in approving our State's request, and we triumphed over scattering but vigorous partisan opposition.

As a Senator from California, as well as a Senator of the United States, I am grateful for this chance to summarize and highlight a variety of actions that will further our progress and brighten our promising future.

In the past year alone, Congress enacted laws that protected the interests of our cotton farmers, whose crop now is California's leading agricultural commodity; it cushioned

the impact on seriously congested schools in scores of our communities where thousands of additional families were drawn by reason of Federal activities and programs. It has contributed toward the solution of our continually pressing water problem, undeniably a matter of greatest concern to our expanding economy and development; and it has facilitated our commerce through improvement of ports along the whole stretch of our coastline.

As a sample of what has been done to safeguard our lands and help us utilize our resources, let me cite part of the record of the 83d Congress:

Increased funds were appropriated to speed the pace of flood prevention projects in Los Angeles, the northern section of the bay region, and in the lower Sacramento Valley.

Dams were authorized to bring about greater use of waters in several widespread areas of our State, for the benefit of farmers and city dwellers alike.

Construction of additional distribution systems was made possible, to carry benefits of the Central Valley project to more farm areas in the central valleys of our State.

The outlook for the future is encouraging.

Recognition of the continuing problem of our schools will be made in the present Congress and hearings on the matter are now in progress in Washington. Progress will be made in our water and power problems. In line with the recommendations of our Governor, I have introduced legislation for the multiple-purpose Trinity-San Luis project in northern California. Also, in conjunction with colleagues in both Chambers, I have proposed Federal assistance for the so-called Tri-Dam project in San Joaquin and a bill to assist the people of Ventura County in efforts to satisfy their acute water demands.

As a member of the Public Works Committee I look forward to playing an active part in shaping legislation to carry out a comprehensive long-range highway program. This measure will enable the Federal, State, and local governments to tackle the neglected problem of expanding and modernizing roads of all types so our highway network may better meet demands of our highly mobile population.

The Federal Government, at long last, has become an ally in the fight against a menace which endangers an increasing number of communities, air pollution. Just this month President Eisenhower again acknowledged that the complex problem of checking and, we hope, ultimately eliminating smog, requires positive participation by national agencies. They will make a tremendous contribution chiefly in the field of scientific research and should speed the efforts already under way in various metropolitan areas. I shall endeavor to broaden the program of Federal assistance in this field, and I feel hopeful that aid will be forthcoming to clean up the atmosphere in the cities and towns of California and across the Nation.

Production and employment are increasing on a broad front. President Eisenhower has prophesied that, within a decade, our current annual production level of three hundred and sixty billion dollars will increase to five hundred billion or more, expressed in dollars of the same purchasing power.

In the first 2 years of the present administration, Federal appropriations have been reduced, Federal personal income taxes and excise taxes were cut, the excess-profits tax was repealed, governmental controls on business were abolished, and 1954 was one of the best years, economically, in our history.

We've made magnificent strides in the field of human rights and equal dignity among our people in a fashion that would make Abe Lincoln proud of us. In this free republic of ours, the brotherhood of man becomes an increasingly accepted standard of decency, and the leadership of our Chief Executive has supplied the idealism and the intelligence to bring to more of our people a rising standard of living in this country of free men and free government.

The cloud on the horizon is the world situation.

With the most painful and heartfelt regret, the American people are aware that there are those in the world who oppose freedom and who have been measurably successful in stamping it out in great areas. Human slavery, in its most cruel form, is practiced today as a Government policy by those countries chained down by Red communism. Their current activities, placed in the background of their self-proclaimed desires, are cause for sober concern by free America and by the free world. And it is to this question that I desire now to direct your attention.

Basically, the American people today and their Government concern themselves with the security of our Nation and an honorable peace in our world. Perhaps never before have they turned as soberly to the contemplation of our Nation's needs to preserve freedom, as they have today.

We live our lives in a whole new era. Solving the problems of freedom in that era depends upon our acceptance and understanding of the new energies which men of science have brought forth in our time. The needs of the American people in securing their freedom must be, and have been, set in this background.

Several months ago I listened to Admiral Carney in Vallejo suggest that the American Navy is on its way to complete atomic power for its propulsion. Thus, since 1789, we have passed successively through periods of sailing ships, and steam ships, and diesel ships, to atomically-propelled vessels. Our gallant air force is expanding almost daily, and piston planes give way to jet-powered aircraft. Whereas at the outbreak of the Korean war the United States Air Force had but 42 effective wings out of a projected 70, it has today 121 effective wings out of a projected 137, a goal which will be attained before too many months have passed, with the approval by the Congress to recommendations of the administration. Our airmen have long since penetrated the sonic barrier, and one of their experimental planes has flown 1650 miles per hour, and how much faster is the Defense Department's secret. An American airman has flown to an altitude in excess of 85,000 feet, and again it is a secret how much further up he may have gone. The United States Army and the Marine Corps likewise have entered upon a modern atomic posture of readiness and mobility, testifying, without equivocation, to our determination to safeguard American security.

Every citizen of this country and his family may give eternal thanks that the Commander in Chief of our defense forces is an unselfish and enlightened leader devotedly dedicated to peace in the world, partly by reason of his own experiences over an almost entire lifetime as a skilled professional soldier.

In his state of the Union message to the Congress early in January, the President of the United States again stated that our national goals continue to be a just and enduring peace, and a realistic worldwide limitation of the implements of war. "We maintain powerful military forces," he said, "Because there is no present alternative—they are forces designed for deterrent and defensive purposes, able to strike back with destructive power in response to any attack." The defense plans of the United States have been under the personal direction of the President after his own long and contemplative study. His recommendations for our country's defense will, I prophesy, be given the same bipartisan congressional approval in 1956 as they were these last 2 years. There are a few professional disagreements on emphasis, but here again we can be thankful for the experienced counsel which the Chief Executive can give as a military man. His recommendations include, among others, an emphasis on modern airpower and new weapons, the elimination of duplication and overstaffing, the acceleration of a program for our own continental defense, and the build-up of a military reserve. Incidentally, they include increases in compensation for service personnel. When I tell you that only 15 percent of the Regular Air Force personnel are expected to reenlist when their present terms expire, I underline the importance of increasing the attractiveness of peacetime military service.

Meanwhile, in existence or on the drawing boards are weapons so appallingly destructive as to chill one's imagination. International ballistic missiles—euphemistically termed IBM—will, we are told, travel across oceans at unthinkable speed, addressed to targets thousands of miles away, with considerable precision and accuracy. And while the science of destruction continues its deadly progress among the free countries of the world, there is no question that international communism, with the brains it has from varying sources at its disposal, likewise makes progress in this same field.

Recently, the former Chairman of the Joint Atomic Energy Committee said:

"Today, atomic and hydrogen bombs exist in growing numbers on both sides of the Iron Curtain. Today—not next year, or the year after, but today—the Soviets have both the bombs and the planes needed to launch a devastating nuclear attack against the cities of North America."

Listen to Winston Churchill as he comments on current history:

"Mankind has never been in this position before. Without having improved appreciably in virtue or enjoying wiser guidance, it has got into its hands for the first time the tools by which it can unfailingly accomplish its own extermination. That is the point in human destinies to which all the glories and toils of men have at last led them. They would do well to pause and ponder upon their new responsibilities. Death stands at attention, obedient, expectant, ready to serve, ready to shear away the people en masse; ready, if called on, to pulverize, without hope of repair, what is left of civilization. He awaits only the word of command. He awaits it from a frail, bewildered being, long his victim, now—for one occasion only—his master."

There you have a glimpse of the background in which nations of the world may decide upon the course to follow in dealing with one another. And it is against that background that the American people must determine the course of their own policy as respects our neighbors. Our Government is seriously concerned with such a question, and the Senate, and the House of Representatives as well, have sat in judgment upon phases of it these past several weeks.

On January 24, President Eisenhower sent to the Senate and the House a message in which he reiterated that this country's basic goal is safeguarding the security of the United States by establishing and preserving a just and honorable peace. He then described, in considerable detail, the serious and darkening situation in the Straits of Formosa. Suffice to say here, since 1945 the islands of Formosa and the Pescadores have been occupied by the Republic of China, a loyal ally of the American people. Communist China, which incidentally still incarcerates innocent American citizens, anaounced its determination to invade and conquer these islands and bring them under the aegis of Red Chinese communism. The President emphasized the importance to the American people that these islands remain in friendly hands. He requested the

Congress to adopt a resolution authorizing him to employ our Armed Forces as he might deem necessary to secure and protect these islands against armed attack.

What, my fellow citizens, is the importance to the American people of Formosa and the Pescadores? In the words of the President of the United States, those islands, in unfriendly hands "would seriously dislocate the existing, even if unstable, balance, of moral, economic, and military forces upon which the peace of the Pacific depends. It would create a breach in the island chain of the western Pacific that constitutes, for the United States and other free nations, the geographic backbone of their security structure in that ocean. With that, the Joint Chiefs of Staff of the United States agree."

I want to recall the words of another great American citizen who was a guest of the people of Los Angeles a very few days ago. Speaking to the 82d Congress on his triumphant return to our country, Gen. Douglas MacArthur described the Pacific Ocean as a vast moat to protect the United States as long as we held it. He spoke of a chain of islands in the Pacific which constituted for Americans a protective shield. It was his powerfully-stated conviction that a breach in that littoral defense line by an unfriendly power would make vulnerable each remaining segment of it. And then he said, "Under no circumstances must Formosa fall under Communist control. Such an eventuality would at once threaten the freedom of the Philippines and the loss of Japan and might well force our western frontier back to the coasts of California, Oregon, and Washington."

In the considered judgment of such American patriots who are qualified to speak, Communist occupation of Formosa and the Pescadores would seriously endanger the security of the people of the United States and would undermine the cause of peace.

The resolution was debated in the House of Representatives and it passed almost unanimously with only three Members opposing it. It was debated at considerable length in the Senate. All manner of amendments were offered to delimit or restrict the President's responsibility. I listened to those Senators who advocated restrictive amendments or who advocated, indeed, no resolution at all. I listened also to the distinguished Democratic Senator WALTER F. GEORGE, chairman of the Foreign Relations Committee, who urged the adoption of the resolution exactly as the President had recommended it. On the basis of all the background and of the Senate debate, I say to the people of my State of California, there was only one course in my judgment to pursue in the cause of American security and peace in the world. That was to uphold the recommendation of the President of the United States. And the Senate did uphold the President's recommendation, and did so overwhelmingly.

Thus, for all the world to see, the President of the United States and the Congress, representing the American people, have taken an unequivocal position. It is a position in line with our basic foreign policy and completely in consonance with our American goal.

That action was followed a few days later by overwhelming ratification in the Senate of the Southeast Asia collective defense treaty. By that commitment the United States, together with Australia, New Zealand, Great Britain, France, the Philippines, Pakistan, and Thailand, combined to create a protective network of mutual defense, to promote security and to strengthen the fabric of peace in Southeast Asia and the Southwest Pacific. This treaty is designed to deter aggression, which means Communist aggression, in that area of the world by warning potential aggressors that an open armed attack upon the territory of any of the parties will be regarded by each signatory nation as dangerous to its own peace and safety. In such contingency the parties agree to meet the common danger in accordance with their constitutional processes. They also agree to consult on measures for their common defense whenever the territory or integrity or political independence of any of them is threatened other than by armed attack, which might endanger the peace of the area. Thus it is indicated to communism that its techniques of internal subversion would be dealt with effectively. If communism fails to understand anything but force and might, then communism is forewarned that retribution lies in store for it for breaching the peace in the future.

This is the foreign policy of the Government of the United States. We have now added a mutual defense treaty with Nationalist China. The SEATO treaty in Southeast Asia balances our NATO treaty of mutual security in Europe. It is a policy based upon coming into firm agreement of those who, like ourselves, love freedom. It is designed to deter Communist aggression and the onslaught of Communist slavery. It is an enlightened policy of our own self-interest consistent with our goal of freedom and of peace. There are some in California and some in the Nation who, for varying purposes, oppose this policy. They are a vociferous minority and they are wrong. For my part, my friends, I shall continue to support that policy as it is carried out by the President of the United States.

When Abraham Lincoln was about to become President of the United States in 1861, and as he was traveling en route to Washington, he made a statement to the American people which I repeat as I conclude:

"If the people shall be lost, it is little to any one man * * * but a great deal to the * * * millions of people who inhabit these United States, and their posterity in all coming time. It is your business to rise up and preserve the Union and liberty for yourselves, and not for me. I appeal to you again to constantly bear in mind, that not with politicians, not with presidents, not with officeseekers, but with you is the question: Shall the Union and shall the liberties of this country be preserved to the latest generations?"

Mr. Lincoln answered history in the affirmative. So must we.

The Challenge to Public Power

EXTENSION OF REMARKS

OF

HON. RICHARD L. NEUBERGER

OF OREGON

IN THE SENATE OF THE UNITED STATES

Friday, February 18, 1955

Mr. NEUBERGER. Mr. President, on February 16, 1955, it was my privilege to address the annual meeting of one of the most useful groups in our Nation—the National Rural Electric Cooperative Association. This is the organization which has done so much to bring the blessings of electricity, with an attendant higher standard of living, to hundreds of thousands of farm families in rural America.

Other Members of Congress, of both great political parties, who spoke to this highly successful meeting were the Senator from North Dakota [Mr. LANGER], the Senator from Tennessee [Mr. GORE], and Representative H. R. GROSS, of Iowa.

I addressed the convention, assembled in Convention Hall at Atlantic City, N. J., on the subject of The Challenge to Public Power, reviewing the efforts undertaken during the past 2 years by the present administration to eliminate or destroy the public power program in the United States. I had the honor of being introduced by my old friend, Lee Wooden, of Jewell, in Clatsop County, Oreg., the president of the Rural Electric Cooperative Association in our own State.

Mr. President, I ask unanimous consent that my address to the delegates attending the National Rural Electric Cooperative Association be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE CHALLENGE TO PUBLIC POWER

(Address by Senator RICHARD L. NEUBERGER, of Oregon)

One of the great moments of my career was to stand with George William Norris, the father of public power in America, when he saw Bonneville Dam for the first time. He watched the Columbia River surging inexorably through the Cascade Mountain Range, before it thundered over the spillway of the long, low dam.

"I don't think you people in the Northwest realize what a marvelous resource you have in this wonderful river," said Uncle George. "Is there any other bounty which produces so much good for mankind and yet never diminishes in quantity?"

George Norris is gone now, and the public power program which he helped to build confronts a major crisis. Yet many times I have thought of what he said. What other resource can light farms, turn factory wheels and operate businesses and, at the same time, continue in as great an abundance as ever before?

The lighting up of rural America was born of the same forces that started major multipurpose projects. The first real electric co-op came into being under TVA. Today about 300 of the 1,000 REA's receive all or part of their power supply from Federal power projects. Truly, rural families have a tremendous stake in future resource policies, not only because of potential power supply but because of the great impact of TVA and Bonneville on the rates of private power companies.

When Bonneville and TVA were started, it was like dropping a pebble into a pond of high-power-company rates. The effect of an abundant, low-cost power supply was immediate and far-reaching. The public-power yardstick was felt in ever-widening circles, forcing down the padded rates in adjacent areas.

For 20 years, the United States Government promoted a program to make the rivers of America the servants of the people. I use the term advisedly. I live in a State where only 27 percent of our farms had electricity in 1933. By 1952, this figure had soared to 98 percent. It is practically impossible to measure this gain other than in terms of increased creature comforts, greater purchasing power, a higher standard of living. These are the only proper measurements.

Mrs. Neuberger's mother, Ethel Kelty Brown, is one of the farm women who had no electricity until the programs were begun which symbolize the work of the National Rural Electric Cooperative Association. Mother Brown has told me what it was like to live on a farm without power. It meant no refrigeration for the food which was cooked. It meant doing that cooking on a wood stove, with the women splitting kindling while the men were at their chores.

It meant hand-washing farm clothes—which get excruciatingly dirty—on a corrugated washboard. It meant carrying a Coleman lantern from room to room at night when children were sick.

POWER CHANGES FARM LIFE

Electricity on the farm has changed all this. The vast majority of the farms of our country have power today because of the Federal power program, because of the Rural Electric Administration, because of the watchful vigilance and persistent crusading of groups like the National Electric Cooperative Association. And all this benefit has occurred without diminishing the natural resources of America. The late J. D. Ross, first administrator of Bonneville, used to call that dam "an oil well which will never run dry, a coal mine that will never thin out. * * *"

Although I am only (sic) 42 years old, I come before you today as a man who has seen the public power program revolve in a full cycle in my region, the Pacific Northwest.

I witnessed the program begin a little more than 20 years ago. It was a bipartisan program—a program advanced by far-sighted men in both major political parties. By every possible standard, it was a success. As you know, electricity was brought to the farms, and at rates which the farmer could afford. Industrial payrolls came next, and this meant a steady market in town for the farmer's crops. Although the Pacific Northwest has historically lagged behind the rest of the Nation in manufacturing, its expansion led the land during the first decade that Bonneville power was available. Between 1939 and 1948, the national increase in manufacturing employment was 284 percent but in the States of Oregon and Washington it was 329 percent. Furthermore, this program has been generously paying for itself. Indeed, the annual reports of the Interior Department actually admit that the Columbia River power program is far ahead of the amortization schedule in repayments to the Government.

And auxiliary benefits of incalculable value were occurring simultaneously. In 1933, the year Bonneville Dam was started, a mere 85,000 tons of cargo moved upstream into the reaches of the upper Columbia River. In 1953, the tonnage was 1,375,000. This was merely a bonus from the power program. And what are we to say of the thousands of irrigated homesteads now being wrested from the arid upland desert near Grand Coulee, homesteads where ex-GI's and their families are making a new start in life?

I stress these benefits that have taken place in my own part of the country because I can be a little more poignant, a little more dramatic, a little more specific about it. These things I have seen with my own eyes. I was at Grand Coulee when the world's biggest dam was started. I saw the first water gurgling through canals amidst the sagebrush and tumbleweed. I saw the first transmission lines stretching out across the wasteland like a steel-legged centipede.

CALCULATED SCHEME STOPS PROGRAM

This was a program dedicated to the welfare of the United States, yet you of the NRECA know what has happened to that program. In 1953, the present national administration stopped it—deliberately, calculatingly, grimly.

The onslaught has occurred on many fronts:

1. Appropriations have been reduced for agencies devoted to the wider use of low-cost power.

2. Key waterpower sites, like Hells Canyon, have been pledged by the administration to private power companies for piecemeal, high-cost development.

3. New Federal starts have been choked off.

4. So-called wheeling agreements with utility corporations have given them control of the power supply in many areas.

5. Attacks upon the public-power preference clause have imperiled the electric supply of rural electric co-ops and other nonprofit systems.

6. A nationwide barrage of propaganda, some of it stemming from the White House and executive departments, has sought to indict such undertakings as the Tennessee Valley Authority and Bonneville as "creeping socialism."

7. A so-called partnership with private utilities has been proposed, whereby these companies would monopolize the revenue and energy at Federal power projects.

I emphasize the partnership because it represents today the spearhead of the current attack upon public power. The word "partnership" peppers the President's budget message. It is an appealing word. Yet what kind of a partnership is it? It is a partnership in which the Government relinquishes to private monopolies the powerhouses at Federal dams, while the Government continues to finance the nonreimbursable features, such as fish ladders, floodgates, and navigation locks.

THE MONOPOLY PARTNERSHIP

We had a partnership in operation. It wasn't this kind of partnership. It was a legitimate partnership between the Government and its citizens. Clyde T. Ellis, your executive manager, described this partnership in a masterful address which he delivered a year ago last month at your 1954 convention in Miami. Mr. Ellis referred numerous times to the Federal-local partnership, under which kilowatts were being sold at low cost to whatever distributing agency the residents of a particular area preferred.

It might be a municipal system as in Seattle. It might be a private power company as in Portland. It might be a public utility district as in Clark County, Wash. It might be a rural electric co-op as in Benton and Lincoln Counties, Oreg. These various methods of distribution represented the democratically chosen preference of the men and women living in that part of our Nation. They made the choice without interference by politicians in either the State capital or the National Capital, and then the Federal power system made available energy from the dams constructed on key river networks.

This was a bona fide partnership, as Clyde Ellis made clear. But what is proposed today as partnership is no partnership at all. It is monopoly and special privilege. For at least 50 years, a private stranglehold will be given legal sanctity at a great power site, and there will be nothing that the men and women in that area can do about it, through half a century of time.

We are told the abandonment of public power is necessary in the name of Americanism. Yet the preference clause, which safeguards the power supply of our rural electric co-ops, goes all the way back to the administration of Theodore Roosevelt and the Reclamation Act of 1906. I refuse to believe that the man who led the Rough Riders up San Juan Hill was a creeping Socialist. The inclusion of the preference clause in the Bonneville Act was principally the work of Senator Charles L. McNary, of Oregon. Does the present administration want to accuse of socialism the man who was Republican minority floor leader in the United States Senate for well over a decade?

In the barrage of propaganda being fired at the people over the Hells Canyon question, these overtones of patriotism again appear. Is it patriotic to abandon the greatest hydroelectric site left on our continent to the absentee-dominated corporation, which will tap only a segment of the available kilowatts?

PLAYBACK OF HISTORY

Historians tell us that no issues are really new. They all have arisen before—perhaps in different guise and other settings. Yet almost half a century ago, Theodore Roosevelt and his illustrious Chief Forester, Gifford Pinchot, confronted a Hells Canyon problem of their own.

Utility companies were grabbing off power sites on the mountain rivers of the West. Although the Nation had recently set aside the forest reserves, no legislation existed for the specific protection of these hydroelectric power sites. Let Pinchot describe what happened, in his autobiography Breaking New Ground:

"A certain number of forest-ranger stations were applied for which were needed less for rangers than to give the Government a temporary hold on some power site and prevent the power octopus from sucking it in. * * * Some of these ranger stations we deliberately located on water power sites, in order to insure some form of government control. * * *"

Contrast this action by Teddy Roosevelt and Gifford Pinchot with the shameful relinquishment of Hells Canyon by the present masters of the American Government. Roosevelt and Pinchot contrived extra-legal machinery to save these power resources for future generations. They relied upon a subterfuge. This national administration refuses to use the machinery long ago created for the purpose—it seeks to hasten the abandonment of Hells Canyon, John Day, Green Peter, and other sites.

Nor can this be called in any sense of the word a partisan issue. Theodore Roosevelt and Pinchot were lifelong Republicans. The program which this administration has jettisoned was, in many of its concepts, a program originated by Republicans of the past—Roosevelt, Pinchot, Hiram Johnson, Norris, Borah, McNary, and many others. In my own State, I am a Democrat, but thousands of Republicans, on farms and in the cities, assured me that they were loyal to a publicly motivated program of resource development that had its roots within their own party.

Under this administration, engineering and scientific knowledge have been bent to political whims. The 308 report of the United States Army Corps of Engineers is the master plan for development of the Columbia River Basin. Surely if the Army ever errs, it is on the conservative and cautious side. But the 308 report recommends without reservation the erection of a high multipurpose Federal dam in Hells Canyon.

Yet this national administration assures us that the 308 report is wrong at Hells Canyon. Of course, the 308 report, according to the administration, is right at Libby Dam up along the Canadian border, where the prospects for construction are so clouded by international disputes that no private power company covets the site. So, here, the administration is willing to promote a Federal dam. How can the same engineers, with the same transits and the same diamond drills, be wrong on the Snake River and right on the Kootenai River? It is as if a patient told his doctor that the doctor was right about one lung, but wrong about the other.

INTERIOR POLICIES THREATEN REA'S

One of the serious blows suffered by REA's under the new policies was abrogation of 40-year contracts between the Interior Department and cooperatives in the southwest. As a result, the REA's were threatened with the bankruptcy or high rates, or loss of their independence. As you know, the original destruction of the continuing fund vital to these contracts was put through by a former Senator from Oregon. I assure you the new Senator from Oregon will do everything in his power to undo the damage.

Other corrective measures are also necessary, especially against the conspiracy to rewrite the formula for allocating power costs to make the price of Federal power as high as private power.

I cite these things to indicate how politics and greed are intruding into programs

which, until the last year or so, were decided by the needs of the American people and not by the selfish desires of 1 or 2 utility corporations.

ATTACK BY STEALTH

As you are well aware, REA funds have been cut but not abolished by Congress. You have been successful in maintaining reasonably adequate loan funds and services during the past 2 years. But this was to be expected. It was forecast at your first annual convention by the late George W. Norris. He said: "The attack upon REA will not be an open assault. The attack will be by stealth and treachery because REA is too popular to be attacked openly."

I don't own a crystal ball, but occult powers are not needed to predict that the Hoover Commission will probably recommend that REA—as you now know it—be abolished. Out of respect for your political potency, they will try to put forth some plausible substitute like a Federal REA corporation forced to borrow money from bankers at high-interest rates, and run by a board of directors and not by the Congress, which is now REA's board of directors.

THAT FEDERAL POWER MONOPOLY

For nearly 2 years, the administration has defended its abandonment of the Federal power program by contending that the Nation was in dire peril of being suffocated by a Federal power monopoly.

Secretary McKay has uttered this warning on many occasions. At McNary Dam on September 23, 1954, the President himself warned against Federal operation of "a gigantic, overwhelming nationwide power monopoly."

On November 4, 1954, Budget Director Rowland R. Hughes warned against committing the country to "a policy of establishing a nationwide power monopoly."

Yet this entire argument was refuted by the President in his state of the Union message of January 6, 1955, when he flatly declared to the Congress that "Federal hydroelectric developments supply but a small fraction of the Nation's power needs."

On this occasion, the President definitely asserted the true facts. Only about 13 percent of the energy used in the Nation is generated by the Federal Government. Approximately 6 percent spins off the turbines of municipal systems, and the remaining 81 percent from private utility corporations.

What is monopoly—13 percent, or 81 percent?

Yet for months the American people were told solemnly by their highest government officials that they couldn't have any more dams like Grand Coulee, Shasta, and Bonneville because of the imminent dangers of a Federal power monopoly.

Wasn't it Bernard M. Baruch who said that every man had a right to be wrong as to his opinions but that no man had a right to be wrong as to his facts?

SUBSIDIZED POWER: ANOTHER MYTH

Ever since the present national administration went into office, a conscious and deliberate effort has taken place to convince the people of America that the energy generated at Federal hydroelectric projects does not pay for itself. These projects are portrayed as vast drains on our national Treasury.

For example, Secretary of the Interior McKay appeared on the CBS Capitol Cloak Room TV program October 23, 1953. This colloquy took place between him and Mr. Bill Costello, one of the CBS panel:

Mr. COSTELLO. "Well, it's your philosophy, then, that the citizen generally should not pay the cost of keeping power rates low but that the individual consumer should pay the actual cost of producing that power."

Secretary MCKAY. "That's right. I don't think it's right to subsidize power out in my country—for instance in Oregon, Washington, Idaho, and that country. We shouldn't ask for power to be subsidized by the people in New England."

Now if anyone should realize that this is a plain and outright misrepresentation, it should be Secretary McKay. In the first place, his own annual report for 1953 declares (at p. 326) that "the repayment (on Bonneville) is substantially in excess of scheduled requirements." As a former Governor of Oregon and as a resident of the Northwest, the Secretary ought to know that the great Government power projects on the Columbia River are returning to the Treasury not only the original investment in hydroelectric facilities, but also interest and operating costs.

Consider the repayment record on the Bonneville Dam project alone. The Government has invested $128,549,822 in construction costs and operating expenses for Bonneville Dam. Although its full span of generators have been in operation only 11 years, the project has put $48,825,959 into Federal coffers from sale of power. In fact, the whole Bonneville system—marketing the output of all Federal dams on the Columbia—has collected gross income of $340,565,589 through the sale of kilowatts.

Yet these fiscal facts are not known today throughout the Nation. The other day I engaged in a brief and friendly debate on the floor of the Senate with Senator NORRIS COTTON, a fine Republican Senator from New Hampshire. He was of the opinion that our dams in the Northwest are a drain on the taxpayers of his State. In other words, the propaganda put out by Mr. McKay and others has taken root. Senator COTTON does not realize that the Columbia River projects actually, in the long run, will be an ultimate source of financial profit to the Federal Government. And I know he is not aware of the innumerable products manufactured in New England—products like alarm clocks, ice boxes, stoves, washing machines, and shoes—which have been purchased because thousands of rural folks in the Northwest have a higher standard of living and increased purchasing power through the abundant and low-cost electricity made available to them on their farms.

THE BETRAYAL AT HELLS CANYON

The adage that history repeats itself was never more dramatically brought home to me than when I was asked a year ago to review a book detailing the fight to build Grand Coulee Dam, called Hail Columbia. This book, written by George Sundborg, a former Northwest newspaperman, impressed me with the deadly parallel between the fight for Grand Coulee and our present day struggle for Hells Canyon Dam.

Mr. Sundborg could not have had the Hells Canyon case in mind when he wrote the book because he started the work before the Hells Canyon struggle commenced.

But the situations are such close parallels they might have been poured from the same mold—like the Gold Dust twins that used to adorn the soap flake boxes.

Kettle Falls was a place on the Columbia River about 117 miles upstream from the proposed Grand Coulee damsite. In March of 1921—just after the appropriation had been secured to core-drill the Coulee site—the Washington Water Power Company began to show interest in Kettle Falls as a site for development. On June 20, 1921, a contract for exploratory drilling on the Grand Coulee site was awarded. Ten days later, Washington Water Power filed an application with the Federal Power Commission to construct a dam at Kettle Falls. The Kettle Falls dam, located in the proposed Coulee reservoir pool, would have lopped off a hundred feet from the height of Grand Coulee—with consequent reduction of a million horsepower in the big dam's power output.

A long public debate ensued in which spokesmen for a number of Federal and State agencies were enlisted to support the power company. The pattern included such official statements as that of the then secretary of the Federal Power Commission. This gentleman said a dam at Grand Coulee—and I quote—"would involve an excessive initial investment", which, he said, it was "extremely doubtful could be secured for the purpose from any resource." This official went on to say of Grand Coulee that the FPC license to the power company would be granted only for a period of 50 years. "If at the end of that time or even before, it should become evident that the high dam would be a desirable step, the net investment of the Kettle Falls development could readily be absorbed by the Grand Coulee development." And, he added, "further investigation of this plan does not seem to be necessary."

It was not until June 23, 1936, that the FPC issued an order formally denying the Kettle Falls dam permit—nearly 14 years after Washington Water Power made its first move to block Grand Coulee construction.

I detail this background only for purposes of comparing some of the developments in the Grand Coulee and Hells Canyon fights. On June 9, 1947, the Army Corps of Engineers announced a public hearing would be held on plans for development of the Middle Snake River. These plans included Hells Canyon Dam, which was a key part of its famous 308 Report on Columbia River development. Thirteen days later, the Idaho Power Co. applied to the Federal Power Commission for a preliminary permit for a new run-of-the-river dam at Oxbow site, some 35 miles upstream from the Hells Canyon site. Granting of the Oxbow license would forever bar construction of Hells Canyon Dam, but would preserve the barony which the Idaho Power Co. holds in Idaho.

Since the Oxbow application was filed, the battle has raged on. We have seen spokesmen for Government agencies and company-front groups pressured to back the company scheme, just as in the days of Grand Coulee. Hells Canyon Dam and the whole plan for full development of the Columbia Basin was hit hardest by action of Secretary of the Interior Douglas McKay in withdrawing his Department's opposition to the Oxbow license.

As recently as last spring we, in Oregon, heard the Secretary repeat that the Federal budget was too precarious to start new dams. He was especially insistent about expenditures for Hells Canyon Dam, although when campaigning in the Colorado River Basin he never mentioned this fiscal situation. In Oregon, it was like listening to a hollow echo from the corridors of history—shades of that former FPC secretary who said Grand Coulee involved "excessive initial investment."

McKay never mentioned that, although Grand Coulee has had its full quota of generators in operation only since 1951, it has paid into the Federal Treasury over $51 million toward retiring an eventual power debt of $221 million.

POWER-COMPANY SLOGANS REVIVED

The parallel between Hells Canyon and Grand Coulee is significant. It shows that the situations and the arguments are not new. The ideas espoused by the Interior Secretary on Hells Canyon were merely revived from the Grand Coulee fight. It would appear that the public-opinion formers thumbed back through their book of tricks and slogans to pick out the present-day arguments.

But what if the arguments used by McKay and other administration spokesmen had prevailed in the embryo days of Grand Coulee? What would have happened to the energy which activated the Hanford works and made plutonium available for our knockout punch in World War II? Where would the power have come from for the aluminum

to make 50,000 planes a year for our Nation's defense? How would we have started to wrest from the desert 15,000 farmsteads for ex-GI's and others in the Coulee region?

Fortunately, the views of those who ridiculed Grand Coulee as a "white elephant" did not prevail. As a result, America has been a better and more secure place in which to live. There were men of vision, integrity, and courage—men like George Norris, of Nebraska, and Tim O'Sullivan, from the plateau of eastern Washington—who were willing to carry on in the face of ridicule, deception, and pressure. To prevent the warmed-over arguments of the 1920's from being used against the public-power program today, we must keep alive their traditions of battle. They knew not the meaning of surrender, nor did they compromise when faced with discouragement.

Many of you may feel that the picture of the moment is bleak. But you should feel optimistic and proud. You have been in the front lines, blunting the attack. You have been hurt in some areas but not beyond recovery.

It is a far road from a damsite on a tributary to the Columbia where Norris stood that day long ago, with the fine spray drifting into his face. The prophecy and admonition which Norris gave applies today, as it did then. He said: "We will come some day, perhaps within our lifetime, to the great electric age. * * * Since Adam and Eve were driven from the Garden of Eden, there has never been discovered an element in nature with so many possibilities of usefulness and pleasure as electricity. We ought to guard with jealous care the concentration of water-power in the hands of any combination of men."

This is Norris' challenge to us. He is gone. We are here. Can we fail this man—and the hosts like him—who fought for public power when it was considered a lost cause, when the movement was in infancy? The illustrious Jefferson said, "Each generation must make its own fight for liberty." Because Norris and his contemporaries won their battle, we cannot rest content. Our own Armageddon lies ahead.

The outcome is in our own hands.

Lincoln, Eisenhower, and a Republican Philosophy for Our Times

EXTENSION OF REMARKS
OF
HON. PRESCOTT BUSH
OF CONNECTICUT

IN THE SENATE OF THE UNITED STATES

Friday, February 18, 1955

Mr. BUSH. Mr. President, I ask unanimous consent to have printed in the RECORD a Lincoln Day address which I delivered last Saturday night at Glastonbury, Conn.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LINCOLN, EISENHOWER, AND A REPUBLICAN PHILOSOPHY FOR OUR TIMES

(By United States Senator PRESCOTT BUSH)

In every public speaker's life there come two reactions after he receives an invitation to address a meeting such as this. First, there is the warm, happy glow when the invitation arrives, and he feels that after all this time someone is still interested in what he has to say. Later, unhappily, comes the descent to the depths, as the time by which he must prepare his remarks inexorably approaches, and he wonders what new message he can bring his audience.

In this latter mood, back in Washington a few days ago, and thinking of Abraham Lincoln, whom we honor tonight, 90 years after his death, my eyes fell on a newspaper clipping I keep below the glass on my desk. It's a prayer which James Reston of the New York Times reprinted in his column some months ago. Let me read it to you:

"God give us men! A time like this demands
Strong minds, great heart, true faith, and ready hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue
And damn his treacherous flatteries without winking;
Tall men, sun-crowned, who live above the fog
In public duty and in private thinking.
God, give us men. Amen."

As I read those lines again one night last week, they gave me one part of the message I want to bring to you tonight:

The Republican Party can be eternally proud that in two times of crisis in the history of our Nation it gave America two Presidents of the stature of Abraham Lincoln and Dwight D. Eisenhower.

Both men, in truth, of "strong minds, great hearts, true faith, and ready hands." Both above the fog in public duty and in private thinking.

There have been other great Republican Presidents. The name of Teddy Roosevelt, to mention only one, comes automatically to mind. But between Lincoln and none of our other great Presidents, including the Oyster Bay Roosevelt, have there been such similarities as exist between the Great Emancipator and Dwight Eisenhower.

Many parallels between Lincoln and Eisenhower could be pointed out. I will mention but a few.

First, most obviously, are the times of national crises in which each bore the burdens of office. Lincoln, in his day, was confronted with a nation half slave and half free; Eisenhower, today, struggles with the many grave problems created by a world half slave and half free.

Outstanding, next, are their similar great qualities as spiritual leaders of the American people, leaders with a reverent faith in God and in the Divine inspiration which gives life to the great documents of our history, the Declaration of Independence, the Constitution and the Bill of Rights. Both men came at times in our history when there was need for the flame of that faith to burn brighter.

And then there is their leadership in stating the philosophy of the Republican Party to which we give our allegiance.

Political conditions in our times, as in Lincoln's day, envelop the political battle in a thick smog. Differences between our major parties are blurred. Factions mark splits within each party. Slogans and labels today are used much as they were in Lincoln's time to create differences where none exist, or to cover up the real differences which honest reason and discussion would expose.

Facing similar conditions in his time, Lincoln did something about them which we are only now beginning to understand. He cut beneath the party battle to eternal truths. He stated principles, defined differences, and clarified issues. No one can read the famous Lincoln-Douglas debates or the Lincoln campaign speeches without being impressed with his patient determination to draw the line between the emerging Republican Party and his Democratic opponents.

The same thing is being done today by President Eisenhower. A careful reader of his state papers and public utterances will find within them a growing body of political philosophy, a philosophy suited for our times and the Nation's manifold problems of the day.

As modern Republicans, we believe with Lincoln that "the dogmas of the quiet past are inadequate to the stormy present. And, as our case is new, so must we think and act anew."

And President Eisenhower, while holding fast to the fundamentals of our American system of government which our opponents sometimes forgot and still forget, is thinking and acting anew as we come to grips with the sometimes bewilderingly complex problems we face.

It is significant that our President has so often quoted Lincoln's famous statement on the nature of government:

"The legitimate object of government is to do for a community of people whatever they need to have done, but cannot do at all, or cannot so well do, for themselves, in their separate and individual capacities. In all that the people can individually do as well for themselves, government ought not to interfere."

And Dwight Eisenhower has added to that statement his own—one which I venture to suggest will one day become as famous:

"In all those things which deal with people, be liberal, be human. In all those things which deal with the people's money or their economy or their form of government, be conservative—and don't be afraid to use the word."

Together, those statements form the central core of the philosophy of our modern Republican Party—a party which is alive and sympathetic to the human needs of the people, and a party which, unlike our opponents at times, is aware of the dangers to the people's freedom which lie in overly paternalistic, centralized government.

It is a philosophy of progressive moderation, as the President has called it, or of moderate progressiveness as others name it. Whatever it be named, it is a philosophy which strikes a responsive chord in the minds and aspirations of the American people, who find a steady advance along the middle of the road to our future more sensible and more attractive than frenetic zigzaggings from left to right and vice versa.

The Republican Party has come a long way in improving its political philosophy since I first voted for Charles Evans Hughes in New Haven in 1916. It has profited by its own mistakes. It has profited by the mistakes of its political opponents. And, under the leadership of President Eisenhower, it reflects the best understanding of the real obligations and duties of government that we have yet seen in the history of the United States.

Our philosophy recognizes that in this complex industrial civilization of modern times, the problems of government are more complicated and more comprehensive than they have ever been before.

We recognize that there has grown to be a greater degree of interdependence among our people than ever before.

We recognize that the security and happiness of the American home is the most important basic asset in American economic, political, and social life.

We recognize that the happiness and security of those homes depends upon jobs. It depends upon opportunities and incentives to work.

We recognize that there can be no prosperity in the truest sense unless there are jobs available for all who are willing and able to work.

So, with these basic facts in mind, the Eisenhower administration has undertaken, in the past 2 years, to unleash the forces which will create this indispensable situation. It has adopted a policy of incentives, rather than a punitive attitude, toward labor,

capital, and management. It has passed legislation designed to loosen up the savings of the people and put them into constructive job-creating enterprises. It has been unashamed to state the doctrine that just as labor is worthy of its hire, so are the savings of the people.

In matters of taxation, it has adopted an incentive rather than a punitive attitude. And in dealing with private business, it has adopted a helpful and understanding attitude rather than one of punitive vindictiveness. And taken all in all, these attitudes and policies have resulted in more jobs—more jobs than we have ever had before in any peacetime period in American history.

But that is not all. Our policies have created a situation and an environment which gives tremendous confidence for the future. No one could read the President's Economic Report of January 19, 1955, without being inspired with confidence for the future. We recognize our Government's obligation to serve the basic human needs of our people, to encourage and promote personal and family security, and we point the way to accomplishment of those ends by encouragement and stimulation of jobmaking private enterprise.

I have referred to factional splits within the 2 major parties today. I sometimes think that we Republicans worry so much about our own differences of opinion that we blind ourselves to the very serious cleavages which drive apart the Democrats. From observation in the Senate, I can assure you that those cleavages exist, although I must reluctantly confess that the Democrats, perhaps smarter politicians than we, gloss them over as much as possible. And when the chips are down, their party discipline takes command.

Nevertheless, we can't blink the fact that there are divisions in our Republican Party, differences which are particularly apparent in the Senate. There has been encouraging progress in the early days of the 84th Congress towards increasing the unity among Republican Senators. I hope that progress will continue.

And to my Republican friends in Connecticut, I say that we are in need of greater unity—greater unity and a spirit of confidence. The shock and disappointment of losing the Governorship in the most recent election has caused some to doubt and despair. There are some, I regret to say, who fail to realize that in Dwight D. Eisenhower and the record we are making under his leadership the Republican Party has its greatest asset since the days of Lincoln.

Let us look to the future instead of the past. And our future as a party is bright. I see an overwhelming victory ahead for us in 1956. I see that victory because the record we are making will be unbeatable—the record both in national affairs and in the zealous attention to the interests of Connecticut which is being given by your entire Republican delegation in the Congress.

The President has the trust of the American people. I confidently expect that he will run again. In his messages to the 84th Congress, he has outlined a program and expressed a philosophy which we, as modern Republicans, embrace and in which we can take pride. It is a program and a philosophy for our times, reflecting the hopes and aspirations of a great majority of the American people.

The enactment of the program for the 84th Congress—and I believe most of it will be adopted, although not without heel-dragging and querulous quibbling by our opponents—will add luster to the record made by the 83d.

So look ahead.

Cast off the chains of fear and doubt. Be proud of our party and its great leader who will surely restore it to the hearts and affections of the American people.

United Nations Commission on International Commodity Trade

EXTENSION OF REMARKS

OF

HON. THOMAS E. MARTIN

OF IOWA

IN THE SENATE OF THE UNITED STATES

Friday, February 18, 1955

Mr. MARTIN of Iowa. Mr. President, on February 11 I had the honor of addressing the Executives Club of Chicago. This is an exceptionally fine group, and I was more than pleased to have the opportunity to speak to them. I ask unanimous consent to have printed in the RECORD the remarks I made plus the full documentation of the speech.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Last month a new United Nations Commission, known as the Commission on International Commodity Trade convened in New York. Our Government took a momentous step in December of 1954 when the Honorable Nat King, Acting United States Representative in the United Nations Economic and Social Council released the following statement:

"At the last session of the Council I stated that my delegation hoped to be able to announce at this session whether my Government would participate in the Commission on International Commodity Trade. In this connection I am now authorized to make the following statement:

" 'The United States Government is not now prepared to participate in the work of the Commission on International Commodity Trade. It wishes for the present to keep in close contact with the Commission's work as it develops in the hope that it might be able to be of possible assistance. The United States Government will be prepared to reexamine the question of its eventual participation after the Commission's terms of reference and its scope of activities have been defined'."

I wish to commend the Secretary of State and his associates for this action. I regard it as the first step in reversing some of the unfortunate economic trends within the United Nations which were originally promoted by our own Government.

Our present able delegation to the Economic and Social Council, headed by the Honorable Preston Hotchkis, has had to devote a great deal of its efforts to combat proposals which originated in our own State Department many years ago. This is unfortunate as the Iron Curtain countries are presented with an opportunity to sow dissension among the free nations when it becomes necessary for us to cast votes in opposition to proposals sponsored by friendly countries in the United Nations. Yet, if we are to remain true to our own economic philosophy, we can take no other course. Our sins of the past have now returned to haunt us.

This Commission on International Commodity Trade is 1 of 2 groups established by the Economic and Social Council whose activities can have a very profound effect upon our economy. The other is the Ad Hoc Committee on Restrictive Business Practices. I now intend to trace the establishment of these groups to concepts originally formulated by our own Government.

Our State Department published a document entitled "Proposals for Expansion of World Trade and Employment" in November of 1945. The foreword to this publication read as follows:

"Developed by a technical staff within the Government of the United States in preparation for an International Conference on Trade and Employment and presented for consideration by the peoples of the world."

The thesis of this document was that international trade was kept small by four factors:

(1) Restrictions imposed by Governments, i. e., tariffs and quotas.

(2) Excessive price fluctuations in the markets for primary commodities.

(3) Restrictions imposed by private combines and cartels.

(4) Irregularity and the fear of irregularity in production and employment.

This State Department document proposed the formation of an International Trade Organization to make recommendations for the removal of the impediments to expanding world trade enumerated previously and to implement such recommendations.

The Economic and Social Council of the United Nations, at its first session early in 1946, adopted a resolution to call an International Conference on Trade and Employment as suggested in the United States proposals. The council also established a preparatory committee to prepare an agenda and a draft charter for consideration by the conference. This preparatory committee held its first meeting in London in the fall of 1946. Subsequent meetings were held in New York and Geneva.

The international conference, to consider the charter, convened at Habana, Cuba, on November 21, 1947, and remained in session until March 24, 1948. The document which emerged from these deliberations is now familiarly known as the Habana Charter. It was submitted to the Congress in April 1949, and was strongly supported by President Truman and the then Secretary of State, Dean Acheson.

The House Committee on Foreign Affairs conducted extensive hearings on this agreement in April and May 1950. No report was ever made by the committee. The State Department announced in December of 1950 that it would not ask the 82d Congress, which convened in 1951, to again consider agreeing to United States membership in the proposed International Trade Organization.

Although the basic concepts for the charter had originated in our own Government, it is quite clear that the Congress never accepted the document which emerged from this series of meetings under United Nations auspices. In fact, the State Department, by its announcement in December of 1950, clearly showed that it realized the futility of asking the Congress to consider this subject again.

I shall now show how the four restrictive factors enumerated in the United States proposals were incorporated into the charter.

The first obstacle to the expansion of world trade outlined in the State Department's proposals was the restriction on trade imposed by governments including tariffs, quotas, and exchange controls. Chapter IV of the Habana Charter entitled "Commercial Policy" dealt with procedures to reduce tariffs and to extend the most-favored-nation treatment in trade agreements. It also covered quantitative restrictions and currency controls.

Chapter VI of the Habana Charter was entitled "Intergovernmental Commodity Agreements." This chapter recommended the use of such agreements to eliminate excessive price fluctuations in the markets for primary commodities and implemented the State Department proposal

dealing with this subject. The preamble to this chapter stated, and I quote:

"The members recognize that the conditions under which some primary commodities are produced, exchanged and consumed are such that international trade in these commodities may be affected by special difficulties such as the tendency toward persistent disequilibrium between production and consumption, the accumulation of burdensome stocks and pronounced fluctuations in prices. These special difficulties may have serious adverse effects on the interests of producers and consumers, as well as widespread repercussions jeopardizing the general policy of economic expansion. The members recognize that such difficulties may, at times, necessitate special treatment of the international trade in such commodities through intergovernmental agreement."

Chapter V of the Habana Charter was entitled "Restrictive Business Practices." It provided for procedures to eliminate the restrictions imposed by private combines and cartels in the original United States proposals. In effect it proposed an international antitrust law.

Chapter II of the Habana Charter was entitled "Employment and Economic Activities." This chapter dealt with the irregularity and the fear of irregularity in production and employment and, again implemented the State Department's proposals dealing with this subject.

The proponents of these proposals did not wait for the nations of the world to ratify the charter for the International Trade Organization. Steps were taken during the third session of the Preparatory Committee for the Habana Conference which met in Geneva in the spring of 1947 to implement some of these proposals.

This Preparatory Committee sponsored negotiations for the reduction of tariffs and conducted discussions which led to the General Agreement on Tariffs and Trade familiarly known as GATT. Although these tariff negotiations were sponsored by the Preparatory Committee for the Habana Conference to implement one chapter of the proposed charter and were finally incorporated in the General Agreement on Tariffs and Trade, the countries concerned established a separate organization, which is not an operating unit of the United Nations, to carry on this work. Other succeeding sessions were conducted at Annecy, France, and Torquay, England.

The GATT organization differs from the other groups which trace their origin to the original State Department proposals. In the first place, of the Iron Curtain countries, only Czechoslovakia which became a signatory to the GATT before she went behind the Iron Curtain is a member. The activities of GATT, by its very nature, are directed at the removal of trade barriers and not to the imposition of new controls and restrictions.

There was much criticism in the Congress of the GATT because many of us felt that no authority had been granted by the Congress through the Trade Agreements Act to enter into any such negotiations. The Eisenhower administration has scrupulously followed the practice of submitting agreements to the Congress so that the Congress and the executive can work together as independent and coordinate branches of our Government.

The provisions of the General Agreement on Tariffs and Trade currently are being renegotiated at Geneva. The President has assured us that they will be submitted to the Congress for our consideration. For the first time an opportunity will be afforded for this agreement to receive consideration on its merits by the Senate of the United States.

I am confident that the Congress and the President working together in this way can come up with a workable solution to expanding our foreign trade which is the objective that we are all seeking.

The Economic and Social Council proceeded to implement another of the United States proposals without even waiting for the convening of the Habana Conference. This was the proposal which dealt with excessive price fluctuations in the markets for primary commodities.

This United Nations group, at its fourth session, recommended, and I quote from the resolution:

"That, pending the establishment of the International Trade Organization, members of the United Nations adopt as a general guide in intergovernmental consultation or action with respect to commodity problems the principles laid down in chapter VI as a whole, i. e., the chapter on intergovernmental commodity arrangements * * *; and

"Requests the Secretary-General to appoint an Interim Coordinating Committee for International Commodity Arrangements to keep informed of and to facilitate by appropriate means such intergovernmental consultation or action with respect to commodity problems."

The Interim Coordinating Committee for International Commodity Agreements was not sanctioned by the Congress. The interim referred to in the title for this organization was presumably the time interval between the formation of this group and the ratification of the charter for the International Trade Organization. The interim has continued through 1954, although the United States decision not to join the ITO was made known in 1950. This organization which was established at Geneva, has now been supplanted by this permanent new Commission on International Commodity Trade, which met in New York last month. While some may feel that this action is unimportant, as we were not bound by any decisions made by this interim committee, in the opinion of the President's Materials Policy Commission, popularly known as the Paley Commission, this is not the case. Page 87, volume I, of its report, which was issued in 1952, contained the following statement:

"The United States has not ratified the treaty, but under a resolution the United Nations Economic and Social Council is bound with other nations to recognize chapter VI as a general guide."

This clearly indicates that, even though Congress refused to give its assent to United States participation in the International Trade Organization, the Paley Commission believed we were bound to accept these concepts. I shall now read from page 90 of the Paley report:

"By resolution of the United Nations Economic and Social Council, a review of chapter VI of the Habana Charter is called for some time in 1952. This code serves as a general guide for efforts of the free nations to stabilize materials markets."

Now let us review together the developments which took place starting in the General Assembly late in 1952 which culminated in our decision not to participate in this new Commission on International Commodity Trade.

In November of 1952 the Argentine Government presented a resolution of far-reaching significance to the seventh session of the General Assembly, which was then meeting in New York. This resolution was a new implementation of the original proposals of our State Department which had been embodied in chapter VI of the rejected Habana Charter. I shall now read the operative part of this draft resolution. It provided that the General Assembly should recommend to member states—and I quote—that—

"(a) Whenever governments adopt measures affecting the prices of primary commodities entering international trade, they should duly consider the effect of such measures on the terms of trade of countries in the process of development, in order to ensure that the prices of primary commodities remain in an adequate, just and equitable relation to the prices of capital goods and other manufactured articles so as to permit the more satisfactory formation of domestic savings in the countries in the process of development and to facilitate the establishment of just wage levels for the working population of these countries with a view to reducing the existing disparity between their standards of living and those in the highly industrialized countries;

"(b) Their governments should refrain, unless unavoidably required by national security in times of war and without prejudice to technological research and progress, from encouraging the production of any synthetic or substitute materials that unnecessarily affect the international demand for natural primary commodities;

"(c) Their governments should intensify their efforts to reduce restrictions on imports of primary commodities."

It is quite obvious, from what I have just read that the purpose of this resolution was to establish fixed, rigid international parity prices for all of the world's materials which could only be supported by heavy outlays on the part of the United States. It is also apparent that this resolution was aimed at discouraging the development of synthetic products, particularly synthetic rubber and synthetic fibers within the United States. This provision directly affects our national security. I know that none of us wish to again struggle with the problem of providing rubber from distant sources which confronted us in World War II.

Representatives from Australia, Belgium, Canada, China, France, the Union of South Africa, and the United Kingdom opposed this resolution as too general in scope and open to dangerous interpretations. The 1952 yearbook of the United Nations summarized the objections voiced by these countries. Among them were:

"(1) That a system of international parity prices such as that implied in the draft could not be instituted unless foreign trade were controlled by the state; (2) that such a system would make the economic structure more rigid and would not be conducive to increased productivity; (3) that there were no objective criteria for determining an adequate, just, and equitable relationship between prices of primary commodities and those of capital and other manufactured goods; and (4) that it would be better to deal with the problem through individual commodity agreements as the need arose.

"They also objected to the recommendation that governments should not encourage the manufacture of synthetic or substitute materials. Such action, they held, would harm the interests of both underdeveloped and industrialized countries; it would also stand in the way of progress, from which all, in the long run, would benefit. The latter point was also made by the representatives of Cuba, Ecuador, and Peru."

After considerable debate within the General Assembly and the adoption of several amendments, the Argentine resolution was put to a vote. It was approved on November 29, 1952, with 29 countries voting in favor of it, 16 opposing it, and 9 abstaining. I am happy to say that our Government was among the 16 countries opposed to the adoption of this resolution. The amended resolution contained the following provision which was not a part of the original Argentine draft resolution:

"Recommends that governments should cooperate in establishing multilateral international arrangements relating to primary commodities for the purpose of—

"(a) Insuring the stability of the prices of the said commodities in keeping with a reasonable, fair, and equitable relationship

between these prices and those of capital goods and other manufactured articles; and

"(b) Safeguarding the continuity of the economic and social progress of all countries, those producing as well as those consuming such raw materials."

You will note that this provision again urges the member governments to establish multilateral commodity agreements.

The amended resolution further provided that the Secretary General was to appoint a group of experts to study the entire problem and make recommendations for further action to the Economic and Social Council of the United Nations. Pursuant to this resolution, the Secretary General appointed five economists whose recommendations were transmitted to the Economic and Social Council in a report released in November of 1953. This report is entitled "Commodity Trade and Economic Development."

The report suggested the establishment of world buffer stocks and a new international currency which would be based upon the monetization of these stocks. It also proposed the negotiation of multilateral commodity agreements to cover a group of commodities rather than a single commodity. There were many other strange proposals which were totally incompatible with American free-enterprise economic concepts. The most important recommendation of the committee of experts was that a new trade Stabilization Commission be established. Now I shall read exactly what the experts proposed in this connection. They said:

"It seems to us that there is at present no effective international procedure for discussing and proposing action on the general problem of stabilization—a matter which transcends the problems of particular commodities. The present organization is directed toward piecemeal action, commodity by commodity. We do not think that this is sufficient; a general and simultaneous approach to the problem of stability in its many aspects is required. It is possible that a gap in international organization has here arisen unintentionally, through the absence of an international trade organization as envisaged in the Habana charter."

This so-called gap in international organization to which the experts refer, had not arisen unintentionally insofar as the Congress of the United States was concerned. I shall continue reading from the recommendations of the experts:

"We therefore propose that the Economic and Social Council should establish an intergovernmental commission, which we will refer to as the Trade Stabilization Commission. In order to provide permanent representation for the most important trading countries and an adequate rotation of representation for others, it would probably be necessary to have eight or nine member governments."

"The work of the Commission would involve exchanges of views between governments on possible types of action to which they may not wish to appear publicly committed; and there is a very real risk that premature knowledge of the Commission's deliberations would produce harmful effects in the commodity markets. We therefore recommend that, contrary to usual United Nations practice, the Commission should meet in closed session except when it decides otherwise. We would expect that, in addition to the formal meetings, occasions would be required for informal exchanges of view among the representatives of the member governments, meeting in private."

Our Government should not establish an international organization in which governments would make proposals to which they may not wish to appear publicly committed. I subscribe to President Woodrow Wilson's doctrine of open covenants openly arrived at. I am opposed to private meetings to "rig" commodity markets. This is essentially what the experts propose. We must all realize, in discussing these proposals that representatives of the Iron Curtain countries would be eligible to participate in this Commission.

The report of the experts and its recommendation for this new commission was placed on the agenda of the meeting of the Economic and Social Council which convened in New York in April 1954, and a resolution was introduced by the Argentine Government to establish this new commission. The comments of our representative to the Economic and Social Council, Mr. Preston Hotchkis, are most illuminating. I shall now read his statement regarding these proposals:

"The problem of marked price instability in primary commodity markets is, therefore, one with which my Government and all governments of the free world must be greatly converned. As to the desirability of reducing this instability, there can be no disagreement. The problem to be faced is how this can be safely accomplished. Devices that serve temporarily to reduce price fluctuations must be judged by their potentialities for contributing to healthy economic growth. They may retard rather than promote such growth if they interfere with long-term price trends and introduce rigidities and restraints that impair the elasticity of economic adjustment which is fundamental to economic progress.

"This is a danger which must be faced in the consideration of proposals for governmental commodity arrangements. This danger and the great practical difficulties involved in reaching accord on the details of any contemplated arrangement largely explain why so few international agreements involving consuming as well as producing countries have hitherto been reached. The experts recognize this situation and see little prospect of any substantial increase in the number of agreements. My delegation shares this view.

"The experts also believe, however, that commodity agreements, if properly drawn and operated, may be an effective means for preventing excessive price fluctuation. This they hope might be obtained if the attempt were made to cover several commodities in a single agreement instead of relying on the inevitably slow and uncertain increase in single-commodity agreements.

"I must confess, Mr. President, that I find no ground to justify this hope. The difficulties experienced in negotiations relating to a single commodity would in my judgment be greatly multiplied if we attempted to deal with many commodities at the same time. Moreover, any agreement covering many commodities would involve widespread interference with the workings of a free-world economy. It would magnify the danger of diverting production, consumption and trade patterns from the channels they would be likely to assume under a more healthy, competitive and free-enterprise system. The net result of such arrangements, even if it were practicable to conclude them, would, I firmly believe, be detrimental and not beneficial to economic development.

"The experts extend their proposals for comprehensive commodity stabilization arrangements by recommending for further study a 'commodity reserve currency scheme.' If this were an academic seminar we might, Mr. President, find some interest in discussing the complexities of this by no means novel proposal. This, however, is not an exercise in which I would care to engage in this forum. I see no likelihood whatever that my Government would be disposed to give this scheme any serious consideration in the foreseeable future. I feel sure that other delegations will share my view that the scheme is impractical. I hope therefore that the Council will not devote time and energy which might well be spent in more useful activities to detailed examination of a proposal that would seem to have no chance whatever of acceptance by governments.

"The experts recommend—and this is their most specific proposal—the establishment by the Council of a Trade Stabilization Commission. This commission would be concerned with proposals for dealing with the problem of stabilization generally. It would leave undisturbed the existing international machinery, such as the Interim Coordinating Committee for International Commodity Arrangements and its associated study groups, which provide mainly for action, on commodity by commodity.

"My delegation is unable to support this recommendation. The proposed commission would inevitably exercise the same general responsibilities as the old Economic and Employment Commission of the Council and might be expected to suffer from the same defects. The establishment of a commission charged with responsibility for considering broad questions of economic policy would simply invite duplication of discussion, since these are questions which the Council itself must necessarily debate."

The resolution introduced by the Argentine Government established the terms of reference for this proposed new Commission. I shall now quote from the resolution:

"The main task of the Commission shall be to examine measures designed to avoid excessive fluctuations in the prices of and the volume of trade in primary commodities, including measures aiming at the maintenance of a just and equitable relationship between the prices of primary commodities and the prices of manufactured goods in international trade. * * *"

This resolution is designed to establish a system of international parity prices which is totally incompatible with our approach to foreign economic relations.

This resolution was adopted on April 30, on a rollcall vote of the 18 nations comprising the Economic and Social Council. The United States was joined in opposing the establishment of this new Commission by Belgium, Norway, France, and the United Kingdom. The Australian delegation abstained from voting. The resolution was supported by 12 countries, the Argentine, Free China, Cuba, Czechoslovakia, Ecuador, Egypt, India, Pakistan, Turkey, U. S. S. R., Venezuela, and Yugoslavia.

The formation of the Commissison had the support of Soviet Russia and Czechoslovakia whose concepts of stabilizing commodity markets would certainly be quite different from our own. The resolution as adopted deferred the actual organization of the Commission until the 18th session of the Economic and Social Council which convened at Geneva in June of 1954. Our delegation at Geneva continued its opposition to the formation of this Commission and indicated that even if we were elected, we might not be willing to participate. In spite of United States opposition, the Council voted to proceed with the organization of the Commission with the first session scheduled for January 1955.

The United Kingdom and France voted with the United States to delay the organization of the Commission. However, following the vote in the Economic and Social Council both these countries announced that they would participate in spite of their opposition. The resolution adopted at Geneva transferred most of the functions of the Interim Coordinating Committee for International Commodity Arrangements to the new Commission on International Commodity Trade. The Interim Committee, which was only to be in existence until the Habana Charter was ratified, thus has now become a permanent United Nations organ under a new name.

The announcement of our Government in which we declined to participate at the first session of this new Commission included this statement: "The United States Government will be prepared to reexamine the question of its eventual participation after the Commission's terms of reference and its scope of activities have been defined." I am glad that this is the case as we have no desire to minimize the seriousness of the problems of price instability. Our Government is opposed to the present terms of reference which imply Government action to stabilize prices through international agreements and international parity prices. I can see many possibilities for useful work by this Commission in compiling statistics and studying market problems, thus making it possible for the free markets of the world to operate more effectively. My interpretation of the statement by our representative is that we will always be prepared to assist in such activities that do not compromise free enterprise economic principles.

The history I have related follows the progress of this concept from 1945 to 1955, a 10-year period. Our State Department deserves great credit for having successfully extricated the United States from a creature of its own creation which has untold potentialities of causing economic chaos. The New York Times of January 11, in reporting the forthcoming meeting of this new Commission made the following significant comment:

"The United States will pass up a delegate's seat, but will send an observer to the first session of the newly-established Commission on International Commodity Trade. The Commission will open its meetings here next Monday.

"Although United States opposition to the Commission is nothing new, this is the first time that Washington has given a diplomatic cold shoulder to a United Nations organ."

It has always seemed to be a paradox that those who advocate free trade and the removal of Government restrictions on our economy should, at the same time, have been fostering commodity agreements. There is probably no more restrictive device than such an agreement as it interjects Government controls throughout the production and marketing process.

During previous administrations, our State Department was apparently most sympathetic to the commodity agreement concept. I am happy to see that this is no longer so.

The Randall Commission, in both its majority and minority reports condemned such agreements as restrictive devices. Following the release of the report by the Randall Commission, our Government declined to participate in the International Tin Agreement. We have also resisted efforts to establish commodity stabilization groups within the Western Hemisphere at the Rio Conference. Let me again compliment the Secretary of State and his colleagues who have credibly performed a very difficult task in reversing this trend toward Government controls over the world's economy.

Unfortunately, all our problems are not behind us. The original State Department proposals of 1945, included measures to deal with restrictions imposed by private combines and cartels. As I have already indicated, chapter V of the Habana Charter was drafted to implement these particular proposals.

This chapter, dealing with restrictive practices by private business, was in sharp conflict with the philosophy of chapter VI which fostered Government price-fixing and cartel operations. Many apparently believe that actions taken by governments in concert with other governments or in cooperation with certain industries should escape the condemnation imposed by chapter V of the charter. In a sense chapter VI was really a modification or loophole in chapter V.

Professors Stocking and Watkins in their book Cartels or Competition define a cartel as "* * * an arrangement among, or on behalf of, producers engaged in the same line of business, with the design or effect of limiting or eliminating competition among them. * * *"

They also say "rival business enterprises may set up cartels by direct negotiation and mutual commitments, or governments may establish them by treaty."

The commodity agreements provided in chapter VI are, of course, cartels established through government negotiation and commitment. The evils of cartels were dramatically shown during the Hitler and Mussolini regimes in Germany and Italy where private cartels were taken over by these governments to strengthen their economies for war. The entire Habana Charter concept, as embodied in chapter V, was to curb private international cartels but to tolerate the government cartels provided in chapter VI. In retrospect, let me remind you of the extraordinary economic power developed by the Nazi Government through intergovernmental commodity agreements after it came to power in Germany.

Prof. Edward S. Mason, of Harvard University, was deputy to the Assistant Secretary of State in charge of Economic Affairs in 1945. Presumably, he was quite familiar with the proposals issued by our State Department at that time.

He published a book under the sponsorship of the Committee for Economic Development entitled "Controlling World Trade" in June of 1946. I shall now read two paragraphs from the introduction of this book:

"This divergence between American and other experience with cartels and commodity agreements must be borne in mind in the ensuing discussion. There is a school of thought in the United States that abhors cartels as private treaties restrictive of trade but embraces commodity agreements as intergovernmental arrangements inevitably serving the public interest. Cartels may, and usually do, restrict trade but so do commodity agreements—and much more effectively. Nor is the range of interests served necessarily very different.

"The general line of policy defended in this report is that, when international controls relating to a commodity or industry are demonstrably necessary, they should be intergovernmental in character. It does not follow that intergovernmental commodity agreements should be numerous or easily justifiable on grounds of public interest. If the agreement, moreover, lies outside the field of agriculture, it is likely to involve a type of governmental relation to industry with which the United States has as yet had little experience."

Mr. Mason concluded his 265-page treatise with this statement:

"To enable the machinery to function, it will be necessary to reshape not only commercial policy but policies hitherto considered as belonging to the field of domestic regulation, and such action as is proposed can only be taken with the cooperation of other governments and with due regard for their interests."

We are now confronted with exactly the situation portrayed by Professor Mason if the report of the so-called Ad Hoc Committee on Restrictive Business Practices is adopted by the Economic and Social Council.

The United States delegation to Habana was opposed to restrictive business practices per se. This is consistent with all of our economic concepts. In reviewing the Habana Conference I find that there were three points of view which were compromised in the final draft of chapter V. As I have already indicated, our point of view was that cartels were bad per se. Some believed that cartels were useful devices and that action was required only to cope with flagrant abuses. The Luxembourg delegation took this position. Others took a middle ground. The United Kingdom delegation took such a point of view. There was actually very little support for the stringent action recommended by the United States.

Chapter V of the Habana Charter dealt only with restrictive business practices when, and I quote: "Such practices have harmful effects." The definition of harmful effects was to be left to the new international agency to determine. No sanctions for failure to comply with the Charter were imposed. This philosophy is also incorporated in the new United Nations proposals.

I shall now trace the steps since the rejection of the Habana Charter by the Congress of the United States which have resulted in this report of the United Nations ad hoc committee on Restrictive Business Practices presently on the agenda of the Economic and Social Council.

Our antitrust laws are of the utmost importance in promoting a free-enterprise economy. The Sherman Act was adopted in 1890 during the administration of President Harrison, a Republican President. The Clayton Act and the Federal Trade Commission Acts were adopted during the administration of President Wilson, a Democratic President. The spirit of our antitrust laws is truly bipartisan and they have a vital role in maintaining a competitive economy in this country. I believe in them and I am in favor of strengthening these laws if such action is shown to be necessary and in a vigorous enforcement of the laws now on the statute books. I am opposed to all cartels. There are no good cartels as far as I am concerned.

Unfortunately, our antitrust laws have sometimes been used to harass legitimate business by those whose paramount interest has not been the preservation of free enterprise. I am afraid they may have been deliberately used to bring it into disrepute and to lay the groundwork for a socialist economy within the United States. Those who conceived such improper uses of the antitrust laws are, I am sure, no longer on our Government payroll.

It seems strange that almost immediately after the rejection of the Habana Charter by the 81st Congress, and the decision by the State Department not to resubmit it to the 82d Congress, the United States Government took the lead in attempting to implement chapter V through the United Nations.

In 1951, the United States delegation submitted a resolution to the Economic and Social Council asking that the question of restrictive business practices should be placed on the agenda of the 13th session of the Council. The United States draft resolution recommended the establishment of an ad hoc Committee on Restrictive Business Practices charged with formulating and submitting to the Council, proposals on appropriate methods to be adopted by international agreement to deal with harmful restrictive business practices.

Perhaps, the purpose of establishing this international machinery was to be able to proceed against American companies doing business abroad because of our inability to apply United States statutes in the jurisdiction of other sovereign nations. We must remember that these same companies were bound to conduct their activities so as to comply with the laws of the country in which they were operating. Since our antitrust laws are free-enterprise laws, I see no way that an international body, including Communist and Socialist states, could establish appropriate methods to deal with antitrust violations on a universal basis. It would seem to me that treaties by the United States and other countries with the same type of

economy and with similar judicial procedures might be more fruitful. The United Nations approach can only lead to chaos.

The United States proposal was debated at length during the 13th session of the Economic and Social Council held in the summer of 1951 at Geneva. The Yearbook of the United Nations for 1951, reports this debate and I am particularly interested in the comments which appear in this official document on the attitude of other countries who have no concept of our antitrust laws. I shall now quote from the United Nations Yearbook:

"The representatives of Belgium, France, Peru, Sweden, and Uruguay, while agreeing as to the harmful effects of many restrictive business practices and believing that far-reaching private agreements constituted a political danger, felt nevertheless that international producers' agreements were not always to be condemned and that in certain cases they met urgent needs connected with economic progress.

"The representative of Peru stated that, in South America, public commercial enterprises were operated in the interests of the State and of the community, many of them being accompanied by measures to protect the individual's social rights. These enterprises, he said, should not be confused with private monopolies.

"The representatives of Chile, Mexico, and Uruguay also emphasized the important part played by public commercial enterprises in their national development. The Chilean and Mexican representatives stated that they would abstain from voting on the joint draft resolution. Representatives supporting the resolution believed, however, that studies and investigations were necessary to distinguish between good and bad restrictive practices.

"The representative of the International Cooperative Alliance referred to a recent survey by his organization which had revealed the widespread use and the harmful effect of restrictive business practices. He described the manner in which his organization had been fighting such practices and urged the Council to undertake an authoritative investigation in this field.

"In the view of the representatives of Czechoslovakia, Poland, and the U. S. S. R., the United States proposal was designed to camouflage the real objective of United States monopolies. Figures were cited in order to show that these monopolies controlled the United States foreign trade and investments. These monopolies, those representatives said, in their struggle to gain domination of world markets, engaged in extensive restrictive business practices to remove any competition; they earned immense profits in underdeveloped countries, and were powerful enough to obtain a stranglehold on European trusts, secure markets for their excess production in Europe, and influence the political life of other countries through economic control. United States exports were being used as instruments of discriminatory policies applied against the peoples' democracies. American big business, those representatives maintained, fostered the creation of monopolies which it could dominate, but opposed the creation of those over which it had no control."

After extensive debate and the adoption of amendments the United States resolution was approved and the Ad Hoc Committee on Restrictive Business Practices was appointed. It consisted of Belgium, Canada, France, India, Mexico, Pakistan, Sweden, the United Kingdom, United States, and Uruguay.

The terms of reference of the ad hoc committee provided that, and I quote: "The Economic and Social Council of the United Nations recommend that the measures adopted in the cases and the purposes stated in the preceding paragraphs shall be based on the principles set forth in chapter V of the Habana Charter concerning restrictive business practices."

Thus, entirely at the initiative of the United States Government this ad hoc committee was established under the Economic and Social Council of the United Nations to implement chapter V of the rejected Habana Charter.

The United States representative on this committee was Corwin Edwards, the former chief economist of the Federal Trade Commission. The secretary of the ad hoc committee itself was Sigmund Timberg, formerly with the Antitrust Division in the United States Department of Justice. The committee assembled in January of 1952 and presented its report in March of 1953. During this period, the committee held 77 meetings, a great majority of which were closed to the public. The report of the committee was filed with the United Nations Secretary-General in March of 1953.

It was considered briefly at two sessions of the Economic and Social Council who requested the Secretary-General of the United Nations to refer this report and the analysis by the Secretariat to the member states and to specialized agencies for examination and comment. The Council also decided that consideration of the report would be resumed not later than at its 19th session which will convene at United Nations headquarters in New York at the end of March of this year.

It is important that the people of the United States be familiar with this report and the pitfalls into which we can be led should it be adopted. An article by Samuel K. C. Kopper which appeared in the Virginia Law Review of December 1954 gives a complete analysis of this report. This article is a revision and expansion of a paper originally presented by Mr. Kopper to the Fourth International Congress of Comparative Law at the Faculte de Droit, University of Paris, on August 6, 1954.

Mr. Kopper has an unusual background which uniquely qualifies him to review the report of this Committee. After graduating from Princeton University in 1937, he obtained his law degree at the University of Virginia in 1940. Subsequently, he studied at the Academie de Droit, Internationel de la Haye. From 1946 to 1949 he was an adviser to the United States delegations to the United Nations Security Council and to its General Assembly. He was a special consultant to the Assistant Secretary of State during 1952–53. He has also been the officer in charge of North African Affairs, the Deputy and Acting Director of the Office of Near East Affairs, and is presently counsel for the Arabian-American Oil Co. in New York City. He is also the chairman of the Near East Committee, Section of International and Comparative Law of the American Bar Association.

I shall now read the relevant sections of Mr. Kopper's article.

"EXCERPTS FROM THE INTERNATIONAL REGULATION OF CARTELS—CURRENT PROPOSALS

"(By Samuel K. C. Kopper)

"A. The draft articles

"The report of the ad hoc committee contained draft articles of agreement,[1] which were based largely on chapter V of the Habana Charter. The draft articles of agreement call for the establishment of a United Nations organization composed of all United Nations members, the basic objective of which is to coordinate national and international action to prevent and eliminate restrictive business practices whenever such practices have harmful effects on the expansion of production or trade.[2] It is provided that there will be a 'representative body' composed of all members of the United Nations, and an 'executive board' which is to carry out the functions and duties of the representative body and exercise its powers. Membership on the executive board will be determined by the extent to which a nation participates in international trade, and by a geographical balance.

"The draft articles of agreement contain a preamble, 20 articles, and an appendix which describes the share in world trade of individual countries. The preamble states that national and international action is required to attain: (1) A reduction of governmental and private trade barriers and the promotion on equitable terms of access to markets, products, and productive facilities; (2) encouragement of industrial and agricultural development, particularly in underdeveloped areas; (3) balance and expansion of the world economy through greater and more efficient production, increased income and greater consumption, and the elimination of discriminatory treatment in international trade; and (4) the promotion of mutual understanding and cooperation to solve problems arising in all aspects of international trade. The preamble concludes with a recognition that national and international action in the field of restrictive business practices can contribute substantially to the attainment of such overall objectives.

"Article 1 sets forth the general policy toward restrictive business practices. Each member of the Organization shall take measures and cooperate with other members to prevent restrictive business practices that have harmful effects on the expansion of production or trade. The Organization is empowered to determine whether a particular practice is restrictive and has harmful effects whenever: (1) It receives a complaint; (2) the practice is engaged in or made effective by one or more private or public commercial enterprises; and (3) such enterprises possess effective trade control among a number of countries in one or more products.

"Restrictive business practices are defined as (1) Fixing of prices, or of terms or conditions to be observed in the purchase, sale, or lease of any product; (2) exclusion of enterprises from, or allocation or division of, any territorial market or field of business activity, or allocation of customers, or fixing of sale or purchase quotas; (3) discrimination against particular enterprises; (4) production limitations or quotas; (5) prevention of development or application of technology or invention, whether patented or not, or withholding of same with the result of monopolizing an industrial or commercial field; (6) illegal extension of rights under patents, trade-marks, or copyrights; and (7) 'any similar practices which the Organization may declare, by a majority of two-thirds of the members present and voting, to be restrictive business practices.

[1] Report of the Ad Hoc Committee on Restrictive Business Practices E/2380, E/AC.37/3 (U. N. Economic and Social Council Official Records, 16th sess., Supp. 11) 12 et seq. (March 30, 1953).

[2] The ad hoc committee was not specifically instructed to prepare the draft articles. It appears clear, however, that the Committee considered this the most satisfactory way to implement ECOSOC's recommendation. The Secretary-General of the United Nations had been instructed to obtain information on the type of organization which could implement the Committee proposals. See note 26, supra.

However, he explained in a note to ECOSOC that this could not be done by July 1953, because one of the most important of the intergovernmental bodies, the Contracting Parties to GATT, had had no regular meeting. Note by the Secretary-General concerning the report requested under Council resolution 375 (XIII) E/2443 (1953).

"The breadth of this article can be fully appreciated only by a careful study of its precise language. It clearly appears at a glance, however, that the article is not only broad but vague. Furthermore, it is questionable whether the criteria set forth are adequate for an international organization to determine whether specific practices are restrictive or not. Perhaps the most fundamental question raised by this article is whether its basic philosophy is generally accepted in the family of nations. It presumably represents the philosophy of the United States, but in the United States there is no clear agreement as to just what this philosophy really is.

"The confusion about the application of American antitrust laws in foreign commerce could hardly be greater.[3] Not only is there confusion about the application of these laws but there is also little agreement about the meaning of some of the terms used in article 1. The Attorney General of the United States has established a committee to reexamine our antitrust laws.[4] Particular attention is to be paid to their extraterritorial application. Pending the completion of this study, it is doubtful whether other nations will be eager to accept the terminology and philosophy of this article. Certainly an international organization composed of nations having widely differing concepts of law would have an exceedingly difficult time implementing or interpreting it.

"Article 2 provides that any member may consult directly, or ask the Organization to arrange a consultation, with other members in any instance in which the member thinks it has been affected within the meaning of article 1. If the Organization considers action justified, it will arrange for and assist in such consultation. This article gives the Organization very broad authority without any checks. It could open the door to frivolous cases which might very well be considered by the Organization for political reasons.

"Article 3 concerns investigative procedure. It provides for the presentation of written complaints to the Organization which must contain minimal information (prescribed by the Organization) as to the nature of the practice complained of. The Organization determines whether the complaint is justified. If, however, the Organization is satisfied that the practice in question was specifically required by governmental measures in existence prior to the complaint, no further investigation shall be undertaken, provided that any practice found to exist in more than one country may be further investigated in the Organization's discretion, if such practice is not specifically required in all countries in which it is found to exist.

"Reasonable opportunities for being heard shall be afforded the complainant and the commercial enterprise alleged to have engaged in the practice complained of. All members are to be informed of the complaint. Any member can be asked for information on the complaint. The Organization shall decide whether there has been a violation, and shall inform all members of its decision and reasons therefor. If there is a violation, the Organization has the power to request the members concerned to take remedial action in accordance 'with their respective laws and procedures.' The remainder of the article deals with reports which the Organization shall make on the matter.

"This article clearly indicates that there is discrimination in favor of public enterprises and against private enterprises. The ad hoc committee frankly admitted that 'special difficulties arose, however, in connection with restrictive business practices which were sanctioned by governmental statutes or regulations.'[5]

"This is a fundamental defect in the whole plan. A further defect which appears in this article is the provision that members will be requested[6] to take remedial measures in accordance with their respective laws and procedures. Nations like the United States, which has rigid and enforced laws, will be placed at an obvious disadvantage vis-a-vis countries with less rigid and frequently unenforced laws. If this disadvantage were temporary it might be tolerated. It is perfectly clear, however, that it might last for years, or decades, and hence would be unacceptable. It is obvious that laws and procedures vary widely in the various countries of the United Nations.[7] When, if ever, they will come to resemble those of the United States is uncertain.

"A final observation about article 3 should be made. The investigation, trial, and adjudication of cases involving restrictive business practices are extremely intricate and complicated tasks. The patient and painstaking efforts of trained people are always required to bring about a fair and just settlement of such cases. The proposed United Nations plan does not spell out how these difficult tasks will be performed. Will there be an investigatory staff, or is the advisory staff provided for in articles 13 and 15 to conduct investigations? What information will be used? Can judicial proceedings and committee investigations in this country be used? What power and authority will an investigatory staff have? Or if the investigations are left entirely to the individual member nations, what assurance can there be that investigative procedures will be reasonably similar? The answer to the last question clearly semes to be that there can be no assurance because of the wide differences in approach to this whole subject among the member nations of the United Nations. It should be noted in conclusion that it would be possible under article 3 for the Organization to publish reports on charges even though the latter had been proved false.

"Article 4 authorizes the Organization to make studies of all aspects of restrictive business practices. It may request members to supply information in connection with these studies. Thus, the burden may fall on nations with a great deal of commerce to receive recommendations from countries whose basic motives are political.

"Article 5 provides that each member shall take all possible measures to insure that within its jurisdiction private and public commercial enterprises do not engage in restrictive practices as previously defined. Members are to comply promptly with requests from the Organization for information regarding complaints. They are to take action in accordance with their constitutions or systems of law and economic organization. Nothing in the agreement shall be construed, however, as requiring a member to give information contrary to its essential security interests.

"The obligations imposed on the members contain no safeguards against frivolous complaints. The criteria upon which the Organization will base its decision as to whether a complaint is justified are unclear. The burden may frequently be on the defending country to prove that it is innocent under its own laws. Furthermore, the paragraph requiring members to take action under the constitution or system of law and economic organization is meaningless in view of the wide diversity of such systems. There is no equitable basis for international conduct or action.

"In article 8 it is recognized that certain services, e. g., transportation and telecommunications, are substantial elements of international trade, and that any restrictive business practices by them may have harmful effects. If any member thinks that such harmful restrictive business practices exist, it may submit a written statement on the situation to those whose private or public enterprises are involved, and sympathetic consideration shall be given to effecting a satisfactory adjustment. If no adjustment is made and the matter is referred to the Organization, it shall be transferred to the intergovernmental body concerned if one exists. If there is no such body, the Organization may make recommendations.

"Article 9 contains four paragraphs which empower the Organization to bring to the attention of members measures taken by other members or intergovernmental bodies or agencies regarding business practices; to make arrangements with other intergovernmental bodies or agencies which will provide for effective cooperation with respect to restrictive business practices; and to make suitable arrangements for consultation and cooperation with nongovernmental organizations.

"If it is anticipated that the Organization will do these things, as well as all of the other things provided for in preceding articles, on a worldwide basis, it will have to maintain an astonishingly large staff of highly trained personnel.

"Article 10 provides that the representative body is to consist of all members of the agency. Each is to have one vote. Decisions are to be made by the majority of the members unless otherwise provided in the agreement. The representative body is to meet regularly and can be convoked by the executive board or by one-third of the members of the representative body. It is to establish its own rules of procedure, and final authority to determine the poliices of the agency shall be vested in it.

"This article underscores what has been pointed out in comments on previous articles—the policies with regard to restrictive business practices might very well be determined by a group of nations having only a small percentage of world commerce, and whose motivations might stem from political, ideological, or other reasons to the detriment of more highly commercial nations. The proposed program is, to say the least, a novel one. The procedure for adjudication is nonjudicial, and might easily become political or partisan. Yet various articles of the proposal refer to what the Organization may decide, or to decisions of the Organization.[8] Are these decisions to take on the aura of judicial decisions? With no appli-

[3] See Searls, Trade or Commerce Among the Several States or With Foreign Nations, proceedings at annual meeting, section of antitrust law, American Bar Association 58 (Aug. 26, 27, 1953). See also Hale and Hale, Monopoly Abroad: The Antitrust Laws and Commerce in Foreign Areas, 31 Texas L. Rev. 493 (1953); see note, Foreign Subsidiaries in Antitrust Law, 4 Stan. L. Rev. 559 (1952).

[5] Report of the Ad Hoc Committee on Restrictive Business Practices E/2380, E/AC.37/3 (U. N. Economic Social Council Official Records, 16th sess., Supp. 11) 4, par. 22 (March 30, 1953).

[6] The Organization's power is limited to "requesting" members to take remedial action and "recommending" possible remedial measures.

[7] This conclusion is based on the findings in Analysis of Governmental Measures Relating to Restrictive Business Practices E/2379 and E/2379/Add.1, E/AC.37/2 and E/AC.37/2/-Add. 1 (U. N. Economic and Social Council Official Records, 16th sess., Supp. 11A), (April 29, 1953), and Foreign Legislation Concerning Monopoly and Cartel Practices (report of Department of State to Subcommittee on Monopoly, Senate Select Committee on Small Business, subcommittee print No. 5, 82d Cong., 2 sess.) (1952).

[8] E. g., art 2, pars. 3, 5, 8; art. 5, par. 4.

cable law and no agreement about basic principles, confusion unbounded might easily reign.

"Article 11 concerns the executive board. The executive board is to carry on the functions of the representative body. Its size and composition are to be determined by the body. The selection of members is to be made with due regard to 'the objectives of including members from the different types of economies and degrees of economic development to be found among members of the agency, from the broad geographical areas to which the members belong, and from countries of chief economic importance, for which last criterion particular regard shall be paid to members' shares in international trade.'

"On the basis of previous experience in the United Nations, one could anticipate a Board composed roughly of 25 percent from Latin America, 25 percent from Europe, 25 percent from Asia, and the remainder from the United States, the Iron Curtain countries (if they should join the Organization), and the British Commonwealth. In the absence of a clearer definition of the powers and limitations of the Organization, the countries having rigid laws on restrictive business practices would be placed in a disadvantageous position in dealing with nations having looser or unenforced laws.

"Article 13 provides that the chief advisory officer of the agency, who is appointed by the representative body, shall be the director of the advisory staff. He is to select the staff. The advisory staff shall exercise its functions with complete independence in the general interest of all members, and shall neither solicit nor accept instructions from any government. Article 15 assigns to the advisory staff almost entire responsibility for evaluating the substance of each complaint. The staff is to arrange for the analysis of the information, and to prepare the report. It can call for additional information, and do whatever is necessary to obtain information to prepare the report of the representative body.

"Articles 13 and 15 make it obvious that the position of the director of the advisory staff is important. Likewise, the staff will have considerable latitude in light of its "complete independence." The director has a substantial amount of power. His position should not be underestimated. He is in effect both prosecutor and judge. This, coupled with the fact that there are no rules of law to guide him or within which he should operate, produces a unsatisfactory and unacceptable system.

"Article 16 provides that the representative body 'shall take full account of reports of the advisory staff.' This emphasizes the importance of the work of the advisory staff.

"Articles 17, 18, 19, and 20 make provisions for the content of reports; entry into force of the agreement; and amendment, withdrawal, termination, interpretation, and definition of the agreement. The agreement is to come into force on the 60th day after—

"'(a) The number of governments which have deposited instruments of acceptance shall reach 20 or more and shall cover 65 percent or more of the total value of world imports and exports, as set forth in appendix A; [or]

"'(b) The number of governments which have deposited instruments of acceptance shall have reached 20 or more and shall cover 65 percent or more of the total value of world imports and exports as set forth in appendix A, and shall include six countries which individually have 3 percent or more of such total value.'

"Amendment of the agreement can be effected by a two-thirds majority of the members of the Organization. Any member may withdraw at any time. Withdrawal is to become effective 6 months after receipt of the written notice by the executive secretary. The agreement can be terminated by a three-fourths vote of the members.

"The provisions for the coming into force of the agreement are sound. They do prevent it from becoming effective without the concurrence of most of the important commercial countries.

"The appendix of the agreement points up the fact that only seven countries in the world have trade over 3 percent of the world total. These are:

	Percent
"(1) United Kingdom and dependencies	17.57
"(2) United States and dependencies	17.22
"(3) France and dependencies	8.04
"(4) Canada	5.15
"(5) Germany (Federal Republic)	4.47
"(6) Netherlands and dependencies	3.91
"(7) Belgium-Luxembourg and dependencies	3.77

"The total of these 7 countries is 60.13 percent. There are 57 countries each with trade under 3 percent of the world total.

"B. International Reaction to the Draft Articles

"In light of the foregoing objections to the ad hoc committee's report, it seems remarkable that none of the delegations or the nongovernmental organizations pointed out the defects of the plan.[9] Furthermore there has been no indication yet that these difficulties will be taken into account. One is forced to conclude that the fear of being branded a 'procartelist' has muted the voices of organizations and individuals. This is a regrettable situation, since we are not concerned with the merits or demerits of cartels and restrictive business practices, but only with the wisdom and validity of plans to handle them.

"The Belgian representative to ECOSOC did observe that cartels were not necessarily evils in themselves. Their evil springs from the general economic situation that calls them into being. Turkey questioned whether there was any point in the Council's discussing only one part of the ITO Charter. The French representative felt that the proposals might well be expanded so that there would be a comprehensive coverage of all restrictive practices. The United States and the United Kingdom were noncommittal.[10]

"The other members of ECOSOC and the nongovernmental representatives seemed for the most part to be favorably disposed toward the committee's report. The Soviet Union, which is the largest and most ominous cartel in history, abstained after making some snide remarks about the same American industry which had contributed so much to Russian success against nazism. The Russian representative and Mr. Boson, the representative of the International Cooperative Alliance, referred to the antitrust suit of 1952 against a number of American oil companies. Boson hardly paid a tribute to the American system of law when he stated:

"'In the United States of America, the grand jury investigating the international petroleum cartel had failed to establish a prima facie case. There was no doubt that an investigation by an international body would have been more successful.'[11]

"This conclusion is as unjustified as it is revealing of exactly what the International Cooperative Alliance really wants.

"C. General Considerations

"Aside from the specific objections to the ad hoc committee plan outlined in earlier paragraphs, there are a number of general observations which ought to be taken into account:

"(1) Chapter V of the Habana Chapter, upon which the ad hoc committee plan is based, was only one part of an overall proposal to deal with barriers to the free flow of trade. To attempt to implement only a part of the plan would be a mistake;

"(2) The committee's plan does not rest on a sound basis of agreement as to what is or is not an objectionable business practice;

"(3) The language employed in the plan is not sufficiently precise, but is vague and ambiguous;

"(4) The plan purports to deal with matters normally handled by the courts in the various countries covered by it, yet there are no provisions which would insure the use of judicial processes by the Organization. On the contrary, it would appear that there is no guaranty of due process of law, and that enforcement would be obtained by indictment;

"(5) Members of the Organization would be such on different bases inasmuch as the laws of the participating nations all differ in some respects;

"(6) There is no reference to the important question of the right of each sovereign nation to handle restrictive business practices in its own territory in accordance with its own laws and ideologies.[12] The committee recognized the difficulty, but stated that 'the issue [of overlapping jurisdictions and conflicts of laws] has, however, far-reaching implications which raise serious difficulties of substance; moreover, the question arose whether the matter came properly within the committee's competence. For these reasons, and having regard to the limited time available to the committee, most members felt it would not be profitable to pursue the matter.[13]

"III. Domestic laws and conditions in the nations concerned

"Any consideration of proposals for the international regulation of cartels must take into account national legislation on the subject. With world trade and business activity expanding, the private-law aspects of international industrial combinations become of increasing interest to the student of conflict of laws. The ad hoc committee made an analysis of the constitutional provisions and laws of a number of countries on the subject

---

[9] The International Chamber of Commerce has subsequently indicated its opposition to the plan. Resolution adopted by council of International Chamber of Commerce, Doc. 225/23, Rome, Italy, April 13, 1954. Likewise, the National Association of Manufacturers has indicated its lack of agreement. See Restrictive Business Practices. Comments * * * E/2612 (U. N. Economic and Social Council Document) (May 28, 1954). But there has not been any analytical survey of the implications of the plan.

[10] The summary of attitudes is taken from Official Records (U. N. Econ. & Social Council, 16th Sess.) 742d meeting E/SR.742, p. 239 et seq. (July 30, 1953), 744th meeting E/SR.744, p. 257 et seq. (July 31, 1953).

[11] Id. at 244. The views of other nongovernmental organizations like the ICFTU seemed to spring from a genuine apprehension of restrictive business arrangements. Unfortunately, they do not seem to have recognized the dangers of an unworkable plan. Possibly time will permit a more thorough examination of the proposals.

[12] See Haight, International Law and Extraterritorial Application of the Antitrust Laws, 63 Yale L. J. 639 (1954); Whitney, Sources of Conflict Between International Law and the Antitrust Laws, 63 Yale L. J. 655 (1954). The conflict of laws could not be more clearly illustrated than in the recent cases of *United States* v. *Imperial Chemical Industries, Ltd.* (105 F. Supp. 215 (S. D. N. Y. 1952)), and *British Nylon Spinners, Ltd.* v. *Imperial Chemical Industries, Ltd.* ((1953) 1 Ch. 19).

[13] Report of the Ad Hoc Committee on Restrictive Business Practices E/2380, E/AC.-37/3 (U. N. Econ. & Social Council Official Records, 16th Sess., Supp. 11) 6, ¶ 36 (March 30, 1953).

of restrictive business practices. The conclusions of the committee are of interest.

" 'The documents have confirmed in the minds of the committee three broad propositions which underlie Resolution 375. These are:

" '1. That opinions differ from country to country about restrictive business practices and about governmental policies towards them;

" '2. That restrictive business practices affecting international trade may in some circumstances have harmful effects on the fulfilment of widely acceptable objectives of international economic policy;

" '3. That it may be difficult in such cases for appropriate action to be undertaken solely by governments acting individually.' [14]

"Paragraph 1 of the preceding quotation is, if anything, an understatement of the present situation. In a number of European countries cartels have been quite acceptable to governments.[15] In the United States, Congress passed the Webb-Pomerene Act,[16] authorizing exporters to combine to form export corporations so they could match their foreign competitors. The question has been raised whether the European Coal and Steel Community might end in a superinternational cartel. Whether it does or not, the plan proposed to the United Nations simply does not cover arrangements like these.

"The ad hoc committee plan takes no appreciable account of the problems which confront private enterprise seeking to do business abroad under laws which are all too frequently different from those at home. The risks involved in such ventures are often enormous. At the present time, the petroleum industry is in the forefront of American investors abroad. The industry is concerned about the implications of the extension of American antitrust laws to operations being conducted within the sovereign territory of another State.[17] There must be a clarification of the national laws before any international action based on national law can be undertaken.

"In the United States there is a confusing lack of clarity as to where the Attorney General's jurisdiction should logically end, and where that of the Secretary of State should begin. While it is very true that the Sherman and Clayton Acts have been strong links in the chain of the free enterprise system,[18] efforts to extend their application extraterritorially to foreign operations of American concerns may in certain instances work a positive disservice to national security interests of the United States. In nations unaccustomed to American antitrust law, reactions to antitrust proceedings against American companies frequently range from surprise and incredulity to suspicion and hostility—particularly where criminal proceedings are instituted.

"Space does not permit a detailed analysis of all governmental measures which have been taken relating to restrictive business practices. The recent reports of the United Nations ad hoc committee and of the United States Department of State to a Senate Subcommittee on Monopoly [19] contain a review of constitutional provisions and legislation in a number of countries. There are certain significant deductions which can be drawn from these reports when a comparison of the various laws is made.

"We have noted that the ad hoc committee found that opinions differ from country to country about restrictive business practices.[20] The Department of State report comes to the same conclusion:

" 'As might be expected, the type of statutes as well as the degree of effectiveness of their provisions and of their administration has varied greatly from country to country. These factors are a function of a number of complex considerations, such as the type of government in the particular country at the period in which legislation was adopted; its economic, social, and political aims; and the fundamental philosophy of the government and the people of a country toward the part the business community should play in the economic and political structure of the country. It is accordingly difficult to reach any generalizations as to the trend of development in the group of countries as a whole.' [21]

"Comments from the State Department report on selected countries are also of interest:

" 'The Austrian economy is characterized by an absence of free competition, caused in large part by the concentration of economic power. This concentration results from such factors as (a) the dominant influence of a few firms in the principal areas of private industry; (b) the dominant position of the larger banks; (c) a complex network of interlocking directorates by means of which a few leading groups control a large part of the private industrial economy; and (d) the nationalization of a major sector of industry.[22]

" 'Industrial federations form the principal basis of the strong ties that exist among individual Belgian firms. * * *

" 'Existing Belgian legislation is favorable to the formation of cartels and imposes but few limits on their operation.[23]

" 'There are in France few large industrial firms in a monopoly or nonmonopoly position. There has, however, been a trend to the uniting of business firms in cooperative agreements or associations. The comptoir system of doing business often involves restrictions on the right of the individual firm to take independent action as to prices, quantity and type of production, and areas of sale.

" 'At the present time, there is no legislation in existence in France directly relating to restrictive business practices which can be effectively employed to control or eliminate such practices.[24]

" 'Germany's industrial development has been characterized by a high degree of economic concentration during the entire period of the existence of the country as a modern industrial state.

" 'In general, the economic structure of Germany has been characterized by industrial combinations based on financial and legal interrelationships such as trusts and combines, and by cartels.[25]

" 'The political and business climate in Western Germany is generally unfavorable to a program for the elimination of restrictive business practices.[26]

" 'Swiss industry is highly organized into trade associations which regulate the terms of sale and prices in practically all sectors of the economy.[27]

" 'There are no laws in Denmark which actually prohibit business enterprises from organizing cartels or engaging in other arrangements designed to restrain competition.' [28]

"The selected comments quoted above clearly indicate the wide variety of ideas and concepts on how to deal with restrictive business practices. It should be noted that both the Department of State Report and the United Nations Ad Hoc Committee's Report discuss only a relatively small number of countries. Important though these countries may be, there is still a large group of countries which have virtually no interest in the whole subject.[29]

"Conclusion

"It is true that there has been much interest manifested in some countries, particularly in Western Europe, about the problem of restrictive business practices. However, it would seem abundantly clear that even the proponents of United Nations action in the field recognize the great variations in national approaches to the problem.[30] Furthermore, while constitutional and statutory provisions may exist in many countries, whether they are really enforced is quite another matter.[31]

[29] Recent comments from member nations, specialized agencies, intergovernmental organizations, and nongovernmental organizations regrettably reflect little additional analysis of the problem, particularly as it involves the efficacy of the ad hoc committee's proposals. Restrictive Business Practices. Comments * * * E/2612 (U. N. Economic and Social Council document) (May 28, 1954).

[30] This is the writer's conclusion with respect to such informative articles as Timberg, Restrictive Business Practices, 2 Am. J. Comp. L. 445 (1953). Mr. Timberg was secretary of the ad hoc committee on restrictive business practices.

[31] Id. at 465:

While the constitutional texts and statutory provisions of many other countries show on their face a similar hostility against monopolies, these have no history of practical enforcement.

"This brings us to the conclusion that no matter how strongly one may feel about restrictive business agreements, action in the international sphere which is predicated on national law is questionable policy. There can be little doubt that the ad hoc committee was confronted with a most difficult task.[32] Valiant though its efforts were, the great differences of opinion were an exceedingly difficult problem to overcome.

"It can only be concluded, therefore, that the answer to the question raised by Prof. Corwin Edwards as to whether the United Nations proposals 'afford a useful basis for a beginning of multilateral action'[33] is that they regrettably do not appear to be satisfactory in their present form. Whether any plan can be developed in the absence of uniformity in national laws is extremely doubtful. In the meantime, based on his experience attending United Nations sessions in official and semiofficial capacities, the writer believes that it would be a positive disservice to the United Nations organization to attempt to give it a somewhat nebulous responsibility based on an ambiguous plan to attain a hazy objective in the field of restrictive business practices. On the other hand, a heavy responsibility rests on governments and business to see that business practices are not harmful or disruptive of the free flow of international trade, and to make any constructive suggestions toward this end which the United Nations and its members might consider."

The principal conclusion I derive from what I have just read is that it is impossible for an administrative body established within the United Nations to act as a court and determine violations of restrictive business practices. The laws of the sovereign nations differ so widely concerning this subject that it is impossible to frame an agreement predicated on national law which would be meaningful. Without a uniformity in national laws which, in turn, presuppoes some common agreement on the type of economy under which the different countries shall operate, it is impossible to conceive of any useful purpose resulting from the implementation of chapter V through a new United Nations organ.

The resolution establishing this ad hoc committee, which was adopted in September of 1951, also provided—and I am quoting from the resolution:

"Determines further that the committee shall:

"(a) Obtain information from governments, specialized agencies and other sources, on restrictive business practices, whether based on cartel agreements or not, that affect international trade and international economic cooperation generally, and on legislation adopted and measures taken by individual member States in connection with restrictive business practices and with the object of restoring the freedom of competition; and

"(b) Present to the council analyses of this information together with the proposals mentioned in paragraph 4. * * *"

Pursuant to this resolution, two United Nations documents were issued, known as supplements 11A and 11B to the official records of the 16th session of the Economic and Social Council. These documents analyze governmental measures relating to restrictive business practices. While these documents clearly show that there is no uniformity in the approach to restrictive business practices by the nations of the world, they also raise another problem which has disturbed me. They review our antitrust laws and refer to criminal proceedings which are meaningful to those familiar with American jurisprudence, but place American free enterprise in an unfavorable light in a forum such as the United Nations with its Iron Curtain members who do not adhere to our judicial concepts.

Our Government has just recently furnished another report to the United Nations pursuant to this resolution. This report assumes a complete understanding of the philosophy underlying our antitrust laws by the reader of a United Nations document. Unfortunately, few foreign readers possess such understanding. It proceeds to describe various antitrust cases which have been initiated in the United States and cites the complaints in detail. Many of these cases have not been brought to trial, and I am sure that those who wish to impugn the motives and philosophy of American business enterprise will have a field day with this document. I wish to read just one page from this report, which clearly shows the unfavorable light in which American enterprise is placed. I shall now read from page 3 of the document:

"3. ADMINISTRATIVE DEVELOPMENTS

"During the course of the period since January 1, 1953, the Antitrust Division of the Department of Justice had brought through July 1954, a total of 55 new cases, of which 29 have been criminal proceedings, and the remaining 26, civil cases. These cases cover a broad variety of industries as well as of types of restraints. A majority of them have been directed at traditional violations of the antitrust statutes such as price-fixing, allocation of customers or territories, and boycotts. As an example, a criminal case and a separate civil action were filed against four pencil manufacturers charging a price-fixing conspiracy, including collusive bidding on Government contracts.[34] In another instance, four distributors of toilet goods, perfumes, and cosmetics were charged, in a separate action filed against each company, with attempting to restrain trade, through misuse of the United States trademark laws, by preventing goods produced by their foreign affiliates from being imported and sold in this country through competitors.[35]

"Several important cases having international as well as domestic significance have been brought against monopoly or monopolistic practices of dominant companies in their respective fields. One of these, filed on October 9, 1953, charges the American Smelting & Refining Co. and St. Joseph Lead Co., with a conspiracy to monopolize and restrain trade in primary lead.[36] The case charges the companies with collaborating to preempt supply sources of raw material, to limit the marketing opportunities of competitors and to restrict overall domestic production of lead ore. On April 21, 1953, a complaint was filed against five leading United States oil companies charging unlawful agreement to secure and exercise control over foreign production and supplies of petroleum and its products, to regulate imports into the United States in order to maintain an agreed level of domestic world prices, and to divide foreign producing and marketing territories.[37] The complaint charged further that some thirty jointly owned companies were created to give effect to these arrangements."

You will note the reference to a price-fixing conspiracy, collusion, and the statement that a criminal case was instituted. I am sure that the representatives from the Soviet Union will be happy to have this official report of our Government to use for propaganda purposes.

This report also recites actions recently instituted under the 1950 amendments of section 7 of the Clayton Act. This statement is meaningful to those of us who are familiar with this legislation, but in the form in which the report is presented, it has no meaning whatsoever to other countries who will receive it through the United Nations Economic and Social Council.

Our present able delegation to the Council has sufficient difficulty in presenting the merits of the American free-enterprise system without having to be confronted with a report placing American business enterprise in a most unfavorable light in such a forum.

On October 21, 1953, I testified before the Subcommittee on Minerals, Materials, and Fuels Economics of the Committee on Interior and Insular Affairs, of which the distinguished senior Senator from Nevada was the chairman, and reviewed the steps which led to the convening of the conference at Habana. After outlining the State Department's 1945 proposals, I said that they represented a bold move in the direction of world government and threatened the measures of security in which I have been particularly interested throughout my entire adult lifetime.

The report of this ad hoc committee on Restrictive Business Practices, which will be before the Economic and Social Council this spring, included this statement which confirms the fears I expressed at that time:

"Governments have long since come realistically to accept the concept that different types of trade barriers must be dealt with at a different pace and through different organizational arrangements. For example, the International Monetary Fund, which is charged with the problem of dealing with exchange restrictions, was established several years before any organization had been set up to deal with the problem of import restrictions, the close companion of exchange restrictions; and the General Agreement on Trade and Tariffs was established without any parallel organization with respect to restrictive business practices. Both the International Monetary Fund and the General Agreement, in turn, were created at a time when no formal arrangements had been developed for continuous consideration of commodity agreements and commodity allocations, problems which are intimately related to trade-barrier problems. In each of these fields, notwithstanding their interrelationships, machinery for international action was developed at its own pace and in its own form. The problems of liaison and consistency of pace have proved far less difficult in actuality than in the abstract. A common core of membership in these groups, supplemented by the enterprise of the secretariats, by arrangements similar to those provided in article 9 of the draft agreement, and by a few formal ties, have created a reasonably workable system."

I am confident that the steps which have already been taken by the Eisenhower administration to repudiate chapter VI of the Habana Charter through our nonparticipation in the Trade Stabilization Commission will be repeated at the forthcoming session of the Economic and Social Council when,

---

[32] Having participated in a number of international conferences, the writer is deeply aware of the painstaking effort and negotiation necessary to achieve workable agreements.

Aircraft Carrier Potential

EXTENSION OF REMARKS
OF

HON. HENRY J. LATHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. LATHAM. Mr. Speaker, for the benefit of my colleagues, I wish to set forth in the RECORD a most significant and enlightening article by James H. Smith, Jr., Assistant Secretary of the Navy (Air), which appeared in the February 1955 issue of United States Naval Institute Proceedings:

MOBILE SEA BASE SYSTEMS IN NUCLEAR WARFARE

It is increasingly evident that nuclear warfare is refocusing attention upon the need for a military force based on the high seas. Rather than diminishing the future value and need of a Navy, the advent of the atom, like that of the airplane, has reemphasized the importance of seapower.

In modern warfare the offense has taken a commanding lead over the defense. This lead is a product of the nuclear weapon and its sharply increased lethal radius. Even so, a reasonable defense against nuclear explosives might be devised, were it not for the tremendous increase in the speed of the vehicle delivering the explosive. The speed of these vehicles—whether they are today's supersonic jet bombers or tomorrow's long-range missiles—reduces the warning period before an attack and, consequently, the time in which we can bring our defense to bear. The destruction of the attacker is therefore up to defenses that are already in place.

A handful of men operating offensive nuclear weapons today can do more damage than an entire army in the past, and they can do it at a distance of thousands of miles from their home base and within hours (ultimately, minutes) of the decision to attack. Even against a 90 percent effective defense—an almost incredible effectiveness level—they could probably achieve a rate of destruction critical to the defender.

It would be hard to estimate what percent of effectiveness could be achieved by the defense against an enemy jet bomber attack. It is known that against future missiles of the improved V-2 type there is no practicable defense. Against those prospective missiles the only solution—and against today's weapons a more effective solution—is to destroy the bases from which they might be launched.

These facts lead to several conclusions which appear valid for the medium-term future:

First: The offensive can inflict devastating results despite any foreseeable defensive effort.

Second: The best defense is an overwhelming counteroffense, directed primarily at the bases and sources of the enemy striking forces.

Third: National security, unless one can be sure of striking first, lies in convincing an enemy that even if he strikes the first blow, he cannot prevent an overwhelming and possibly fatal counterattack against his airpower and other nuclear weapons potentials.

Since it is the consistent policy of the United States not to initiate preventive war, it is plain that our determent of war before it starts (and our survival if it does) depends on our ability to counterattack promptly and with great force and precision no matter how severe the enemy's initial attack. Such a defense requires two things: First, the United States long-range weapons and their delivery systems must remain adequate in numbers and second to none in quality. Second, the bases from which these weapons are launched must neither be nor appear to be vulnerable to an enemy's initial attack. This last requirement cannot be overemphasized. The present contest is not a game in which the aces are hidden. The enemy must know and know well that his best calculations and best efforts cannot earn him immunity from a blow of magnitude equal to, or greater than, that which he has attempted.

Therefore the security of the base system from which our retaliatory attack is launched is a major concern of our military planners. To compensate for the limited range of our present bombers and missiles, we now have bases well advanced toward the enemy targets. Yet fixed bases on foreign soil in close proximity to the enemy cannot always be used—because of problems of sovereignty. Nor can they be defended adequately. In these advanced locations they offer the most obvious, immovable, exposed targets for surprise attack by relatively short-range enemy nuclear weapons.

The concentration of all the services on increasing the range of our weapons steadily reduces our dependence on bases near the target. However, a corresponding increase in range of enemy weapons would also make even our immovable home bases vulnerable to sudden overwhelming attacks which could prevent our counterattack.

In a recent magazine article Gen. Charles A. Lindbergh pointed to the vulnerability of airbases as a weak spot in our atomic deterrent potential. He emphasized the importance of decentralizing and scattering our bases to prevent their simultaneous destruction. He assumed quite logically that we cannot conceal the location of our land bases from enemy intelligence agents.

On the other hand, sea bases can be readily decentralized and scattered and their location cannot be predicted by the enemy. This is of great importance because long-range pilotless missiles such as those developed from German V-1 and V-2 types (which will be among the major threats to our fixed land bases in the future) cannot be used effectively against moving targets. This is a fundamental weakness inherent in the guidance problem for very long-range missiles. This weakness confers a very great advantage on the nation that invests a goodly share of its deterrent and retaliatory potential in forces operating from mobile bases.

It is therefore submitted that:

1. Our defense in nuclear warfare must be based primarily on a well-advertised ability and intention to counterattack with overwhelming force.

2. For maximum assurance against a surprise attack, at least a part of the United States counterattack potential must be decentralized and dispersed far and wide on moving bases. This might be called an ultimate or an additional deterrent, supplementing our fixed-base striking forces. In any event it is so important that if we did not have mobile sea bases we should be forced to invent them. Fortunately we have them.

The most practical moving base for an offensive weapon today is that which moves on water. There are several such bases. It can be a surface ship such as the carrier or it can be a submarine from which aircraft or missiles are launched, or simply the sea itself from which seaplanes supplied by mobile tenders operate against the target. Moving bases may eventually shift to the air, but such a development requires endurance in aircraft beyond anything presently in sight. For today's use, inventing an American mobile deterrent force for the atomic age is not necessary. Because the Navy has not lost sight of the strategic and tactical value of mobility which the sea provides, naval power stands squarely in the road to meet future national strategic requirements.

On this faith in the enduring virtues of mobility the American carrier striking force was founded. That force is mobile deterrent power today. Furthermore, carrier forces have the additional virtue, uncommon these days, of diverting enemy intentions and weapons away from our populated areas and out to sea. This is extremely important when considering such things as radioactive "fallout."

The mobile deterrent forces the United States will need must have three characteristics. First, they must have the ability to deal devastating blows precisely—a high rate of destruction against the enemy's striking power. Second, they must be self-sustaining for periods sufficient to render overwhelming injury to the enemy, so that even if our shore bases are destroyed they can still continue from the far seas to hurl destruction at the enemy's military vitals. Third, although invulnerable to long-range pilotless missiles, they must still be defensible against the modern humanly guided weapons.

Those are the three characteristics which must mark the carrier striking forces of today and tomorrow.

Future carrier striking forces can be visualized as a handful of large ships able to maintain high speeds in all sea conditions—say, 3 carriers, 7 guided missile cruisers, and 2 high-speed resupply ships per task force. This small task force may be contrasted with the 100-ship Task Force 58 of World War II and its many dozens of logistic support ships. This handful of a dozen ships will be far more economical, yet more powerful and more mobile. The ratio of punch to overhead will be tremendously improved.

This mobile force will be spread out over an ocean area the size of the State of Maine. It will be so widely dispersed that no single weapon, of any size now visualized, can seriously damage more than 1 ship.

Such a force would pack a very great offensive punch. It would include aircraft able to deliver large yield weapons under all weather conditions against enemy bases 1,500 or more miles distant. It would have other smaller, supersonic aircraft, each able to deliver in the medium ranges a weapon large enough to knock out an opposing air base or missile site. Coordinating with such carrier forces will be advanced forces of nuclear-powered submarines, launching atomic missiles against targets at relatively short ranges.

These forces would be self-sustaining for some 30 days of war operations, a long time in terms of atomic war. Most of the ships would have nuclear propulsion. Aviation fuel and weapons resupply would come from the 2 fast supply ships traveling with each task force.

Because of the dispersion of the force's ships and the range of its weapons, such a carrier force could exert a tight and exclusive control over an area of 60,000 square miles—the 6 New England States rearranged into a circle 275 miles in diameter. An enemy vessel or aircraft would approach that area at its peril and few would live to penetrate even part way to its center.

In the past, fast carrier task forces have been satisfied to have 1 or 2 cracks at the enemy attackers. Antiaircraft and antisubmarine defenses have been tightly concentrated around the carriers for mutual reinforcement. Combat air patrols were dispatched to break up enemy attacks 50 miles

out. Against the Japanese this was enough. In 1 day alone—the Marianas turkey shoot—the Japanese threw 545 aircraft against such a formation and had 366 shot down. Against nuclear attacks even this high performance is unacceptable, even though it is not expected that the mobile deterrent force would face such numbers.

Against air attack, the future carrier force would have a defense system unrecognizable when compared to that of our World War II task force. Short range antiaircraft weapons would be absent because they have been made obsolete by the distance from target to release point in modern high-speed bombing. Instead, defense against air attack would in great part depend on medium range guided missiles carried aboard the cruiser missile ships. Nuclear warheads would be available for missiles fired against large bomber formations, should the enemy be unwise enough to concentrate his aircraft.

Against enemy submarines there would be concentric rings of warning and defense, provided primarily by helicopters based on the guided-missile cruisers. The outer ring would be effective many miles from the carriers. Nuclear antisubmarine weapons would also be available. The use of destroyers will be entirely different from the procedure of World War II and probably none would be employed in a carrier task force.

This exploration of the potential capabilities of future carrier defense has been mentioned in some detail because of the prevailing feeling that carriers are easy to sink. Those who share that feeling fail to distinguish between putting a carrier out of action and stopping the carrier force as a whole. In the defense of the modern carrier task force, the objective will be to stop all attackers before they reach release position. A failure will not sink the entire force, although it may knock out any one ship.

But the unpleasant fact of nuclear war is that today practically everything is vulnerable, particularly airfields. Nuclear tests tell us exactly what size atomic bomb is required to lower the center of any man-made runway in the world to a depth of 100 feet. Any runway so attacked will stay sunk. But it is obvious that of the two bases—fixed and mobile—the latter has a far greater chance of survival.

The sea base, moreover, has other important advantages:

First, it enjoys unobstructed radar vision.

Second, the location of that sea base cannot be predicted. The location of the carrier force will not be a secret, but within its vast dispersed control area the carrier location will be obscure. Moreover, the carrier task force's defense system will be especially designed to limit enemy reconnaissance.

Third, the sea base's offensive punch would be used to stop attacks at their source—the enemy's bases—using the full advantage of our mobile basis against their fixed bases. The ace we do not mind showing is that we will know course and distance to their fixed bases in advance, while they will not know the exact whereabouts of our mobile bases.

Such a carrier task force is the application of atomic capabilities in an exacting blend of air and sea power, of carrier-based fighters relying on warning and control furnished by cruisers, of warning and antisubmarine helicopters operating from cruiser decks, of carriers poised behind cruiser-launched missile umbrellas, and of all ships in turn depending on the effective destruction of enemy forces and bases by carrier-based bombers and submarine-launched missiles. It is the logical development of sea-air power in the atomic age. This would be our primary mobile deterrent force for the age of long-range missiles. It is a force which the Navy must perfect before that age comes, and which, though it would not escape unscathed, would have a most favorable exchange rate in a battle as well as the power of diverting the enemy forces from our homeland.

This future carrier force has been projected to demonstrate that the carrier has not yet reached its ultimate development as a major weapons system. Further, the principle of the mobile air base, which it exemplifies, is, of necessity, experiencing a resurrection among exponents of airpower.

In addition to the carrier, there will be other mobile deterrent forces to strengthen United States strategy in the age of missiles. Very long-range missiles launched from submarines and surface ships constitute one fruitful line of advance. Also promising is the long-range attack seaplane. This has an additional advantage which the carrier force lacks—seaplane forces can be widely dispersed overseas in many small, relatively inexpensive units, in areas where maintenance of other forces would be too costly. The appearance of modern United States seaplanes in an area thousands of miles from American soil could establish a threat to an enemy's flank and require a diversion of his defenses from other fronts.

The seaplane can soon be given the speed and altitude and load-carrying capabilities of land-based jet bombers. It can be given the ability to operate from any sheltered bay, gulf, lagoon, and estuary having water depth of a few feet. It can be given the capability to land in semisheltered sea areas adjacent to the enemy's shore, refuel, rearm, and replenish from a waiting submarine and proceed on its mission. It need not return to the area whence it departed. With these capabilities it could deliver powerful weapons to vital targets, yet operate from a mobile base well removed from threat of heavy attack. The operating base, a seaplane tender far to the rear, can be given missile and helicopter defenses against light air and submarine attack. It can be moved frequently to foil enemy attack; no advance preparation is needed and no expensive facilities are left behind as improvements to someone else's property. Nor are the sabotage and espionage problems as great for a floating base.

With perhaps half a dozen seaplanes, a single tender, and a pair of logistic submarines, an integrated force could be provided that an enemy could not ignore. Once nuclear propulsion can be fitted to the seaplanes—and for this they appear ideally adapted—the submarines could be dispensed with and the tender base moved still farther back out of attack range.

Use of a proper seaplane force is good deployment—an essential to nuclear warfare. It permits tomorrow's Navy to attack from unpredictable directions and to dilute, divert, and divide an enemy's attacking forces.

It is therefore submitted that, first, survival of the United States requires a supplementary reserve of nuclear striking power which can be launched from mobile bases and, second, the Navy's development of weapons systems employing sea and air provides such power in natural course. It is important to note also that such naval forces can be equally effective in both nuclear war and nonnuclear war. This permits us to apply the type and degree of power appropriate to the situation and avoids the predicament of being unable to use force when necessary because the only force available is too great for the circumstances.

Whether or not we become engaged in limited wars in the future, there will be jobs to do which may not involve all-out nuclear assault on the enemy's sources of military strength. Allies must be supported, supplied, and in some cases fed, and our own raw material needs must be met. And so transports, both surface and air, must flow safely across the oceans. Perhaps tactical air support for hard-pressed allies must also be provided, without atomizing a friendly population. It is likewise conceivable that in the later phases of a nuclear war the patterns of a nonnuclear, conventional war may return.

In any event these naval striking forces have the dual capability for both types of war. Most of the existing fleet was designed for the nonnuclear, and successfully so, as the Pacific wars have shown. New construction, modernization, and modifications will continue to be adapted to the atomic. But they will retain their flexibility however the issue may be joined. Mobility makes them irreplaceable as a safety factor today; the same mobility and flexibility spell economy in a world where the exact place and nature of the next threat cannot always be anticipated. They will be replaced only by weapons of greater mobility, speed, and range.

The United States must face up realistically to the problems and requirements of nuclear war. As a first priority, varied types of striking forces must be adequately maintained which alone can deter nuclear warfare, and which alone can be decisive in the first phase of such a war if it comes. A reasonable effort must also be devoted to home defense and to the support of our overseas commitments; even though the defensive is not decisive, the enemy cannot be left an open invitation to move unopposed.

If adequate strength is to be maintained in this critical area while supporting a reasonable civil economy, there must be a constant re-examination of both the kind and the qualities of forces. Those types of weapons which give relatively less security per man or dollar—however useful they may be for specific purposes—must be questioned and reappraised. While the possible requirements of limited war must not be neglected, the maintenance in peacetime of forces which in unlimited war could be useful only in the later stages, and might even be serious burdens in the early stages, must likewise be questioned. It must be appreciated that in nuclear war it takes far fewer men to destroy at unheard of rates, and that it will take more and more men for reconstruction of industry, transport, and essential shelter.

As the nature of war changes many of our present weapons and forces will inevitably become relics of history, including elements of the Navy and of naval aviation as well. All weapons systems must stand the tests of mobility, multi-purpose flexibility, speed and range, lethality, and the other attributes. Our obligation is to discard those which do not measure up and to accelerate the development of those which show promise.

With this approach, the Navy has a future more vital and more demanding than ever before.

Formosa: Risks and Strength

EXTENSION OF REMARKS
OF

HON. PHILIP J. PHILBIN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. PHILBIN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following statement:

Speaking at the 25th anniversary of the Hoboken Club, Milford, yesterday, Congressman PHILIP J. PHILBIN, of Clinton, hailed the Formosa policy as a long-overdue favorable change in United States foreign policy.

"There are risks involved in the course we have selected," said PHILBIN. "In fact there are risks whatever course we may follow because we are living in a very dangerous world. But the alternative of appeasement and

vacillation would constitute, in my opinion, a far greater risk. If we stand by, while world communism directed from Moscow conquers one nation after another by force and insidious conspiracy, the time would ultimately come when we would be outflanked militarily, economically, and in every other way. That would be a prospect of real peril.

"The present situation is grave, but we are acting from a position of strength. Our own Armed Forces are in a high state of efficiency and the military and economic resources of the free world plus our power to strike, if attacked, with overwhelming nuclear force will continue to be the great deterrent to Soviet aggression. We must continue to build this great strength for the long haul. It will best guarantee the national security and the peace."

The Congressman also touched briefly on present immigration laws which he said were working great inequities upon many American families and veterans who, despite their fine citizenship and loyal service, are prevented by law from having their relatives join them in this country. "There should be a rule of reason in these matters. These laws should be liberalized," he said.

PHILBIN congratulated the members of the Hoboken Club who, he said, had conducted themselves in the best traditions of the Nation. "Your contributions to Milford and to the Nation in war and in peace represent the highest type of citizenship. And your devotion to the cause of your own people has heightened your allegiance to this country. I wish you many more years of useful service and happiness," he concluded.

They Who Have Sown the Wind—An Editorial Naming Harvey Matusow

EXTENSION OF REMARKS

OF

HON. CLYDE DOYLE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. DOYLE. Mr. Speaker, by reason of unanimous consent granted me heretofore so to do, I present the text of an editorial printed in the Christian Science Monitor on Thursday, February 17, 1955.

In view of the fact that this editorial deals with Harvey Matusow, and with former Communist and self-styled witnesses, it would appear appropriate that I incorporate in these remarks part of a question and answer period on July 2, 1954, when Harvey Matusow, he being the same person as is identified in the editorial, testified before the House Committee on Un-American Activities in the 83d Congress.

Mr. DOYLE. You have enumerated some 7 or 8 boards or committees before which you have testified since February 1952. Before any of those boards or committees were you paid a professional fee for so testifying?

Mr. MATUSOW. Sir, yes; let me say 1, 2, 3, maybe 4, maybe 5 occasions, and that was the Subversive Activities Control Board, they gave me a fee of $25 a day and once before an Immigration Service had me in New York and I don't remember the individual, but they paid me a fee of $25. On a number of occasions when I received that fee I turned it over to a charity of some sort.

Mr. WALTER. That is the usual fee provided for by law.

Mr. MATUSOW. As the per diem?

Mr. WALTER. That is provided by law.

At the time Mr. Matusow said "I turned it over to a charity of some sort," I regretted I did not have time to have him name the charity of some sort.

Also, his recent swearing that he lied and testified falsely before some Government committees, including the House Un-American Activities Committee, of which I am a member, further substantiates the position taken by me as a member of that committee; to wit, that said committee and all congressional committees must be increasingly on the alert to search and discover, so far as it is possible, the creditability of all witnesses before congressional committees. Certainly, Mr. Speaker, the earning of $25 a day, as earned by Mr. Matusow before various Government boards and congressional committees, together with the fact that he, and also other similar witnesses, had recently testified that they had falsified in testimony before these boards and committees should make us all wary and most cautious about being placed in the position where we are expected to fully believe and give full face to their testimony.

The above-mentioned editorial follows:

THEY WHO HAVE SOWN THE WIND

Implications of the Harvey Matusow recantations continue to spread out like the ripples from a stone dropped into a pond.

The admitted former Communist and self-styled professional witness now declares under cross-examination that he was hired to prepare black lists by at least two big advertising agencies and as a consultant on subversion by New York City's superintendent of schools, and that he made false accusations. His testimony as a witness for the Department of Justice in several trials involving alleged Red activities he had previously sworn was false.

We cannot be sure that what he declares to be the truth now can be relied on any more than what he declares was false. That remains to be proved. Nor does the recantation of one ex-Communist prove that all the Red apostates have given false testimony. But dependence upon paid informers is a risky business under any circumstances; retention by congressional committees and the Department of Justice of a string of them for use on call in a semipolitical field has made many people, no friends of the Reds, uncomfortable.

Now to learn that at least one of them has been instrumental, presumably, in hazarding, if not damaging, careers of actors, artists, and teachers confirms something we said over 3 years ago when the question was being asked, "Who's harmed except the Communists?":

"The fact is that we are all harmed. The virus of indiscriminate suspicion has made everyone pause before the costs of free discussion as Americans have known it. It has driven teachers to avoid classroom discussion of controversial subjects. * * * It has frightened legislators and other public officials. * * * It has so blurred crucial distinctions in the thinking of many people that real subversion is often confused with all sorts of useful leavening minority movements."

Those who have sown the wind may now be feeling but the first faint gusts of a whirlwind yet to be reaped.

The Office of the President of the United States

EXTENSION OF REMARKS

OF

HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, February 18, 1955

Mr. CELLER. Mr. Speaker, under leave to extend my remarks, I insert herewith the following speech I delivered before the Consular Law Society on February 23, 1955:

It is a singular honor to be appearing before the Consular Law Society. I say "singular" advisedly, since here I am facing the soul-chilling scrutiny of the expert. The Congressman envies the expert, and I often believe that the Congressman is called upon to have opinions on everything, conviction on nothing, and the little learning the poet Pope has dubbed dangerous.

Nonetheless, I secretly confess to holding a dozen or so convictions, and it is on one of these to which I would like to address myself tonight. That is, the Office of the President of the United States.

During my 32 years in Congress, I have watched 6 Presidents, each in his own way, define the Office of President: Harding, Coolidge, Hoover, Roosevelt, Truman, and Eisenhower. It is in this definition of the line that both weaves together and at the same time separates the executive and legislative branches of the Government, the line that is most generally and, I might add, most loosely, called checks and balances, that each has differed; and it is in this difference of personal definition that has set, and continues to set, the course of the ship of state.

Where the President is fully aware that his office is the governing office of the country, he accepts both the tones and the overtones of power and the awful responsibility that goes with the possession of such power. Particularly is this true in the conduct of foreign affairs. He in the office of the President is charged with that responsibility. The ultimate decisions must be his. You can no more separate the loneness and the loneliness of the man in this office than you could separate the tides of the ocean from the pull of the moon. The President who seeks to divest himself, in all good faith, from the loneness and loneliness of the office, deserts the charges of responsibility that office has placed upon him.

Undoubtedly today we have in our Chief Executive a man with the will to peace. If sincerity were the only quality the office of the Presidency demands, we could then say, without reservation, that the office had found its man. But I have come to believe that the office of the Presidency, as it is being defined by Mr. Eisenhower, has been invested with a much narrower meaning than was ever intended by the Founding Fathers. The office of the President is not that of adjudicator, conciliator, or merely administrator in the sense of delegating authorities and duties. It is not the echo of short-term public opinion. Nor is it merely the coordinate branch of the Government.

In the relationship, for example, with the Congress, the Executive must realize that the Congress has many more explicit ways of curbing the Executive than the Executive has of curbing the Congress. The Congress, through its control of the purse strings, can check the Executive. Another check lies in the investigatory powers of Congress. The Senate can halt the Executive by withholding consent and approval of treaties. The same is true of Presidential confirmable appoint-

ments. While it is true that the Executive can veto a bill, the ultimate power still lies in the Congress while it is in session by the overriding veto. But there is a vast area of power consciously not made explicit by the framers of our Constitution who were aware of the curbs placed on the Executive without corresponding explicit curbs which the Executive could use in its relationship with the Congress, and it is in the use of this area that a President fails or succeeds in the government of his country.

It is because the fathers of this country had an image of what the President must be to match the responsibility of the office—decisive, subtle, informed, and imaginative—that this area of power exists. When the office of the President is filled with a man limited in the exercise of these qualities, the country must suffer. So it is today.

We have had, unfortunately, too many commissions and not enough decisions. We have had a reliance on the resonant phrase: "dynamic massive retaliation"; "liberation"; "agonizing reappraisal", to catch the public mind. We have had to swing around from "liberation" to "containment." We have had an unleashing and a re-leashing of the Chinese Nationalist troops on Formosa. We have had decisions made, remade, and un-made again, from the first decision that the Tachen Islands are vital to our defense to the un-made decision to evacuate the Tachens. We have had the decision of defending Quemoy and the Matsu Islands through the promise of Secretary Dulles to Chiang Kai-shek and again through "implications" in Mr. Dulles' foreign policy statement of last week. Now we are not quite sure what the decision will be since the President's statement to the Senate on the Formosa resolution. We have had the decision to defend Dien Bien Phu and then the decision not to defend Dien Bien Phu. What was at first the relentless decision not to consider the Chinese Communist government as either de facto or de jure, we now seek, through the language of the Formosa treaty and through the efforts of cease-fire, to bring ourselves to the point of acknowledging the existence of two Chinese governments, one for the mainland and one for Formosa.

I do not quarrel with some of the decisions that have ultimately been made; I make only the point of the circuitous, contradictory routes that have been passed through to reach them.

Perhaps the severest test placed upon the office of the Presidency is that of silence. In the delicate operations of negotiation upon which, perforce, the conduct of foreign affairs must hinge, there are changes from day to day which alter or amend earlier decisions. The volume and the complexity of such exchange among governments can be known to the President alone. The public cannot know what they are, nor should they. I am talking, mind you, of the day-to-day exchange among governments. Hence a dramatic announcement of policy must be watched lest it be tainted with the poison of prematurity.

We have seen just such a public scramble relative to the now ex-Premier of France, Mendes-France. It was first the violence directed against him in the repudiation of EDC by France, and then the reassessment upon the completion of the Paris agreements. Our policy in the Far East has been paralyzed by public statements emanating from the White House. Good intentions are not a substitute for firmness, nor overeagerness for public approval a substitute for delicacy and imagination.

This, of course, is not a brief for the withholding of information from the public. It is, rather, a reminder that the hasty jumping into public print carries with it a danger that public opinion, unaware of new and subtle developments, may compel a rigidity in the operation of foreign affairs which new developments no longer warrant. This eagerness for public announcement has already resulted in unnecessary confusion at home and abroad and has left the unwarranted impression that the United States leaps before it looks.

Hamilton has said it well in discussing the powers of the President:

"In the article which gives the legislative powers of the Government, the expressions are, 'All legislative powers herein granted shall be vested in a Congress of the United States.' In that which grants the executive power, the expressions are, 'The executive power shall be vested in a President of the United States.' The enumeration ought therefore to be considered, as intended merely to specify the principal articles implied in the definition of executive power; leaving the rest to flow from the general grant of that power, interpreted in conformity with other parts of the Constitution, and with the principles of free government."

It is well that those of us who are concerned with the conduct of government become increasingly aware of the relationship between the office of the President and the Congress of the United States. The indispensable factor must be Presidential initiative. There has been—unfortunately, I say, despite the fact I am a Member of Congress—a growing dependency upon congressional support, in the conduct of our foreign affairs particularly. If this tendency develops to too great a degree, we shall find a radical disturbance in the distribution of powers, an imbalance which bodes ill for the country.

This growing imbalance can only be redressed by the man who, by the strength of his visions, understands the responsibilities, duties, and the powers of the office of the President.

SENATE

MONDAY, FEBRUARY 21, 1955

The Chaplain, Rev. Frederick Brown Harris, D. D., offered the following prayer:

O Thou whose throne is truth, frail creatures of dust serving out our brief day on the world's vast stage, we would set our little lives in the midst of Thine eternity and feel Thy completeness flowing around our incompleteness, and around our restlessness Thy rest.

As we face together the tasks of another week, we come asking that Thou wilt give us a rebirth of faith, because when faith dies the deepest meanings of our lives fold up their tents and disappear; but if faith returns, in ourselves, in others, and in Thee, then life again clothes itself with purpose and significance and we have treasures worth living and worth dying for. And so, pausing by this wayside shrine in prayerful penitence, we do not ask for easy lives, but for great reserves; we do not ask that our path should be smooth, but that we should never lose our direction or become dismayed.

Make us ever mindful that upon the free soil of this continent our fathers, with holy toil, reared a house of faith hallowed by Thy name. Make us so to believe in America and so to add to its strength and stamina by our own characters that we shall covet for the whole world its emancipating truth and light in the midst of today's falsehood and darkness. We ask it in the dear Redeemer's name. Amen.

THE JOURNAL

On request of Mr. CLEMENTS, and by unanimous consent, the reading of the Journal of the proceedings of Friday, February 18, 1955, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on February 19, 1955, the President had approved and signed the act (S. 145) to amend the wheat marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting sundry nominations, which was referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its clerks, announced that the House had passed a bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 1) to extend the authority of the President to enter into trade agreements under section 350 of the Tariff Act of 1930, as amended, and for other purposes, was read twice by its title and referred to the Committee on Finance.

LEAVE OF ABSENCE

Mr. HICKENLOOPER. Mr. President, as a member of the United States delegation to attend the inauguration of the President of Cuba, and inasmuch as I shall be leaving for that purpose tomorrow morning, I ask unanimous consent that I may be excused from attendance on the sessions of the Senate beginning tomorrow, and for the remainder of the week.

The PRESIDENT pro tempore. Without objection, leave is granted.

COMMITTEE MEETING DURING SENATE SESSION

On request of Mr. CLEMENTS, and by unanimous consent, the Internal Security

Subcommittee of the Committee on the Judiciary was authorized to meet during the session of the Senate today.

ANNOUNCEMENT OF MEMORIAL SERVICE FOR THE LATE SENATOR MAYBANK, OF SOUTH CAROLINA

Mr. CLEMENTS. Mr. President, at this time I should like to announce to the Senate that on March 2, 1955, there will be held in the Senate a memorial service for the late Senator Burnet R. Maybank, of South Carolina.

ELECTION OF CHAIRMAN AND VICE CHAIRMAN OF JOINT COMMITTEE ON THE LIBRARY

Mr. HAYDEN. Mr. President, I announce that at a meeting of the Joint Committee of Congress on the Library, on Friday, February 18, 1955, the following were elected for the first session of the 84th Congress: Representative OMAR BURLESON, of Texas, chairman; and the Senator from Rhode Island [Mr. GREEN], vice chairman. I make this announcement in order that the RECORD will show their election.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. CLEMENTS. Mr. President, under the rule, there will be a morning hour for the presentation of petitions and memorials, the introduction of bills, and other routine matters, and I ask unanimous consent that any statements made in connection therewith be limited to 2 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

RUNNING MATES FOR CERTAIN STAFF CORPS OFFICERS IN NAVAL SERVICE

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to provide running mates for certain staff corps officers in the naval service, and for other purposes (with an accompanying paper); to the Committee on Armed Services.

INTERCHANGE OF SUPPLIES BETWEEN THE ARMED FORCES

A letter from the Acting Secretary of the Air Force, transmitting a draft of proposed legislation to amend section 640 of title 14, United States Code concerning the interchange of supplies between the Armed Forces (with an accompanying paper); to the Committee on Armed Services.

EXEMPTIONS FROM DUTY OF CERTAIN PERSONAL AND HOUSEHOLD EFFECTS

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend the act of June 27, 1942 (ch. 453, 56 Stat. 461), as amended, to make permanent the exemptions from duty of personal and household effects, and for other purposes (with an accompanying paper); to the Committee on Finance.

REPORT OF MARITIME ADMINISTRATION ON OPERATIONS UNDER MERCHANT SHIP SALES ACT OF 1946

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report of the Maritime Administration of the Department of Commerce on activities and transactions under the Merchant Ship Sales Act of 1946, for the period October 1 through December 31, 1954 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

REPORT OF FEDERAL MARITIME BOARD AND MARITIME ADMINISTRATION

A letter from the Secretary of Commerce, transmitting, pursuant to law, a report of the Federal Maritime Board and Maritime Administration, for the fiscal year 1954 (with an accompanying report); to the Committee on Interstate and Foreign Commerce.

PENALTIES FOR VIOLATION OF SECURITY PROVISIONS OF CIVIL AERONAUTICS ACT

A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to authorize the imposition of civil penalties for violation of the security provisions of the Civil Aeronautics Act of 1938, and for other purposes (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

REPORT ON TORT CLAIMS PAID BY DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

A letter from the Secretary, Department of Health, Education, and Welfare, transmitting, pursuant to law, a report on tort claims paid by that Department, for the calendar year 1954 (with an accompanying report); to the Committee on the Judiciary.

WILLIAM HENRY DIMENT ET AL.

A letter from the Secretary of the Army, transmitting a draft of proposed legislation for the relief of Mr. William Henry Diment, Mrs. Mary Ellen Diment and Mrs. Gladys Everingham (with an accompanying paper); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Two letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law as to each alien and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

GRANTING OF APPLICATIONS FOR PERMANENT RESIDENCE TO CERTAIN ALIENS

Two letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders granting the applications for permanent residence filed by certain aliens, together with a statement of the facts and pertinent provisions of law as to each alien and the reasons for granting such applications (with accompanying papers); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

Resolutions of the General Court of the Commonwealth of Massachusetts; to the Committee on Finance:

"Resolutions memorializing the Congress of the United States against the enactment of legislation lowering the tariffs on the importation of rubber products

"Whereas there is now pending before Congress H. R. 1, which provides for the lowering of tariffs on the importation of certain manufactured products, including manufactured rubber goods; and

"Whereas adequate tariffs must be maintained to enable American manufacturers of rubber goods to remain in business and sell their products in the domestic market—the last market left to them; and

"Whereas the rubber manufacturing industry, founded in America and which, at one time, sold its goods throughout the world, cannot fairly compete with foreign manufacturers who have copied the American product but have exploited their one advantage of cheap labor: Therefore be it

"Resolved, That the House of Representatives of the General Court of the Commonwealth of Massachusetts memorializes the Congress of the United States to defeat H. R. 1; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the State secretary to the President of the United States, to the presiding officer of each branch of Congress, and to the Members thereof from this Commonwealth."

A joint resolution of the Legislature of the State of Colorado; to the Committee on Finance:

"Senate Joint Memorial 3

"Memorializing the President of the United States and the Congress thereof to consider revision of the Sugar Act of 1948 in regard to sugar quotas established for domestic sugar beet production

"Whereas the Sugar Act of 1948, as amended, provides a statutory limitation upon the quantity of sugar which may be marketed in the United States during any 1 year by the domestic beet, mainland cane, Hawaiian, Puerto Rico, and Virgin Islands sugar industries; and

"Whereas since the establishment of these inflexible marketing quotas the population of the United States has increased from approximately 150 million to more than 163 million persons and the consumption of sugar has increased approximately 1 million tons since 1948 as a result of the increased population; and

"Whereas sugar consumption in the United States may be expected to continue to increase at a rate of 100,000 to 125,000 tons per year; and

"Whereas under provisions of the Sugar Act of 1948, as amended, the domestic sugar industry has been prevented from participating in this increase in consumption by the inflexible marketing privileges; and

"Whereas an equitable and participating share of this expanding market is essential to the continued stability and vigor of the domestic sugar industry; and

"Whereas the beet sugar industry is prepared to meet the challenge of an expanding market due to achieved gains in productivity and efficiency; and

"Whereas the welfare of our State and our Nation requires the existence of a strong and vigorous domestic sugar industry, especially during periods of war and national emergencies: Now, therefore, be it

"Resolved by the Senate of the 40th General Assembly of the State of Colorado (the House of Representatives concurring herein), That all members of the Congress of the United States are urged to enact legislation amending the Sugar Act of 1948 in such manner as to enable the domestic sugar industry to have fair and equitable participation in the growth of our Nation; be it further

"Resolved, That copies of this memorial be immediately transmitted to the President of the United States, the Secretary of Agriculture, the Secretary of Interior, the President of the Senate of the United States, the Speaker of the House of Representatives of

the United States, and to each Member from Colorado of the Congress of the United States.

"STEPHEN R. NUNECHOP,
"President of the Senate.
"MILDRED H. CRESSWELL,
"Secretary of the Senate.
"DAVID A. HAMIL,
"Speaker of the House of Representatives.
"LEE MATTIEA,
"Chief Clerk of the House of Representatives."

Four joint resolutions of the Legislature of the Territory of Alaska; to the Committee on Interior and Insular Affairs:

"House Joint Memorial 1

"To the Honorable Dwight D. Eisenhower, President of the United States and to the Congress of the United States:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d session assembled, respectfully submits that:

"We, representatives of the citizens of Alaska, again appeal to you, the duly constituted representatives of all the people of the United States, that you may recognize us and our constituency as equal citizens under the democratic flag of America;

"We remind you again that the people of Alaska have demonstrated through all their history of Territorial status their adherence to the principles upon which the Government of the United States was founded;

"We remind you that by referendum and by acclamation through our land an overwhelming majority of our people have declared unequivocally their desire for statehood and the right of a free people to govern themselves;

"We recall to you that your own electors, through the platforms of the major political parties and by their popular accord have given you a mandate for statehood for Alaska; and

"Therefore we ask that you, collectively and as individuals, dismiss all partisan concerns, look only to the merits of our cause, recognize and correct the injustice we suffer in not being allowed to govern ourselves or participate in the election of the President or have voting representation in Congress, all of which may be cured by enabling immediate statehood for Alaska.

"Your memorialist will ever pray.

"Passed by the house January 25, 1955.
"WENDELL P. KAY,
"Speaker of the House.

"Attest:
"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Passed by the senate February 8, 1955.
"JAMES NOLAN,
"President of the Senate.

"Attest:
"KATHERINE T. ALEXANDER,
"Secretary of the Senate."

"House Joint Memorial 3

"To the Honorable Dwight D. Eisenhower, President of the United States; to the President of the Senate and Speaker of the House of Representatives of the Congress of the United States; and to the Honorable Douglas McKay, Secretary of the Interior:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d regular session assembled, respectfully submits that:

"Whereas the Federal Government retains the responsibility for care and treatment of the mentally ill in Alaska; and

"Whereas the existing procedures for the care and treatment of such persons in Alaska are antiquated, inhuman, and cruel; and

"Whereas this condition is a matter of grief and shame to all the people of Alaska, who plead to us, their duly elected Representatives and their Delegate to Congress for immediate correction of this deplorable condition; and

"Whereas H. R. 610, a bill to correct this condition is pending before the Congress of the United States.

"Now, therefore, your memorialist the Legislature of the Territory of Alaska urges that this legislation be passed and approved.

"And your memorialist will ever pray.

"Passed by the house January 27, 1955.
"WENDELL P. KAY,
"Speaker of the House.

"Attest:
"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Passed by the senate February 8, 1955.
"JAMES NOLAN,
"President of the Senate.

"Attest:
"KATHERINE T. ALEXANDER,
"Secretary of the Senate."

"House Joint Memorial 2

"To the Honorable Dwight D. Eisenhower, President of the United States; to the President of the Senate and Speaker of the House of Representatives of the Congress of the United States; and to the Honorable Douglas McKay, Secretary of the Interior:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d regular session assembled, respectfully submits that:

"Whereas under the law of the United States the States therein receive the benefit of 90 percent of the profits from the leasing of coal and certain other mineral lands therein; and

"Whereas the Territory of Alaska is discriminated against in the benefit of profits from these mineral lands under existing Federal law; and

"Whereas H. R. 247, a bill to correct this discrimination now existing, is pending before the Congress of the United States.

"Now, therefore, your memorialist, the Legislature of the Territory of Alaska, urges that this legislation be passed and approved, thereby eliminating this unfair discrimination.

"And your memorialist will ever pray.

"Passed by the house January 27, 1955.
"WENDELL P. KAY,
"Speaker of the House.

"Attest:
"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Passed by the senate February 5, 1955.
"JAMES NOLAN,
"President of the Senate.

"Attest:
"KATHERINE T. ALEXANDER,
"Secretary of the Senate."

"Senate Joint Memorial 8

"To the President of the United States; the Congress of the United States; and the Delegate to Congress from Alaska:

"Your memorialist, the Legislature of the Territory of Alaska, in 22d regular session assembled, respectfully submits that:

"Whereas the great need for the economy of Alaska is industrial development and use of its natural resources; and

"Whereas an opportunity for a large wood-processing industry at Shoemaker Bay, near Wrangell, Alaska, is immediately available in matured plans of the Pacific Northern Timber Co., which has timber-use rights in this area under contract with the United States Forest Service; and

"Whereas development of this $2,500,000 plant cannot be achieved without ownership and use of certain tidelands, adjacent to and abutting on upland property owned by the Pacific Northern Timber Co., which are presently held in trust by the United States for the State of Alaska and the ownership rights to which tidelands can be obtained only by an act of Congress; and

"Whereas we, the duly elected representatives of the people of Alaska, hereby record our findings and belief that the tidelands involved should be committed to the industrial use here proposed.

"Therefore, we ask that you immediately enact legislation authorizing the issuance of a patent conveying fee simple title to those certain necessary tidelands in Shoemaker Bay to the Pacific Northern Timber Co., the issuance of the patent to be conditioned on the faithful performance by the company of its agreement with the United States Forest Service to construct sawmill facilities at the site by December 31, 1957.

"And your memorialist will ever pray.

"Passed by the senate February 14, 1955.
"JAMES NOLAN,
"President of the Senate.

"Attest:
"KATHERINE T. ALEXANDER,
"Secretary of the Senate.

"Passed by the house February 14, 1955.
"WENDELL P. KAY,
"Speaker of the House.

"Attest:
"JOHN T. MCLAUGHLIN,
"Chief Clerk of the House.

"Approved by the Governor February 17, 1955.
"B. FRANK HEINTZLEMAN,
"Governor of Alaska."

A resolution of the House of Representatives of the State of Arizona; to the Committee on Interior and Insular Affairs:

"House Memorial 2

"Memorial requesting the Congress of the United States to pass legislation withdrawing all tribal lands of the Papago Indian Reservation except lands previously patented or now subject to valid mining claims, from all forms of mineral entry and location, and directing that the mineral rights in said reservation be held in trust by the United States for lease for mining purposes for the benefit of the Papago Indians on the same terms and conditions as mineral rights are leased in other Indian reservations in Arizona

"To the Congress of the United States:

"Your memorialist respectfully represents:

"The Papago Indian Reservation, created by Executive Order 2524 and extended by statute (46 Stat. 1202), is subject to mineral entry and location under the mining laws of the United States.

"Except for the mining laws of the United States and Arizona, the said right of entry is not subject to any control by the United States or by the Papago Tribe.

"Said right of location has caused hardship to numerous Papago Indians in the past by forcing them to move from their homes and fields and by depriving them of desirable lands and waterholes.

"Due to the great interest of the general public in the possibility of discovering uranium ore on the reservation, there is great fear among the Papago Indians that they will be deprived of their reservation piecemeal by mining claimants.

"The Papago Indian Reservation does not have adequate resources to support the population presently living there and the possibility of substantial mineral discoveries seems the only hope that the reservation can provide an adequate economic base for the Papago people.

"Wherefore your memorialist, the House of Representatives of the State of Arizona prays:

"That the Congress of the United States withdraw all tribal lands of the Papago Indian Reservation, except lands previously patented or now subject to valid mining claims, from all forms of mineral entry and location and directing that the mineral

rights in said reservation be held in trust by the United States for lease for mining purposes for the benefit of the Papago Indians on the same terms and conditions as mineral rights are leased in other Indian reservations in Arizona."

A joint resolution of the Legislature of the State of Alabama; to the Committee on the Judiciary:

"Senate Joint Resolution 23

"Joint resolution memorializing Congress to enact legislation limiting the appellate jurisdiction of the United States Supreme Court and the jurisdiction of other Federal courts

"Whereas Federal courts and more particularly the United States Supreme Court have, through numerous opinions and decisions, invaded the fields of the legislative and executive branches of Government; and

"Whereas through numerous opinions and decisions Federal courts and more particularly the United States Supreme Court have invaded the field of government which should be left to the control of the several States of the Union; and

"Whereas Congress is authorized under the Constitution of the United States to control and limit the appellate jurisdiction of the United States Supreme Court and the jurisdiction of other Federal courts: Now, therefore, be it

"Resolved by the Senate of Alabama (the House of Representatives concurring), That Congress be memorialized to enact legislation limiting the appellate jurisdiction of the United States Supreme Court and the jurisdiction of other Federal courts so that the fields of the government of the executive and legislative branches and that of the several States shall not be invaded, but shall remain separate and distinct; be it further

"Resolved, That copies of this resolution be forwarded to the President of the United States, to each United States Senator from Alabama, each Member of the House of Representatives of Congress from Alabama, the Senate of the United States, and the House of Representatives of the United States."

A joint resolution of the Legislature of the State of Idaho; to the Committee on Public Works:

"Senate Joint Memorial 2

"To the Honorable Senate and House of Representatives of the United States in Congress assembled:

"We, your memorialists, the Legislature of the State of Idaho, respectfully represent, that:

"Whereas the Corps of Engineers issued, on June 23, 1954, a progress report on the Libby project, which project is located on the Kootenai River, which heads in Canada and crosses the Canadian-United States boundary into the State of Montana and from there crosses the Montana-Idaho line at Leona, Idaho, in Boundary County, Idaho, from which point it runs in a westerly direction to Bonners Ferry, Idaho, and then meanders northerly to the Canadian-United States boundary line and back into Canada; and

"Whereas the Libby project recommended in said report would be a multipurpose project, accomplishing the following, among other purposes:

"1. Power: The firm power capability of Libby Dam's at-site generating capacity will be 292,000 kilowatts. However, total firm power production resulting from the stream regulation by Libby Dam will amount to 1,150,000 kilowatts.

"2. Flood-control protection for 70,000 acres of agricultural and stock-raising lands in the Kootenai Flats region between Bonners Ferry, Idaho, and downstream to Kootenay Lake, British Columbia, Canada.

"3. The 95-mile-long reservoir also will provide incidental navigation and recreational benefits; and

"Whereas this power is urgently needed to relieve the power shortage in the region; and

"Whereas the Kootenai Flats area, which includes 36,000 acres in northern Idaho and 34,000 acres in British Columbia, is the victim of almost annual flooding despite levee work and other flood-protection measures and extensive flood-fighting efforts. The emergency became so great in 1954 that the Governor of the State of Idaho called upon the Army and all other available forces for assistance, resulting in mobilization of a flood-fighting force of 1,000 men, 155 dump trucks, 34 bulldozers, and 22 power shovels. This force went to work on a 24-hour basis over the 50-mile reach of the Kootenai River and about 100 miles of levees. A preliminary estimate of the total damage, including the cost of this operation, but not including the damage in Canada, was $1,400,000; and

"Whereas said dam would improve navigation and recreation benefits on said river: Now, therefore, be it

"Resolved by the Senate of the State of Idaho (the House of Representatives concurring), That we most respectfully urge the Congress of the United States of America that the report of the Corps of Engineers be approved, that the project be authorized, and that funds be made available for its construction at the earliest possible date; be it further

"Resolved, That the secretary of state of the State of Idaho be authorized and he is hereby directed to immediately forward certified copies of this memorial to the Senate and the House of Representatives of the United States of America, the Chairman of the United States section, International Joint Commission, and to the Senators and the Representatives in Congress from this State and from the State of Montana.

"The senate joint memorial was adopted by the senate on the 29th day of January 1955.

"CARL D. IRWIN,
"President pro tempore of the Senate.

"This senate joint memorial was adopted by the house of representatives on the 11th day of February 1955.

"R. H. YOUNG., Jr.,
"Speaker of the House of Reprcsentatives.

"I hereby certify that the within Senate Joint Memorial 2 originated in the Senate during the 33d session of the Legislature of the State of Idaho.

"ROBERT H. REMAKLUS,
"Secretary of the Senate."

A joint resolution of the Legislature of the State of New Jersey; to the Committee on Public Works:

"Joint resolution memorializing the Congress of the United States to amend the Hayden-Cartwright Act of 1934 and subsequent Federal aid highway acts to provide for the elimination of provisions which would deprive those States of Federal highway aid which are spending motor-fuel and motor-vehicle tax receipts for nonhighway purposes

"Whereas the State for many years has been contributing to the Federal Government through the Federal gasoline tax substantial amounts in excess of the amounts of Federal highway aid received; and

"Whereas the Federal Government for many years has been diverting to other than highway purposes substantial amounts of highway user revenues collected in New Jersey and the other States; and

"Whereas for these and other reasons it seems presumptuous for the Federal Government to assume the right to deprive New Jersey and other States of the return of their own tax money in the form of aid because they choose to spend their State tax revenues in a manner not approved by the Federal Government: Now, therefore, be it

"Resolved by the Senate and General Assembly of the State of New Jersey:

"1. The Congress of the United States is hereby memorialized to amend the Hayden-Cartwright Act of 1934 and subsequent Federal aid highway acts by providing for the elimination of the provisions under which the Federal Government withholds highway aid from States failing to use at least the amounts provided by law (in 1934) 'from State motor-vehicle registration fees, licenses, gasoline taxes, and other special taxes on motor-vehicle owners and operators of all kinds for the construction, improvement, and maintenance of highways and administrative expenses in connection therewith, including the retirement of bonds for the payment of which such revenues have been pledged, and for no other purposes.'

"2. The Secretary of State is hereby directed forthwith to transmit a copy of this joint resolution, properly authenticated to the President of the United States, to the respective presiding officers of the United States Senate and the House of Representatives and to all of the Senators and Representatives from New Jersey in the Congress.

"3. This joint resolution shall take effect immediately."

A resolution adopted by the Yucaipa Valley Real Estate Board, California County, Calif., relating to the processing of FHA applications in that area; to the Committee on Appropriations.

A resolution adopted by the City Council of the City of Anchorage, Alaska, favoring the enactment of legislation to provide statehood for Alaska; to the Committee on Interior and Insular Affairs.

A resolution adopted by the Board of Supervisors of San Diego County, Calif., endorsing Joint Resolution No. 3 adopted by the California legislature, relating to the cooperation of the Federal Government with the celebration of the centennials of the opening of the Pacific Overland Mail (with an accompanying paper); to the Committee on the Judiciary.

Petitions signed by William D. Holland and sundry other citizens of the State of New York, favoring the enactment of Senate Joint Resolution 1, relative to treaties and other international agreements; to the Committee on the Judiciary.

A resolution adopted by Morning Star Council 294, the Knights of Columbus, Brooklyn, N. Y., favoring the enactment of Senate joint resolution 1, relating to the treaty-making power; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina:

A concurrent resolution of the Legislature of the State of South Carolina; to the Committee on Agriculture and Forestry:

"Concurrent resolution memorializing Congress to extend the emergency drought relief feed program

"Whereas the beef and dairy section of the South has suffered a long period of drought; and

"Whereas the severe freezing weather recently experienced, combined with the drought, has generally retarded the growth of grain crops and in many instances completely destroyed winter pastures: Now, therefore, be it

"Resolved by the house of representatives (the senate concurring), That Congress is memorialized to extend the emergency drought-relief-feed program for at least 60 days beyond the expiration date now provided; be it

"Resolved, That copies of this resolution be furnished to each of the United States Senators from South Carolina and each Member of the House of Representatives of the United States from South Carolina and to the clerk of the United States Senate and House of Representatives."

(The PRESIDENT pro tempore laid before the Senate a concurrent resolution of the Legislature of the State of South Carolina, identical with the foregoing, which was referred to the Committee on Agriculture and Forestry.)

A concurrent resolution of the Legislature of the State of South Carolina; to the Committee on Appropriations:

"Concurrent resolution memorializing South Carolina's Members in Congress to take whatever action is appropriate or necessary to obtain Federal funds for a survey of the possibilities and practicability of irrigation and drainage in South Carolina

"Whereas farmers and all agricultural agencies are actively participating in a long-range farm program for the betterment of the country, of agriculture, and of the people as a whole; and

"Whereas in a number of States the normal waterfall is not sufficient to provide productive lands; and

"Whereas the economy of South Carolina is basically agricultural; and

"Whereas droughts of recent years have brought great losses to the farmers of this State; and

"Whereas in South Carolina there are often times when the water supply is not normal and, though there may be sufficient total rainfall, it is not certain during the times when needed most; and

"Whereas under modern farming procedures, localities that have resorted to irrigation have succeeded in producing substantial gains in crops and have made certain the time of harvest; and

"Whereas there is a trend toward irrigation in many localities all over the State: Now, therefore, be it

"Resolved by the house of representatives (the senate concurring), That the two United States Senators and the Members of the House of Representatives of the Congress of the United States from South Carolina be memorialized to take whatever action is appropriate or necessary to obtain Federal funds for a survey of the possibilities and practicability of irrigation and drainage in South Carolina; be it further

"Resolved, That a copy of this resolution be sent to each of the United States Senators and each Member of the United States House of Representatives from South Carolina."

EDUCATIONAL BENEFITS TO CHILDREN OF CERTAIN EX-MEMBERS OF THE ARMED FORCES—RESOLUTIONS OF GENERAL COURT OF MASSACHUSETTS

Mr. SALTONSTALL. Mr. President, on behalf of my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], and myself, I present for appropriate reference, and ask unanimous consent to have printed in the RECORD, resolutions of the General Court of the Commonwealth of Massachusetts, relative to the granting of educational benefits to children of members of the Armed Forces killed in combat during World War II, and in Korea.

The PRESIDENT pro tempore. The resolutions will be received and appropriately referred; and, under the rule, will be printed in the RECORD.

The resolutions were referred to the Committee on Labor and Public Welfare, as follows:

Resolutions memorializing Congress to pass legislation granting educational benefits to children of members of the Armed Forces killed in combat during World War II and in Korea

Whereas there is now pending before the Congress of the United States a bill to grant educational benefits to children of members of the Armed Forces killed in combat during World War II and in Korea; and

Whereas approximately 100,000 children in the United States are now likely to be deprived of the advantages of an education or livelihood that would have been theirs had they been provided for by their fathers: Now, therefore, be it

Resolved, That the house of representatives of the General Court of Massachusetts respectfully urges the Congress of the United States to enact into law such proposed legislation; and be it further

Resolved, That copies of these resolutions be sent forthwith by the secretary of state to the President of the United States, to the presiding officer of each branch of the Congress, and to each of the Members thereof from this Commonwealth.

The PRESIDENT pro tempore laid before the Senate resolutions of the General Court of the Commonwealth of Massachusetts, identical with the foregoing, which were referred to the Committee on Labor and Public Welfare.

REPORTS OF COMMITTEE ON THE JUDICIARY

The following reports of a committee were submitted:

By Mr. KILGORE, from the Committee on the Judiciary:

S. Res. 58. Resolution to further increase the limit of expenditures under Senate Resolution 366, 81st Congress, relating to the internal security of the United States; with an amendment (Rept. No. 34); and, under the rule, the resolution was referred to the Committee on Rules and Administration.

Mr. KILGORE. Mr. President, from the Committee on the Judiciary, I report favorably seven original resolutions. I ask unanimous consent that they be immediately referred to the Committee on Rules and Administration so that that committee may take action upon them, rather than to have them lie over a day on the calendar, as normally required.

There being no objection, the resolutions were referred to the Committee on Rules and Administration, as follows:

S. Res. 61. Resolution authorizing a study of the antitrust laws of the United States, and their administration, interpretation, and effect (Rept. No. 35).

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the Committee on the Judiciary to make a complete and comprehensive study and investigation of the antitrust laws of the United States and their administration, interpretation, operation, enforcement, and effect, and to determine the nature and extent of any legislation which may be necessary or desirable to—

(a) clarify existing statutory enactments, and eliminate any conflicts which may exist among the several statutes comprising such laws;

(b) rectify any misapplications and misinterpretations of such laws which may have developed in the administration thereof;

(c) supplement such statutes to provide any additional substantive, procedural, or organizational legislation which may be needed for the attainment of the fundamental objects of such statutes; and

(d) improve the administration and enforcement of such statutes, the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $250,000, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

SEC. 3. This resolution shall be effective as of March 1, 1955.

S. Res. 62. Resolution to study juvenile delinquency in the United States.

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the Committee on the Judiciary under Senate Resolution 89 of the 83d Congress to conduct a full and complete study of juvenile delinquency in the United States, including (a) the extent and character of juvenile delinquency in the United States and its causes and contributing factors, (b) the adequacy of existing provisions of law, including chapters 402 and 403 of title 18 of the United States Code, in dealing with youthful offenders of Federal laws, (c) sentences imposed on, or other correctional action taken with respect to, youthful offenders by Federal courts, and (d) the extent to which juveniles are violating Federal laws relating to the sale or use of narcotics, the Subcommittee To Study Juvenile Delinquency in the United States is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $154,000, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

SEC. 3. This resolution shall be effective as of March 1, 1955.

S. Res. 63. Resolution providing funds for an examination and review of the administration of the Trading With the Enemy Act.

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the Committee on the Judiciary under Senate Resolution 245 of the Eighty-second Congress to conduct a full and complete examination and review of the administration of the Trading With the Enemy Act, the Committee on the Judiciary is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $58,500 shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

S. Res. 64. Resolution extending the authority to investigate problems connected with emigration of refugees from Western European nations.

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate insofar as they relate to the authority of the Committee on the Judiciary under Senate Resolution 326 of the Eighty-second Congress to conduct a thorough and complete study, survey, and investigation of the problems in certain Western European nations created by the flow of escapees and refugees from Communist tyranny, the Subcommittee To Investigate Problems Connected With Emigration of Refugees and Escapees is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $36,500, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

SEC. 3. This resolution shall be effective as of March 1, 1955.

S. Res. 65. Resolution to authorize an investigation of national penitentiaries.

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946, and in accordance with its jurisdictions specified by rule XXV of the Standing Rules of the Senate, insofar as they relate to national penitentiaries, the Committee on the Judiciary, or the standing Subcommittee on National Penitentiaries, is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $13,600 shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

S. Res. 66. Resolution to provide additional funds for the Committee on the Judiciary.

Resolved, That in holding hearings, reporting such hearings, and making investigations as authorized by subsection (k) of rule XXV of the Standing Rules of the Senate, or by section 134 (a) of the Legislative Reorganization Act of 1946, insofar as they relate to the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized during the period beginning on March 1, 1955, and ending on January 31, 1956, to make such expenditures, and to employ upon a temporary basis such investigators, and such technical, clerical, and other assistance, as it deems advisable.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $102,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

S. Res. 67. Resolution to authorize a study of the narcotics problem in the United States.

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized and directed to conduct a full and complete study of the narcotics problem in the United States, including ways and means of improving the Federal Criminal Code and other laws and enforcement procedures dealing with the possession, sale, and transportation of narcotics, marihuana, and similar drugs. In the conduct of such investigation special attention shall be given to (1) the extent, cause, and effect of unlawful uses of narcotics and marihuana in the United States, (2) the adequacy, administration, operation, and enforcement of existing laws relating thereto, and (3) the additions and changes which should be made in the laws and enforcement procedures to prevent illicit possession, sale, transportation, and use of narcotic drugs and marihuana, and to combat the increasing narcotic addiction in the United States.

SEC. 2. The committee, or any duly authorized subcommittee thereof, is authorized to sit and act at such places and times during the sessions, recesses, and adjourned periods of the Senate, to hold such hearings, to require by subpenas or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to procure such printing and binding, as it deems advisable. The cost of stenographic services to report hearings of the committee or subcommittee shall not be in excess of 40 cents per hundred words. Subpenas shall be issued by the chairman of the committee or the subcommittee, and may be served by any person designated by such chairman.

A majority of the members of the committee, or duly authorized subcommittee thereof, shall constitute a quorum for the transaction of business, except that a lesser number to be fixed by the committee, or by such subcommittee, shall constitute a quorum for the purpose of administering oaths and taking sworn testimony.

SEC. 3. The committee shall report its findings, together with its recommendations for such legislation as it deems advisable, to the Senate at the earliest date practicable but not later than January 31, 1956.

SEC. 4. For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 5. The expenses of the committee under this resolution, which shall not exceed $30,000, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

SEC. 6. This resolution shall be effective as of March 1, 1955.

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON of South Carolina, from the Joint Select Committee on the Disposition of Executive Papers, to which was referred for examination and recommendation a list of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. THYE:

S. 1123. A bill to make unlawful certain commercial dealing in minor children; to the Committee on the Judiciary.

By Mr. MARTIN of Pennsylvania:

S. 1124. A bill to establish separate rates of excise tax on automotive glass; to the Committee on Finance.

S. 1125. A bill for the relief of Stephen Fodo; and

S. 1126. A bill for the relief of Dimitrios Antoniou Kostalas; to the Committee on the Judiciary.

S. 1127 (by request). A bill to amend the Fair Labor Standards Act of 1938, as amended; to the Committee on Labor and Public Welfare.

By Mr. ELLENDER:

S. 1128. A bill for the relief of Angel Castanedo Del Llano; to the Committee on the Judiciary.

By Mr. BARKLEY:

S. 1129. A bill for the relief of Isako Hardin (nee Shirayama); to the Committee on the Judiciary.

By Mr. MCNAMARA:

S. 1130. A bill for the relief of Theresa Yik Mun Woo; to the Committee on the Judiciary.

By Mr. DUFF:

S. 1131. A bill for the relief of Taufic Abdaliah Joudeh Khalaf; and

S. 1132. A bill for the relief of Rosario Troia; to the Committee on the Judiciary.

By Mr. HICKENLOOPER (for himself and Mr. MARTIN of Iowa):

S. 1133. A bill to authorize the Secretary of Agriculture to pay indemnity for losses and expenses incurred during July 1954 in the destruction, treatment or processing, under authority of law, of swine, swine carcasses and products derived from swine carcasses, infected with vesicular exanthema; to the Committee on Agriculture and Forestry.

By Mr. MURRAY:

S. 1134. A bill for the relief of Florence E. McConnell; to the Committee on the Judiciary.

By Mr. RUSSELL (for himself and Mr. SALTONSTALL) (by request):

S. 1135. A bill to amend the act entitled "An act to establish Civil Air Patrol as a civilian auxiliary of the United States Air Force and to authorize the Secretary of the Air Force to extend aid to Civil Air Patrol in the fulfillment of its objectives, and for other purposes;

S. 1136. A bill to authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes;

S. 1137. A bill to extend the authority for the enlistment of aliens in the Regular Army;

S. 1138. A bill to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), as amended, providing certain construction and other authority; and

S. 1139. A bill to extend the existing authority for the loan of a small aircraft carrier to the Government of France; to the Committee on Armed Services.

(See the remarks of Mr. RUSSELL when he introduced the above bills, which appear under a separate heading.)

By Mr. KNOWLAND:

S. 1140. A bill for the relief of Heui Sik Min and his wife Mary Pu Keui Min and their children David Pyong Wha Min, Susan Pyong Soon Min, Sally Pyong Yun Min,

George Pyong Yu Min, William Pyong Soo Min, and daughter-in-law Gloria Yong Hiu Min; to the Committee on the Judiciary.

By Mr. BUTLER:

S. 1141. A bill for the relief of Mrs. Marjorie E. Taylor; to the Committee on Armed Service.

S. 1142. A bill for the relief of Arthur Sew Sang, Kee Yin Sew Wong, Sew Ing Lin, Sew Ing Quay, and Sew Ing You; and

S. 1143. A bill for the relief of Arthur K. Jefferson; to the Committee on the Judiciary.

By Mr. JACKSON:

S. 1144. A bill for the relief of Carl O. Eck; to the Committee on the Judiciary.

By Mr. BUSH:

S. 1145. A bill for the relief of Thomas Marfoe (also known as Tao-Wen Ma); to the Committee on the Judiciary.

By Mr. DIRKSEN:

S. 1146. A bill to further amend section 20 of the Trading With the Enemy Act relating to fees of agents, attorneys, and representatives; and

S. 1147. A bill to amend the Trading With the Enemy Act relating to debt claims; to the Committee on the Judiciary.

By Mr. KNOWLAND (for Mr. BENDER):

S. 1148. A bill for the relief of Frank B. James; to the Committee on the Judiciary.

By Mr. WATKINS:

S. 1149. A bill to permit the mining, development, and utilization of the mineral resources of all public lands withdrawn or reserved for power development, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1150. A bill to include persons engaged in carrying out the provisions of labor laws of the United States within the provisions of sections 111 and 1114 of title 18 of the United States Code, relating to assaults and homicides; to the Committee on the Judiciary.

By Mr. WATKINS (for himself, Mr. CASE of New Jersey, Mrs. SMITH of Maine, Mr. IVES, Mr. DUFF, and Mr. ALLOTT):

S. 1151. A bill to make the employment, and related practices, of any alien known by an employer to have entered the United States illegally within 3 years thereof unlawful, and for other purposes; and

S. 1152. A bill to provide for the seizure and forfeiture of any vessel or vehicle used in the transportation of any alien known by the owner thereof to have entered the United States illegally within 3 years thereof, and for other purposes; to the Committee on the Judiciary.

By Mr. JOHNSTON of South Carolina:

S. 1153. A bill to amend the Civil Service Retirement Act; to the Committee on Post Office and Civil Service.

By Mr. MAGNUSON:

S. 1154. A bill for the relief of Hal A. Marchant; and

S. 1155. A bill for the relief of Iva Druzianich (Iva Druzianic); to the Committee on the Judiciary.

S. 1156. A bill to relieve States, subdivisions and instrumentalities thereof, and certain educational institutions of liability to the United States for the value of certain aircraft acquired by them under the Surplus Property Act of 1944, as amended, and for other purposes; to the Committee on Government Operations.

S. 1157. A bill to terminate the withholding of Oregon State income tax from the wages of certain residents of the State of Washington who are employed by the Corps of Engineers at Bonneville Dam; to the Committee on Finance.

By Mr. CASE of New Jersey:

S. 1158. A bill for the relief of Joseph S. Aldridge; to the Committee on the Judiciary.

By Mr. CHAVEZ:

S. J. Res. 48. Joint resolution to provide for the establishment of a United States Women's Armed Services Academy, and for other purposes; to the Committee on Armed Services.

(See the remarks of Mr. CHAVEZ when he introduced the above joint resolution, which appear under a separate heading.)

By Mr. MANSFIELD:

S. J. Res. 49. Joint resolution to amend the joint resolution entitled "Joint resolution to provide for the adjudication by a commissioner of claims of American nationals against the Government of the Union of Soviet Socialist Republics," approved August 4, 1939; to the Committee on Foreign Relations.

PROPOSED LEGISLATION FOR THE ARMED FORCES

Mr. RUSSELL. Mr. President, on behalf of myself, and the Senator from Massachusetts [Mr. SALTONSTALL], by request, I introduce, for appropriate reference, five bills relating to proposed legislation for the armed services. Each of these bills is requested by the Department of Defense and is accompanied by a letter of transmittal from the appropriate military department explaining the purpose of the bill. I ask that the letters of transmittal be printed in the RECORD immediately following the listing of the bills.

The PRESIDENT pro tempore. The bills will be received and appropriately referred; and, without objection, the letters of transmittal will be printed in the RECORD.

The bills introduced by Mr. RUSSELL (for himself and Mr. SALTONSTALL) (by request), were received, read twice by their titles, and referred to the Committee on Armed Services, as follows:

S. 1135. A bill to amend the act entitled "An act to establish Civil Air Patrol as a civilian auxiliary of the United States Air Force and to authorize the Secretary of the Air Force to extend aid to Civil Air Patrol in the fulfillment of its objectives, and for other purposes."

(The letter accompanying Senate bill 1135 is as follows:)

DEPARTMENT OF THE AIR FORCE,
Washington, February 4, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There are forwarded herewith a draft of legislation to amend the act entitled "An act to establish Civil Air Patrol as a civilian auxiliary of the United States Air Force and to authorize the Secretary of the Air Force to extend aid to Civil Air Patrol in the fulfillment of its its objectives, and for other purposes," and a sectional analysis thereof.

This proposal is part of the Department of Defense legislative program for 1955 and the Bureau of the Budget has advised that there would be no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Air Force has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

This legislative proposal would amend the act of May 26, 1948 (62 Stat. 274), establishing a Civil Air Patrol. It would provide disability benefits for volunteer civilian members of the Civil Air Patrol, other than Civil Air Patrol cadets, who have incurred injuries or disabilities, including those resulting in death, while on active service in the performance or support of operational missions of the Civil Patrol, by extending to them the benefits of the Federal Employees' Compensation Act.

The benefits of the proposed bill are appropriately restricted. The term "performance of duty" for service rendered prior to the date of enactment of the proposal is specifically limited to active service, and travel to and from such service, rendered in performance or support of operational missions of the Civil Air Patrol, under direction of the Office of Civilian Defense, the Department of the Army (War), including the Army Air Forces, or the Department of the Air Force.

For service rendered on or subsequent to the date of enactment of the proposed bill, the term "performance of duty" is specifically limited to active service, and travel to and from such service, rendered in performance or support of operational missions of the Civil Air Patrol, under direction of the Department of the Air Force, and under written authorization by competent authority covering a specific assignment and prescribing a time limit for such assignment.

During World War II, members of the Civil Air Patrol, under the direction of the Commanding General, Army Air Forces, performed invaluable services in the accomplishment of coastal patrol, liaison patrol, military courier service, and tow-target and tracking duties for antiaircraft-gunnery training. Civil Air Patrol operation during that period is illustrated by the fact that, incident to coastal patrol activities, nearly a quarter-million hours were flown; 363 survivors were reported; 91 vessels were reported in distress; and 173 submarines were located and reported. Apart from the payment of expenses for the use of privately owned aircraft and a small subsistence allowance, no emoluments were received by individuals for their services as active members of the Civil Air Patrol.

The proposed bill specifically provides that nothing contained therein shall be construed to confer military or veteran status upon any person.

LEGISLATIVE REFERENCES

This proposal was submitted to the 83d Congress on January 5, 1953, as part of the Department of Defense legislative program for 1953. It was introduced in the House of Representatives as H. R. 2275 on January 29, 1953, and in the Senate as S. 2279 on July 2, 1953.

COST AND BUDGET DATA

This proposal would cause no increase in budgetary requirements for the Department of Defense.

Sincerely yours,

HAROLD E. TALBOTT.

SECTIONAL ANALYSIS OF A BILL TO AMEND THE ACT ENTITLED "AN ACT TO ESTABLISH CIVIL AIR PATROL AS A CIVILIAN AUXILIARY OF THE UNITED STATES AIR FORCE AND TO AUTHORIZE THE SECRETARY OF THE AIR FORCE TO EXTEND AID TO CIVIL AIR PATROL IN THE FULFILLMENT OF ITS OBJECTIVES, AND FOR OTHER PURPOSES"

Section 1 amends the act of May 26, 1948 (62 Stat. 274), establishing the Civil Air Patrol by adding thereto new sections 3 and 4, for the purpose of providing disability benefits for members of the Civil Air Patrol who have incurred injuries or disabilities, including those resulting in death, while on active service in the performance or support of operational missions of the Civil Air Patrol.

Section 3 (a) would provide that members of the Civil Air Patrol, except Civil Air Patrol

cadets, shall, for the purpose of the administration of the Federal Employees' Compensation Act, be deemed to be civilian employees of the United States.

Section 3 (b) would provide that in the administration of the Federal Employees' Compensation Act the monthly pay of such members, for the purpose of computing compensation for disability or death, shall be deemed to be $300, and that the term "performance of duty" shall mean only active service rendered in performance or support of operational missions of the Civil Air Patrol.

Section 3 (c) would provide that the Secretary of the Air Force or his designee shall advise, if so requested, the Secretary of Labor concerning the facts with respect to claims filed with the Secretary of Labor.

Section 3 (d) makes the provisions of the new section 3 applicable as of May 20, 1941; however, no benefits would accrue or be payable in any case for any period prior to the date of this act, except medical or other expenses as authorized by sections 9 and 11 of the Federal Employees' Compensation Act. This subsection terminates the entitlement to benefits now being extended to members of the Civil Air Patrol and their dependents coincident with the enactment of this act.

Section 4 would specify that the act does not confer military or veteran status upon any person.

S. 1136. A bill to authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes.

(The letter accompanying Senate bill 1136 is as follows:)

DEPARTMENT OF THE ARMY,
Washington, D. C., January 7, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation, "To authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes."

This proposal is part of the Department of Defense legislative program for 1955 and the Bureau of the Budget has advised that it has no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Army has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

The purpose of the proposed legislation is to authorize the Secretary of Defense and the Secretaries of the military departments to reproduce, rent, sell, or otherwise dispose of, to interested persons, concerns, and institutions, copies of the official records of the department concerned, including but not limited to, papers, miscellaneous documents, books, photographs, lantern slides, motion picture films, and sound reproductions, consistent with national security under regulations promulgated with the approval of the Secretary of Defense, and at such prices and fees (not less than the estimated cost of furnishing copies of such reproductions) as may be prescribed under such regulations. The proceeds of such transactions would be deposited in the Treasury of the United States as miscellaneous receipts, and would not be withdrawn or reapplied except in consequence of a subsequent appropriation made by law.

The military departments of the Department of Defense accumulated during World War II a large number of technical and scientific documents, aerial and other photographs, motion pictures, sound reproductions, recordings, and other allied publications, many of which are of educational and historical value. A considerable number of requests have been received from private persons and concerns, and from educational and other institutions, for copies of such material.

It is believed to be in the public interest to permit the Secretary of Defense and the Secretaries of the military departments to comply with such requests from sources whose requirements are legitimate when such compliance would be consistent with national security. Furthermore, the sale of such material would provide a basis for securing similar material and information in the possession of others.

LEGISLATIVE REFERENCES

Authority similar to that requested herein was granted the Director of the United States Geological Survey by Public Law 206, 80th Congress. However, the Secretary of Defense and the Secretaries of the military departments have not been authorized by the Congress to engage in the sale of such material, although the Departments of the Army and the Air Force have sold copies of still pictures and motion picture film pursuant to directions issued in 1918 by the Secretary of War. The Department of Defense sponsored a similar proposal in the 83d Congress (H. R. 2319). That bill passed the House of Representatives on May 19, 1953, with minor amendments but no further action was taken. The enclosed draft of bill is identical with H. R. 2319 as passed by the House of Representatives.

COST AND BUDGET DATA

The enactment of this proposal will cause no apparent increase in the budgetary requirements for the Department of Defense.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

FEBRUARY 11, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: Reference is made to a draft of legislation, "To authorize the Secretary of Defense and the Secretaries of the Army, the Navy, and the Air Force to reproduce and to sell copies of official records of their respective departments, and for other purposes," submitted to the Congress on January 7, 1955 as a part of the Department of Defense legislative program for 1955.

In order to preclude the objection previously made by the Joint Committee on Printing, it is requested that the proposal be amended by the addition of a second section as follows:

"SEC. 2. Nothing contained in this act shall alter, amend, repeal, or otherwise affect the provisions of any law relating to the public printing and binding and the distribution of Government publications."

The contents of this letter have been coordinated in accordance with procedures prescribed by the Secretary of Defense and the Department of the Army has been advised by the Bureau of the Budget that it has no objection to the proposed section 2 for subject proposal as set forth above.

It is requested that the Congress consider the proposed legislation as amended by this letter.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

S. 1137. A bill to extend the authority for the enlistment of aliens in the Regular Army.

(The letter accompanying Senate bill 1137 is as follows:)

DEPARTMENT OF THE ARMY,
Washington, D. C., February 2, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation to extend the authority for the enlistment of aliens in the Regular Army.

This proposal is a part of the Department of Defense legislative program for 1955 and the Bureau of the Budget has advised that there would be no objection to the presentation of this proposal for the consideration of the Congress. The Department of the Army has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

This proposed legislation would extend until June 30, 1957, the authority to enlist aliens in the Regular Army pursuant to the provisions of the act of June 30, 1950 (ch. 443, 64 Stat. 316), as amended (10 U. S. C. 631c). Under existing law, that authority will expire on June 30, 1955. The act of June 30, 1950, authorizes the acceptance of original enlistments or reenlistments, not to exceed 12,500 in number, in the Regular Army of qualified unmarried male aliens between the ages of 18 and 35. An original enlistment is for a period of not less than 5 years and aliens so enlisted must be integrated into established units with citizen soldiers. In addition, aliens enlisted or reenlisted under the act of June 30, 1950, as amended, who subsequently enter the United States, American Samoa, Swains Island, or the Canal Zone, pursuant to military orders, and who are honorably discharged after completing 5 years of service, if otherwise qualified for citizenship, are deemed to have been lawfully admitted to the United States for permanent residence within the meaning of section 329 (a) of the Immigration and Nationality Act.

The extension of the authority to enlist qualified male aliens is desirable because it enables the Army to secure certain skilled personnel with special knowledge to fill positions for which citizen soldiers are not normally available. The Army has a continuing need for persons with extensive knowledge of foreign languages and local conditions. From both a planning and a tactical viewpoint, it would be of incalculable value when preparing for or carrying out a mission in a foreign country to have trained men familiar not only with the language of the area, but more important, with the customs of the people, their temperament and frame of mind, and geographical and other local conditions. Inasmuch as few native Americans possess such knowledge, the best available source of supply of such persons having these special qualifications are aliens who desire consideration for United States citizenship and who are willing to enlist in our Army for a period of 5 years or more in order to gain the opportunity to qualify for citizenship.

The proposed legislation would also permit the Army to enlist and utilize the services of alien specialists within technical fields, such as electronics. In addition, it would provide authority for the procurement of a small number of selected individuals of officer caliber with a long future potential to the Army.

While the Department of the Navy and the Air Force have indicated that they concur in the proposed legislation as it relates to the Department of the Army, they have no apparent need for such authority at this time and, accordingly, do not desire to be included within the provisions of the proposed legislation.

Although information relating to the number of aliens now serving in the Regular Army under the authority of this legislation and other aspects of the program is classified, the Department of Defense will, upon request, furnish additional information during closed congressional hearings on the proposed legislation.

COST AND BUDGET DATA

The enactment of this proposal will cause no apparent increase in the budgetary requirements for the Department of Defense.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

S. 1138. A bill to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), as amended, providing certain construction and other authority.

(The letter accompanying Senate bill 1138 is as follows:)

DEPARTMENT OF THE ARMY,
Washington, D. C., February 2, 1955.

Hon. RICHARD M. NIXON,
President of the Senate.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation to continue the effectiveness of the act of July 17, 1953 (67 Stat. 177), as amended.

This proposal is a part of the Department of Defense legislative program for 1955, and the Bureau of the Budget has advised that there would be no objection to its transmittal to the Congress for consideration. The Department of the Army has been designated as the representative of the Department of Defense for this legislation. It is recommended that this legislation be enacted by the Congress.

PURPOSE OF THE LEGISLATION

The proposed legislation would provide continuing statutory authority for the Secretaries of the Army, the Navy, and the Air Force to expand and maintain productive capacity in Government-owned and privately owned plants in order to meet current or mobilization military production requirements, with ownership remaining in the Government for those facilities placed in privately owned plants. The present authority for these purposes is contained in the act of July 17, 1953 (Public Law 130, 83d Cong.; 67 Stat. 177), as amended and extended (Public Law 523, 83d Cong.; 68 Stat. 531), which authority expires not later than July 1, 1955. This proposal would extend the duration of the effectiveness of its provisions until 6 months after the termination of the national emergency proclaimed by the President on December 16, 1950, or until such time as may be specified by concurrent resolution of the Congress, or until July 1, 1956, whichever is the earliest.

The present world situation is similar in many respects to that which led to the request of this Department for and the enactment of the act of July 17, 1953, in that it is still considered necessary that there be authority to meet requirements for rapid construction or expansion of production facilities needed to alleviate emergency production shortages which arise under conditions of urgent requirements for end items necessary for defense purposes. The act of July 17, 1953, itself was, to a large extent, a continuation of authority to expedite military production granted by statutes enacted shortly before and during World War II.

As was stated in connection with the request for enactment of the act of July 17, 1953, under normal peacetime conditions, the construction, conversion, or expansion of facilities for the procurement of military items is reduced to a minimum and limited to specific items which may be required during such peacetime periods. Peacetime authority of the military departments is not sufficiently broad to provide facilities that will be needed when an emergency occurs, nor is there any peacetime authority available to the departments for assisting the expansion of privately owned productive capacity for an emergency. Expansion of both Government-owned and privately owned plants became immediately necessary in the emergencies that occurred prior to World War II and with the advent of the Korean conflict.

In the case of construction at military installations, it has been the practice periodically to obtain specific authorizing legislation for known needs. This procedure is clearly not feasible in the case of construction or expansion of plants needed to alleviate unforeseen shortages in defense production. It is not possible to foresee and predict accurately the need for specific authorizing legislation. During World War II and the Korean conflict, authority similar to that contained in the act of July 17, 1953, proved to be of inestimable value for the rapid expansion of productive capacity by the construction of Government-owned and expansion of privately owned plants.

Under the existing international situation, the present emergency may become acute at any time without warning. In such an eventuality, time would be a large and very significant factor in the expansion of urgently needed productive capacity. It is believed that continued statutory authority for a rapid expansion of productive capacity is important to the timely satisfaction of the needs of the military departments for vital supplies. This proposal would continue not only the authority with respect to facilities required for current defense production but also to facilities intended for mobilization reserve purposes. The reserve capacity to be provided will be for essential military items requiring a long-lead production time. In the event of the full mobilization, a lack of adequate productive capacity for such items would create a serious bottleneck.

Authority to maintain production facilities on a standby basis at or near the location planned to be used for production purposes in the event of further emergency continues to be increasingly important as the immediate need for current production decreases. By arranging with contractors for storage and/or maintenance of production facilities at or near the plant site, and by leasing facilities in place to contractors in return for their undertakings to maintain and preserve the leased property or other production facilities as part or all of the consideration of the lease, the services can assure that such facilities will be available as quickly as possible for actual production in the event of a future emergency.

Continuation of the act of July 17, 1953, is considered to be extremely important to the Department of Defense in carrying out its responsibilities.

COST AND BUDGET DATA

This proposal would cause no apparent increase in budgetary requirements insofar as the Department of Defense is concerned.

Sincerely yours,

ROBERT T. STEVENS,
Secretary of the Army.

S. 1139. A bill to extend the existing authority for the loan of a small aircraft carrier to the Government of France.

(The letter accompanying Senate bill 1139 is as follows:)

DEPARTMENT OF THE NAVY,
Washington, D. C., February 9, 1955.

Hon. RICHARD M. NIXON,
President of the Senate,
United States Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: There is enclosed a draft of proposed legislation to extend the existing authority for the loan of a small aircraft carrier to the Government of France.

This proposal is part of the Department of Defense legislative program for 1955 and the Bureau of the Budget has advised that the proposal is in accordance with the program of the President. The Department of the Navy has been designated as the representative of the Department of Defense for this legislation. It is recommended that this proposal be enacted by the Congress.

PURPOSE OF THE LEGISLATION

The purpose of the proposed legislation is to obtain specific legislative authority for the continuance of the loan of the small aircraft carrier *Bois Belleau* (formerly the U. S. S. *Belleau Wood*) to the Government of France. Transfer of this vessel was effected under the act of August 5, 1953 (67 Stat. 363), which authorized the President to loan a small aircraft carrier to the Government of France "until 6 months after the cessation of hostilities in Indochina, as determined by the President, or 5 years after the date of this act, whichever is earlier."

Although no definite proclamation has been made by the President relative to the cessation of hostilities in Indochina for purposes of this act, various official statements have been made by the United States which recognize that the hostilities have in fact ceased. It is therefore considered desirable to obtain a clear-cut legislative authorization for the extension of this loan.

The Government of France has formally requested a continuance of this loan. The Department of the Navy is of the opinion that the loan is in the best interests of the United States. The proposal is drafted with the purpose of creating a new loan authority until June 30, 1958. If this authority is granted, the old loan agreement will be replaced by a loan agreement which more accurately reflects the needs and requirements of the present world situation. Inasmuch as the details of this proposal are, for security reasons, classified, this Department will furnish witnesses upon request who will be prepared to discuss further aspects of this proposal before the appropriate committees in executive session.

COST AND BUDGET DATA

The enactment of this proposed legislation would cause no apparent increase in budgetary requirements.

Sincerely yours,

C. S. THOMAS.

UNITED STATES WOMEN'S ARMED SERVICES ACADEMY

Mr. CHAVEZ. Mr. President, I introduce, for appropriate reference, a joint resolution to provide for the establishment of a United States Women's Armed Services Academy, and for other purposes. I have prepared a statement in explanation of the joint resolution. In view of the fact that we are now proceeding under a time limitation, in connection with the morning hour, I ask unanimous consent that my statement be printed in the RECORD, instead of being delivered by me at this time.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The joint resolution (S. J. Res. 48) to provide for the establishment of a United States Women's Armed Services Academy, and for other purposes, introduced by Mr. CHAVEZ, was received, read twice by its title, and referred to the Committee on Armed Services.

The statement presented by Mr. CHAVEZ is as follows:

STATEMENT BY SENATOR CHAVEZ

In connection with the joint resolution I have introduced, it would seem to be in order to say just a little about the background and the history of participation by American womanhood in the defense of our country and to give a résumé, also, of the

purposes and objectives sought to be accomplished by the proposed legislation.

On May 31, 1945, there were in the armed services a total of women, including nurses, of 266,184, of whom nurses numbered 67,507 and other categories totaled 198,677. Of the latter, 15,193 were officers, and 183,484 were enlisted personnel.

How did it happen that these large numbers of young women were wearing the honored uniforms of soldiers, sailors, and marines?

The answer lies in two factors. The first is the spontaneous patriotism of our womanhood. Women yield nothing to men in that direction. Always and always and always, American women have stood with their men in all things contributing to the welfare and security of our country. The recital of their offerings upon the altar of Americanism would comprehend all our history, from the hazards of pioneer days, with their Indian conflicts, down through the saga of the Revolution highlighted by the personal participation in battle by Molly Pitcher and Deborah Sampson, and thence through the ever-widening vistas of the industrial advances in more peaceful eras.

The second factor is opportunity. As technological progress has made its way not only in the peaceful pursuits of office and warehouse and factory, it has likewise had its impact in the fields of war.

Time once was when actual warfare involved combat which was localized and limited to men engaged in actual fighting, opposing forces within plain view and using weapons of comparatively short range and often under individual control. This made matters of service and supply routine and simple.

Today, we have scientific and total war, where even the fighting men may not see the enemy, where instruments of most intricate character and design are fabricated for purposes of wholesale destruction, and where the service and supply of the Armed Forces involve a host of undertakings, far removed from actual scenes of battle. Aside from, but directly contributing to the conduct of battle, are matters of intelligence, finance, accounting, transport, photography, mapping, and maintenance, to mention but a few of the activities that affect the actual conduct of war in the field. Women have already proven their competence and desire to make their contributions in these and many other fields. Some conception of the magnitude of the areas open to women may be had from the fact that in the Army alone, as of now, WAC officers are assigned to no less than 140 categories of officer positions. In other words, granted the opportunity for service, our women have proven eager to accept it.

Up to the outbreak of World War II, nursing and office typing marked the extent of the official possibilities for women to serve in war and defense. With the advent of total war and the enhancement of opportunities for service, the Navy, the Army, the Marines and the Air Force, in somewhat that order, set up training schools for officers in order to satisfy the critical demand for women capable of the leadership so sorely needed in wartime. A superb job was done, although at times the methods employed savored of improvisation.

In recognition of past contributions and future needs, in 1947 there was introduced a bill (S. 1641) to integrate women permanently into the armed services. In connection with the bill, which became law on June 12, 1948, the Senate received a report from the Committee on Armed Services in which are found the following significant statements:

"The hearings developed the fact that it is highly desirable that the experience gained in World War II in the utilization of women in the armed services be preserved and that their utilization be integrated in future planning by maintaining a relatively small nucleus capable of prompt expansion in time of emergency.

* * * * *

"In addition to the continued use of women in the positions which they filled so successfully during World War II, it is felt certain that further experience will show that their field of employment can be increased materially. Evidence presented to the committee showed quite clearly that the employment of women in the armed services was definitely on the increase when the war ended. Their performance of duty since the end of hostilities has continued at the same high level of efficiency that prevailed during the combat phase of the war. It is, therefore, considered entirely logical that they have a definite place in the Regular Military and Naval Establishments. * * *

* * * * *

"The joint resolution contemplates that, except where obviously inapplicable, the same personnel management policies that are prescribed for male personnel shall continue to govern the treatment of women in the armed services."

The time has now come to move forward by an additional step in line with the expression of policy last quoted. It is now fitting and appropriate that the opportunities for education and training afforded to selected young men in our several service academies be now extended in full measure to our young womanhood with the same purposes and objectives in view. In this way we shall grant full recognition to their contributions and shall broaden their opportunities for leadership in appropriate fields.

I visualize, indeed, the type of institution which will eventually emerge as one modeled along the line of our great universities where basic training will be afforded in the freshman and sophomore years in history, languages, general science, and similar subjects of value in all the services, with the junior and senior years devoted to majoring in special subjects appropriate to the branch of service chosen. Such an academy will then be in a position to grant degrees, so that those who may subsequently terminate their service may return to civil life with education and training on a par with that received by their colleagues and friends who have devoted themselves exclusively to civilian pursuits.

What was said on behalf of the Department of Defense in connection with the establishment of the Air Force Academy is pertinent here. Said the distinguished Assistant Secretary, Mr. Hannah:

"The Defense Department is a huge operation involving the expenditure of vast sums of money. When tens of billions are being spent to assure our survival, it is easy to become so involved in considerations of atomic versus standard weapons, guided missiles, radar screens, remote detection centers, carriers versus land bases, and on and on and forget that as we plan for the future there is no more important consideration than the wisest possible programs for training our future military leaders—Army, Navy, and Air.

"It is the view of some able and sincere educators that the educational needs of the services could be met adequately by institutions under civilian control. They point out that many of our finest military leaders have come from our civilian colleges and universities. They argue that graduates of civilian institutions bring into the services a highly desirable variety of background, training, and experience, and often a high degree of desirable specialization.

"I came to my present office in the Department of Defense with that point of view. I had studied the report of the Service Academy Board, previously referred to, and I remained convinced that undergraduate training of career officers could best be given in civilian colleges and universities, with the academies restricted to postgraduate training in various military specialties.

"My subsequent experiences in close association with large numbers of graduates of West Point and Annapolis and visits to the two academies have led me to a complete change of viewpoint. I am now strongly convinced of the wisdom of establishing an Air Force Academy, believing it to be necessary from the standpoint of national defense, and wholly desirable from an educational point of view.

"I have been led to this complete change of attitude by the personal observation that West Point and Annapolis perform two unique functions which no civilian institution of like rank could hope or be expected to do.

"I am impressed, first of all, with their intense and continued emphasis upon the ideal of service to the country. Nowhere else, so far as I know, are young men exposed to just that sort of influence over a protracted period. Loyalty and dedication to the service are hallmarks of the graduates of the military and naval academies, and we would be in a sorry state if the professional officers' corps did not have a high proportion of men who are motivated by just those ideals. Since such training is available nowhere else, it is not only desirable but necessary that the Air Force should have its own academy where it can teach its own cadets those same lessons.

"Second, I am impressed by the high standards of integrity and personal ethics enforced at the two service academies. No one would claim that their graduates are totally beyond reproach, but I do maintain that few professions, if any, can match the success of the service academies in inspiring their members to live up to such high standards of integrity and ethical conduct."

Every word in this quotation can be made equally applicable to the women in the armed services provided they are given the same opportunities.

An analysis of the joint resolution now offered will disclose that it provides for an institution to be known as the United States Women's Armed Services Academy, to be located at such place as the Secretary of Defense, with the advice of a commission to be established by him, shall select.

In order to establish the academy, provision is made for the acquisition of the necessary land, the preparatory and actual work of construction, permanent and temporary, and for the provision of necessary equipment.

The joint resolution then provides, generally, that all the appropriate legislation dealing with the United States Military Academy shall apply to this institution.

Finally, the joint resolution provides for appointments by Senators and Representatives.

It is a simple joint resolution, but one of immense possibilities. Its enactment will mean that we shall have brought ourselves up to date in the establishment of an officer group calculated to deal ably with the problems of modern warfare insofar as they are already recognized as within the sphere of capable women with the experience and training to do the job.

STUDY OF ISSUANCE OF URANIUM MINING STOCKS

Mr. CHAVEZ. Mr. President, since the uranium idea came into being, individual companies of all kinds and by the thousands have started selling stock in

various uranium promotional ventures. I submit, for appropriate reference, a resolution which would authorize the Committee on Banking and Currency to make an investigation of that situation.

Mr. LANGER. Mr. President, will the Senator from New Mexico yield for a question?

Mr. CHAVEZ. I yield.

Mr. LANGER. From my State, I have received many letters inquiring whether there is in existence a pamphlet on uranium. Does the resolution of the Senator from New Mexico provide for the publication of such a pamphlet?

Mr. CHAVEZ. Yes.

Mr. LANGER. I think that is most commendable, because that topic is a very live one. However, apparently there is no place where Members of Congress can obtain such information to be mailed to their constituents.

Mr. CHAVEZ. Let me say that the different varieties of uranium stock being sold today through the mails exceed the total number of stocks listed on the Stock Exchange Board in New York City.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 59) was referred to the Committee on Banking and Currency, as follows:

Whereas a large number of issues of uranium mining stocks are being offered for sale to the public through the mails and other instrumentalities of interstate commerce;

Whereas many of these stocks are being issued in relatively small amounts and have been exempted from registration under the Securities Act of 1933, as amended; and

Whereas such exemption from registration may, in many cases, leave prospective investors without adequate information concerning such issues: Therefore be it

Resolved, That the Committee on Banking and Currency, or any duly authorized subcommittee thereof, shall make a full and complete study and investigation with respect to the issuance of uranium mining stocks, for the purpose of ascertaining whether any changes are necessary in the Securities Act of 1933, as amended, or in the regulations promulgated thereunder, to provide adequate protection for prospective investors in such securities. The committee shall report to the Senate at the earliest practicable date the results of its study and investigation together with such recommendations as it may deem desirable.

STUDY OF NARCOTICS PROBLEM IN THE UNITED STATES

Mr. DANIEL submitted the following resolution (S. Res. 60), which was referred to the Committee on the Judiciary:

Resolved, That the Committee on the Judiciary, or any duly authorized subcommittee thereof, is authorized and directed to conduct a full and complete study of the narcotics problem in the United States, including ways and means of improving the Federal Criminal Code and other laws and enforcement procedures dealing with the possession, sale, and transportation of narcotics, marihuana, and similar drugs. In the conduct of such investigation special attention shall be given to (1) the extent, cause, and effect of unlawful uses of narcotics and marihuana in the United States, (2) the adequacy, administration, operation, and enforcement of existing laws relating thereto, and (3) the additions and changes which should be made in the laws and enforcement procedures to prevent illicit possession, sale, transportation, and use of narcotic drugs and marihuana, and to combat the increasing narcotic addiction in the United States.

SEC. 2. The committee, or any duly authorized subcommittee thereof, is authorized to sit and act at such places and times during the sessions, recesses, and adjourned periods of the Senate, to hold such hearings, to require by subpenas or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to procure such printing and binding, as it deems advisable. The cost of stenographic services to report hearings of the committee or subcommittee shall not be in excess of 40 cents per hundred words. Subpenas shall be issued by the chairman of the committee or the subcommittee, and may be served by any person designated by such chairman.

A majority of the members of the committee, or duly authorized subcommittee thereof, shall constitute a quorum for the transaction of business, except that a lesser number to be fixed by the committee, or by such subcommittee, shall constitute a quorum for the purpose of administering oaths and taking sworn testimony.

SEC. 3. The committee shall report its findings, together with its recommendations for such legislation as it deems advisable, to the Senate at the earliest date practicable but not later than January 31, 1956.

SEC. 4. For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized from March 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ on a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the heads of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 5. The expenses of the committee under this resolution, which shall not exceed $30,000, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

INTEROCEANIC SHIP CANAL ACROSS THE ISTHMUS OF TEHUANTEPEC

Mr. CHAVEZ. Mr. President, in the United States there is a considerable school of thought which believes that something should be done to further inter-American defense and Western Hemispheric economic progress and solidarity. Therefore, I submit, for appropriate reference, a resolution by which the President is requested to enter into negotiations with the Republic of Mexico, in order to carry out those purposes.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 68) was referred to the Committee on Foreign Relations, as follows:

Resolved, That in the furtherance of Inter-American defense and Western Hemispheric economic progress and solidarity, the President is requested to enter into negotiations with the Government of the Republic of Mexico for the purpose of ascertaining the willingness of that Government to make a treaty providing for the construction, operation, and maintenance of an interoceanic ship canal across the Isthmus of Tehuantepec.

EXTENSION OF TIME FOR COMMITTEE ON THE JUDICIARY TO MAKE EXPENDITURES UNDER SENATE RESOLUTION 172

Mr. EASTLAND submitted the following resolution (S. Res. 69), which was referred to the Committee on Rules and Administration:

Resolved, That the time in which the Committee on the Judiciary may expend funds under the authority of Senate Resolution 172, agreed to January 27, 1954, is hereby extended through March 15, 1955.

CIVIL SERVICE WEEK—PROCLAMATION OF GOVERNOR OF MASSACHUSETTS

Mr. SALTONSTALL. Mr. President, on behalf of my colleague, the junior Senator from Massachusetts [Mr. KENNEDY], and myself, I ask unanimous consent to have printed in the RECORD a proclamation issued by the Governor of Massachusetts, relating to Civil Service Week. A great number of Massachusetts citizens think it will be helpful to have the proclamation published in the CONGRESSIONAL RECORD.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

Whereas Federal employees have set high standards of accomplishment and integrity in meeting the responsibilities of public service; and

Whereas these high standards are made possible by a civil-service system based on merit; and

Whereas President Eisenhower recently issued an Executive order that establishes a new appointment system for the Federal Government, effective January 23, 1955; and

Whereas such Executive order provides greater job security for nearly 450,000 present Government employees, who get their jobs through competitive examination, and represents the greatest advance in many years toward providing the American people with a strong and stable career force to carry out the essential and complicated functions of modern government; and

Whereas each year, on the anniversary of the passage of the Civil Service Act of 1883, the Government Employees Council of the American Federation of Labor of Massachusetts sponsors special programs and activities to acquaint the public with the history and principles of the merit system in Government service.

Now, therefore, I, Christian A. Herter, Governor of the Commonwealth of Massachusetts, do hereby proclaim January 16–22, 1955, as Civil Service Week and urge the citizens of Massachusetts to join with our Federal employees in a suitable observance of the 72d anniversary of the Civil Service Act.

Given at the executive chamber in Boston, this 26th day of January in the year of our Lord 1955; and of the independence of the United States of America, the 179th.

By His Excellency the Governor:

CHRISTIAN A. HERTER,
EDWARD J. CRONIN,
Secretary of the Commonwealth.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc.,

were ordered to be printed in the RECORD, as follows:

By Mr. KNOWLAND:

Address delivered by him in San Francisco, Calif., on February 18, 1955.

By Mr. MANSFIELD:

Address delivered by him at the commissioning exercises of the 12th officer candidate class, United States Marine Corps, at Quantico, Va., on February 19, 1955.

Article entitled "Is Ike Popular Enough To Save the GOP?" published in the Democratic Digest of March 1955.

By Mr. BUTLER:

Statement prepared by him relating to the 37th anniversary of Lithuanian independence.

By Mr. DUFF:

Address delivered by Henry Cabot Lodge, Jr., United States Representative to the United Nations, at a dinner of the Republican State Committee of Pennsylvania, at Philadelphia, Pa., on February 14, 1955.

NOTICE OF HEARING ON INDIAN AFFAIRS

Mr. O'MAHONEY. Mr. President, it is my purpose to give notice, through the CONGRESSIONAL RECORD, that the subcommittee on Indian Affairs of the Committee on Interior and Insular Affairs will hold a hearing on the afternoon of February 24, at 2 o'clock, in the room of the Committee on Interior and Insular Affairs.

The purpose of the hearing is to give an opportunity to the Commissioner of Indian Affairs and his staff to appear before the subcommittee and make such report as they may desire, and to answer such questions as the members of the subcommittee may desire to propound, with respect to the program, policy, and accomplishments of the Bureau of Indian Affairs in carrying out its duties.

Attention should be called to the fact that on August 1, 1953, the Senate and the House adopted a concurrent resolution declaring it to be the sense of the Congress that all Indians in certain States and certain tribes should be released from the guardianship of the Government of the United States. Some action has been taken under that resolution. During the 83d Congress, certain bills on the subject—approximately 12 in number, I believe—were introduced. However, not all of them were passed.

From the mail being received by the committee, I know there is a great deal of interest in this matter; and I feel that this is the best way to draw the attention of all who may be interested to the fact that the Commissioner and his staff will appear and will discuss the entire problem of Indian affairs on the 24th of February, at 2 o'clock in the afternoon.

LEGISLATIVE PROGRAM

Mr. CLEMENTS. Mr. President, I desire to announce that tomorrow no other business will be transacted in the Senate except routine matters and the reading of Washington's Farewell Address.

Mr. MORSE. Mr. President, will the Senator yield for a question in regard to the proceedings today?

Mr. CLEMENTS. I yield to the Senator from Oregon.

Mr. MORSE. Will the acting majority leader give us assurance that there will not be a night session tonight? Some of us have made engagements for tonight which have been planned for a long time. I have been asked to make inquiry of the acting majority leader as to whether there will be a night session tonight.

Mr. CLEMENTS. I am not in a position at this time, 12:05 p. m., to tell my friend from Oregon what the situation will be tonight. It is the hope of the acting majority leader that the Senate may dispose of as many of the measures it was announced last Friday would be considered today as it may be possible to act on. If it should be necessary that the Senate sit until a little later hour than usual in order to dispose of one or two important measures in the group announced on last Friday, it would be my intention to have the Senate remain in session long enough to dispose of them.

Mr. MORSE. I thank the Senator for the information.

ALASKA AND HAWAII STATEHOOD—HEARINGS ON SENATE BILL 49, AND TELEGRAM FROM ALASKA HOUSE OF REPRESENTATIVES

Mr. MURRAY. Mr. President, today hearings on Senate bill 49, to enable Alaska and Hawaii to attain statehood, were opened by the Subcommittee on Territories and Insular Affairs. The Honorable Douglas McKay, Secretary of the Interior, was the chief witness today; and I urge every Member of the Senate to read the Secretary's testimony.

In connection with these hearings, the Members of the Senate will be interested in a telegram I have received. It is signed by every member of the House of Representatives of the Alaskan Territorial Legislative, who are unequivocally supporting statehood. The members of the House of Representatives of Alaska are, of course, elected by popular vote of the citizens of the Territory, hence, their unanimous views can be said to express the position of the nearly 200,000 loyal and brave American citizens of the Territory of Alaska. Incidentally, Mr. President, the Alaska House consists of both Republican and Democratic members, showing again that the issue of statehood transcends politics both in Alaska and in our Nation as a whole.

I ask that the telegram from all the members of the Alaska House of Representatives appear at this point in the body of the RECORD.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

JUNEAU, ALASKA, *February 17, 1955.*

Hon. JAMES MURRAY,
Chairman, Senate Committee on Interior and Insular Affairs, Senate Office Building, Washington, D. C.:

We wholeheartedly endorse the efforts your committee is making toward achieving statehood for Alaska and we extend to you our sincere appreciation. May God be with you in your deliberations. We in Alaska stand ready to assume our responsibilities as a State. We feel our loyalty and devotion as citizens of the United States has been proven by performance and action. It is therefore with burning indignation that we observe from time to time the testimony that is tendered to your committee by the great leaders of the administration in Washington. We feel further that a careful analysis of the remarks made by Secretaries McKay and Wilson might well serve as a warning to the American people everywhere for it is clearly evident that their remarks show a complete and wanton disregard toward Alaskan rights as American citizens. Their testimony of late has dwelt upon the loyalty of Hawaiians, with specific omission of Alaskans. We protest such omissions. Their testimony refers to Alaska as a Federal area. From time to time there has been talk of using Alaska as a defense area. To your loyal citizens residing in Alaska this type of thinking is completely repugnant to America's heritage. We are an industrious and freedom-loving people. We intensely dislike being thought of as pawns in a game of chess to be played by high administrative officials. The Congress of the United States might well look further into the thinking and purposes of Secretaries Wilson and McKay. We feel their thinking is a serious matter and that disregard and abuse of Americans anywhere is a matter of concern to Americans everywhere.

E. G. Bailey, Lester Bronson, Seaborn J. Buckalew, Jr., Edith R. Bullock, Charles E. Fagerstrom, Hubert A. Gilbert, Richard J. Oreuel, Ken C. Johnson, Peter J. Kalamarides, Ed Locken, Stanley J. McCutcheon, Joseph A. McLean, George B. McNabb, Jr., Robert J. McNeally, Vernon M. Metcalfe, Harry B. Palmer, Raymond E. Plummer, Burke Riley, Irene E. Ryan, Thomas B. Stewart, Dora M. Sweeney, Warren A. Taylor, Russell K. Young, Wendell P. Kay, Speaker of the House; complete membership, Alaska House of Representatives.

INCREASES IN SALARIES OF MEMBERS OF CONGRESS, THE JUDICIARY, AND FEDERAL EMPLOYEES

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter which I received from the Congress of Industrial Organizations, relating to salary increases for Members of Congress and Federal judges, together with a statement favoring such pay increases.

There being no objection, the letter and statement were ordered to be printed in the RECORD, as follows:

CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D. C., February 9, 1955.

To: Members of the United States Congress.
From: Robert Oliver, assistant to the President and director of CIO legislative committee.

Enclosed herewith you will find a resolution concerning the pending legislation to increase congressional and judicial salaries which was adopted unanimously by the CIO executive board at its meeting in Washington, D. C. on February 2, 1955.

This action by the CIO executive board follows the endorsement of the recommendations of the Commission on Judicial and Congressional Salaries which CIO secretary-treasurer James B. Carey earlier forwarded to the chairman of the Senate Subcommittee on Judicial and Congressional Salaries.

The CIO realizes that there exists some misunderstanding of the merits of the pending legislation. We will make every effort throughout the country, both through our own membership as well as the general public, to show the rightness and justification of the proposed increases.

We urge you to proceed with the enactment of this legislation as rapidly as possible, confident that in the coming weeks a large segment of the population will be fully informed as to its complete justification.

CONGRESSIONAL AND JUDICIAL PAY RAISE

(Resolution adopted by the CIO executive board, February 2, 1955)

The CIO heartily approves the proposal to increase salaries of Members of Congress and Federal judges. We urge the leaders of both parties in both Houses of the Congress to unite behind the recommendations made last year by the Commission on Judicial and Congressional Salaries to the end that they may be enacted into law as speedily as possible.

It has been 9 years since Congress and the Federal judiciary last received a salary increase. The result, during this period of high inflation and general salary increases for most segments of the economy, has been an increasing number of resignations of Members of Congress and judges to accept other more lucrative jobs in private industry.

The CIO believes that no body of men in the world have a greater responsibility than the Members of our great national legislature and the judges who are called upon to interpret legislative enactments. Such responsibility must be met with adequate recompense.

Not only have congressional salaries never caught up with inflation, but in recent years they have never been entirely commensurate with the high demands made upon Congressmen. Even the top recommendation for an increase currently being considered by the Congress will, if enacted, still leave the pay of Members of Congress far below the salaries being paid to executives of business corporations whose work has far less responsibility to the public interest.

Enactment of the pay increases for Congress and the Federal judges at the top levels recommended by the Commission on Judicial and Cnngressional Salaries will be an investment in good government that is long overdue. It should have the support of all citizens. We urge immediate passage of this legislation.

Mr. LANGER. Mr. President, I also ask unanimous consent to have printed in the RECORD a letter which I received from the American Federation of Labor dealing with Federal pay increase proposed legislation pending before the 84th Congress providing pay increases for Federal employees.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

For the most part, the history of Government wage legislation is one of shabby treatment of Federal employees. Too often Congress and the executive branch of our Government have considered Federal salaries as a largess, rather than on the basis of the complex of competitive forces laid down by historic experience and the laws of economics.

Wages of a worker, including Federal employees, must be considered in the light of cost of living, productivity of the national economy, productivity of the individual firm and worker, collective bargaining, the American goal of a constantly rising standard of living and the demands of an economy predicated on mass production for a market through mass consumption.

During the greater part of the last two decades, postal and other Federal employees have been denied the ability to compete with increased prices. In a period during which our Nation as a whole enjoyed unprecedented national prosperity, Federal workers have been stepchildren of our American economy. For example, in only 2 years since 1939 have postal employees been paid wages above living costs. In 1952, salaries were a mere 4 percent above Bureau of Labor cost figures published by the Department of Labor; in 1953, there was a 1 percent spread between wages and living costs. Deficits were shown for the remaining years ranging from 1 percent in 1940 to 32 percent in 1948.

Inadequate wages for Government workers can lead only to an inferior caliber of personnel, expensive recruiting and training experience, decreased efficiency and, in the finals, poor Government operation. The combination of these undesirable conditions inevitably results in more costly Government to every taxpayer.

The cost of Government is properly the concern of each of us. No one advocates useless spending or the waste of our public Treasury. However, in the matter of wages for Federal employees, there is involved a very human question as well as a moral obligation on the part of those responsible for determining salaries. The human question can be satisfied only if the worker is given a wage that will enable him to provide decent and adequate care for his family. A moral responsibility exists as long as Federal employees do not have collective bargaining rights and in the absence of economic privileges accorded workers in private industry in a given wage dispute.

These two responsibilities should weigh heavily on those charged with establishing Federal salary schedules. They were completely ignored last year in the veto of the wage legislation approved by the 83d Congress. The current attitude of some persons in the executive branch of Government seems to be a take-it-or-leave-it offer, without reference to the needs of the employees or the justice of their case for better wages. This amounts to a callous disregard of more than 2 million Federal workers and their families and a complete evasion of the moral responsibility on the part of our Federal Government to pay fair and decent wages.

Bills now before Congress providing for a 10-percent wage increase have the support of an overwhelming majority of Federal employees. The executive council of the American Federation of Labor is convinced this is a minimum amount due Government personnel, the majority of whom have had no upward wage adjustment since 1951.

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated February 17, 1955, which I received from Lawrence J. Walsh, dealing with the proposed 66.6 percent salary increases for Members of Congress and increases in the pay of certain other employees.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEBRUARY 17, 1955.

The Honorable WILLIAM LANGER,
Senate Office Building,
Washington, D. C.

DEAR SIR: I was stunned to hear of Congress supporting a 66.6-percent raise for Congressmen when GS employees, such as myself, have had no raise since 1951 and even a 5-percent raise vetoed.

It seems at least a 10-percent raise for GS employees should be expedited and made retroactive to the veto of 1954 or January 1, 1955, at the latest.

The fringe benefits make the take-home pay less when the cost-of-living expenses are greater.

An equitable raise is needed soon.

Sincerely,

LAWRENCE J. WALSH.

Mr. LANGER. Mr. President, I also ask unanimous consent to have printed in the RECORD a letter which I received from a person in Anthony, Tex., dealing with proposed salary increases for Members of Congress and the judiciary.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ANTHONY, TEX., *February 18, 1955.*

Senator WM. E. LANGER,
Patriot, Washington,
District of Confusion.

DEAR SENATOR: Congress votes itself $25,000 per year with perquisites. It is clear Congress feels that as the Republic is being destroyed anyhow its bones should be picked clean before casting them away.

It has been made clear by our modernized courts that an oath to uphold and defend our fabric of government has no power to bind the hands of officials reaching out to the synagogue of Satan, to be filled by those within the shadows who hold the money bags, as Aldrich held them at the stockyards at Chicago.

Every legislature should forthwith pass declarations of independence of the falling Government before the intended military dictatorship can be clamped upon them.

Dare you—even you—as boldly courageous as you undoubtedly are, dare put this message into the CONGRESSIONAL RECORD? It might make you President if you do. Is not an oath of office even less than a scrap of paper?

Of course wine and whisky comes high down there and many of those lads never before had a chance to spread themselves with someone else footing the bill. Anyway, Judas must have his 30 pieces of silver.

HUBERT H. HEATH.

SCHOOL MILK PROGRAM

Mr. THYE. Mr. President, a few days ago I introduced S. 1120, to enlarge and extend the special school milk program which was authorized in the Agricultural Act of 1954.

The provisions of the present act provide for use of $50 million of funds of the Commodity Credit Corporation annually for 2 years, ending June 30, 1956, to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under.

Under S. 1120, the amount authorized for such use would be increased to $100 million annually, and the program would be continued for an additional year, namely, until June 30, 1957.

On the basis of the program already undertaken, and the great advantages, from economic and health standpoints, of the increased use of milk, I believe that the investment of additional funds in this program will result in good to the entire country.

I also feel confident that many more schools will participate, and there will be more effective development of the program by all schools, if it is known that the plan will continue for at least 2 years beyond the present fiscal year.

This will enable the Department of Agriculture and the schools to plan their activities beyond the present more or less experimental program.

Every State, through its department of education, has a contract with the Department of Agriculture for the allocation of funds allotted to it.

Although the program was not initiated until September, an allocation of $35 million has already been made.

Funds allocated to the States, on the basis of a formula relating to the number of school children and the per capita income, are used to reimburse participating schools which show increased consumption of milk.

A base of normal consumption prior to the program is established in each school, and the school is then reimbursed at the rate of 4 cents per half pint of milk consumed by schoolchildren above that base.

Where no milk was previously served and a base is not available, the reimbursement is made at 3 cents a half pint for milk consumed by the children.

On February 15, 45,500 schools throughout the Nation participated in this program to increase the use of milk in the diets of our growing boys and girls.

Some States report their schools showing increased milk consumption of more than 100 percent.

While some States have already used all the funds available to them, others have not fully developed their programs.

It is planned, therefore, to make a reallocation of the unused funds for the fiscal year.

It seems to me that an effective program is being developed, and that it should be continued and expanded.

I have received from the Department of Agriculture some reports giving the status of the special school milk program on January 15.

I ask unanimous consent that the reports be printed in the RECORD as a part of my remarks. I think the information would be most informative to most Members of the Senate.

There being no objection, the reports were ordered to be printed in the RECORD, as follows:

SPECIAL SCHOOL MILK PROGRAM—STATUS OF PROGRAM AS OF JANUARY 15, 1955, AND ITS EFFECTS ON MILK CONSUMPTION IN PARTICIPATING SCHOOLS

The special school milk program, which was announced to the States on September 10, 1954, is now operating in all States. This report summarizes the current status of the program from the standpoint of number of schools approved for participation and provides preliminary data on the effects of the program on milk consumption.

CURRENT STATUS OF THE PROGRAM

As of January 15, 1955, nearly 42,000 schools had been approved for participation in the program. This is an increase of approximately 10,000 schools above the number which had been approved as of November 30, 1954. The number of schools approved represents about one-fourth of the 160,000 schools in the Nation. (See table I.)

EFFECTS ON MILK CONSUMPTION

During the month of November the new program was operating in 44 States and the District of Columbia. Preliminary reports received cover operations in 19,535 schools in which 5.2 million children were drinking milk under the program. (See table II.)

In November, these schools achieved a 55-percent increase over normal base consumption of milk. For the 19,535 schools, this represented additional consumption of 32 million half pints of milk, or over 17 million additional pounds. Among the States reporting, the increase in milk consumption in participating schools ranged from 22 percent in the District of Columbia to 123 percent in Montana. Increases in the majority of States ranged between 40 and 90 percent. A few States fell below 40 percent but 7 States reported increases of over 100 percent.

TABLE I.—*Special school milk program—Status of program as of Jan. 15, 1955: Number of schools approved for participation compared to total number of schools in each State*

ADDRESSES BY FORMER PRESIDENT HOOVER ON EUROPEAN GOOD-WILL TOUR

Mr. BUTLER. Mr. President, former President Hoover continues to serve his Nation with distinction and with lasting impress upon the course of world affairs. In November of last year, he made a good-will trip to West Germany, and during the course of his travels he delivered three major addresses, the contents of which reflect the depth of his understanding of today's difficult problems. I, therefore, ask unanimous consent to have these remarkable speeches printed in the body of the RECORD at this point.

There being no objection, the addresses were ordered to be printed in the RECORD, as follows:

SOME HOPES FOR PEACE

(Speech of Hon. Herbert Hoover before the press club of Bonn, Germany, November 24, 1954)

Mr. Chairman and guests, I am greatly touched by your tribute to my country and to myself. I also am told that I am the first speaker at a press club lunch in the new headquarters. I would not arrogate to myself the right to deliver any message from the press club of the United States, of which I have been a member for several years. Probably a public official is not expected to convey their messages, but, as a private member of the press club of Washington, I am glad to be the first speaker in this new room. Moreover, our press club has become a forum for the more important addresses outside of the halls of Congress. Every returning statesman who came to our country in recent years has addressed the press club to deliver their messages to the American people. So I hope you will grow and particularly will expand your diningroom. I might add that our own press club expanded four times since it was founded.

It appears to be the rule of the executive committee of our press club that the chairman should delicately convey to every speaker that 20 minutes would probably be as long as the press could dissociate itself from its work. So I warn you that I will not be more than 20 minutes.

It is indeed a great honor for me to be an invited guest of the Chancellor and the German people.

I have visited Germany many times over 40 years. My last visit was nearly 8 years ago. In the past 8 years since then, West Germany has risen from the ashes of war; the shackles of stifling and destructive economic policies have been stricken off; famine has been overcome; productivity has been reestablished. And finally sovereignty and full membership in the family of nations has been acknowledged as Germany's right.

I have rejoiced in each of these steps to the restoration of a great people. And these accomplishments are the vivid proof of the genius and vitality of the German people.

When I learned that you wished me to make some sort of an address, I inquired as to what subject within my province might be of interest to you. Your officials suggested that I appraise the hopes of peace as seen through some American eyes.

There never was a time when the Western World was more anxious for peace. All our peoples have had their fill of war. The daily prayer of all freemen is for a lasting peace.

In this 9½ years since the guns were silenced the disordered world with all its aftermaths has made some progress toward stability and peace. And from this progress there is hope.

You will remember the Biblical legend of the Four Horsemen of the Apocalypse, the names of which were War, Death, Famine, and Pestilence. Fighting war and death have abated. Through aroused compassion, famine and pestilence were overcome at that time.

But out of these gigantic tumults has come another horseman to ravish the world with fear, hate, and a passion to destroy Western civilization. The ancient prophet was unacquainted with him, but his name is communism.

The tensions of military conflict with Russia seem to have abated in these recent months and from this abatement I believe we can have at least a gleam of hope. Moscow has made many declarations of peace-loving intent. They speak of peaceful coexistence.

It may be that they want more time to consolidate their gains. They may want more time to promote their infiltration of conspiracies in free nations. It may be that the growth of our deterrents against military aggression has influenced their minds.

It may be that internal forces are working within to restrain them. Every deep-seated social or political revolution has generated within itself a dynamism of military aggression or a crusading spirit to spread their new ideas. That was the case of the Mohammedan Revolution, the French Revolution, the American Revolution, as well as the Russian Revolution. Incidentally, in the American case, we had a vacant continent to invade, but we have been nonetheless crusaders to spread our concepts of freedom.

With time, the original leaders of these revolutions die off and some revolutions have the bad habit of devouring their young. At least their successors are less violent. They become more concerned with their dangers and improvements at home. From all this it may be that the Communist protestations are genuine. All of which possibly warrants a faint hope.

But from our many years' experience with the Communists, we should learn more about what peaceful coexistence means, and we must await works rather than words. The Western World has many times enumerated some of these works to which the Communists might contribute. They could join in the completely free unification of Germany; they could sign the peace with Austria. They could cease their germ warfare of conspiracies directed to overthrowing free governments.

With such steps, we might at least advance out of the thunder and lightning of this cold war into the dawn of a cold peace.

THE DEFENSE OF WESTERN CIVILIZATION

But all this is too much to expect, and we should not be lulled into the abandonment of our means of defense. The only hope for our safety is the building up of arms and a united front among free nations which will deter Communist aggression against us. The Western World has no intention of military aggression against the Communists. The sole purpose of our alliances and our armament is to have such powerful deterrents as to convince them of the futility of starting war.

In this role of deterrents, the present proposed agreements looking to the arming of Germany and Europe have a very large part. Without the consummation of those agreements, the security of Western civilization in Europe becomes dependent on the malevolent will of the Communists.

NEUTRALISM

The coming of the fission bomb and guided missiles has contributed to the deterrents. But one of its discouraging effects has been that, for fear of its use upon them by the Communists, some nations engage in the futile hope to escape its ravages by neutrality in a great conflict.

Neutralism is no answer to the security of free nations in case of a major conflict. And moreover, it gives comfort only to the spirit of aggression from the Communists.

The only hope of at least relief from military aggression by the Communists is if each one of the powerful nations associates itself in the real building of arms for mutual defense. That is the most powerful of deterrents.

AMERICAN PARTICIPATION IN THE DEFENSE OF EUROPE

Our American people have joined in the defense of Western Europe. It is an illusion of some European statesmen that we have joined and spent huge efforts for the selfish

purpose of defending ourselves. I and most of my countrymen have held that this is untrue. We can defend ourselves at much less cost in manpower and money, and build effective deterrents against Communist attack upon us. The fundamental reason for our participation is to preserve Western civilization in Europe and the freedom of nations in the world.

The strength of the West in effective defense is not a goal in itself but only a precondition and guaranty of freedom for unlimited development of our cultural and spiritual life.

Nor is there an atom of truth in the assertion that American action is animated by imperialistic ambitions. The world should know from our many actions in the past there is no imperialism in our blood.

Our people have met many discouragements and frustrations in these efforts. We have greatly reduced our resources with which we could increase the comfort and living of our own people. Europe must realize that many of my countrymen had lost confidence in these projects of European defense.

But the statesmanship of Chancellor Adenauer and your Parliament, through joining Germany in the effective defense of Europe, has done much to restore confidence and hope in the American people. We await similar action by other nations, but our patience is not inexhaustible.

THE UNITED NATIONS

At one time we built great hopes on the organization of the United Nations.

When that temple was built to guard the flame of peace, the world concerned itself with the architecture of the superstructure, but neglected its foundation. When Communists were taken into that structure, the foundation of its major purpose, which was to stop military aggression, was destroyed.

But it has some values as a forum whereby with electronic equipment we can denounce the ways of the Communists in five languages all at once. It does perform useful services in mediating minor conflicts, in public health, in some economic and philanthropic fields. It might also be a place where free nations can promote their unity. But the inability of the United Nations to prevent military aggression has given rise to defensive alliances intended for the protection of the free world.

THE RISE OF PEACEFUL NATIONALISM

One of the real foundations of peace is the rise of what is sometimes derisively called nationalism. There are those who with the organization of the United Nations had further dreams of some sort of world government where the independence of nations would be curtailed or abolished. They denounce nationalism as a sin against peace and progress and as a wicked force.

But the spirit of nationalism in its true sense springs from the deepest of human emotions. It springs from a thousand rills of inspiring national history, its heroes, its common language, its culture, and its national achievements. It rises from the yearning of men to be free of foreign domination, to govern themselves.

Nationalism rises from our national sacrifices. Every nation has laid its dead upon the altar of its country. These died with their national flag before their eyes and their national hymns upon their lips. National pride has swelled from their suffering and sacrifice. Within free nations these emotions, added to their religious faith, are their spiritual strength. It sustains their resolution to defend themselves against aggression and domination.

And equally do these emotions flow wide and deep in all free nations. Within them and their religious faith is their spiritual strength. It sustains their resolution to defend themselves against aggression and domination.

Nationalism does not mean isolation from unity of action among nations; rather does internal spiritual strength make common action for defense more secure and more potent.

And we can have some hope that slumbering nationalism in the Iron Curtain nations will awaken to throw off the Moscow yoke as it has in Yugoslavia.

I have rejoiced at the rise of a peaceful and constructive spirit in Germany. It has brought great steps in her independence and her strength. From her full freedom alone can come the common defense and her full contribution to all mankind.

THE UNIFICATION OF GERMANY

I can well claim that advocacy of German unification is no afterthought of mine for this occasion.

Twelve years ago, just after America entered the war, some of our leaders in a spirit of revenge and as a necessity of peace began to demand dismemberment of Germany. At that time I said:

"The Germans, like all virile races, are cohesive. The history of Europe's wars might be written around her dismemberments and the explosions from her movements to unity. * * *

"There can be no lasting peace * * * with a dismembered Germany.

"Nations cannot be held in chains. * * *

"No people can be punished and at the same time leave any hope of lasting peace. * * * Victory with vengeance is ultimate defeat in the modern world. * * *

"We can have peace or we can have revenge, but we cannot have both."

In my country we hold that unification must be the purpose of free nations; we hold that the work of unification must have their full cooperation; we hold that unification by the hand of Russia alone is not likely to be on terms which preserve Germany's association with Western civilization or which can assure the defense of Germany from Communist domination.

The German peoples have before now been the bastion of Western civilization which deterred its destruction by the Asiatic hordes.

My prayer is that Germany may be given the unity and full freedom which will restore her to that mission in the world.

CONCLUSION

I am not here to offer certain solutions to these dreadful aftermaths of war from which we still suffer, but to indicate the good will of my countrymen.

We must realize that in dealing with these gigantic problems the statesmen of free nations cannot perform miracles. But that they can, by vision, patience, tolerance, moderation, and understanding, abate the dangerous forces which breed aggression, fear, and hate, and they can increase good will among men; nor can we abandon the hope that some time the free nations who believe in God will mobilize in unity against Red atheism and human slavery.

In Germany the rebuilding of prosperity and independence from the demoralization of defeat has of necessity been by the patient laying of stone upon stone.

My countrymen believe that the reconstruction of West Germany, the revival of its economic life, and the respect it has won among nations is due to the great statesmanship of your Chancellor and to the great people he is privileged to lead.

THE SERVICE OF UNIVERSITIES TO FREEDOM

(Address by Herbert Hoover at Tuebingen University, November 25, 1954)

Mr. Rector, representatives of the faculty, and students of Tuebingen University, it is a great honor to come back to a university because, as some of you may know, 60 years of my life has been spent on the campus of a university. I have had interruptions due to the Four Horsemen of the Apocalypse having followed me at times, but otherwise my life has been one of association with university faculties and students, and I have had the same refreshment of spirit that I have had today in meeting the students and professors.

You have conferred a great honor upon me by a degree from this, one of the oldest of the world's great universities, to one who is a graduate of perhaps one of the youngest of the universities. I have had, as I have said, many affections for universities but have only one honestly-earned degree to my credit. This event today constitutes my 81st great honor from universities by a degree. I might plead that perhaps life on the campus and some effort trying to find money to pay professors justifies the universities in awarding me some academic attention.

On this occasion, I could not fail to acknowledge the obligations which our much younger universities of America owe to their older German brothers. The structure of our faculties and our methods of instruction were established almost wholly on the pattern of German universities. You will realize that more than 25 percent of the races which have poured into the melting pot of America are of Germanic origin. The very names of many American leaders in every branch of our national life are witness to the value of this inheritance.

There is no better example of this fruitful interchange of intellectual life than the case of Friedrich List. His name especially comes to my mind because I have received the distinguished honor of being made an honorary citizen of Reutlingen, the city of his birth. List was indeed one of the great economists during the first half of the 19th century. As a member of your faculty, his pioneering ideas on economic freedom brought him trouble and exile. He naturally migrated to America where he took part in molding American life. Becoming an American citizen he was appointed American consul at Stuttgart. Over his remaining 20 years he was a frequent visitor to this university. Nor did he cease in his contributions to an understanding of the basis of the successful economic life of nations.

I have been in Germany many times, but one occasion was on a scholastic adventure. Some years before the First World War, together with Mrs. Hoover, we undertook to translate from the Latin the first comprehensive book published on my branch of the engineering profession. That was a work entitled, "De Re Metallica," by Georgius Agricola—being a huge folio of 600 pages with many intelligent illustrations. It was published almost 400 years ago. The author's real name was Georg Bauer, a doctor living among the mines of Saxony and Bohemia. He also held some public offices, among them Burgomeister of Chemnitz. Agricola had a tendril of memory with this university. Although he was a stanch Catholic, he was a lifelong friend of Melanchthon, a lecturer here, who aided in securing the publication of his book.

Previous translators had failed at any adequate translation because Agricola wrote in a language which had ceased to grow on the technical side a thousand years before his time. He therefore invented or adapted a maze of Latin terms for materials and technical processes unknown to the Romans. As a part of disentangling these puzzles, Mrs. Hoover and I visited the scene of his work. She also probed the literature in German libraries on these subjects which began to appear some years after Agricola. Ultimately with these aids, we disentangled some hundred of terms that he had added to the Latin language.

It might interest you to know that this book by a long-since-forgotten German scholar had some responsibilities for the

torrent of gold and silver with which the Spanish Conquistadors of Peru and Mexico flooded the world in the 15th and 16th centuries. It seems highly probable that the processes used in working the mines were taken from Agricola's book. No other text existed at that time, and the particular processes which they needed were not used in Spain. And as a further tribute to this scholar, he was the first to illuminate correctly the principles of many metallurgical processes which we still use today. However, we have improved the machinery.

I have been interested in your library and its ancient setting. Again I can establish a certain comity of action. I began during the First World War to make use of my many opportunities to collect what has become millions of items about this 40 years' tumult of wars, peace and revolutions. In this library at my university we have certain collections of German history of the First World War that were given to me by the Ebert regime which I do not believe are available in Germany. Again after the Second World War with the aid of our American officials and certain Nazis who wanted to be rid of their documents, we formed an extensive collection on the rise and fall of the Hitler regime, which might otherwise have been lost. Some of the First World War documents we agreed would not be disclosed for a term of years not yet expired. Sometime this library may be of use to your students of your own history.

An added burden has fallen upon our universities. The Communists, by infiltration, propaganda, and conspiracy are seeking to corrupt the truth, the morals, the religion and in fact to destroy the freedoms of Western civilization. They use our freedoms to destroy freedom itself, but they do not comprehend the spiritual, moral, and educational force which will defeat them.

I may be rightly accused of carrying coal to the Ruhr, but I might touch upon other of the immense mutual responsibilities of our universities in free nations.

Aside from the primary duty of instruction of the young, our universities have great mutual responsibilities in the generating of ideas bearing upon our great problems of scientific, social, and economic development.

One of the greatest contributions of the universities is to keep open the channels of free exchange of knowledge between all the universities in the world. It is one of the pillars of freedom today.

It is by the free shuttle of ideas between our universities that we weave the great tapestries of knowledge. Our academic traditions have developed a system that is peculiarly effective in spotting outstanding intellects and putting them to work in a climate that fosters creative, original thinking.

From the mutual building by our university faculties and laboratories devoted to abstract science have come most of the great discoveries of natural law. The application of these discoveries through invention and production has been the task of the engineers and technicians whom we train. Applied science dries up quickly unless we maintain the sources of discovery in pure science. From these dual activities of the scientists and the technicians, a great stream of blessings in health, comfort, and good living has flowed to all our peoples.

It may be that at one time scientific discovery and invention were the product of a poverty-driven genius in a garret. Even if that were so, it is no longer the case. The discovery of natural law does not come as a sudden concept. It comes mostly slowly—step by step—through the action and reaction among our university scientific faculties and their laboratories.

For instance, the parents of our radio communications of today were not the broadcasters. Its parents were Maxwell from one university, who by mathematics formulated the hypothesis of electrical wave motion. It was Hertz of another university who experimentally confirmed Maxwell's deductions and carried them further to the demonstration that these waves could traverse the atmosphere. Then university-trained technicians from a score of institutions gave the world mounting inventions which finally handed this great tool to the broadcasters.

We have another mutual duty. For it is our universities which must train the men for leadership in our professions and as executives of great economic institutions. It is they who must guide them away from incompetence and in their social responsibilities. It becomes the mutual obligation of our universities to inculcate in these future administrators morals, rectitude, and their responsibilities to the public.

But our universities have a still greater purpose. From them must come the expansion of the human spirit; with its over-widening penetration into the unknown; and, finally, as Huxley says, "the inculcation of veracity of thought."

But again I return to the fundamental of all—that is freedom itself. The discoveries of natural law can flourish only in an atmosphere of free minds and free spirits. And inventions and production flourish only in a climate of reward for effort.

And, finally, as a tribute to the influence of German universities, I may mention that my own university bears on its seal the words "Die Luft der Freiheit Weht."

It has been indeed the universities of the world which have molded and defended the freedoms of mankind. That has been your greatest mission over 400 years and it is our greatest mutual mission today.

Again, may I express my appreciation for the honor of this occasion.

Resistance to Communism

(Speech of Hon. Herbert Hoover before the Senate of the City of Berlin, November 26, 1954)

Mr. Mayor, I am grateful for your kind statement. I have been greatly honored to be a guest of a great people. It is only 8 years since I last visited Berlin, and today I have witnessed the great transformation of this city, both physically and in spirit, from that which I saw the last time. Outstanding in my eyes is that you have devoted your energies to the rebuilding of homes for the people rather than the repair of ancient monuments. And I have witnessed the tender care with which you attend the children and the refugees who seek sanctuary from the oppression which haunts you next door.

It is a great work, of which you may well be proud.

This city of Berlin is on the front line of the cold war. You are combat soldiers in that war. Should it, which God forbid, ever become a hot war, you would be the first to face the enemy. Thus you more than others have the right to feel a sense of relief that the tensions of imminent war have sensibly decreased during these recent months. We can only speculate upon the outcome of this change in Moscow's protestations.

Whatever the outcome we must remember that the Communists still confront us with three problems.

The first is their declared basis of immoral relations between nations. That must cause us to hesitate to accept their assurances of good will toward men without more particulars. St. James said: "Even so faith, if it hath not works, is dead."

The second of our problems is that ever since the war the Communists have held to increasing armament. And that even in the period when other nations had demobilized. That does not seem to spell simple defense measures. We have been compelled to resume arming to the teeth in order to deter any possible aggression from them.

The third is their militant promotion of the Communist faith. They incessantly seek by propaganda, infiltration, and conspiracy within all the free nations to destroy the very foundations of civilization.

For 6,000 years, since recorded time, every civilized race has believed in a Supreme Being. They have realized that the laws which control the orderly movement of the stars were not economic materialism. For the first time in this long corridor of human history, a group of men with the resources of a powerful nation and all the modern techniques of communication are seeking to inflict Red atheism on the whole world.

Let there be no mistake about it. Lenin repeated over and over again that "religion is the opiate of a people." And his malign announcements have been ratified before his tomb every year with fanatic zeal. And their agents at work every day in every free country provide ample confirmation of this wickedness. Their crusade would destroy men's belief in God. It would destroy the moral foundations of mankind. It rots the souls of men.

And the dreadful degenerations of 30 years of war have fertilized the soil of even free nations for the growth of these malign ideas.

Those dangers cannot be met by suppressing our own freedoms. Our Governments can take care of definite conspiracies to overthrow them by violence. But the organized infiltration of Communist ideas into disturbed and weak minds can be met only by moral and spiritual resistance.

The first bastion of that resistance is religious faith, whether it be Mohammedan, Jewish, or Christian.

Nothing is more true than George Washington's statement "National morality cannot exist in the absence of religious principle." And that strong bulwark of resistance to communism requires incessant strengthening of the moral foundations of all our people.

The Sermon on the Mount established the transcendent concept of compassion and good will among men.

There was profound confirmation of the validity of religious faith when compassion defeated the scourges of famine and pestilence which were inevitable after these two great world wars, even to the extent of furnishing help and relief to the Communists themselves.

A further stronghold of resistance is the unquenchable aspiration of the human heart for personal freedom and respect for the dignity of the individual man. The free nations hold that the right to this dignity and personal freedom comes from the Creator and not from governments—especially Communist governments.

But freedom does not come like manna from heaven; it must be cultivated from rock soil with infinite patience and great human toil. To assure the resistance of nations to communism, our governments must find solution of many social ills which prepare the soil for its evil growth.

I have faith that the yearning for freedom is not dead even behind the Iron Curtain, for their peoples have tasted the invigorating waters of free men in long centuries gone by.

I do not need to discuss the values of freedom with the people of Berlin. You live cheek by jowl on the boundary over which you daily witness the naked poverty, the inhuman toil, the terror, the repressions of mind and spirit which the Communists inflict upon your own compatriots.

INCREASING PRODUCTIVITY

One of the greatest resistances to communism has been the increase in productivity in the Western World. And among the many discouraging events in the world, it is a heartening encouragement.

Since the war there have been revolutionary strides in scientific discovery and invention.

These improvements have almost wholly come from the countries where men's minds

and spirits are free. It is only in those countries that men have the incentives to strive and where they might receive rewards for their efforts.

To these astonishing scientific discoveries and inventions Germany has contributed a full and perhaps even a greater share.

We of the free world have developed new materials in artificial fibers and plastics.

We have invented thousands of new labor-saving devices and better tools which relieve sweat from the backs of mankind.

We have by new designs immensely increased the power of our older aviation engines. We have invented the turbo jet and turbo engines. We have made huge advances in electronics. All of them have created an enormous expansion of transportation by air.

We have so improved the automobile as to bring it more nearly within reach of every family in the Western nations.

In agriculture, we have improved the quality of animals and plant life. We have improved the farmers' tools and his fertilizers.

We have enormously improved our fuel-produced electric power and its distribution. And now comes the possibility of the greatest source of power yet discovered by man. That is the fission of the atom.

In its benevolent aspects we are already building atomic powerplants, we are improving the health of men with its byproducts. And President Eisenhower has proposed the sharing of these benevolent uses by all nations, even including the Communists.

The discoveries in new drugs and antibiotics have brought relief from a multitude of diseases. They have lengthened the span of life and reduced pressures on our doctors and hospitals.

The sum of all this, and many other improvements, amounts to industrial revolution in only one decade of time.

Without this increase in productivity my country would have been unable to carry the burden of aid to other countries. And in Germany these improvements in productivity and the invigoration of private initiative under economic freedom have enabled you to carry the almost overwhelming burdens of the refugees and ruined industry.

Nor have you neglected the solution of stupendous social problems and the building of moral and spiritual bulwarks of resistance to Communist corruption.

With all this promise of increasing productivity, if the world could have peace, we would find a new Golden Age.

But meanwhile you, the leaders of Berlin, have a great responsibility toward the free world. And may I add the nations of Western Europe have a great responsibility toward you. You face an enemy who lives just across the street. You have seen your duty and have performed it well. Thanks to the spirit and courage of men under the leadership of two great mayors, you can, like the men of ancient Athens, hold your heads high and say: "I am a Berliner."

SENATOR MORSE, OF OREGON

Mr. LEHMAN. Mr. President, to my regret, I was unable to be on the floor of the Senate when the junior Senator from Oregon [Mr. NEUBERGER] announced that his colleague [Mr. MORSE] had registered in Oregon as a Democrat, and is now officially a member of the Democratic Party.

I am glad to have this opportunity to express my deep satisfaction at the decision of Senator MORSE to join the Democratic Party, and to welcome him heartily to the councils of my party.

I have had the opportunity of working very closely with the senior Senator from Oregon in many causes ever since I entered the Senate 6 years ago, even though for a long time we sat on opposite sides of the aisle. During that long period I learned to hold him in great admiration and respect. He undoubtedly is one of the greatest authorities on constitutional law, not only in the Senate, but in the entire country. He is a man of high courage and of sincere convictions, for which he is always ready to do battle, even though he knows that the causes he sponsors may be politically unpopular. I know of no man who has shown greater devotion to our country or who has fought more tenaciously and more vigorously for the peace and security of our Nation and, indeed, of the free world. I look on WAYNE MORSE as one of the most distinguished and useful Members of the Senate. I say this, not because of my long and close friendship with him and my personal affection and admiration for him. I say it with confidence because during the years I have had the privilege of standing side by side with him on many issues, I have learned to know his heart and his mind. He is a great American, and I am proud to be his associate in the Democratic Party and in the Senate of the United States.

ORDER OF BUSINESS

The PRESIDENT pro tempore. If there is no further morning business, morning business is closed.

ADDITIONAL PERSONNEL FOR COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the consideration of Senate Resolution 20, Calendar No. 29, authorizing the employment of additional personnel by the Committee on Post Office and Civil Service, and appropriating funds therefor.

The PRESIDENT pro tempore. The resolution will be stated, for the information of the Senate.

The LEGISLATIVE CLERK. A resolution (S. Res. 20) authorizing the employment of additional personnel by the Committee on Post Office and Civil Service, and appropriating funds therefor.

Mr. KNOWLAND. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Daniel	Hill
Allott	Dirksen	Holland
Barkley	Douglas	Ives
Barrett	Duff	Jackson
Beall	Dworshak	Jenner
Bennett	Eastland	Johnson, Tex.
Bible	Ellender	Johnston, S. C.
Bricker	Ervin	Kefauver
Bridges	Frear	Kilgore
Bush	Fulbright	Knowland
Butler	George	Kuchel
Byrd	Goldwater	Langer
Case, N. J.	Gore	Lehman
Case, S. Dak.	Green	Magnuson
Chavez	Hayden	Malone
Clements	Hennings	Mansfield
Curtis	Hickenlooper	Martin, Iowa
Martin, Pa.	Neuberger	Scott
McClellan	O'Mahoney	Stennis
McNamara	Pastore	Thurmond
Millikin	Payne	Thye
Monroney	Purtell	Watkins
Morse	Robertson	Williams
Mundt	Russell	Young
Murray	Saltonstall	
Neely	Schoeppel	

Mr. CLEMENTS. I announce that the Senator from Minnesota [Mr. HUMPHREY], the Senator from Oklahoma [Mr. KERR], the Senator from Florida [Mr. SMATHERS], the Senator from Alabama [Mr. SPARKMAN], and the Senator from Missouri [Mr. SYMINGTON] are absent on official business.

The Senator from New Mexico [Mr. ANDERSON] and the Senator from Louisiana [Mr. LONG] are absent by leave of the Senate to attend the atomic energy tests in Nevada.

The Senator from Massachusetts [Mr. KENNEDY] is absent by leave of the Senate because of illness.

Mr. SALTONSTALL. I announce that the Senator from Ohio [Mr. BENDER], the Senator from Indiana [Mr. CAPEHART], the Senator from Kansas [Mr. CARLSON], the Senator from New Hampshire [Mr. COTTON], the Senator from Vermont [Mr. FLANDERS], the Senator from Nebraska [Mr. HRUSKA], the Senator from Michigan [Mr. POTTER], and the Senator from Idaho [Mr. WELKER] are absent on official business.

The Senator from Maine [Mrs. SMITH] is absent by leave of the Senate.

The Senator from New Jersey [Mr. SMITH] and the Senator from Wisconsin [Mr. WILEY] are necessarily absent.

The Senator from Wisconsin [Mr. MCCARTHY] is detained on official business.

The PRESIDENT pro tempore. A quorum is present.

The question is on agreeing to the motion of the Senator from Kentucky [Mr. CLEMENTS].

The motion was agreed to; and the Senate proceeded to consider the resolution (S. Res. 20) authorizing the employment of additional personnel by the Committee on Post Office and Civil Service and appropriating funds therefor, which had been reported from the Committee on Post Office and Civil Service with an amendment, and subsequently reported from the Committee on Rules and Administration with an additional amendment.

The amendment of the Committee on Post Office and Civil Service was to strike out all after the word "Resolved" and insert:

That the Committee on Post Office and Civil Service, or any duly authorized subcommittee thereof, is authorized and directed to make a full and complete study and investigation with respect to the administration of the Government employees security program, and to report to the Senate not later than January 31, 1956, the results of its study and investigation together with such recommendations as it may deem advisable.

SEC. 2. For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized until January 31, 1956, to employ upon a temporary basis such technical, clerical, and other assistants as it deems advisable. The expenses of the committee under this resolution, which shall not exceed $125,000, shall be

paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

The PRESIDENT pro tempore. The Secretary will state the amendment of the Committee on Rules and Administration.

The LEGISLATIVE CLERK. On page 2, line 17, in the proposed amendment of the Committee on Post Office and Civil Service, after the word "authorized", it is proposed to strike out the word "until", so as to make the resolution read:

That the Committee on Post Office and Civil Service, or any duly authorized subcommittee thereof, is authorized and directed to make a full and complete study and investigation with respect to the administration of the Government employees security program, and to report to the Senate not later than January 31, 1956, the results of its study and investigation together with such recommendations as it may deem advisable.

SEC. 2. For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized from February 1, 1955, through January 31, 1956, to employ upon a temporary basis such technical, clerical, and other assistants as it deems advisable. The expenses of the committee under this resolution, which shall not exceed $125,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Committee on Rules and Administration to the amendment of the Committee on Post Office and Civil Service.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Committee on Post Office and Civil Service, as amended.

The amendment, as amended, was agreed to.

Mr. ELLENDER. Mr. President, is the Senate now considering Calendar No. 29, Senate Resolution No. 20?

The PRESIDENT pro tempore. The Senator is correct.

Mr. ELLENDER. Mr. President, I should like to have an explanation of the resolution, and also to be advised whether the Committee on Post Office and Civil Service has jurisdiction of the subject which is intended to be investigated.

Mr. JOHNSTON of South Carolina. Mr. President, I certainly believe the Committee on Post Office and Civil Service has jurisdiction over the subject. It pertains to Civil Service employees.

Mr. ELLENDER. Is the resolution for the purpose of investigating security cases?

Mr. JOHNSTON of South Carolina. It affects civil service employees.

Mr. ELLENDER. What will the committee investigate with respect to civil service employees? Under the reorganization act, as I understand, the Committee on Post Office and Civil Service has jurisdiction over the Federal civil service generally. To me, that indicates jurisdiction over salaries and matters of that kind, including anything relating to the civil service. The investigation, as I understand, will relate to security risks in the State Department and other departments of the Government. Am I correct in that assumption?

Mr. JOHNSTON of South Carolina. The Senator from Louisiana is correct in part. At the same time, it will deal with civil service workers and their rights under the civil service laws of the United States.

Mr. ELLENDER. In what respect?

Mr. JOHNSTON of South Carolina. For instance, when a man is employed he has certain rights under the civil service laws.

Mr. ELLENDER. All the charges which have been made against any Federal employees who have been discharged, as I understand, have been based on matters pertaining to security and whether such employees were qualified from that standpoint.

Mr. JOHNSTON of South Carolina. We think the investigation will bring out the fact that many employees have been discharged because of things which are affected by the civil service laws.

Mr. ELLENDER. To what would the investigation relate, in particular? Can the Senator give us information on that point?

Mr. JOHNSTON of South Carolina. It may relate to whether an employee was discharged because of being late for work. It might also deal with an employee who probably drank too much at home, a fact which did not perhaps affect his work, but was entered on his record.

Mr. ELLENDER. Have any cases involving such questions come to the Senator's attention?

As I understand, what gives rise to this proposed investigation is certain action taken by the executive department in discharging a number of Government employees because of subversive activities. Is that what prompted the Senator to submit this resolution?

Mr. JOHNSTON of South Carolina. I should like the Senator from Louisiana and all other Senators to understand that I and the committee as a whole do not wish the Government to employ anyone who is connected in any way with communism. What the committee does object to, under our civil-service system of employment, is the discharge of employees on unsubstantiated charges, leaving their characters and names besmirched. We do not wish to have their characters besmirched in any way because of unfounded charges. We think that Executive Order 10450, as presently drawn, is so broad that it acts as a dragnet covering all employees. We do not believe that it treats the individual fairly merely to say, without adequate proof, that an employee is a security risk or is a Communist.

Mr. ELLENDER. Is it the committee's view that the executive department went too far in discharging workers for alleged security reasons, when, in fact, they were discharged for reasons other than security reasons?

Mr. JOHNSTON of South Carolina. We think that probably the investigation will bring out the facts.

Mr. ELLENDER. Does the Senator know about that?

Mr. JOHNSTON of South Carolina. Many such cases have been brought to our attention.

Mr. ELLENDER. Is it because of those cases that the committee submitted this resolution to the Senate?

Mr. JOHNSTON of South Carolina. The Senator from Louisiana is correct.

Mr. ELLENDER. So it is not based entirely on a security question?

Mr. JOHNSTON of South Carolina. No. We wish to ascertain what laws should be enacted to remedy the existing situation.

Mr. ELLENDER. As I understand, the committee originally requested a quarter of a million dollars.

Mr. JOHNSTON of South Carolina. That was the overall request. It was suggested by some of the members that the subjects be separated and that $125,000 be requested for this investigation.

Mr. ELLENDER. What does the Senator mean by separating the subjects?

Mr. JOHNSTON of South Carolina. Because the original request included holding hearings and investigating the question of what rate of postage should be charged on letters sent throughout the United States, whether it should be 3 cents or 4 cents and whether the second-class mail rate should be increased. That was all within one resolution.

Mr. ELLENDER. Was any effort made to separate the two investigations?

Mr. JOHNSTON of South Carolina. That has been accomplished by an amendment to the resolution.

Mr. ELLENDER. So that the request, as I understand, has been reduced by half?

Mr. JOHNSTON of South Carolina. Yes.

Mr. ELLENDER. And the Senator is now asking for $125,000 to investigate certain discharges which have been made recently by the executive department under the so-called Government security program; is that correct?

Mr. JOHNSTON of South Carolina. That is correct. We have been asked to investigate such matters.

Mr. LANGER. Mr. President, will the Senator from South Carolina yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. LANGER. Is it not true that this resolution has been submitted by unanimous action of the Committee on Post Office and Civil Service?

Mr. JOHNSTON of South Carolina. The Senator from North Dakota is correct.

Mr. LANGER. Is it not also true that one of the complaints is that an employee may be charged with certain things and be given no opportunity for a hearing?

Mr. JOHNSTON of South Carolina. That is the report which has come to the committee.

Mr. LANGER. Is it not also true that in a great many instances the claim is made that civil-service employees have been discharged without any opportunity to face their accusers, in violation of the Constitution of the United States?

Mr. JOHNSTON of South Carolina. Many such reports have come to the committee.

Mr. LANGER. Is it not the belief of the committee, from a preliminary investigation, that when an employee loses his job he is at least entitled to know what the charges are, and is entitled to face his accusers and listen to the testimony against him?

Mr. JOHNSTON of South Carolina. We think that is entirely correct, and we believe our committee is the one to see that the employee is given that right.

Mr. ELLENDER. Mr. President, will the Senator from South Carolina further yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. ELLENDER. Has the committee any evidence that that has not been done?

Mr. JOHNSTON of South Carolina. Many persons have come before the committee complaining that they have not had a chance to ascertain why they were discharged from the service.

Mr. ELLENDER. The resolution provides for a period of approximately a year within which the committee may make its report.

Mr. JOHNSTON of South Carolina. A little less than a year.

Mr. ELLENDER. Can the Senator assure the Senate that the money now being requested, if granted, will be sufficient to conduct the investigation and enable the committee to report back to the Senate, so that the matter can be closed within a year?

Mr. JOHNSTON of South Carolina. The committee and the staff made a study and came to the unanimous conclusion that it would be necessary to have the amount of money requested, and we think that amount will be sufficient.

Mr. ELLENDER. Can the Senator give us assurance that, with the money requested, the investigation can be made and a report submitted to the Senate?

Mr. JOHNSTON of South Carolina. I can only promise the Senator from Louisiana that I shall do my best, and I am satisfied that the committee will do likewise.

Mr. ELLENDER. The Senator knows that, like the old soldier, an investigating committee never dies.

Mr. JOHNSTON of South Carolina. The committee of which I was chairman for 4 years never requested any extensions.

Mr. ELLENDER. I hope that course will be followed in this instance.

Mr. LANGER. Mr. President, will the Senator from South Carolina yield further?

Mr. JOHNSTON of South Carolina. I yield.

Mr. LANGER. As a matter of fact, the committee returned an unexpended balance to the Treasury. Is that not correct?

Mr. JOHNSTON of South Carolina. That is correct.

The PRESIDENT pro tempore. The question is on agreeing to the resolution, as amended.

The resolution (S. Res. 20) was agreed to.

CONTINUING AUTHORITY OF THE COMMITTEE ON LABOR AND PUBLIC WELFARE TO INVESTIGATE WELFARE AND PENSION PLANS

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the immediate consideration of Calendar No. 30, Senate Resolution 40.

The PRESIDENT pro tempore. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 40) continuing the authority of the Committee on Labor and Public Welfare to investigate employee welfare and pension plans and funds subject to collective bargaining.

The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from Kentucky.

The motion was agreed to; and the Senate proceeded to consider the resolution which had been reported from the Committee on Rules and Administration with an amendment, to strike out all after the word *"Resolved"* and insert:

That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946 and in accordance with its jurisdictions under rule XXV of the Standing Rules of the Senate, the Committee on Labor and Public Welfare, or any subcommittee thereof, is authorized from February 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ upon a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the head of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $190,000 (inclusive of all sums heretofore authorized but unexpended pursuant to Senate Resolution 225, 83d Congress, agreed to April 28, 1954, as amended), shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

Mr. ELLENDER. Mr. President, may we have an explanation of the resolution? I should like to ask a few questions with respect to it.

Mr. CLEMENTS. Mr. President, the Senator from Alabama [Mr. HILL] is out of the Chamber at the present time.

Mr. President, I ask unanimous consent that Calendar No. 30, Senate Resolution 40, be temporarily laid aside, and that the Senate proceed to the consideration of Calendar No. 31, Senate Resolution 41, authorizing additional expenditures and the employment of further temporary assistants by the Committee on Government Operations.

The PRESIDENT pro tempore. The Senator from Kentucky is advised that the Senator from Rhode Island [Mr. GREEN], who reported the amendment in the nature of a substitute to Senate Resolution 40, is present.

Mr. CLEMENTS. Then I withdraw my unanimous-consent request.

The PRESIDENT pro tempore. Will the Senator from Louisiana address his inquiry to the Senator from Rhode Island?

Mr. ELLENDER. What I wish to ascertain is the length of time the subcommittee has been investigating the subject matter.

The PRESIDENT pro tempore. The Chair wishes to observe that the Senator from Alabama is now in the Chamber.

Mr. HILL. Mr. President, the subcommittee was created at the last session of Congress and began to function last June.

Mr. ELLENDER. How much was requested of the Senate?

Mr. HILL. Does the Senator refer to the original request?

Mr. ELLENDER. I refer to the original request.

Mr. HILL. One hundred and twenty-five thousand dollars was requested originally.

Mr. ELLENDER. Are we to understand that the committee has been at work since last June?

Mr. HILL. Yes, since last June. I am now a member of the subcommittee; I was not a member of the subcommittee during the last session. But the subcommittee has been very hard at work. If the Senator could realize the amount of work which has been done, I think he would feel that the investigation by the committee was more than justified.

Mr. ELLENDER. I presume much work has been done, but what I wish to ascertain from the Senator is this: I notice that the amount requested is $150,000 plus a $40,000 carryover from the last session of Congress.

Mr. HILL. That is correct.

Mr. ELLENDER. And also that it is intended to employ five persons as lawyers and investigators at the rate of $11,646 a year. That is correct, is it not?

Mr. HILL. Will the Senator state his question again, please?

Mr. ELLENDER. I notice from the report which was submitted in connection with the resolution that five persons will be employed as lawyers and investigators at the rate of $11,646 apiece. That is correct, is it not?

Mr. HILL. Some of the employees, such as the actuarial and insurance consultants, are not employed on a full-time basis.

Mr. ELLENDER. Why, then, is the full amount carried as gross salaries? It is apparent from the report that it is expected that these employees will be engaged for the whole year.

Mr. HILL. It is necessary to make an allowance in the event they are used for the full period. The committee expects to make a study of union welfare funds, and it is necessary to employ actuarial specialists and insurance consultants, as well as lawyers and investigators. It is necessary to be prepared in order to go forward with the work.

Mr. ELLENDER. I observe from the report that the distinguished Senator from Alabama is asking for $150,000, which is $25,000 more than the committee received last year; and to that amount another $40,000 has been added. How will the additional $40,000 be used?

Mr. HILL. Last year the work of the committee did not begin until June. The amount now sought is intended to carry the committee through the present session of Congress. The likelihood now is that it may take the whole 12-month

period, the whole period of the present session, to complete the work.

Mr. ELLENDER. On page 2 of the report, the committee has indicated how $150,000 of the amount asked for will be spent. As I have just indicated, five persons will be employed. A chief counsel and staff director, an assistant chief counsel, a chief investigator, an actuarial specialist, and an insurance consultant, each at $11,646.

In addition, there will be administrative and clerical help, all of which, if added together, will necessitate an aggregate amount of $150,000.

How will the $40,000, which the Senator from Alabama is asking in addition to the $150,000, be spent?

Mr. HILL. The distinguished senior Senator from Illinois [Mr. DOUGLAS], who is chairman of the subcommittee, is on the floor. I shall ask him if he will answer the Senator's question. The Senator from Illinois, as chairman of the subcommittee, is more intimately associated with the work than is the Senator from Alabama, and has a more detailed knowledge of the activities of the subcommittee.

Mr. DOUGLAS. The committee contemplates expenditures at approximately the same monthly rate as occurred during the start of the committee's work in the 83d Congress. The committee spent $100,000 in 8 months, or at the rate of $12,500 a month.

There was a demand from all quarters, including the present minority, the former majority, that the work of the committee should be continued. So what we are proposing is simply that we be permitted to continue to spend at the same rate for 12 months as was expended during the preceding 8 months; namely, $12,500 a month for 12 months, or a total of $150,000.

The $40,000, to which the Senator from Louisiana has referred, is the unexpended balance appropriated for the committee in the previous Congress, but which was not actually spent.

Mr. ELLENDER. The question I asked was, How will the $40,000 be spent? The Senator from Illinois has indicated that he expects to spend during this year at the same rate as was spent last year. It strikes me that $150,000 should be sufficient with which to do the job; instead, the Senator is asking for $190,000. Will the Senator not agree to $150,000?

Mr. President, if it is in order to do so, I move that on line 17 the amount "$190,000" be reduced to "$150,000."

The PRESIDENT pro tempore. The clerk will state the amendment offered by the Senator from Louisiana.

The LEGISLATIVE CLERK. On page 2, line 17, it is proposed to strike out "$190,000" and insert in lieu thereof "$150,000."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Louisiana to the committee amendment.

Mr. DOUGLAS. First, I may say to my good friend from Louisiana that if he will consult the committee's budget, he will observe that salaries will absorb $130,000, leaving only $20,000 for traveling expenses, hearings, witness fees, and so forth.

Mr. ELLENDER. One hundred and fifty thousand dollars happens to be the amount asked for, and those items are all covered. I wonder if the Senator from Illinois would not be willing to have the amount reduced to $150,000, and let it go at that. The committee would be getting $25,000 more than it received last year.

Mr. DOUGLAS. Yes; but not at a greater monthly rate. I think the committee ought to have some leeway it had last year so as to provide for extraordinary emergencies which may develop.

Mr. ELLENDER. The Senator can make another request of the Senate if he finds that he needs additional funds.

Mr. DOUGLAS. I have a good deal of Scotch blood in my veins. I can assure the Senator that the committee will not expend money unnecessarily. I hope that we may be able to turn back to the Senate a large portion of the total sum requested. It is intended to turn back any unexpended balance, and we hope the unexpended balance will be large.

Mr. ELLENDER. The chairmen of the other subcommittees, in discussing their resolutions, have also expressed the same hope, namely, that they would not spend all their funds, but that they would have a large amount left over. But the point is that the actual breakdown of the committee's own budget shows a need for $150,000. Why not let the amount stand at $150,000? Why add $40,000 to the estimated expenditure needs? Why not save this $40,000? It is a small amount, but it is worth saving.

Mr. LANGER. Mr. President, will the Senator from Illinois yield?

Mr. DOUGLAS. I yield.

Mr. LANGER. It is my understanding that last year the committee was so economical that it saved $40,000. Certainly the Senate knows that there is not a Member who has strived more earnestly for economy than has the distinguished senior Senator from Illinois. He has a record for trying to effect economies on the floor.

Although I speak from the opposite side of the aisle from the Senator from Illinois, I believe we can rely on the Senator from Illinois not to allow his committee to waste any money. The committee returned to the Treasury $40,000 last year. If they do not need the money, they will not spend it. Certainly the committee should not be limited in its attempts to secure adequate personnel. If they can locate a first class person at a little higher rate, they should not have to say, "We can pay only $9,000 or $8,500."

Speaking for myself, I hope the amount will not be reduced, and that the sum of $190,000 will be granted to the subcommittee, which is headed by a very worthy Senator.

Mr. DOUGLAS. I wish to thank the Senator from North Dakota. I shall try to be worthy of his trust in my economical tendencies.

Mr. ELLENDER. Mr. President, I point out to the Senator from North Dakota that the committee's budget of $150,000, originally asked for, provides for the employment of 5 persons at the rate of $11,646. I am not questioning that request. All I am asking is that the amount be reduced to the figure submitted in the committee's budget, namely, $150,000—an appropriation which is $25,000 more than the same committee received last year.

Mr. LANGER. I read the budget very carefully. The Senator from Louisiana also knows, because he has been a member of the Committee on Rules and Administration for a long time, that the budget does not confine the employment of personnel to 5 or 6 persons. He knows that if more persons are needed, it may be necessary to employ 6 or 7, because the work of the committee covers the entire United States of America.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Louisiana to the amendment of the committee.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore.—The question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is on agreeing to the resolution, as amended.

The resolution [S. Res. 40] was agreed to.

AUTHORIZATION FOR ADDITIONAL EXPENDITURES AND EMPLOYMENT OF FURTHER TEMPORARY ASSISTANTS BY THE COMMITTEE ON GOVERNMENT OPERATIONS

Mr. CLEMENTS. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 31, Senate Resolution 41.

The motion was agreed to, and the Senate proceeded to consider the resolution (S. Res. 41) authorizing additional expenditures and the employment of further temporary assistants by the Committee on Government Operations, which had been reported from the Committee on Rules and Administration with an amendment, on page 1, line 1, to strike out all after the word "Resolved", and insert:

That in holding hearings, reporting such hearings, and making investigations as authorized by section 134 of the Legislative Reorganization Act of 1946 and in accordance with its jurisdictions under rule XXV of the Standing Rules of the Senate, the Committee on Government Operations, or any subcommittee thereof, is authorized from February 1, 1955, through January 31, 1956, (1) to make such expenditures as it deems advisable; (2) to employ upon a temporary basis such technical, clerical, and other assistants and consultants as it deems advisable; and (3) with the consent of the head of the department or agency concerned, to utilize the reimbursable services, information, facilities, and personnel of any of the departments or agencies of the Government.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $190,000, shall be paid from the contingent fund of the Senate by vouchers approved by the chairman of the committee.

The amendment was agreed to.

Mr. ELLENDER. Mr. President, I should like to ask a question of the Senator from Arkansas [Mr. McCLELLAN].

During the 83d Congress, when the Senator from Wisconsin [Mr. McCARTHY] was chairman of this same subcommittee, I asked whether or not there was any duplication of the work done by the subcommittee, which is now headed by the distinguished Senator from Arkansas, and the work of the Internal Security Subcommittee, which was then headed by the distinguished Senator from Indiana [Mr. JENNER]. In answer to my question the Senator from Indiana responded as follows, as appears in the CONGRESSIONAL RECORD, volume 99, part 1, page 685:

> As I read the Reorganization Act, I think the Committee on Government Operations, of which the Senator from Wisconsin [Mr. McCARTHY] is chairman, has a proper field of investigation without going into the field of communism or subversive activities in the Government. That is the view which our subcommittee intends to take of the situation.

I should like to ask the Senator if he agrees with that statement.

Mr. McCLELLAN. I agree with it substantially. I might say that if the Committee on Government Operations, in the course of investigating in the field of efficiency and economy in Government, should discover that any department had been infiltrated by Communists, I think it would be its duty to investigate the infiltration and expose it.

Mr. ELLENDER. Is the Senator of the opinion that that subject should be investigated by the Internal Security Subcommittee of the Committee on the Judiciary?
